Notice of an application, Serial No. U-053035, for withdrawal and reservation of lands was published in the FEDERAL REGISTER, Document No. 60-10265, on page 10500 of the issue for November 2, 1960. The Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, U.S. Department of the Interior, has now requested that the proposed withdrawal be extended to include the minerals, title to which remains in the United States, in certain tribal lands and other lands acquired for the establishment of the Ouray National Wildlife Refuge. It is, therefore, proposed that the lands described below be withdrawn from appropriation under the mining laws, but not the mineral leasing laws, subject to existing withdrawals and valid existing rights.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections or comments in writing to the State Director for Utah, Bureau of Land Management, Darling Building, P.O. Box 777, Salt Lake City 10, Utah. If any objections are filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the proposed withdrawal may state their views, and where proponents may explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the amendment on which the proposed withdrawal is extended to include the minerals are:

[Case No. 296]

BOMAG G.m.b.H. et al.

Order Denying Export Privileges

In the matter of BOMAG G.m.b.H., Carola Schueler, Carola Gasch, Rudolph Stumpf, Albert Hugardstrasse 12 Staufen (Breisgau), and Kampstrasse 18, Celle, West Germany, and Veku Import, Dr. Alois Vogt, Vaduz, Liechtenstein, respondents.

BOMAG G.m.b.H. (hereinafter referred to as BOMAG), Carola Schueler, its owner, of Albert Hugardstrasse 12, Staufen (Breisgau) West Germany and Kampstrasse 18, Celle, West Germany, Carola Gasch, BOMAG's commercial clerk, and Rudolph Stumpf, manager of BOMAG at the Celle address, together with Veku Import, and Dr. Alois Vogt, its sole director, of Vaduz, Liechtenstein, were charged by the Director of the Investigation Staff, then in the Bureau of Foreign Commerce, with having violated the Export Control Act of 1949, as amended, and regulations promulgated thereunder.

On August 8, 1961, by Department Order No. 173, of the Department of Commerce, the Office of Export Supply of the Bureau of Foreign Commerce became the Office of Export Control of the Bureau of International Programs, the undersigned Director of which now has and exercises the authority and powers formerly held by the Director of the Office of Export Supply, Bureau of Foreign Commerce.

Allegedly these companies through participation of their named officials and employees, the respondents herein, participated in a transaction whereby a complete Type P-33 seismograph system valued at $41,079.76, was ordered from an American producer for export to BOMAG, Celle, West Germany. In the same transaction it was further alleged the respondents had induced the Bureau of Foreign Commerce (hereinafter referred to as the BFC) to approve an application for a license to export the said seismograph system for use in West Germany by assurances that it would not be sold for use outside West Germany. It was also alleged that the BFC issued an export license in reliance on representations made by BOMAG, in a consignee purchaser statement to that effect, and because of further certification and representations by BOMAG that it knew no additional facts which were inconsistent with these representations, and with respect to any shipment proposed to be disposed of contrary to such representations, or to countries contrary to the list of those approved on the export license or by other shipping documents or other means that BOMAG would notify the U.S. exporter and secure U.S. Government approval through that company prior to such disposition.

It was further alleged that exportation of the seismograph system was made from the United States to Bremen, West Germany, on or about November 9, 1959, in an American flag ship, with bill of lading consigned to BOMAG, as the notify party and bearing on its face the required destination control clause limiting shipment to the assigned destination. It was alleged that despite these representations and restrictions against reexportation, made known by the documents to the ordering parties, and by notice from the American Consul General of Hamburg, Germany, BOMAG in accordance with a prearranged plan, with Veku Imports, reexported, diverted and transshipped the seismograph equipment for the account of Veku Import with Express Internationale Speditions, in Vienna, Austria, a destination not authorized by the BFC.

On the basis of the above allegations it was charged that BOMAG, Carola Schueler, owner, Carola Gasch, and Rudolph Stumpf, employees of BOMAG, Veku Import, and Dr. Alois Vogt, Trustee-Director, for Veku Import, had knowingly conspired and acted in concert to bring about violations of the Export Control Act contrary to § 381.3 of the Export Regulations, in that without authorization from the BFC they knowingly diverted, disposed of, transshipped and reexported commodities, to an unauthorized destination, and contrary to the destination control notice of the shipping documents, in violation of §§ 379.10(d)(2) and 381.5 of the Export Regulations, and bought, sold, received of otherwise serviced an exportation from the United States knowing that a violation of the export regulations with respect thereto was intended to occur contrary to § 381.4 of the Export Regulations.

It was further charged that BOMAG, Carola Schueler, owner, and Carola Gasch and Rudolph Stumpf, knowingly made false statements to and concealed material facts from the BFC concerning the true parties in interest and the ultimate destination of the seismographic system, in connection with which a consignee purchaser statement was submitted to the BFC by BOMAG, through a U.S. exporter in violation of § 381.5 of the Export Regulations, and that they also, without BFC authorization, diverted, disposed of, transshipped and reexported commodities to an unauthorized destination and contrary to the control notices in violation of §§ 379.10(d)(2) and 381.6 of the Export Regulations and further bought, sold, disposed of, and transported an exportation from the United States with knowledge that a violation of the export control law regulations and license had occurred and was intended to occur with respect to said exportation from the United States in violation of § 381.4 of the Export Regulations.

Service of the charging letter herein of October 1960 was effected on BOMAG and its owner at Staufen, West Germany, and on BOMAG and its employees, Gasch and Stumpf, at Celle, West Germany, and on Veku Import and Dr. Alois Vogt at Vaduz, Liechtenstein, in accordance with the procedures authorized by § 382.3(b) of the Export Regulations.

Only BOMAG, its owner and employees responded by asking for a translation of the charging letter into German, to be delivered to it and them, which was later carried out as requested, according to the procedures authorized in § 382.3 of the U.S. Export Regulations. The Compliance Commissioner had treated this request as a preliminary motion only, and since no further reply, answer or request, was received from any of the respondents herein, they were all held to be in default, and the case was assigned to the Compliance Commissioner for hearing and disposition in accordance with § 382.4 of the U.S. Export Regulations.

The Compliance Commissioner who has examined and heard the evidence and arguments in support of the charges set forth in the charging letter herein, has concluded that all of the respondents have committed the violations as charged with the exception of Dr. Alois Vogt, who has committed the violation set forth in charge (d). The Compliance Commissioner has recommended that an order should be issued denying the respondents all privileges of participating in U.S. exports so long as the export controls remain in effect.

The Compliance Commissioner found:

(a) That the application filed by the American supplier for a validated license to export a Type P-33 seismographic system for BOMAG, Celle, West Germany, was supported by a consignee purchaser statement executed by BOMAG in which it was certified to the BFC through the applicant that the equipment was to be used for prospection in West Germany, and further that before any change in intention by BOMAG with respect to a different disposition of the commodities, it would apply for and obtain from the BFC through the exporter prior written approval thereof.

(b) That this shipment was carried out in November 1959, with the proper documents each bearing on the face the destination control clause, restricting ultimate use destination to West Germany with the prohibition on diversion contrary to U.S. law.

(c) That when the shipping and credit documents were received by the BOMAG respondents in West Germany, they refused to accept them as not conforming with the credit conditions established by them, and sought permission from the BFC to delete all clauses indicating destination control restrictions from the documents.

(d) That though refused and warned on this matter, BOMAG, through respondent Gasch, again sought permission from the American Consul General, Hamburg, to reship the seismograph equipment to the account of Veku Import, Vienna, Austria.

(e) That despite these refusals communicated to respondents Gasch and Stumpf, and despite instructions that such applications must be made by the supplier to the BFC, no such applications were ever made, and the said commodities, according to the original plan for the transaction, were thereafter forwarded to the account of Veku Import, in Vienna, Austria with Express Internationale Speditions, a Communist bloc freight forwarder.

Now after considering the entire record, consisting of the charging letter, the transcript of the hearing and the evidence and exhibits submitted in suport thereof and of the service of the charges and the reports and recommendations of the Compliance Commissioner, I hereby accept and adopt the findings of fact made by the Compliance Commissioner. I have concluded therefore, that with the exception of Dr. Alois Vogt, all of the above named respondents have knowingly:

A. Conspired and acted in concert to bring about violations of the Export Control Law referred to in B, C, and D herein contrary to § 381.3 of the Export Regulations.

B. Without authorization of the BFC, diverted, disposed of, transshipped and reexported commodities to a destination not authorized by the U.S. export license and contrary to the destination control notice appearing on the shipping documents in violation of §§ 379.10(d)(2) and 381.6 of the Export Regulations.

C. Made false statements and representations to and concealed material facts from the BFC for the purpose of effecting an exportation from the United States in violation of § 381.5 of the Export Regulations.

D. Bought, sold, received, and otherwise serviced an exportation from the United States, knowing that with respect thereto a violation of the export controls was intended to occur, contrary to § 381.4 of the Export Regulations.

As to Dr. Alois Vogt only, I have concluded that he had reason to know that he had participated in a transaction in which commodities were bought, sold, received and otherwise serviced which were in an exportation from the United States, and that with respect thereto a violation of the U.S. export controls was intended to occur contrary to § 381.4 of the U.S. Export Regulations.

In addition I have concluded that BOMAG, G.m.b.H., Carola Schueler, Carola Gasch, and Rudolph Stumpf have knowingly:

E. Made false statements to and concealed material facts from the BFC concerning the true parties in interest, and the ultimate destination intended of a seismographic system, in connection with which a consignee-purchaser statement was submitted to the BFC by BOMAG, through a U.S. exporter for the purpose of effecting an exportation from the United States in violation of § 381.5 of the Export Regulations.

F. Without authorization of the BFC diverted, disposed of, transshipped, and reexported commodities to destination not authorized by the U.S. export license and contrary to the destination control notice on the shipping documents and notices in violation of §§ 379.10(d)(2) and 381.6 of the Export Regulations.

G. Bought, sold, disposed of, and transported an exportation from the United States with knowledge that a violation of the export control law, regulations and license had occurred, was about to occur, and was intended to occur with respect to said exportation in violation of § 381.4 of the Export Regulations.

Having concluded that the recommended action is fair, just, and necessary to achieve effective enforcement of the law: *It is hereby ordered:*

I. So long as the U.S. export controls shall be in effect, the respondents, BOMAG, G.m.b.H., Carola Schueler, owner, Carola Gasch and Rudolph Stumpf, employees, Veku Import Ges, and Dr. Alois Vogt, its Director, their successors or assigns, and the two firms' officers, directors, administrators, agents and employees, hereby are and shall be denied all privileges of participating directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data in whole or in part exported or to be exported from the United States to any foreign destination including Canada. Without limitation of the generality of the foregoing denial of export privileges, participation in any such transaction is deemed to include and prohibit participation, directly or indirectly, in any manner or capacity, (a) as a party or as representative of a party to any validated export license application, (b) in the preparation or filing of any export license application or document to be submitted therewith, (c) in the obtaining or using of any validated or general export license or other export control documents, (d) in the receiving, ordering, buying, selling, delivering, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (e) in the storing, financing, forwarding, transporting, inspecting, or other services of such exports from the United States.

II. Such denial of export privileges shall apply not only to BOMAG, G.m.b.H., Veku Import, Ges, the respondents Schueler, Gasch, Stumpf, and Dr. Alois Vogt, the firms' affiliates, successors or assigns, and their officers, directors, administrators, agents, and employees, but also to any person, firm, corporation or business organization, which may be related to any of them by ownership, control, position of responsibility, or other connection in the conduct of trade or services connected therewith.

III. Without prior disclosure to, and specific authorization from the Bureau of International Programs, no person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, shall on behalf of or in any association with any of the respondents, directly or indirectly, in any manner or capacity, (a) apply for, obtain, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any such prohibited activity or (b), order, receive, buy, use, sell, dispose of, finance, transport, or forward any commodity heretofore or hereafter exported from the United States. Nor shall any person do any of the foregoing acts with respect to any such commodity or exportation in which the respondent may have any interest of any kind or nature.

IV. A respondent herein, against whom this default order has been issued, may apply upon good cause shown, together with evidentiary data in support thereof, to set aside the default and vacate the order against him, her, it, or them, entered herein. This application shall be submitted to the Director, Office of Export Control, Bureau of International Programs, Washington 25, D.C., in accordance with the requirements of § 382.4(b) of the Export Regulations, and will be disposed of in accordance with the practice set forth therein.

Dated: September 12, 1961.

JOHN C. BORTON,
Director, Office of Export Control.

ATOMIC ENERGY COMMISSION

[Docket No. 27-10]

NUCLEAR ENGINEERING CO., INC.

Notice of Proposed Amendment of Byproduct, Source and Special Nuclear Material License

Please take notice that Nuclear Engineering Company, Inc., 65 Ray Street, Pleasanton, Calif., and 400 Delancy Street, Newark 5, N.J., holder of License No. 4-3766-1 which authorizes the receipt, packaging and disposal of waste byproduct, source and special nuclear material, has applied for a license amendment which would:

1. Authorize the receipt, processing and storage of radioactive waste material at a new site in the Amargosa Desert, approximately 11 miles south of Beatty, Nev.

2. Authorize an increase in the maximum amount of radioactive material which the licensee may possess at any one time to provide for the activities to be conducted at the new site in Nevada. The licensee has requested that the limitations be revised from a total of:

A. 800 curies of byproduct material.

B. 2,500 pounds of source material.

C. 900 grams of special nuclear material, of which not more than 4 grams shall be plutonium or uranium 233.

To:

A. (1) 400 curies of byproduct material at each of the licensee's facilities located at Cowell, Calif., and Kearny, N.J.

(2) 2,000 curies of byproduct material at the proposed facility near Beatty, Nev.

B. 25,000 pounds of source material, total for all three (3) facilities of the licensee.

C. 450 grams of special nuclear material, of which not more than 20 grams shall be plutonium or uranium 233, at each of the licensee's three (3) facilities.

The proposed action would not authorize the packaging of increased amounts of activity per container.

3. Authorize the receipt, storage, packaging and disposal of radioactive waste under the direct supervision of persons designated by the licensee's Radiation Safety Committee in accordance with established criteria of personnel training and experience with radioactive material rather than under the direct supervision of persons individually approved by the Atomic Energy Commission and named in the license.

4. Incorporate the arrangements made between the licensee and the city of Antioch, Calif., regarding the timing of loading of waste aboard ship for disposal at sea at the Fulton Shipyard and the pumping of water from the San Joaquin River, as set forth in the hearing examiner's intermediate decision in the matter dated March 7, 1961.

5. Authorize the conduct of the licensee's activities in accordance with revised radiation safety procedures. These procedures comprise a restatement of many previous statements and representations which were separately submitted in support of applications for the original license and amendments 1 through 12. They cover each phase of the licensee's activities and are not less restrictive than the previous procedures.

6. Authorize the transport of radioactive waste in accordance with a revision of Interstate Commerce Commission Special Permit No. 2301. Previously the permit and Condition 4 of the license authorized the transport, in Nuclear Engineering Co., Inc., owned motor vehicle trailers, of ores, residues and salts of natural uranium thorium packaged in "strong, tight containers." While exception was not granted by the ICC to the radiation levels per package, maximum radiation levels around a truck load of such containers were established to be 10 mr/hr at 12 feet from any surface of the trailer, 10 mr/hr at 5 feet from either end surface of the trailer and 2 mr/hr at the driver's position in the tractor. The proposed amendment would authorize the licensee to transport mixed waste as well as ores, residues and salts of natural uranium and thorium. Further it would specify the types of wastes to be included as low-activity materials, i.e. residues from the processing of natural uranium and thorium; wastes such as building rubble; metal, wood and fabric scrap; glassware; paper and cardboard; reactor and process plant waste in solid form; ashes from incinerators or other solid materials. It would provide that the maximum radioactive content not exceed 0.1 uc/g in the case of radioisotopes listed as Group I, Classification of Radioisotope, page 50, International Atomic Energy Ageny Safety Series No. 6, "Regulations for the Safe Transport of Radioactive Materials." Where these radioisotopes are not present, the limit would be 1.0 uc/g. The total amount of radioactivity per package would be limited to 100 millicuries of Group I isotopes or to 2.7 curies of any other isotopes. Only strong, tight, sealed containers described as (a) ICC-12B-65 fiberboard cartons, (b) 20 gauge steel 30- and 55-gallon open head drums with lids and bolt rings, (c) 20 gauge 1- and 5-gallon open head pails with crimp on lids, (d) strong, sealed plywood boxes, and (e) Bureau of Explosives approved concrete and/or lead transfer casks, may be used.

7. Provide an exception to the requirements of § 20.203(c)(2), Title 10, Part 20, Code of Federal Regulations, "Standards for Protection Against Radiation", regarding control devices in areas in which a radiation exposure in excess of 100 milliroentgens in any one hour. The licensee has described alternative means of preventing exposure of individuals based on the posting and locking of the designated restricted areas, with a system of key control by designated responsible individuals.

8. Renew the license for a period of two (2) years.

The AEC has reviewed the applications for amendment and proposes to grant the amendment subject to appropriate limitations, unless within fifteen (15) days after filing of this notice with the Office of the Federal Register, a petition to intervene and a request for a formal hearing are filed with the Commission in the manner prescribed in Title 10, Code of Federal Regulations, Chapter I, Part 2, "Rules of Practice", or unless the Commission, upon further consideration, directs the holding of such a hearing on its own motion.

The application for license amendment and a Memorandum prepared by the Division of Licensing and Regulation which summarizes the considerations evaluated prior to the issuance of this notice of proposed licensing action are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington 25, D.C. Copies of the memorandum referenced above may also be obtained by request addressed to the Commission's Public Document Room, 1717 H Street NW., Washington 25, D.C., or to the Atomic Energy Commission, Washington 25, D.C., Attention: Director, Division of Licensing and Regulation.

Dated at Germantown, Md., January 25, 1962.

In re applications of Mesa Microwave, Inc., for renewal of the license for station KLH35, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Silverton, Tex., Docket No. 14334, File No. 2843-C1-R-61; for renewal of the license for station KLH36, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Memphis, Tex., Docket No. 14335, File No. 2844-C1-R-61; for construction permits to establish stations in the Point-to-Point Microwave Radio Service at Pledger and Rhodes Ranch, Tex., Docket No. 14347, File Nos. 3664-C1-P-61, 3665-C1-P-61.

The Hearing Examiner having under consideration a petition for continuance, filed on January 23, 1962, by Mesa Microwave, Inc. (Mesa), wherein it is requested that the hearing herein now scheduled to commence on March 1, 1962, be continued without date;

It appearing, that in the order following further prehearing conference, released December 15, 1961, it was provided that should Mesa, no later than January 15, 1962, file appropriate pleadings and applications for modification of its current authorization, the purpose and effect of which might be to obviate the need for formal hearing procedures herein, the Examiner would, unless advised by counsel for the Common Carrier Bureau no later than January 22 that the applications as tendered were not acceptable for filing, entertain an appropriate motion for a continuance of the hearing without date pending action by the Commission on such applications and pleadings;

It further appearing, that on January 15, 1962, Mesa filed applications, the purpose of which would be to amend each of the authorizations now in hearing;

It further appearing, that Mesa alleges in its petition that it is authorized to state that counsel for the Common Carrier Bureau consents to a grant of the instant petition; and

It further appearing, that good cause has been shown for a grant of said petition;

It is ordered, This 26th day of January 1962, that the petition for continuance filed by Mesa Microwave, Inc., is granted and that the hearing now scheduled to commence on March 1, 1962, is postponed without date pending action on the aforementioned applications designed to amend each of the authorizations now in hearing.

Released: January 29, 1962.

FEDERAL MARITIME COMMISSION

[Docket Nos. 967, 970]

ALCOA STEAMSHIP COMPANY, INC. ET AL.

Agreements Pooling in North Atlantic-Venezuela Trade; Notice of Investigation, of Prehearing Conference, and of Hearing

Alcoa Steamship Co., Inc., Docket No. 967 v. Cia. Anonima Venezolana de Navegacion, et al., Docket No. 970.

In the matter of agreements 8640 and 8640-1, between Grace Line, Inc. and Cia. Anonima Venezolana de Navegacion covering pooling in the North Atlantic-Venezuela trade.

On January 15, 1962, the Federal Maritime Commission entered the following order:

Whereas, pursuant to section 15 of the Shipping Act, 1916, as amended, an agreement and amendment thereto, between Grace Line, Inc., and Cia. Anonima Venezolana de Navegacion, covering a pooling arrangement on cargo in the trade from U.S. North Atlantic ports to ports in Venezuela, have been filed for approval under that section, and have been assigned Federal Maritime Commission agreement Nos. 8640 and 8640-1; and

Whereas, pursuant to notice of the filing of agreements 8640 and 8640-1, in the FEDERAL REGISTER of December 6, 1961, Royal Netherlands Steamship Co., A/S Viking Line, Alabama State Docks Department and the Board of Commissioners of the port of New Orleans have filed protests, and requested that agreements 8640 and 8640-1, be disapproved or modified in significant respects and, to the extent appropriate for said purpose, a formal hearing should be instituted; and

Whereas, Alcoa Steamship Co., Inc., has filed a formal complaint in opposition to the approval of said agreements, which is now pending in Docket No. 967; and

Whereas, the Commission having considered the requests of Royal Netherlands Steamship Co., A/S Viking Line, Alabama State Docks Department and the Board of Commissioners of the port of New Orleans, and being of the opinion that sufficient reason has been shown to warrant withholding of the approval of agreements 8640 and 8640-1, pending a hearing for the purpose of receiving evidence in order to determine whether said agreements should be approved, disapproved or modified, pursuant to section 15 of the Shipping Act, 1916, and good cause appearing;

It is ordered, That, pursuant to sections 15 and 22 of the Shipping Act, 1916, as amended, the Commission, upon its own motion, enter upon an investigation and hearing for the taking of evidence to determine whether (1) agreements 8640 and 8640-1, if approved, would be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters of the United States and their foreign competitors, or to operate to the detriment of the commerce of the United States, or to be contrary to the public interest, within the meaning of section 15 of the 1916 act; (2) whether said agreements, if approved, would subject any particular person, locality or description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever; (3) whether said agreements will be in violation of any other provision of said act; and (4) whether said agreements should be approved, disapproved, or modified in any respect, pursuant to said section 15; and

It is further ordered, That Grace Line, Inc., and Cia. Anonima Venezolana de Navegacion be made respondents in this proceeding; and

It is further ordered, That this matter be assigned for hearing before an examiner of the Commission's Office of Hearing Examiners at a date and place to be determined and announced by the Chief Examiner, and be consolidated with Docket No. 967 for hearing and decision; and

It is further ordered, That action with respect to agreements 8640 and 8640-1, be held in abeyance pending the Commission's decision and order in the proceeding herein ordered; and

It is further ordered, That notice of this order and notice of hearing be published in the FEDERAL REGISTER, and a copy of such order and notice of hearing be served upon respondents, Grace Line, Inc., and Cia. Anonima Venezolana de Navegacion, and all protestants and other interested parties.

Pursuant to the above order, notice is hereby given that a prehearing conference herein will be held before Examiner William J. Sweeney on February 5, 1962, at 9 a.m., in Room 4519, New GAO Building, 441 G Street NW., Washington, D.C. The hearing will be held at a date and

place to be hereafter determined and announced, and will be conducted in accordance with the Commission's rules of practice and procedure. An initial decision will be issued by the Examiner.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene therein, should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with rule 5(n) [46 CFR 201.74] of said rules.

Dated: January 29, 1962.

By order of the Federal Maritime Commission.

PACIFIC WESTBOUND CONFERENCE ET AL.

Notice of Agreement Filed for Approval

Notice is hereby given that the following described agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 75 Stat. 763; 46 U.S.C. 814):

Agreement 57-79, between the member lines of the Pacific Westbound Conference and the carriers comprising the P.&O.—Orient Lines joint service (operating under approved agreement 8302, as amended) covers the admission of that joint service to associate membership in said conference. As an associate member P.&O.—Orient Lines will be obligated to observe all the rates, rules and regulations and decisions of the conference, will have no vote in conference affairs except as may be specifically agreed upon, will be permitted to participate in conference contracts with shippers, will not share in the expenses of the conference except as may be specifically agreed upon between the parties, and will be exempt from posting the usual surety bond. Agreement 57-79, upon approval, will supersede and cancel the presently approved associate membership agreements 57-71 (of Peninsular and Oriental Steam Navigation Co.) and 57-72 (of Orient Steam Navigation Co., Ltd.), respectively, with said conference.

Interested parties may inspect this agreement and obtain copies thereof at the Bureau of Foreign Regulation, Federal Maritime Commission, Washington, D.C., and may submit within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to this agreement and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: January 29, 1962.

By order of the Federal Maritime Commission.

FEDERAL POWER COMMISSION

[Docket No. CP62-141]

AMERICAN LOUISIANA PIPE LINE CO.

Notice of Application and Date of Hearing

JANUARY 25, 1962.

Take notice that on December 7, 1961, American Louisiana Pipe Line Co. (Applicant), 3750 Penobscot Building, 645 Griswold Street, Detroit 26, Mich., filed in Docket No. CP62-141 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation during the 12-month period commencing March 1, 1962, of field facilities to enable Applicant to take into its certificated main pipeline system natural gas which may be purchased from producers thereof in the general area of its existing transmission system at a total cost not to exceed $3,000,000, with no single project to exceed a cost of $500,000, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The purpose of this budget-type proposal is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its existing pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on February 27, 1962, at 9:30 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before February 19, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

AIR CRAFT MARINE ENGINEERING CORP.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

JANUARY 26, 1962.

I. Air Craft Marine Engineering Corp. (issuer), 7850 Gloria Street, Van Nuys (Los Angeles), Calif., filed with the Commission on May 28, 1958, a notification and offering circular relating to an offering of 300,000 shares of its $1 par value common stock at $1 per share for an aggregate offering of $300,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reason to believe that the terms and conditions of Regulation A have not been complied with in that:

1. The issuer has solicited the sale of shares by subscription agreement without the use of an offering circular in violation of Rule 256(a);

2. The issuer has failed to file a revised offering circular as required by Rule 256(e); and

3. The issuer has failed to file a report of sales on Form 2-A as required by Rule 260.

III. *It is ordered,* Pursuant to Rule 261 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing within 30 days after the entry of this order; that within 20 days after receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission, for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; that, if no hearing is requested and none is ordered by the Commission, this order shall become permanent on the 30th day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission; and that notice of the time and place for any hearing will promptly be given by the Commission.

BLACK BEAR INDUSTRIES, INC.

Order Summarily Suspending Trading

JANUARY 26, 1962.

The common stock, par value 15 cents a share, of Black Bear Industries, Inc. (formerly Black Bear Consolidated Mining Co.), being listed and registered on the San Francisco Mining Exchange, a national securities exchange; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on such exchange and that such action is necessary and appropriate for the protection of investors; and

The Commission being of the opinion further that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15(c)(2) of the Securities Exchange Act of 1934 and the Commission's Rule 15c2-2 thereunder for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of such security, otherwise than on a national securities exchange;

It is ordered, Pursuant to section 19 (a)(4) of the Securities Exchange Act of 1934 that trading in said security on the San Francisco Mining Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, this order to be effective for a period of ten (10) days, January 29, 1962, to February 7, 1962, both dates inclusive.

ADMINISTRATIVE INSTRUCTIONS PRESCRIBING METHOD OF TREATMENT OF ORANGES, GRAPEFRUIT, AND TANGERINES FOR MEDITERRANEAN FRUIT FLY

Pursuant to the authority conferred by § 319.56-2 of the regulations (7 CFR 319.56-2) supplemental to the Fruit and Vegetable Quarantine (Notice of Quarantine No. 56, 7 CFR 319.56), under sections 5 and 9 of the Plant Quarantine Act of 1912 (7 U.S.C. 159, 162), administrative instructions to be designated as 7 CFR 319.56-2p are hereby issued to read as follows:

§ 319.56-2p Administrative instructions prescribing method of fumigation of oranges, grapefruit, and tangerines for the Mediterranean fruit fly.

Fumigation with ethylene dibromide upon arrival, in accordance with the procedures described in this paragraph, is hereby authorized as an alternate condition-of-entry treatment for oranges, grapefruit, and tangerines offered for entry under permit under § 319.56-2 from countries where the Mediterranean fruit fly is known to occur. This treatment is specific for the Mediterranean fruit fly and will not qualify for entry shipments of fruit from countries where other dangerous citrus pests occur for which the treatment is not effective.

(a) *Ports of entry.* Oranges, grapefruit, and tangerines to be offered for entry must be shipped from the country of origin directly to New York or such other North Atlantic port as may be named in the permit. Furthermore, shipments moving by air must be so routed as to avoid landing at ports south of Baltimore.

(b) *Approved fumigation.* (1) The approved treatment shall consist of fumigation with ethylene dibromide for 2 hours at normal atmospheric pressure, in a fumigation chamber which has been approved for the purpose by the Plant Quarantine Division. The dosage shall be adjusted to the chamber load, which shall not exceed 80 percent of the volume, and temperature as follows:

Load in percent of chamber volume	Dosage in ounces per 1,000 cubic feet	
	50°-70° F.	Above 70° F.
Below 25	9	7
25-49	11	9
50-80	13	11

The temperature shall be that of the fruit. Cubic feet of space shall be that of the unloaded chamber. The ethylene dibromide must be applied as a liquid and volatilized within the sealed fumigation chamber in an electrically heated vaporizing pan. The electrically heated vaporizing pan shall be controlled by a switch outside the chamber and shall be equipped with a signal light to indicate when the current is on or off. Fifteen minutes after all liquid ethylene dibromide has been injected into the vaporizing pan inside the fumigation chamber, the electric current for the vaporizing pan must be turned off, and the 2-hour period of exposure shall begin. The gas shall be circulated within the chamber continuously for the 2-hour period by electric fans or blowers. The fans or blowers must be of a capacity to circulate the entire air mass within the chamber in three minutes.

(2) Oranges, grapefruit, and tangerines to be fumigated may be packed in slatted crates or well perforated unwaxed cardboard cartons with wood excelsior packing material. The fruit may be waxed and individually wrapped with conventional citrus tissue which is gas-permeable. When loaded in the fumigation chamber the crates or containers must be stacked evenly over the floor surface and the crates or containers in a stack shall be separated at least 2 inches on all sides by wooden strips or other means, to insure adequate gas circulation. Fruit in mesh bags or well perforated polyethylene bags (twenty ¼-inch perforations for 5-pound bags, equally spaced on the two sides; proportionately more openings on larger bags) must be placed in crates or similar containers for fumigation.

(c) *Other conditions.* The unloading of oranges, grapefruit, and tangerines from the means of conveyance, their delivery to an approved fumigation plant, and the fumigation procedure will be under the supervision of an inspector of the Plant Quarantine Division. The unloading and delivery and any other handling prior to fumigation shall be

conducted in accordance with such safeguards as the inspector may require to prevent the dissemination of injurious insects. Furthermore, the fruit shall be inspected and the finding of plant pests other than the Mediterranean fruit fly may be cause for additional treatment, or denial of entry if no satisfactory treatment is known. Final release of the fruit for entry into the United States will be conditioned upon compliance with such safeguard requirements and the prescribed regulations. Also, restrictions imposed by special quarantines shall remain in full force and effect.[1]

(d) *Costs.* All costs of treatment and required safeguards and supervision, other than the services of the supervising inspector during regularly assigned hours of duty and at the usual place of duty, shall be borne by the owner of the fruit, or his representative.

(e) *Department not responsible for damage.* The treatment prescribed in paragraph (b) of this section is judged from experimental tests to be safe for use with oranges, grapefruit, and tangerines. However, the Department assumes no responsibility for any damage sustained through or in the course of such treatment, or by compliance with requirements imposed under paragraph (c) of this section.

(Sec. 9, 37 Stat. 318; 7 U.S.C. 162. Interprets or applies sec. 5, 37 Stat. 316; 7 U.S.C. 159)

These administrative instructions shall become effective February 2, 1962.

These instructions provide an alternate method of treatment as a condition for entry under permit of oranges, grapefruit, and tangerines originating in countries where the only dangerous citrus pest known to exist is the Mediterranean fruit fly. The method is specifically limited to such qualifying fruit. Fruits from countries where other dangerous citrus pests occur are not eligible for entry under these instructions.

These instructions relieve restrictions by providing an alternate method of treatment for the qualifying fruits. In order to be of maximum benefit to importers they should be made effective as soon as possible. Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 1003), it is found upon good cause that notice and other public procedure with respect to these instructions are impracticable and they may be made effective less than 30 days after publication in the FEDERAL REGISTER.

[1] Section 319.28 prohibits the entry of oranges, grapefruit, and tangerines from eastern and southeastern Asia, including India, Burma, Ceylon, Siam, Indo-China, and China; the Malayan Archipelago; the Philippines; Oceania, except Australia and Tasmania; Japan, including Formosa and other island adjacent to Japan; Mauritius and Seychelles; Argentina, Brazil, Paraguay, and Uruguay.

Done at Washington, D.C., this 30th day of January 1962.

[SEAL] G. F. CALLAGHAN,
Acting Director, Plant Quarantine Division, Agricultural Research Service.

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Travel Time Allowances

Pursuant to the authority conferred upon the Director of the Plant Quarantine Division by § 354.1 of the regulations concerning overtime services relating to imports and exports, effective July 10, 1960 (7 CFR 354.1), administrative instructions (7 CFR 354.2) effective April 29, 1961, as amended effective August 1, 1961 (26 F.R. 3671, 6833) prescribing the commuted travel time that shall be included in each period of overtime duty are hereby amended by deleting "Marfa Air Force Base (served from Presidio, Tex.)" from the "Three Hour" list therein; by adding "Kelly Air Force Base, Tex. (served from San Antonio, Tex.)" to the "Two Hour" list therein; and by adding "Any undesignated Air Force Base in the State of New Mexico served from El Paso, Tex." to the "Three Hour" list therein.

This commuted travel time period has been established as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which the employee performs such overtime duty when such travel is performed solely on account of such overtime duty. Such establishment depends upon facts within the knowledge of the Plant Quarantine Division. It is to the benefit of the public that these instructions be made effective at the earliest practicable date. Accordingly, pursuant to the provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003), it is found upon good cause that notice and public procedure on these instructions are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making these instructions effective less than thirty days after publication in the FEDERAL REGISTER.

(64 Stat. 561; 5 U.S.C. 576)

This amendment shall become effective February 2, 1962.

Done at Washington, D.C., this 29th day of January 1962.

[SEAL] G. F. CALLAGHAN,
Acting Director, Plant Quarantine Division, Agricultural Research Service.

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

PART 723—CIGAR-FILLER (TYPE 41) TOBACCO, CIGAR-BINDER TOBACCO, AND CIGAR-FILLER AND BINDER TOBACCO

Subpart—Proclamation of a National Marketing Quota for Cigar-Filler (Type 41) Tobacco for Each of the Three Marketing Years Beginning October 1, 1962; and Announcement and Apportionment of the National Marketing Quota for Cigar-Filler (Type 41) Tobacco for the 1962–63 Marketing Year

Sec.
723.905 Basis and purpose.
723.906 Proclamation, findings, and determinations with respect to the amount of the national marketing quota for cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1962.

AUTHORITY: §§ 723.905 and 723.906 issued under sec. 375, 52 Stat. 66, as amended; 7 U.S.C. 1375. Interpret or apply secs. 301, 312, 313, 52 Stat. 38, as amended; 46 as amended; 47 as amended; 7 U.S.C. 1301, 1312, 1313.

§ 723.905 Basis and purpose.

(a) Sections 723.905 and 723.906 are issued (1) to establish the reserve supply level and the total supply of cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1961; (2) to proclaim a national marketing quota for cigar-filler (type 41) tobacco for each of the three marketing years beginning October 1, 1962; (3) to announce the amount of the national marketing quota for cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1962; and (4) to apportion such quota. The findings and determinations by the Secretary contained in § 723.906 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from cigar-filler (type 41) tobacco producers and others as provided in a notice (26 F.R. 9651) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003).

(b) Since the Agricultural Adjustment Act of 1938, as amended, requires the holding of a referendum of cigar-filler (type 41) tobacco producers within 30 days after issuance of the proclamation of the national quota for such kind of tobacco to determine whether such producers favor marketing quotas, and since such producers need to know the 1962 allotments for their farms before they vote in the referendum, it is hereby found that compliance with the 30-day effective date provisions of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the proclamation and the announcement and apportionment of the national marketing quota for cigar-filler (type 41) tobacco for the 1962-63 marketing year contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

§ 723.906 Proclamation, findings, and determinations with respect to the amount of the national marketing quota for cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Proclamation.* Since the 1961–62 marketing year is the last year of a three-year period for which national marketing quotas previously proclaimed were disapproved by producers of cigar-filler (type 41) tobacco in a referendum, and since producers of such kind of tobacco had disapproved national marketing quotas on such kind of tobacco in referenda held in three successive years subsequent to 1952, a national marketing quota for cigar-filler (type 41) tobacco is hereby proclaimed, pursuant to section 312(a)(4) of the Act, for the three successive marketing years beginning with the marketing year beginning October 1, 1962.

(b) *Reserve supply level.* The reserve supply level for cigar-filler (type 41) tobacco is 151.0 million pounds, calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 52.0 million pounds and a normal year's exports of 0.5 million pounds.

(c) *Total supply.* The total supply of cigar-filler (type 41) tobacco for the marketing year beginning October 1, 1961, is 168.3 million pounds, consisting of estimated carry-over of 114.9 million pounds and estimated 1961 production of 53.4 million pounds.

(d) *Carry-over.* The estimated carry-over of cigar-filler (type 41) tobacco on October 1, 1962 is 117.7 million pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961 of 50.6 million pounds from the total supply of such tobacco.

(e) *National marketing quota.* The amount of cigar-filler (type 41) tobacco which will make available during the marketing year beginning October 1, 1962 a supply of cigar-filler (type 41) tobacco equal to the reserve supply level of such tobacco is 33.3 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 33.3 million pounds would cause undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for cigar-filler (type 41) tobacco in terms of the total quantity of tobacco which may be marketed during the marketing year beginning October 1, 1962, is 40.0 million pounds.

[1] Rounded to the nearest tenth of a million pounds.

(f) *Apportionment of the quota.* Since tobacco classified as cigar-filler (type 41) tobacco is grown only in Pennsylvania, the quota is apportioned only to that State under section 313(a) of the Agricultural Adjustment Act of 1938, as amended. The national marketing quota, less 400,000 pounds reserved for establishing allotments for new farms, becomes the State marketing quota for Pennsylvania. The State marketing quota is hereby converted in accordance with section 313(g) of the Act into a State acreage allotment of 23,941.95 acres. Likewise, the reserve of 400,000 pounds for establishing allotments for new farms is hereby converted into 241.84 acres.

Signed at Washington, D.C., this 30th day of January 1962.

ORVILLE L. FREEMAN,
Secretary of Agriculture.

PART 723—CIGAR-FILLER TOBACCO, CIGAR-BINDER TOBACCO, AND CIGAR-FILLER AND BINDER TOBACCO

Subpart—Announcement of the Amounts of and the Apportionments of the National Marketing Quotas for Cigar-Binder (Types 51 and 52) Tobacco and Cigar-Filler and Binder (Types 42, 43, 44, 53, 54 and 55) Tobacco, Respectively, for the 1962–63 Marketing Year Among the Several States

Sec.
723.1301 Basis and purpose.
723.1302 Findings and determinations with respect to the national marketing quota for cigar-binder (types 51 and 52) tobacco for the marketing year beginning October 1, 1962.
723.1303 Findings and determinations with respect to the national marketing quota for cigar-filler and cigar-binder (types 42, 43, 44, 53, 54, and 55) tobacco for the marketing year beginning October 1, 1962.

AUTHORITY: §§ 723.1301 to 723.1303 issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended; 46, as amended; 47, as amended; 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

§ 723.1301 Basis and purpose.

The regulations contained in §§ 723.1301 to 723.1303 are issued (a) to establish the reserve supply level and the total supply of (1) cigar-binder (types 51 and 52) tobacco, and (2) cigar-filler and cigar-binder (types 42, 43, 44, 53, 54, and 55) tobacco, for the marketing year beginning October 1, 1961; (b) to announce the national marketing quotas for (1) cigar-binder (types 51 and 52) tobacco, and (2) cigar-filler and cigar-binder (types 42, 43, 44, 53, 54, and 55) tobacco, for the marketing year beginning October 1, 1962 and (c) to apportion the national marketing quotas for the 1962–63 marketing year among the several States. The findings and determinations by the Secretary contained in §§ 723.1302 and 723.1303 have been made on the basis of the latest available statistics of the Federal Government and after due consideration of data, views, and recommendations received from cigar-binder and cigar-filler and binder tobacco producers and others as provided in a notice (26 F.R. 9651) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003). Since growers of cigar-binder (types 51 and 52) tobacco and of cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco are making their plans for 1962 production of these kinds of tobacco and need to know the 1962 acreage allotments for their farms, it is hereby found that compliance with the 30-day effective date provisions of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the findings and determinations and the announcements and apportionments of the quotas contained herein shall become effective upon the date of their filing with the Director, Office of the Federal Register.

§ 723.1302 Findings and determinations with respect to the national marketing quota for cigar-binder (types 51 and 52) tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for cigar-binder (types 51 and 52) tobacco is 41.3 million pounds, calculated, as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 13.0 million pounds and a normal year's exports of 2.1 million pounds.

(b) *Total supply.* The total supply of cigar-binder (types 51 and 52) tobacco for the marketing year beginning October 1, 1961 is 36.5 million pounds consisting of carry-over of 31.2 million pounds and estimated 1961 production of 5.3 million pounds.

(c) *Carry-over.* The estimated carry-over of cigar-binder (types 51 and 52) tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962, is 27.5 million pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961 of 9.0 million pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of cigar-binder (types 51 and 52) tobacco which will make available during the marketing year beginning October 1, 1962, a supply of cigar-binder (types 51 and 52) tobacco equal to the reserve supply level of such tobacco is 13.8 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 13.8 million pounds would cause undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for cigar-binder (types 51 and 52) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962 is 16.5 million pounds.

(e) *Apportionment of the quota.* The national marketing quota for cigar-binder (types 51 and 52) tobacco is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Connecticut	5,916.83
Massachusetts	2,967.43
New York	0.08
Vermont	4.49
Reserve [1]	89.97

[1] Acreage reserved for establishing allotments for new farms.

§ 723.1303 Findings and determinations with respect to the national marketing quota for cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco is 97.9 million pounds, calculated, as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 33.0 million pounds and a normal year's exports of 1.5 million pounds.

(b) *Total supply.* The total supply of cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco for the marketing year beginning October 1, 1961 is 97.3 million pounds consisting of carry-over of 66.4 million pounds and estimated 1961 production of 30.9 million pounds.

(c) *Carry-over.* The estimated carry-over of cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962 is 70.3 million pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961 of 27.0 million pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco which will make available during the marketing year beginning October 1, 1962, a supply of cigar-filler and binder tobacco equal to the reserve supply level of such tobacco is 27.6 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 27.6 million pounds would cause undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962 is 33.1 million pounds.

(e) *Apportionment of the quota.* The national marketing quota for cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Illinois	5.51
Indiana	1.26
Iowa	7.24
Minnesota	198.23
New York	58.64
Ohio	4,654.17

PART 725—BURLEY, FLUE-CURED, FIRE-CURED, DARK AIR-CURED, AND VIRGINIA SUN-CURED TOBACCO

Subpart—Proclamation of a National Marketing Quota for Burley Tobacco for Each of the Three Marketing Years Beginning October 1, 1962; and Announcement and Apportionment of the National Marketing Quota for Burley Tobacco for the 1962–63 Marketing Year

Sec.
725.1303 Basis and purpose.
725.1304 Proclamation, findings, and determinations with respect to the national marketing quota for burley tobacco for the marketing year beginning October 1, 1962.

AUTHORITY: §§ 725.1303 and 725.1304 issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended; 46, as amended; 47, as amended; 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

§ 725.1303 Basis and purpose.

(a) Sections 725.1303 and 725.1304 are issued (1) to establish the reserve supply level and the total supply of burley tobacco for the marketing year beginning October 1, 1961; (2) to proclaim a national marketing quota for burley tobacco for each of the three marketing years beginning October 1, 1962; (3) to announce the amount of the national marketing quota for burley tobacco for the marketing year beginning October 1, 1962; and (4) to apportion the national marketing quota for burley tobacco for the 1962–63 marketing year among the several States. The findings and determinations contained in § 725.1304 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from burley tobacco producers and others as provided in a notice (26 F.R. 9651) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003).

(b) Since the Agricultural Adjustment Act of 1938, as amended, requires the holding of a referendum of burley tobacco producers within 30 days after issuance of the proclamation of the national quota for such kind of tobacco to determine whether such producers favor quotas, and since burley tobacco producers need to know the 1962 allotments for their farms prior to the referendum, it is hereby found that compliance with the 30-day effective date provision of the Administrative Procedure Act is impractical and contrary to the public interest. Therefore, the proclamation, and the announcement and apportionment of the national marketing quota for burley tobacco for the 1962–63 marketing year contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

§ 725.1304 Proclamation, findings and determinations with respect to the national marketing quota for burley tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Proclamation.* Since the 1961-62 marketing year is the last of three consecutive years for which marketing quotas previously proclaimed will be in effect on burley tobacco, a national marketing quota for burley tobacco for each of the three years beginning October 1, 1962, is hereby proclaimed pursuant to section 312(a)(2) of the Act.

(b) *Reserve supply level.* The reserve supply level for burley tobacco is 1,579.9 million pounds, calculated, as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 525 million pounds and a normal year's exports of 37 million pounds.

(c) *Total supply.* The total supply of burley tobacco for the marketing year beginning October 1, 1961, is 1,675.1 million pounds, consisting of carry-over of 1,127.3 million pounds and estimated 1961 production of 547.8 million pounds.

(d) *Carry-over.* The estimated carry-over of burley tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962 is 1,103.4 million pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961 of 571.7 million pounds from the total supply of such tobacco.

(e) *National marketing quota.* The amount of burley tobacco which will make available during the marketing year beginning October 1, 1962, a supply of burley tobacco equal to the reserve supply level of such tobacco is 476.5 million pounds and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 476.5 million pounds would result in undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for burley tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962, is 571.8 million pounds.

(f) *Apportionment of the quota.* The national marketing quota is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Alabama	33.78
Arkansas	58.94
Georgia	93.09
Illinois	4.59
Indiana	8,684.40
Kansas	101.33

PART 725—BURLEY, FLUE-CURED, FIRE-CURED, DARK AIR-CURED, AND VIRGINIA SUN-CURED TOBACCO

Subpart—Proclamation of National Marketing Quota for Virginia Sun-Cured (Type 37) Tobacco for Each of the Three Marketing Years Beginning October 1, 1962; and Announcement and Apportionment of the National Marketing Quotas for Fire-Cured (Type 21) Tobacco, Fire-Cured (Types 22, 23, and 24) Tobacco, Dark Air-Cured (Types 35 and 36) Tobacco, and Virginia Sun-Cured (Type 37) Tobacco, for the 1962–63 Marketing Year

Sec.
725.1305 Basis and purpose.
725.1306 Findings and determinations with respect to the national marketing quota for fire-cured (type 21) tobacco for the marketing year beginning October 1, 1962.
725.1307 Findings and determinations with respect to the national marketing quota for fire-cured (types 22, 23, and 24) tobacco for the marketing year beginning October 1, 1962.
725.1308 Findings and determinations with respect to the national marketing quota for dark air-cured tobacco for the marketing year beginning October 1, 1962.
725.1309a Findings and determinations with respect to the national marketing quota for Virginia sun-cured tobacco for the marketing year beginning October 1, 1962.

AUTHORITY: §§ 725.1305 to 725.1309a issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended; 46, as amended; 47, as amended; 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

§ 725.1305 Basis and purpose.

(a) Sections 725.1305 to 725.1309a are issued (1) to proclaim a national marketing quota for Virginia sun-cured tobacco, for each of the three marketing years beginning October 1, 1962; (2) to establish the reserve supply level and the total supply of fire-cured (type 21) tobacco, fire-cured (types 22, 23, and 24) tobacco, dark air-cured tobacco, and Virginia sun-cured tobacco, respectively, for the marketing year beginning October 1, 1961; (3) to announce the amounts of the national marketing quotas for fire-cured (type 21) tobacco, fire-cured (types 22, 23, and 24) tobacco, dark air-cured tobacco, and Virginia sun-cured tobacco for the marketing year beginning October 1, 1962; and (4) to apportion such national marketing quotas for the 1962–63 marketing year among the several States. The findings and determinations contained in §§ 725.1306 to 725.1309a have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of the data, views, and recommendations received from fire-cured, dark air-cured, and Virginia sun-cured tobacco producers and others, as provided in a notice (26 F.R. 9651) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003).

(b) Since the Agricultural Adjustment Act of 1938, as amended, requires the holding of a referendum of Virginia sun-cured tobacco producers within 30 days after issuance of the proclamation of a national marketing quota for such kind of tobacco to determine whether such producers favor marketing quotas and such producers need to know the 1962 acreage allotments for their farms prior to the referendum, and since tobacco farmers need to be notified of 1962 crop year allotments as soon as possible in order to make their plans for 1962 tobacco production, it is hereby found that compliance with the 30-day effective date provisions of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the proclamation relating to Virginia sun-cured tobacco, and the announcements and apportionments of the national marketing quotas for fire-cured (type 21) tobacco, fire-cured (types 22, 23, and 24) tobacco, dark air-cured tobacco and Virginia sun-cured tobacco contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

§ 725.1306 Findings and determinations with respect to the amount of the national marketing quota for fire-cured (type 21) tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for fire-cured (type 21) tobacco is 28,471,000 pounds calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 6,200,000 pounds and a normal year's exports of 6,100,000 pounds.

(b) *Total supply.* The total supply of fire-cured (type 21) tobacco for the marketing year beginning October 1, 1961, is 31,063,000 pounds, consisting of carry-over of 20,938,000 pounds and estimated 1961 production of 10,125,000 pounds.

(c) *Carry-over.* The estimated carry-over of fire-cured (type 21) tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962, is 19,060,000 pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961, of 12,003,000 pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of fire-cured (type 21) tobacco which will make available during the marketing year beginning October 1, 1962, a supply of fire-cured (type 21) tobacco equal to the reserve supply level of such tobacco is 9,411,000 pounds and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 9,411,000 pounds would result in undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent to 11,293,000 pounds. Pursuant to Public Law 85–705, this increased quota is further increased to 11,930,000 pounds. Therefore, the amount of the national marketing quota for fire-cured (type 21) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962, is 11,930,000 pounds.

(e) *Apportionment of the quota.* Since fire-cured (type 21) tobacco is grown only in the State of Virginia, the quota is apportioned only to that State under section 313(a) of the Agricultural Adjustment Act of 1938, as amended. The national marketing quota less 29,825 pounds reserved for establishing allotments for new farms, becomes the State marketing quota for Virginia. The State marketing quota is hereby converted in accordance with section 313(g) of the Act into a State acreage allotment of 9,125.90 acres. Likewise, the reserve of 29,825 pounds for establishing allotments for new farms is hereby converted into 22.87 acres.

[1] Rounded to the nearest thousand pounds, except in § 725.1306(e).

[1] Rounded to the nearest tenth of a million pounds.

§ 725.1307 Findings and determinations with respect to the national marketing quota for fire-cured (types 22, 23, and 24) tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for fire-cured (types 22, 23, and 24) tobacco is 130,600,000 pounds calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 29,000,000 pounds and a normal year's exports of 27,000,000 pounds.

(b) *Total supply.* The total supply of fire-cured (types 22, 23, and 24) tobacco for the marketing year beginning October 1, 1961, is 136,500,000 pounds consisting of carry-over of 92,800,000 pounds and estimated 1961 production of 43,700,000 pounds.

(c) *Carry-over.* The estimated carry-over of fire-cured (types 22, 23, and 24) tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962, is 90,400,000 pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961, of 46,100,000 pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of fire-cured (types 22, 23, and 24) tobacco which will make available during the marketing year beginning October 1, 1962, a supply of fire-cured (types 22, 23, and 24) tobacco equal to the reserve supply level of such tobacco is 40,200,000 pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 40,200,000 pounds would result in undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for fire-cured (types 22, 23, and 24) tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962, is 48,240,000 pounds.

(e) *Apportionment of the quota.* The national marketing quota announced in paragraph (d) of this section is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Illinois	0.15
Kentucky	15,505.99
Tennessee	17,423.19
Reserve[1]	82.55

[1] Acreage reserved for establishment allotments for new farms.

[2] Rounded to the nearest tenth of a million pounds except in § 725.1307 (d) and (e).

§ 725.1308 Findings and determinations with respect to the amount of the national marketing quota for dark air-cured tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for dark air-cured tobacco is 72,900,000 pounds calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 21,000,000 pounds and a normal year's exports of 7,000,000 pounds.

(b) *Total supply.* The total supply of dark air-cured tobacco for the marketing year beginning October 1, 1961, is 77,600,000 pounds consisting of carry-over of 57,200,000 pounds and estimated 1961 production of 20,400,000 pounds.

(c) *Carry-over.* The estimated carry-over of dark air-cured tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962, is 54,300,000 pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961, of 23,300,000 pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of dark air-cured tobacco which will make available during the marketing year beginning October 1, 1962, a supply of dark air-cured tobacco equal to the reserve supply level of such tobacco is 18,600,000 pounds and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 18,600,000 pounds would result in undue restriction of marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for dark air-cured tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962 is 22,300,000 pounds.

(e) *Apportionment of the quota.* The national marketing quota is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Kentucky	13,535.42
Tennessee	2,283.46
Indiana	43.92
Reserve[1]	39.76

[1] Acreage reserved for establishing allotments for new farms.

§ 725.1309a Proclamation, findings and determinations with respect to the national marketing quota for Virginia sun-cured tobacco for the marketing year beginning October 1, 1962.[4]

(a) *Proclamation.* Since the 1961–62 marketing year is the last of three consecutive years for which marketing quotas previously proclaimed will be in effect on Virginia sun-cured tobacco, a national marketing quota for such kind of tobacco for each of the three marketing years beginning October 1, 1962, is hereby proclaimed pursuant to section 312(a)(2) of the Act.

(b) *Reserve supply level.* The reserve supply level for Virginia sun-cured tobacco is 8,692,000 pounds calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 2,650,000 pounds and a normal year's exports of 600,000 pounds.

(c) *Total supply.* The total supply of Virginia sun-cured tobacco for the marketing year beginning October 1, 1961, is 7,294,000 pounds consisting of a carry-over of 5,036,000 pounds and estimated 1961 production of 2,258,000 pounds.

(d) *Carry-over.* The estimated carry-over of Virginia sun-cured tobacco at the beginning of the marketing year for such tobacco beginning October 1, 1962, is 4,537,000 pounds calculated by subtracting the estimated disappearance for the marketing year beginning October 1, of 2,757,000 pounds from the total supply of such tobacco.

(e) *National marketing quota.* The amount of Virginia sun-cured tobacco which will make available during the marketing year beginning October 1, 1962, a supply of Virginia sun-cured tobacco equal to the reserve supply level of such tobacco is 4,155,000 pounds and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 4,155,000 pounds would result in undue restriction of marketings for the 1962–63 marketing year and such amount is increased by 20 percent to 4,986,000 pounds. Pursuant to Public Law 85–705, however, such increased quota is decreased to 4,468,000 pounds. Therefore, the amount of the national marketing quota for Virginia sun-cured tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning October 1, 1962, is 4,468,000 pounds.

(f) *Apportionment of the quota.* Since Virginia sun-cured tobacco is grown only in the State of Virginia, the quota is apportioned only to that State under section 313(a) of the Agricultural Adjustment Act of 1938, as amended. The national marketing quota, less 11,170 pounds reserved for establishing allotments for new farms, becomes the State marketing quota for Virginia. The State marketing quota is hereby converted in accordance with section 313(g) of the Act into a State acreage allotment of 4,196.63 acres. Likewise, the reserve of 11,170 pounds for establishing allotments for new farms is hereby converted into 10.53 acres.

PART 727—MARYLAND TOBACCO

Subpart—Announcement and Apportionment of the National Marketing Quota for Maryland Tobacco for the 1962–63 Marketing Year

Sec.
727.1301 Basis and purpose.
727.1302 Findings and determinations with respect to the amount of the national marketing quota for Maryland tobacco for the marketing year beginning October 1, 1962.

AUTHORITY: §§ 727.1301 and 727.1302 issued under secs. 301, 312, 313, 375, 52 Stat. 38, as amended; 46, as amended; 47, as amended; 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375.

§ 727.1301 Basis and purpose.

(a) Sections 727.1301 and 727.1302 are issued (1) to establish the reserve supply level and the total supply of Maryland tobacco for the marketing year beginning October 1, 1961; (2) to announce the amount of the national marketing quota for Maryland tobacco for the marketing year beginning October 1, 1962; and (3) to apportion the quota for the marketing year beginning October 1, 1962, among the several States. The findings and determinations by the Secretary contained in § 727.1302 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from Maryland tobacco producers and others as provided in a notice (26 F.R. 9651) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003).

(b) Since Maryland tobacco growers are making their plans for producing Maryland tobacco in 1962 and need to know the Maryland tobacco acreage allotments for their farms, it is hereby found that compliance with the 30-day effective date provision of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the announcement and apportionment of the national marketing quota for Maryland tobacco for the 1962–63 marketing year, contained herein, shall become effective upon the date of filing with the Director, Office of the Federal Register.

§ 727.1302 Findings and determinations with respect to the amount of the national marketing quota for Maryland tobacco for the marketing year beginning October 1, 1962.[1]

(a) *Reserve supply level.* The reserve supply level for Maryland tobacco is 98.3 million pounds, calculated as provided in the Agricultural Adjustment Act of 1938, as amended, from a normal year's domestic consumption of 26.3 million pounds and a normal year's exports of 12.9 million pounds.

(b) *Total supply.* The total supply of Maryland tobacco for the marketing year beginning October 1, 1961, is 97.0 million pounds, consisting of estimated carryover of 61.0 million pounds and estimated 1961 production of 36.0 million pounds.

(c) *Carryover.* The estimated carryover of Maryland tobacco on January 1, 1963, is 60.3 million pounds, calculated by subtracting the estimated disappearance for the marketing year beginning October 1, 1961, of 36.7 million pounds from the total supply of such tobacco.

(d) *National marketing quota.* The amount of Maryland tobacco which will make available during the marketing year beginning October 1, 1962, a supply of Maryland tobacco equal to the reserve supply level of such tobacco is 38.0 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 38.0 million pounds would unduly restrict marketings during the 1962–63 marketing year and such amount is hereby increased by 20 percent. Therefore, the amount of the national marketing quota for Maryland tobacco in terms of the total quantity of tobacco which may be marketed during the marketing year beginning October 1, 1962, is 45.6 million pounds.

(e) *Apportionment of the quota.* The national marketing quota is hereby apportioned among the several States pursuant to section 313(a) of the Agricultural Adjustment Act of 1938, as amended, and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

State:	*Acreage allotment*
Maryland	49,905.79
Virginia	31.58
Delaware	0.13
Reserve[1]	62.50

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 990[1]—CENTRAL CALIFORNIA GRAPES FOR CRUSHING

Establishment of New Free and Surplus Percentages for 1961–62 Crop Year

The Grape Crush Administrative Committee has recommended that new free and surplus percentages of 75 percent and 25 percent, respectively, be established for the period beginning August 26, 1961, and ending June 30, 1962, to replace the initial free and surplus percentages of 66 percent and 34 percent, respectively, established (§ 990.203, 26 F.R. 9068) last September for such period. The committee is established under, and its actions are pursuant to, Marketing Agreement No. 133 and Order No. 990 (26 F.R. 7797), regulating the handling of Central California grapes for crushing. The said marketing agreement and order (hereinafter referred to collectively as the "order") are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "act."

There follows, in terms of sugar tons,[2] a comparison between the estimates providing the bases for the initial percentages with the determinations providing the bases for the new percentages recommended by the committee:

[Sugar tons]

Item[1]	September 1961 estimates	January 1962 determinations
(1) Total 1961–62 crush of grapes for crushing including the quantity of raisin material permitted by § 990.50	311,430	280,960
(2) Total 1961–62 crush before effective date of order (Aug. 26, 1961)	9,030	8,230
(3) Total crush of exempted varieties after Aug. 25, 1961[2]	34,860	35,297
(4) Crush subject to volume regulation (item (1) less items (2) and (3))	267,540	237,442
(5) Desirable free tonnage[3]	220,500	220,500
(6) Free tonnage needed from item (4) to provide the desirable free tonnage (item (5) less items (2) and (3))	476,610	176,973
(7) Surplus tonnage (item (4) less item (6))	90,930	60,469

FREE AND SURPLUS PERCENTAGES

Percentage	September 1961	January 1962
(8) Free percentage (item (6) divided by item (4))	66	75
(9) Surplus percentage (item (7) divided by item (4))	34	25

[1] All data are for the nine-county area covered by the order.

[2] Varieties exempted from volume regulation are set forth in § 990.202 (26 F.R. 9067).

[3] The desirable free tonnage was established (§ 990.201, 26 F.R. 9067) as 1,050,000 tons of grapes for crushing at 21 percent sugar (or 21 degrees Balling). This volume is equivalent to 220,500 sugar tons. In January 1962, the committee determined that the average sugar content of the total 1961–62 crush approximated 21.8 percent.

The committee has determined that the actual volume of grapes for crushing crushed during the 1961–62 season is materially lower, and that the average sugar content is higher, than the earlier determinations made in connection with the initial percentages. The net effect is that the actual volume crushed, adjusted for its sugar content to sugar tons, is materially lower (Item (1)) than the September estimate. Hence, in accordance with § 990.53 and to supply enough free tonnage to provide the desirable free tonnage, the equivalent of 220,500 sugar tons (Item (5)), established in September 1961, the committee recommended that the initial volume percentages be replaced with the larger free percentage of 75 percent and the correspondingly smaller surplus percentage of 25 percent.

[2] Sugar tons are obtained by multiplying tons of grapes for crushing by the degrees of Balling as a percentage, or by percent sugar, as applicable.

[1] Formerly Part 1026.

On the basis of the recommendation and determinations of the Grape Crush Administrative Committee and other available information, the need for changing the percentages is hereby concurred in and it is hereby found that to establish appropriate new free and surplus percentages, as set forth hereinafter, in order to provide sufficient free tonnage to fulfill the desirable free tonnage, will tend to effectuate the declared policy of the act.

Therefore, appropriate new free and surplus percentages are hereby established, and § 990.203 is hereby revised to read, as follows:

§ 990.203 Free and surplus percentages for the initial crop year ending June 30, 1962.

(a) The free and surplus percentages for the period beginning on August 26, 1961, and ending on June 30, 1962, of the initial crop year that are applicable in accordance with § 990.53 to grapes for crushing are established as follows:

(1) Free percentage: 75 percent; and

(2) Surplus percentage: 25 percent.

(b) The free and surplus percentages set forth in paragraph (a) of this section are not applicable to any varieties of grapes for crushing exempted pursuant to § 990.58(b) and contained in § 990.202.

It is hereby further found that it is impracticable, unnecessary, or contrary to the public interest to give preliminary notice and engage in public rule making procedure, and that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1003(a)), in that: (1) This action reduces volume restrictions; (2) handlers and producers have been aware for several months that the actual 1961–62 crush adjusted for its sugar content would be materially lower than estimated last September, and that, in accordance with § 990.53 and as the result of simple computation using actual crush data tabulated by the committee, the surplus percentage would have to be decreased and the free percentage correspondingly increased to assure sufficient free tonnage to meet the desirable free tonnage objective set last September; (3) under this regulatory program the percentages, or any revision thereof, established for a particular crop year apply to all grapes for crushing (except those specifically exempted) from the beginning of such crop year; and (4) this regulatory program became effective on August 26, 1961, of the current crop year and the new, revised percentages herein established will automatically apply from such date to all grapes for crushing other than those exempted.

Title 18—CONSERVATION OF POWER

Chapter I—Federal Power Commission

SUBCHAPTER D—APPROVED FORMS, FEDERAL POWER ACT

[Docket No. R–198; Order 238–A]

PART 141—STATEMENTS AND REPORTS (SCHEDULES)

Revising Schedule Pages of Annual Report Form for Electric Utilities, Licensees and Others

JANUARY 26, 1962.

Revision of annual report form prescribed for Class A and Class B electric utilities, licensees and others subject to the Federal Power Act, F.P.C. Form No. 1; Docket No. R–198.

On December 7, 1961, the Commission issued its Order No. 238 (26 F.R. 11897, December 13, 1961) in this proceeding amending § 141.1 of the regulations under the Federal Power Act (18 CFR 141.1). Subsequent to the issuance of Order 238 examination of the Schedule Pages of the Report Form promulgated therein revealed the need for certain minor corrections of an editorial nature. These corrections are as set forth hereinafter. They have been incorporated in the printed blank report forms to be used in reporting for the year 1961 but they did not appear in the Schedule Pages annexed to Order 238 which was mailed to interested parties.

The Commission finds:

(1) It is necessary and appropriate for the purposes of the Federal Power Act that the Schedule Pages of F.P.C. Form No. 1 as set forth in Appendix A to Order No. 238 be corrected to read as set forth hereinafter.

(2) In view of the facts set out above, good cause exists for this order to be effective as of the date of its issuance.

(3) The corrections herein adopted and approved are editorial in nature and so it is unnecessary to provide notice and opportunity for comment thereon pursuant to section 4(a) of the Administrative Procedure Act.

The Commission acting pursuant to the Federal Power Act, as amended, particularly sections 3(13), 4 (a), (b), (c), 301(a), 302, 304, 309, and 311 thereof (16 U.S.C. 796 (13), 797, (a), (b), (c), 825(a), 825a, 825c, 825h, and 825j) orders:

(A) The following editorial corrections to the Schedule Pages of F.P.C. Form No. 1 prescribed for electric utilities, licensees and others subject to the provisions of the Federal Power Act as set forth in Appendix A to Order No. 238 are hereby adopted and approved:

General Instructions—last line of instruction 4, change "I, II, III" to "iii, iv, and v."

List of Schedules—page II, change "Common Plant and Expenses and Other Common Expense and Statistical Data" to "Common Section"; page iii, change page number for Construction Overheads-Electric from "428" to "427"; change page number for General Description of Construction Overhead Procedure from "427" to "428".

SUBCHAPTER G—APPROVED FORMS, NATURAL GAS ACT

[Docket No. R–201; Order 239–A]

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

Revising Schedule Pages of Annual Report Form for Natural Gas Companies

JANUARY 26, 1962.

Revision of annual report form prescribed for Class A and Class B natural gas companies subject to the Natural Gas Act, F.P.C. Form No. 2; Docket No. R–201.

On December 7, 1961, the Commission issued its Order No. 239 (26 F.R. 11900, December 13, 1961) in this proceeding amending § 260.1 of the regulations under the Natural Gas Act (18 CFR 260.1). Subsequent to the issuance of Order No. 239, examination of the Schedule Pages of the Report Form promulgated therein revealed the need for certain minor corrections of an editorial nature. These corrections are set forth hereinafter. They have been incorporated in the printed blank report forms to be used in reporting for the year 1961 but they did not appear in the Schedule Pages annexed to Order No. 239 which was mailed to interested parties.

The Commission finds:

(1) It is necessary and appropriate for the purposes of the Federal Power Act that the Schedule Pages of F.P.C. Form No. 2 as set forth in Appendix A to Order No. 239 be corrected to read as set forth hereinafter.

(2) In view of the facts set out above, good cause exists for this order to be effective as of the date of its issuance.

(3) The corrections herein adopted and approved are editorial in nature and so it is unnecessary to provide notice and opportunity for comment thereon pursuant to section 4(a) of the Administrative Procedure Act.

The Commission acting pursuant to the Natural Gas Act, as amended, particularly Sections 8, 9, 10, and 16 (15 U.S.C. 717g, 717h, 717i, and 717o) orders:

(A) The following editorial corrections to the Schedule Pages of F.P.C. Form No. 2 prescribed for natural gas companies subject to the provisions of the Natural Gas Act as set forth in Appendix A to Order No. 239 are hereby adopted and approved:

Cover—add bracket after "(Address of Principal Business Office at end of year)".

General Instructions—last line of instruction 4, change "I, II, III" to "i, ii, and iii."

Excerpts from the law—third line change "prescirbe" to "prescribe."

List of Schedules—page II change "Common Plant and Expenses and Other Common Expense and Statistical Date to "Common Section"; Page III change page number for Construction Overheads-Gas from "544" to "543"; change page number for General Description of Construction Overhead Procedure from "543" to "544."

Page 104—item 2, add ")" after "1954."

Page 106—item 11, change "8" to "106."

Page 113—eliminate column (b) "Page No."

Page 204—account 144, item 1, change "reserve" to "accumulated provision"; item 2, delete "reserve."

Page 207—line 3 after "Residuals" add "and Extracted Products."

Page 214—heading for column (a) change "Description of other deferred debit" to "Description of miscellaneous deferred debit."

Page 219—add "(omit cents)" after schedule heading.

Page 227—add "$" in columns (b), (c), (d), (e).

Page 510—item 4, change page references "552 and 553" to "560 and 561."

Page 512—heading of schedule change "Abandoned" to "Abandonment of."

Page 513—heading for column (d) change to read "Accumulated Provision for Amortization (Account 115)".

Page 514—change last line to read "Total as above—line 12, columns (d) and (f)."

Page 534—item, top of page, change "page 90" to "page 212"; heading for column (c) change "797" to "795."

Page 539—line 2, delete "process."

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 55557]

PART 16—LIQUIDATION OF DUTIES

Countervailing Duties; Sugar From Australia

The following information is published pursuant to T.D. 54582 dated April 29, 1958 (23 F.R. 3034).

The Treasury Department is in receipt of official information that the rates of bounties or grants paid or bestowed by the Australian Government within the meaning of section 303, Tariff Act of 1930 (19 U.S.C. 1303), on the exportation during the last 6 months of 1961 of approved fruit products and other approved products containing sugar are the amounts set forth in the following table:

MERCHANDISE—APPROVED FRUIT PRODUCTS AND OTHER APPROVED PRODUCTS

1961:	*Net amount of bounty per 2,240 lbs. of sugar content*
July	A£40. 18. 0
August	40. 14. 0
September	42. 13. 0
October	42. 13. 0
November	42. 7. 0
December	43. 18. 0

The net amount of bounties or grants on the above-described commodities which are manufactured or produced in Australia are hereby ascertained, determined, and declared to be the amounts set forth in the above table. Collectors of customs shall assess and collect additional duties on the above-described commodities, whether imported directly or indirectly from that country, equal to the appropriate net amount of the bounty shown in the above table.

The table in § 16.24(f) of the Customs Regulations is amended by inserting after the last line under "Australia—Sugar content of certain articles" the number of this Treasury decision in the column headed "Treasury Decision" and the words "New rates" in the column headed "Action".

PART 31—CUSTOMHOUSE BROKERS

Sharing of Fees

There was published in the FEDERAL REGISTER of June 4, 1959 (24 F.R. 4563), a notice which read in part as follows: "Notice is hereby given pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 1003) that under the authority of section 641 of the Tariff Act of 1930, as amended (19 U.S.C. 1641), it is proposed to amend § 31.10 of the Customs Regulations to make such changes as may be deemed appropriate after giving full consideration to the views of parties interested in the subject of division of fees and remuneration between attorneys and customhouse brokers."

In particular the notice specified the concern of the Association of the Customs Bar with § 31.10(n) which provides that no customhouse broker who has recommended to his client an attorney shall demand of, or accept from, such attorney any fee or remuneration by reason of such recommendation without the knowledge and consent of the client.

In response to the notice, numerous views were received which have been carefully studied and considered. In the light of these views and the consideration which has been given to this matter it has been decided to amend § 31.10(n).

The purpose of § 31.10(n) has been to require the knowledge and consent of the client if the customhouse broker proposed to engage in the practice of sharing attorney's fees which arise out of litigation involving the client's importation. This provision is in line with other provisions of the regulations which govern customhouse brokers and are intended to insure full disclosures to clients of matters affecting their financial interests.

It has now been concluded that regardless of the historical reasons associated with the development and recognition of fee-sharing arrangements between customhouse brokers and customs attorneys, it is undesirable for the Customs Regulations to support a practice which is inconsistent with the ethical standards which are now imposed upon customs attorneys. It is clear, however, that any action taken to amend the Customs Regulations should not affect retroactively any contractual arrangements which may be valid under existing law, but no inference regarding the validity or invalidity of any such contract should be drawn from the amendment set forth herein which is intended to have only prospective effect.

Section 31.10(n) is hereby amended to read as follows:

(n) With respect to merchandise imported after March 15, 1962, no customhouse broker shall demand or accept from any attorney (whether directly or indirectly, including, for example, from a client as a part of any arrangement with an attorney) on account of any case litigated in any court of law or an account of any other legal service rendered by an attorney any fee or remuneration in excess of an amount measured by or commensurate with the time, effort

and skill expended by the broker in performing services in that case.

(R.S. 161, 251, secs. 624, 641, 46 Stat. 759, as amended; 5 U.S.C. 22, 19 U.S.C. 66, 1624, 1641)

[Anchorage 050744]

ALASKA

Partly Revoking the Executive Order of May 24, 1905

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. The executive order of May 24, 1905, so far as it withdrew for a right-of-way, a strip of land 100 feet wide (50 feet on either side of the center of a telegraph line), along the U.S. military telegraph lines from Valdez to Fort Egbert; from Fort Egbert to boundary; from Northfork to Fort Gibbon; from Baker to Rampart; from Fort Gibbon to St. Michael, and from Safety Harbor to Fort Davis, is hereby revoked.

2. The lands have been placed under control of the Secretary of the Interior for disposition, by Executive Order No. 702 of October 23, 1907; Executive Order No. 769 of March 13, 1907; Executive Order No. 1438 of November 23, 1911; Executive Order No. 4131 of January 22, 1925, and Executive Order No. 7127 of August 6, 1935. The areas included in the withdrawals have not been surveyed or staked, and cannot be positively identified on the ground at this time. This is primarily a record clearing action.

3. Until 10:00 a.m., on July 30, 1962, the State of Alaska shall have a preferred right to select the public lands released from withdrawal by this order in accordance with the Act of July 28, 1956 (70 Stat. 709; 48 U.S.C. 46-3b), section 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339), and the regulations in 43 CFR Part 76.

Beginning at 10:00 a.m., on July 30, 1962, the lands shall be subject to operation of the public land laws generally, including the mining laws, subject to existing valid rights and equitable claims and the requirements of applicable law, rules and regulations.

Inquiries concerning the lands may be addressed to the Manager of the Land Office, Bureau of Land Management, Anchorage or Fairbanks, Alaska.

Title 14—AERONAUTICS AND SPACE

Chapter II—Civil Aeronautics Board

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-349]

PART 288—EXEMPTION OF AIR CARRIERS FOR SHORT NOTICE MILITARY CONTRACTS

Reasonable Level of Compensation; Postponement of Effective Date of Certain Provisions

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 31st day of January 1962.

On January 19, 1962, the Board adopted Amendment No. 2 to Part 288 of the Economic Regulations, Docket 13039, 27 F.R. 689, by which it amended § 288.7 to provide, among other things, for a revised schedule of minimum charges for charter service for MATS. Revised § 288.7(a)(4) reduces the minimum charge for one-way cargo charters from 22.5 cents to 21.5 cents per ton-mile.

The Board has receiver petitions from Slick Airways, Inc., and Flying Tiger Line, Inc., for reconsideration of this new minimum charge, and for postponement of the effective date of Amendment 2, insofar as it establishes said minimum charge, until Board action on said petitions.

It appears to the Board that the petitions for reconsideration raise substantial issues for the Board's decision insofar as the application of the amended minimum charge to transpacific services between the 48 contiguous States and points beyond Alaska or Hawaii is concerned, and that good cause has been shown for the postponement of the effectiveness of said amended minimum charge in respect of these services pending further consideration by the Board.

Accordingly, the Board hereby postpones the effective date of § 288.7(a)(4) as set forth in Amendment 2 to Part 288, 14 CFR Part 288, insofar and only insofar as this provision relates to transpacific services between the 48 contiguous States and points beyond Alaska or Hawaii, until the further action of the Board. Thus the minimum of 22.5 cents per ton-mile remains in effect for those one-way cargo charter services for MATS as to which the effective date of amended § 288.7(a)(4) is being postponed herein.

In the absence of this action of the Board the aforesaid minimum charge prescribed by Amendment 2 would take effect on February 1, 1962. The Board therefore finds that notice and public procedure on this action are impracticable and contrary to the public interest, and that good cause exists for making this amendment effective on February 1, 1962.

Secretary.

SUBCHAPTER B—PROCEDURAL REGULATIONS

[Reg. No. PR-302]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Prohibition of Unauthorized and Informal Documents

JANUARY 30, 1962.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 30th day of January 1962.

On August 23, 1961, the Board issued a notice of proposed rule making, PDR-6, Docket 12955, 26 F.R. 8074, proposing various amendments to the Board's Rules of Practice in Economic Proceedings which provided that unauthorized or informal documents submitted to the Board would not be accepted for filing; expressly prohibited post-answer responsive documents and established procedures whereby requests for leave to file documents subject to such rejection might be granted upon a showing of good cause.

In response to various comments received concerning various aspects of the proposed rule, certain changes have been made in the final rule. Thus, while the notice contemplated that only the person submitting an unacceptable document would be notified informally of its rejection by the Board, the final rule expressly provides for such notification of all persons upon whom the document has been served.

The final rule has also been amended to expressly provide that any protest or memorandum in opposition or support, filed pursuant to the Act, shall either be filed in lieu of an answer, under § 302.6, or shall be combined therewith and filed as a single pleading. Furthermore, the presently effective provisions of § 302.6 concerning such protests or memoranda have been amended to afford the party to a proceeding whose application has been the subject of such a document the option of responding thereto orally, in writing, or by introducing evidence when the Examiner deems the latter course of action to be appropriate. Sections 302.4(f)(2) and 302.18, which respectively deal with motions for leave to file unauthorized pleadings and motions for relief not otherwise provided for under Part 302, have been identically revised to provide that the Examiner's jurisdiction shall terminate upon the issuance of his Initial Decision rather than upon the expiration of the period within which exceptions thereto may be filed. Finally, certain editorial changes in the text of the proposed rule have been made.

Interested persons have been afforded opportunity to participate in the formulation of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Subpart A—Rules of General Applicability of Part 302 of the Procedural Regulations (14 CFR Part 302) effective March 5, 1962, as follows:

1. By amending § 302.4 to read:

§ 302.4 General requirements as to documents.

(a) *Contents.* In case there is no rule, regulation, or order of the Board which prescribes the contents of a formal application, petition, complaint, motion or other authorized or required document, such document shall contain a proper identification of the parties concerned, and a concise but complete statement of the facts relied upon and the relief sought.

(b) *Subscription.* Every application, petition, complaint, motion or other authorized or required document shall be signed by the party filing the same, or by a duly authorized officer or the attorney-at-law of record of such party, or by any other person: *Provided*, That, if signed by such other person, the reason therefor must be stated and the power of attorney or other authority authorizing such other person to subscribe the document must be filed with the document. The signature of the person signing the document constitutes a certification that he has read the document; that to the best of his knowledge, information and belief every statement contained in the instrument is true and no such statements are misleading; and that it is not interposed for delay.

(c) *Designation of person to receive service.* The initial document filed by any person shall state on the first page thereof the name and post office address of the person or persons who may be served with any documents filed in the proceeding.

(d) *Prohibition of certain documents.* No document which is subject to the general requirements of this subpart concerning form, filing, subscription, service or similar matters shall be filed with the Board or an Examiner unless:

(1) Such document and its filing by the person submitting it has been expressly authorized or required in the Federal Aviation Act of 1958, any other law, this part, other Board regulations, or any order or other document issued by the Board, the Chief Examiner or an Examiner assigned to the proceeding, and

(2) Such document complies with each of the requirements of §§ 302.3 and 302.8, and is submitted as a formal application, complaint, petition, motion, answer, pleading or similar paper rather than as a letter, telegram or other informal written communication: *Provided, however*, That for good cause shown, pleadings of any public body or civic organization may be submitted in the form of a letter: *Provided further*, That comments concerning section 412 agreements, which have not been docketed, may be submitted in the form of a letter.

(e) *Documents improperly filed.* A document which is filed in violation of the prohibition imposed by paragraph (d) of this section, or in violation of a requirement imposed by any other provision of this part, will not be accepted for filing by the Board and will not be physically incorporated in the docket of the proceeding. The sender of such document and all persons who have been served therewith will be notified informally of the Board's action thereon.

(f) *Motions for leave to file otherwise unauthorized documents.* (1) The Board will accept otherwise unauthorized documents for filing only if leave has previously been obtained, from the Examiner or the Board, on written motion and for good cause shown.

(2) After the assignment of an Examiner to a proceeding, and before the issuance of a recommended or initial decision, or the certification of the record to the Board, these motions shall be addressed to him. At all other times, such motions shall be addressed to the Board. The Examiner or the Board will promptly pass upon such motions.

(3) Such motions shall be filed within seven days after service of any document

or order or ruling to which the proposed filing is responsive, and shall be served on all parties to the proceeding. Answers thereto may not be filed.

(4) Such motions shall contain a concise statement of the matters relied upon as good cause and there shall be attached thereto the pleading or other document for which leave to file is sought.

2. By amending § 302.5 to read:

§ 302.5 Amendment of documents and dismissal.

If any document initiating, or filed in, a proceeding is not in substantial conformity with the applicable rules or regulations of the Board as to the contents thereof, or is otherwise insufficient but not subject to rejection under § 302.4(e), the Board, on its own initiative, or on motion of any party, may strike or dismiss such document, or require its amendment. An application may be amended prior to the filing of answers thereto, or, if no answer is filed, prior to its designation for hearing. Thereafter, applications may be amended only if leave is granted by the Board or an Examiner pursuant to the procedures set forth in § 302.18. If properly amended, a document shall be made effective as of the date of original filing but the time prescribed for the filing of an answer or any further responsive document directed towards the amended document shall be computed from the date of the filing of the amendment.

3. By amending § 302.6 to read:

§ 302.6 Responsive documents.

(a) Answers to applications, complaints, petitions, motions or other documents or orders instituting proceedings may be filed by any party to such proceedings or any person who has a petition for intervention pending. Except as otherwise provided, answers are not required. Protests or memoranda of opposition or support, permitted by statute, shall be filed in lieu of answers or shall be combined with answers.

(b) *Further responsive documents.* Except as otherwise provided, no reply to an answer, reply to a reply, or any further responsive document shall be filed. Where a reply to an answer or any further responsive document is not fileable, all new matter contained in such answer shall be deemed controverted. A party to a proceeding whose application has been the subject of a protest or memorandum of opposition or support, permitted by statute, may respond thereto before the close of the hearing in the case to which such documents relate, orally, in writing, or by introducing evidence, subject to appropriate rulings by the Examiner. Once such response has been made, such party may also discuss the protest or memorandum in his brief to the Examiner or the Board or in his oral argument.

(c) *Time for filing.* Except as otherwise provided, an answer or any further responsive document shall be filed within seven days after service of the document to which such responsive filing is directed. Protests or memoranda of opposition or support, permitted by statute, shall be filed before the close of the hearing in the case to which they relate.

4. By amending the first sentence of § 302.8(a)(2) to read:

§ 302.8 Service of documents.

(a) • • •

(2) *The parties.* Answers, petitions, motions, briefs, exceptions, notices, protests or memoranda, or any other documents filed by any party or other person with the Board or an Examiner shall be served upon all parties to the proceeding in which it is filed: *Provided,* That motions to expedite filed in any proceeding conducted pursuant to sections 401 and 402 of the Act, shall, in addition, be served on all persons who have petitioned for intervention in, or consolidation of applications with, such proceeding.

5. By amending paragraphs (a) and (c) of § 302.18 to read:

§ 302.18 Motions.

(a) *Generally.* An application to the Board or an Examiner for an order or ruling not otherwise specifically provided for in this part shall be by motion. After the assignment of an Examiner to a proceeding and before the issuance of a recommended or initial decision or the certification of a record to the Board, all motions shall be addressed to the Examiner. At all other times motions shall be addressed to the Board. All motions shall be made at an appropriate time depending upon the nature thereof and the relief requested therein.

• • • • • •

(c) *Answers to motions.* Within seven days after a motion is served, or such other period as the Board or Examiner may fix, any party to the proceeding may file an answer in support of or in opposition to the motion, accompanied by such affidavits or other evidence as it desires to rely upon. Unless the Board or the Examiner provides otherwise, no reply to an answer, reply to a reply, or any further responsive document shall be filed. Where a reply to an answer or any other responsive document is not fileable, all new matter contained in such answer shall be deemed controverted.

(Sec. 204(a), 72 Stat. 743; 49 U.S.C. 1324. Interpret or apply sec. 1001, 72 Stat. 788; 49 U.S.C. 1481)

Chapter III—Federal Aviation Agency

SUBCHAPTER C—AIRCRAFT REGULATIONS

[Reg. Docket No. 771, Amdt. 54]

PART 514—TECHNICAL STANDARD ORDERS FOR AIRCRAFT MATERIALS, PARTS, PROCESSES, AND APPLIANCES

Subpart A—General

A proposal to amend Subpart A of Part 514 of the regulations of the Administrator was published on June 13, 1961, 26 F.R. 5270. Interested persons were invited to submit comments and due consideration has been given to all comments received.

As a result of the comments received, several changes, generally of a clarifying or explanatory nature have been made. For example, the definition of "Manufacturer" has been revised from that proposed to make it clear that the manufacturer does not necessarily have to produce the component parts of the article which he certifies under the TSO system, and a footnote has been added to indicate that articles may also be approved in conjunction with the type certification procedures for an aircraft, engine or propeller. An explanation of performance standards, as used in this regulation, has been added.

A comment has been received which indicates the need for clarification as to the applicability of certain provisions of the proposed regulation to manufacturers of articles currently being identified with the TSO markings under the provisions of Part 514. Manufacturers who have been authorized to manufacture and to identify their articles under an FAA letter of acceptance of their statement of conformance are holders of an authorization issued pursuant to the provisions of Part 514. It is not intended nor is it necessary, that such manufacturers requalify by reapplication under this revised regulation in order to continue manufacturing such articles. The regulation has been revised to expressly state that such manufacturers may continue to manufacture articles in accordance with the terms of their present authorization and need not reapply for such authorization. However, as the proposal indicated, such manufacturers are subject to the provision permitting authorized representatives of the FAA to inspect their articles and manufacturing facilites and to examine their technical data files. Thus, their continuing capability to manufacture TSO articles may be determined by the FAA at any time.

The requirement for retention of data and records has been revised from that proposed to make it clear that such data and records need be retained only for articles which are manufactured on and after July 1, 1962, the effective date of this amendment. This requirement has also been relaxed to the extent that inspection and test records must be retained for only two years. Furthermore, only copies rather than the original technical data file need be transferred to the FAA for record purposes when the manufacturer terminates his business or no longer operates under the TSO system.

In response to comment received a provision has been added establishing a procedure under which the applicant will be issued an authorization, or notified of the denial of his application within 30 days from the date of its receipt. In the event that additional information is requested by the FAA to process the application, the 30 days will be computed from the date of receipt of such information. In order to expedite the application procedures, applications will be made directly to the FAA Engineering and Manufacturing Branch of the Region in which the applicant is located instead of to the Washington Office.

Finally, a provision has been included in this regulation which permits a manufacturer to refer in his application to quality control data previously submitted to the FAA.

There were objections to what appeared to be a reversal of the policy of delegating responsibility to the industry under the TSO system. Under the TSO system a manufacturer submitting a statement of conformance is responsible for conducting compliance tests and for maintaining quality control to assure that the articles which he certifies meet the standards of a TSO do, in fact, meet these standards. Under this amendment this responsibility will continue, but procedures are also established to provide the FAA with assurance that persons given such responsibility have at all times the necessary facilities, inspection organization and ability to produce the articles in conformance with the approved standards. To provide uniformity and eliminate unnecessary repetition these requirements are set forth in the general provisions of Subpart A rather than in the individual TSO's.

The manual material under §§ 3.18, 4b.18, and 6.18 of the Civil Air Regulations is being amended under appropriate rule making procedures to bring such material in conformance with the provisions of this part.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), Subpart A of Part 514 of the regulations of the Administrator (14 CFR Part 514) is hereby revised as follows, effective July 1, 1962:

Subpart A—General

Sec.
514.0 Definition of terms.
514.1 Basis and purpose.
514.2 TSO authorization.
514.3 Conditions on authorizations.
514.4 Deviations.
514.5 Design changes.
514.6 Retention of data and records.
514.7 Inspection and examination of data, articles or manufacturing facilities.
514.8 Service difficulties.
514.9 Noncompliance.
514.10 Transferability and duration.

AUTHORITY: §§ 514.0 to 514.10 issued under secs. 313(a), 601; 72 Stat. 752, 775; 49 U.S.C. 1354(a), 1421.

Subpart A—General

§ 514.0 Definition of terms.

As used in this part:

(a) "Administrator" means the Administrator of the Federal Aviation Agency or any person to whom he has delegated his authority in the matter concerned.

(b) "FAA" means Federal Aviation Agency.

(c) "Manufacturer" means a person who controls the design and quality of an article produced under the TSO system, including all parts thereof and processes and services related thereto obtained from outside sources.

(d) "Article" means the materials, parts, or appliances for which approval is required under the Civil Air Regulations for use on civil aircraft.

§ 514.1 Basis and purpose.

(a) *Basis.* Section 601 of the Federal Aviation Act of 1958, and §§ 3.18, 4a.31, 4b.18, 5.18, 6.18, 7.18, 10.21, 13.18, and 14.18 of this title (Civil Air Regulations).

(b) *Purpose.* (1) This part prescribes in individual Technical Standard Orders the minimum performance and quality control standards for FAA approval of specified articles used on civil aircraft,[1] and prescribes the methods by which the manufacturer of such articles shall show compliance with such standards in order to obtain authorization for the use of the articles on civil aircraft.

(2) The performance standards set forth in the individual Technical Standard Orders are those standards found necessary by the Administrator to assure that the particular article when used on civil aircraft will operate satisfactorily, or accomplish satisfactorily its intended purpose under specified conditions.

§ 514.2 TSO authorization.

(a) *Privileges.* No person shall identify an article with a TSO marking unless he holds a TSO authorization and the article meets and the applicable TSO standards prescribed in this part.

(b) *Letters of acceptance issued prior to July 1, 1962.* An FAA letter of acceptance of a statement of conformance issued for an article prior to July 1, 1962, is an authorization within the meaning of this part and the holder thereof may continue to manufacture such article without obtaining an additional TSO authorization, but shall comply with the requirements of §§ 514.3 through 514.10.

(c) *Application.* The manufacturer or his duly authorized representative shall submit an application for a TSO authorization together with the following documents (See Appendix A of this subpart for sample application) to the Chief, Engineering and Manufacturing Branch, Flight Standards Division, in the region in which the manufacturer is located:[2]

(1) A statement of conformance certifying that the applicant has complied with the provisions of Subpart A and the article meets the applicable performance standards established in Subpart B of this part (See Appendix B of this subpart for sample statement of conformance);

(2) Copies of the technical data required in the performance standards set forth in Subpart B of this part for the particular article;

(3) A description of his quality control system in the detail specified in § 1.36 of this title (Civil Air Regulations). In complying with this provision the manufacturer may refer to current quality control data filed with the Agency, as a part of a previous application.

NOTE: When a series of minor changes in accordance with § 514.5 is anticipated, the manufacturer may set forth in his application the basic model numbered article with open brackets after it to denote that suffix change letters will be added from time-to-time, e.g., Model No. 100 ( ).

(d) *Issuance.* (1) Upon receipt of the application and adequate supporting documents specified in paragraph (c) of this section to substantiate the manufacturer's statement of conformance with the requirements of this part and his ability to produce duplicate articles in accordance with the provisions of this part, the applicant will be given an authorization to identify his article with the applicable TSO marking.

(2) If the application is deficient in respect to any requirements, the applicant shall, upon request by the Chief, Engineering and Manufacturing Branch, submit such additional information as may be necessary to show compliance with such requirements. Upon the failure of the applicant to submit such additional information within 30 days after the date of the request therefor, his application will be denied and he will be so notified by the Chief, Engineering and Manufacturing Branch.

NOTE: The applicant will be issued an authorization or notified of the denial of his application within 30 days after the date of receipt of such application or, in the event that additional information has been requested, within 30 days after the date of receipt of such additional information.

§ 514.3 Conditions on authorizations.

The manufacturer of an article under an authorization issued under the provisions of this part shall—

(a) Manufacture such article in accordance with the requirements of Subpart A and the performance standards contained in the applicable TSO of Subpart B of this part;

(b) Conduct the required tests and inspections, and establish and maintain a quality control system adequate to assure that such article, as manufactured, meets the requirements of paragraph (a) of this section and is in a condition for safe operation;

(c) Prepare and maintain for each type or model of such article a current file of complete technical data and records in accordance with § 514.6; and

(d) Permanently and legibly mark each such article with the following information:

(1) Name and address of the manufacturer,

(2) Equipment name, or type or model designation,

(3) Weight to the nearest tenth of a pound,

(4) Serial number and/or date of manufacturer, and

(5) Applicable Technical Standard Order (TSO) number.

§ 514.4 Deviations.

Approval for a deviation from the performance standards established in Subpart B may be obtained only if the

[1] Articles may also be approved and manufactured for use on civil aircraft as a part of the type design of a type certificate for an aircraft engine or propeller.

[2] Regional Offices are located at New York, Atlanta, Kansas City, Fort Worth, Los Angeles, Anchorage.

standard or standards for which deviation is requested are compensated for by factors or design features which provide an equivalent level of safety. A request for such approval together with the pertinent data shall be submitted by the manufacturer to the Chief, Engineering and Manufacturing Branch of the Region in which the applicant is located.

§ 514.5 Design changes.

(a) *By Manufacturer*—(1) *Minor changes.* The manufacturer of an article under an authorization issued pursuant to the provisions of this part may make minor design changes to the article without further approval by the FAA. In such case the changed article shall retain the original model number and the manufacturer shall forward to the Chief, Engineering and Manufacturing Branch such revised data as may be necessary for compliance with § 514.2 (c).

(2) *Major changes.* If the changes to the article are so extensive as to require a substantially complete investigation to determine compliance with the performance standards established in Subpart B, the manufacturer shall assign a new type or model designation to the article and submit a new application in accordance with the provisions of § 514.2(c).

(b) *By persons other than the manufacturer.* Design changes to an article by a person other than the manufacturer who submitted the statement of conformance for such article are not eligible for approval under this part, unless such person is a manufacturer as defined in § 514.0 and applies for authorization under § 514.2(c).

NOTE: Persons other than a manufacturer may obtain approval for design changes to a product manufactured under a TSO pursuant to the provisions of Part 18 or the applicable airworthiness regulations.

§ 514.6 Retention of data and records.

(a) A manufacturer holding an authorization issued pursuant to the provisions of this part shall, for all articles manufactured under such authorization on and after July 1, 1962, maintain and keep at his factory:

(1) A complete and current technical data file for each type or model of article which shall include the design drawings and specifications. This technical data shall be retained for the duration of his operation under the provisions of this part.

(2) Complete and current inspection records to show that all inspections and tests required to ensure compliance with this part have been properly accomplished and documented. These records shall be retained for at least two years.

(b) The data specified in paragraph (a)(1) of this section shall be identified and copies transferred to the FAA for record purposes in the event the manufacturer terminates his business or no longer operates under the provisions of this part.

§ 514.7 Inspection and examination of data, articles or manufacturing facilities.

The manufacturer shall, upon request, permit an authorized representative of the FAA to inspect any article manufactured pursuant to this part, and to observe the quality control inspections and tests and examine the manufacturing facilities and technical data files for such article.

§ 514.8 Service difficulties.

Whenever the investigation of an accident or a service difficulty report shows an unsafe feature or characteristic caused by a defect in design or manufacture of an article, the manufacturer shall upon the request of the Chief, Engineering and Manufacturing Branch, report the results of his investigation and the action, if any, taken or proposed by him to correct the defect in design or manufacture (e.g., service bulletin, design changes, etc.). If the defect requires a design change or other action to correct the unsafe feature or characteristic, the manufacturer shall submit to the Chief, Engineering and Manufacturing Branch, the data necessary for the issuance of an airworthiness directive containing the appropriate corrective action.

§ 514.9 Noncompliance.

Whenever the Administrator finds that a manufacturer holding an authorization issued pursuant to the provisions of this part has identified an article by a TSO marking and that such article does not meet the applicable performance standards of this part, the Administrator may, upon notice thereof to the manufacturer, withdraw the manufacturer's authorization and, where necessary, prohibit any further certification or operation of a civil aircraft upon which such article is installed until appropriate corrective action is taken.

§ 514.10 Transferability and duration.

An authorization issued pursuant to the provisions of this part shall not be transferred and is effective until surrendered, or withdrawn, or otherwise terminated by the Administrator.

(Secs. 313(a), 601; 72 Stat. 752, 775; 49 U.S.C. 1354(a), 1421)

Issued in Washington, D.C., on January 29, 1962.

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 60–HO–4]

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS POSITIVE CONTROL ROUTE SEGMENTS AND POSITIVE CONTROL AREAS

Cancellation of Alteration

On January 20, 1962, there was published in the FEDERAL REGISTER an amendment to Airspace Docket No. 60–HO–4 (27 F.R. 616), which altered the Breakers Intersection by redescribing it as the intersection of the Lihue, Hawaii, VOR 130° and the Honolulu, Hawaii, VORTAC 269° True radials in lieu of the Lihue VOR 128° and the Honolulu VORTAC 269° True radials. This action was taken to identify the intersection of radials used to describe Hawaiian VOR Federal airway No. 2.

Subsequent to publication of this amendment, a flight check of the Breakers Intersection disclosed that the altered location would be outside of terminal radar coverage. However, the original site would be within radar coverage. Since the primary purpose of this intersection is to identify the initial holding point for aircraft enroute to Honolulu from the west, it has been determined that the original site of the Breakers Intersection should be retained. Therefore, action is taken herein to cancel the amendment published on January 20, 1962.

Since this amendment is minor in nature, notice and public procedure hereon are unnecessary, and it may be made effective immediately.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582), effective immediately, the alteration of Airspace Docket No. 60–HO–4, published in the FEDERAL REGISTER on January 20, 1962 (27 F.R. 616), is cancelled.

(Sec. 307(a), 72 Stat. 749; U.S.C. 1348)

Issued in Washington, D.C., on January 30, 1962.

Director, Air Traffic Service.

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

The amendments to standard instrument approach procedures contained herein are being adopted to become effective when indicated in order to promote safety. The revised procedures supersede the existing procedures of the same classification now in effect for the airports specified therein. For the convenience of the users, the revised procedures specify the complete procedure and indicate the changes to the existing procedures.

As a situation exists which demands immediate action in the interests of safety in air commerce, I find that compliance with the notice, procedure and effective date provisions of section 4 of the Administrative Procedure Act would be contrary to the public interest and is therefore not required.

Pursuant to the authority delegated to me by the Administrator (24 F.R. 5662), Part 609 is amended as follows:

1. The low or medium frequency range procedures prescribed in § 609.100(a) are amended to read in part:

6. The radar procedures prescribed in § 609.500 are amended to read in part:

RADAR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach, except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 33—SPORT FISHING

Colusa National Wildlife Refuge, California

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

CALIFORNIA

COLUSA NATIONAL WILDLIFE REFUGE

Sport fishing on the Colusa National Wildlife Refuge, California, is permitted only on the areas designated by signs as open to fishing. This open area, comprising 25 acres or less than 1 percent of the total area of the refuge, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1002 Northeast Holladay Street, Portland 8, Oreg.

Sport fishing is subject to the following conditions:

(a) Species permitted to be taken: Catfish, bass, frogs, and other minor species permitted under State regulations.

(b) Open season: All fish—February 1, 1962, through December 31, 1962, except closed during migratory waterfowl hunting season. Frogs—March 1, 1962, through November 30, 1962, except closed during migratory waterfowl hunting season.

(c) Daily creel limits: Catfish—not more than 15 fish nor more than 15 pounds and 1 fish. Irrespective of weight, 3 catfish may be taken. Bass—5 bass may be taken. Frogs—24 frogs. Plus other creel limits for minor species as are prescribed for State regulations.

(d) Methods of fishing:

1. Tackle: Line, or rod and line, in hand or closely attended. Frogs may also be taken with spears or dip net.

2. Boats: The use of boats without motors is permitted.

(e) Other provisions:

1. The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33.

2. A Federal permit is not required to enter the public fishing area.

3. The provisions of this special regulation are effective to January 1, 1963.

J. T. BARNABY,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

MAINLAND AND LOCAL SUGAR

Notice of Hearing on Proposed Allotment of Quotas for Puerto Rico for Six-Month Period Ending June 30, 1962

Pursuant to the authority contained in the Sugar Act of 1948, as amended (61 Stat. 922, as amended), hereinafter called the "Act", and in accordance with the applicable rules of practice and procedure (7 CFR 801.1 et seq.), and on the basis of information before me, I do hereby find it necessary to allot the sugar quotas for Puerto Rico for consumption in the continental United States, as established in Part 811 (26 F.R. 9051, 11963), and for local consumption in Puerto Rico, as established in Part 812 (26 F.R. 11838, 12677) for the six-month period ending June 30, 1962. Allotment of these quotas appears necessary in order to prevent disorderly marketing and importation of sugar and to afford all interested persons an equitable opportunity to market sugar in the continental United States and Puerto Rico within the respective quotas. Accordingly, notice is hereby given that a public hearing will be held at Santurce, Puerto Rico, in the Conference Room, Caribbean Area ASCS Office, Segarra Building, on February 21, 1962, at 10:00 a.m. As used herein, the term "mainland quota" is used in reference to the quota for consumption in the continental United States and the term "local quota" is used in reference to the quota for local consumption in Puerto Rico.

The purpose of such hearing is to receive evidence to enable the Secretary of Agriculture to make fair, efficient, and equitable allotments of the mainland and local quotas among persons who produce and market Puerto Rican sugar to be brought into the continental United States for consumption therein, and who produce and market Puerto Rican sugar for local consumption in Puerto Rico.

The findings made above are in the nature of preliminary findings based on the best information now available. It will be appropriate to present evidence at the hearing on the basis of which the Secretary of Agriculture may affirm, modify, or revoke such preliminary findings and make or withhold allotment of any such quotas in accordance therewith.

In addition, the subjects and issues of this hearing also include: (1) The manner in which the statutory factors "processings from proportionate shares," "past marketings," and "ability to market" as provided in section 205(a) of the Act, should be measured; (2) the relative weightings that should be given to these factors; (3) participation in the allotments by producers of sugarcane who received sugar in settlement therefor; (4) the transfer of allotments or exchange of mainland for local allotments or local for mainland allotments; and (5) the manner in which sugar is to be charged to allotments.

Notice also is given hereby that it will be appropriate at the hearing to present evidence on the basis of which the Secretary may revise or amend the allotment of the quota for the purposes of: (1) Allotting any increase or decrease in the mainland or local quota for Puerto Rico; (2) allotting any deficit in the allotment for any allottee; and (3) substituting revised estimates of data or final actual data for estimates of such data wherever estimates are used in the formulation of an allotment of a quota.

Done at Washington, D.C., this 29th day of January 1962.

ORVILLE L. FREEMAN,
Secretary.

MEASUREMENT OF VESSELS AND SPECIAL EXEMPTED WATER-BALLAST SPACES

Notice of Proposed Rule Making

A notice of proposed rule making setting forth a proposed amendment to § 2.43(g) of the Customs Regulations (19 CFR 2.43(g)) was published in the FEDERAL REGISTER for Tuesday, July 25, 1961 (26 F.R. 6624). Comments were invited to be submitted within 30 days after publication.

Numerous comments received with respect to the proposed amendment point to a need for further clarification of the conditions under which water-ballast exemptions may be allowed.

Apart from special provisions relating to double bottoms, section 4153 of the Revised Statutes, as amended (46 U.S.C. 77), permits the exemption of any space which is adapted only for water ballast and which is certified not to be available for the carriage of cargo, stores, supplies, or fuel. Section 2.43(g) of the Customs Regulations (19 CFR 2.43(g)) specifies the conditions of adaptation which must be met in order to permit such a certification to be made. These conditions have to do with such matters as filling and discharging water-ballast spaces by piping and pumping arrangements which are independent of the pipes and pumps serving spaces for the carriage of cargo, stores, supplies, or fuel; restrictions upon the means of access to water-ballast spaces; and construction of those spaces as an integral part of the vessel's hull.

Heretofore, adaptation of a given space in such a manner as to render it nonavailable for cargo, stores, supplies, or fuel and the absence of any indication that the space was to be used for a purpose other than the carriage of water ballast were deemed to be a sufficient compliance with the statute.

However, recent admeasurement cases reviewed by the Bureau indicate an increasing tendency to claim water-ballast exemption for abnormally large volumes which, even though adapted so as to be nonavailable for cargo, stores, supplies, or fuel, are so excessive as to lead to the consclusion that they are adapted for some purpose other than for water ballast only as prescribed by law. Furthermore, in some of these cases safety or other considerations have resulted in a prohibition against filling the spaces with water at any time while the vessel is under way.

In the Bureau's opinion, the statutory language "adapted only for water ballast" requires that consideration be given to the function of water ballast in relation to the operation of a vessel and such space cannot be said to be "adapted only" for water ballast unless the space is necessary, and available at all times, to serve the primary purpose of water ballast; i.e., to afford a means of maintaining satisfactory stability, trim, and immersion under varying conditions of the vessel's operation. It is the Bureau's intention to add this test to the existing regulatory conditions precedent to a water-ballast exemption, with a further provision for review and approval by the Commissioner of Customs in any case in which the space claimed for exemption exceeds 30 percent of the vessel's gross tonnage calculated without any allowance for water ballast.

Accordingly, the original proposal is withdrawn, and notice is hereby given, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 1003), that under the authority of section 4 of the Act of March 2, 1895, as amended (46 U.S.C. 79), it is proposed to amend § 2.43 (g) of the Customs regulations by numbering the subparagraphs therein as (1) and (2) to conform to the numbering now assigned in the Code of Federal Regulations (19 CFR 2.43(g)) and by the addition of the following new subparagraph:

(3) No space will be deemed to be adapted only for water ballast unless the Bureau is satisfied that the primary purpose of the space is to afford a means of maintaining satisfactory stability, trim, and immersion under varying conditions of the vessel's operation and that the space claimed for exemption is necessary to and available at all times for this purpose. Any application for exemption of water-ballast space in excess of 30 percent of the vessel's gross tonnage calculated without any allowance for water ballast shall be submitted for approval to the Commissioner of Customs, accompanied by a statement in writing from the vessel owner or his representative as to the special circumstances of use or construction of the vessel which make such an extensive allowance necessary and proper and verifying that all conditions specified in this paragraph have been and are met. Any change in the facts on the basis of which a water-ballast exemption is granted under this section shall be promptly reported to the collector of customs for his determination as to whether there has been a change in the use of spaces requiring an adjustment of tonnage under § 2.64.

Prior to the final adoption of the amendment, consideration will be given to any relevant data, views, or arguments, which are submitted in writing to the Commissioner of Customs, Bureau of Customs, Washington 25, D.C., and received not later than 30 days from the date of publication of this notice in the FEDERAL REGISTER. No hearing will be held.

[SEAL] PHILIP NICHOLS, Jr.,
Commissioner of Customs.

1. On January 23, 1962 (FCC 62-96), the Commission extended the time for filing comments and reply comments in Docket 14229, Dockets 14239-14246, and Dockets 14231-14238 to February 19, 1962, and March 23, 1962, respectively.

2. The proposals which are under consideration in the above-captioned proceedings are intimately related to the general UHF proceeding in Docket 14229 and are being considered concurrently with that docket. The Commission is of the opinion, therefore, that the time for filing comments and reply comments on the requests to reserve UHF channels for non-commercial educational use in Florida, Kentucky, and Georgia should also be extended to February 19, 1962, and March 23, 1962, respectively.

3. *Accordingly, it is ordered,* That the time for filing comments and reply comments in Docket 14421, Docket 14396, and Docket 14409 is extended to February 19, 1962, and March 23, 1962, respectively.

[Docket No. 12946]

TABLE OF ASSIGNMENTS FOR TELEVISION BROADCAST STATIONS IN CALIFORNIA AND NEVADA

Order Extending Time to Respond to Petition for Reconsideration and to Reply to Responses

In the matter of amendment of § 3.606, *Table of assignments*, Television Broadcast Stations, San Francisco and Sacramento, Calif., and Reno, Nev.; Docket No. 12946.

1. The Commission has before it for consideration two requests from parties to the above-entitled proceeding for an extension of time for filing pleadings. One, by Capitol Television Co., Inc., Sacramento, Calif., filed January 22, 1962, seeks a 30-day extension of the January 19, 1962, deadline for filing responses to the petition for reconsideration filed by S. H. Patterson, San Francisco, Calif., on December 22, 1961. The other, filed on January 23, 1962, by S. H. Patterson, seeks to have the time for the filing of pleadings in reply to responses directed to its petition for reconsideration extended to February 13, 1962.

2. The Commission has heretofore granted one extension of time for responding to the Patterson petition for reconsideration. The deadline for filing such responses was extended from January 2, 1962, to January 19, 1962, by the Commission's Order of January 5, 1962, released January 8, 1962 (14875). Capitol Television asserts, however, that it did not receive the Commission's letter advising of this time extension until January 12, 1962, and that it has never received a copy of the petition for reconsideration itself. It urges that it needs the additional 30-day extension it seeks to obtain a copy of the Patterson petition and to prepare and file its response.

3. S. H. Patterson states that he requires additional time to consider the

factual allegations and engineering data of the several oppositions addressed to his petition for reconsideration. He also advises that all the parties with oppositions on file have consented to the extension he requests.

4. The circumstances upon which Capitol Television predicates its request for a further 30-day extension are not persuasive. The Patterson petition for reconsideration has been on file since December 22, 1961, and the petitioner does not indicate that it made any effort to obtain a copy. The onus is upon a party to a rule making proceeding to obtain copies of the petitions and comments filed by other parties in the proceeding in which it is interested. The Commission does not furnish them and the rules do not require parties to a rule making proceeding to serve copies of their comments and pleadings upon other parties in the proceeding generally except in the case of responses to petitions for rule making and replies thereto (see § 1.204 of the rules). However, since it appears that Capitol may have mistakenly assumed that it would be furnished a copy of the Patterson petition, and it does not appear that it would unduly delay our disposition of the petition or be prejudicial to other parties, we are persuaded that a further extension to February 12, 1962, should be allowed for responding to the Patterson petition.

5. In light of the number of oppositions filed to the Patterson petition for reconsideration and the matters raised therein, the extension of time requested by Patterson for replying to them appears to be clearly warranted. However, with the filing date for responding to its petition extended to February 12, 1962, we believe a further extension of the reply period to February 26, 1962, is reasonable under the circumstances.

6. *Accordingly, it is ordered*, This 26th day of January 1962, that the abovementioned petitions of Capitol Television Co., Inc., and S. H. Patterson are granted to the extent ordered herein, and that the time for filing responses to the Patterson petition for reconsideration is extended from January 19, 1962, to February 12, 1962, and the time for filing replies to such responses is extended to February 26, 1962.

6. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and section 0.241 (d)(8) of the Commission's rules.

Released: January 30, 1962.

FEDERAL AVIATION AGENCY

[14 CFR Part 507]

[Reg. Docket No. 1048]

AIRWORTHINESS DIRECTIVES

Douglas DC-8

Pursuant to the authority delegated to me by the Administrator (14 CFR Part 405), notice is hereby given that the Federal Aviation Agency has under consideration a proposal to amend Part 507 of the Regulations of the Administrator to include an airworthiness directive requiring modifications to Douglas DC-8 aircraft to permit opening of the overwing exits from outside the airplane in accordance with the provisions of Part 4b of the Civil Air Regulations.

Interested persons may participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should be submitted in duplicate to the Docket Section of the Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. All communications received on or before March 5, 1962, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available in the Docket Section for examination by interested persons when the prescribed date for return of comments has expired. This proposal will not be given further distribution as a draft release.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423).

In consideration of the foregoing, it is proposed to amend § 507.10(a) of Part 507 (14 CFR Part 507), by adding the following airworthiness directive:

DOUGLAS. Applies to DC-8 aircraft, Serial Nos. 45253-45289, 45291-45306, 45376-45382, 45384-45393, 45408-45413, 45416-45419, 45421-45431, 45433, 45442-45445, 45526, 45565-45570, 45588-45606, 45609, 45614, 45617-45618, 45620-45622, 45624-45627.

Compliance required within 300 hours' time in service after the effective date of this AD.

Investigation has revealed that the overwing emergency exits cannot, under all necessary circumstances, be opened from outside the airplane, as required by Civil Air Regulations sections 4b.362(e)(2) and 4b.362(e)(3). To eliminate this condition, one of the following modifications shall be accomplished with respect to each aft overwing exit which is not deactivated per Note 7 of Type Certificate Data Sheet 4A25 and with respect to each forward overwing exit:

(a) The outboard seat in the row of seats forward of each overwing exit shall be permanently blocked to prevent the seat from being reclined across any portion of the exit opening. The outboard seat in the row of seats aft of each overwing exit shall be permanently blocked to prevent the seat from being moved forward across any portion of the exit opening.

(b) Each row of seats forward and aft of each overwing exit shall be relocated in an approved manner that will permit the exit door to be readily opened from the outside and removed when the back of the outboard seat in each such row of seats is in any of its possible positions. The seat track or other seat positioning means shall be clearly marked or blocked in a manner which will assure that these rows of seats are continuously retained in this position during service.

(c) Rework each overwing exit door assembly, door jamb and lower stop, install a handle on the exterior of each of those door assemblies, and restrict the forward movement of the outboard seat in each row of seats just aft of an overwing exit. This total modification shall be such as to permit the exit door to be readily opened and removed from the outside when the backs of both adjacent outboard seats are in any of their possible positions.

(Douglas DC-8 Service Bulletin No. 52-21 pertains to this same subject and describes an FAA-approved means of complying with modification method (c).)

Issued in Washington, D.C., on January 29, 1962.

GEORGE C. PRILL,
Director,
Flight Standards Service.

ORGANIZATION DUTIES AND FUNCTIONS

Under Secretary of Commerce for Transportation

The following order was issued by the Secretary of Commerce, effective January 19, 1962, and supersedes the material appearing at 23 F.R. 8941 of November 15, 1958.

SECTION 1. *Purpose.* The purpose of this order is to prescribe the duties and responsibilities of the Under Secretary of Commerce for Transportation.

SEC. 2. *Authority.* .01 The duties and responsibilities of the Under Secretary of Commerce for Transportation described in this order are assigned pursuant to the authority vested in the Secretary of Commerce by law, including authority under Reorganization Plan No. 5 of 1950, and Reorganization Plan No. 21 of 1950 as amended by Reorganization Plan No. 7 of 1961.

.02 All the authority vested in and exercised by the heads of the Defense Air Transportation Administration, Bureau of Public Roads, Weather Bureau, Coast and Geodetic Survey, Great Lakes Pilotage Administration, and the Maritime Administration are hereby made subject to the policy direction and coordination of the Under Secretary of Commerce for Transportation.

SEC. 3. *Duties and responsibilities.* .01 The Under Secretary of Commerce for Transportation shall:

(1) Serve as the principal adviser to the Secretary on all matters which involve the transportation policies of the Federal Government and on all policy matters concerning transportation responsibilities and activities of the Department of Commerce;

(2) Formulate, in consultation with executive agencies concerned, overall transportation policies and programs within the executive branch of the Government to assure the balanced development of the Nation's transportation system;

(3) Exercise policy direction over and coordinate the transportation and related activities of the Department;

(4) Initiate action before the transportation regulatory agencies when such action appears to be appropriate for the effectuation of transportation policies and programs, or present the Department's views on matters under consideration by such regulatory agencies as they may affect the Department's programs or overall transportation policy;

(5) Serve as the focal point within the Department on, and represent the Department with respect to, all coordination activities of an interdepartmental nature which involve transportation matters including the mobilization aspects thereof;

(6) Grant or deny applications for adjustment or exception from the provisions of Transportation Orders No. T-1 and T-2 which apply to shipment of restricted commodities in American flag ships and aircraft to certain foreign destinations; and

(7) Consult with the Under Secretary of Commerce, the Assistant Secretaries of Commerce for Domestic Affairs, and International Affairs, on matters of common interest in their respective areas of responsibility.

SEC. 4. *Deputy Under Secretary for Transportation Operations.* The Deputy Under Secretary for Transportation Operations shall serve as the deputy to the Under Secretary of Commerce for Transportation with regard to all matters under the Under Secretary's jurisdiction other than those relating to long range transportation planning. The Deputy Under Secretary for Transportation Operations shall assume the full responsibilities of the Under Secretary of Commerce for Transportation during the latter's absence.

SEC. 5. *Deputy Under Secretary for Transportation Policy.* The Deputy Under Secretary for Transportation Policy shall assist the Under Secretary of Commerce for Transportation in developing long range transportation policies, plans, and programs to assure the balanced development of the Nation's transportation system. In carrying out this function, the Deputy Under Secretary for Transportation Policy shall initiate studies relating to all transportation media, shall develop and use techniques for measuring and forecasting total transportation requirements of the economy, and shall study and evaluate the application of Federal transportation programs in terms of their implications on the sound development of private transportation enterprise.

SEC. 6. *Saving provision.* This order shall not be construed to affect any authorities or functions delegated to officers of the Department empowering them to take administrative, security, or legal action.

Effective date: January 19, 1962.

JOHN PRINCE,
Deputy Assistant Secretary for Administration.

REFINED CAMPHOR FROM TAIWAN

Fair Value Determination

JANUARY 26, 1962.

A complaint was received that refined camphor from Taiwan was being sold in the United States at less than fair value within the meaning of the Antidumping Act of 1921.

I hereby determine that refined camphor from Taiwan is not being, nor likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

Statement of reasons. All purchases were outright transactions, no relationship, financial or otherwise, existing be-

tween seller and buyers respectively. It was determined, therefore, that the appropriate fair value comparison is between purchase price and home market price.

Since all sales for home consumption are on an ex-factory level, for comparative purposes both the home market price and the selling price for export to the United States were reduced to an ex-factory basis.

In determining home market price, adjustment was made for the difference between home market and export packing. Adjustment was also made in the home market price to allow for certain home market selling expenses up to the total amount of a selling commission, which applied only to U.S. export sales, and which was deducted from purchase price.

Purchase price was calculated on the basis of the packed, United States sales price, f.o.b. Keelung. From this price the following charges were deducted: selling commission; inland freight; f.o.b. charges; and customs brokerage. Certain taxes imposed in the home market upon the manufacturer in respect to the manufacture, production or sale of the merchandise, and which are included in the home market sales price but not applicable to the U.S. export sales price, were added to purchase price calculations in accordance with statutory requirements.

Although the comparison revealed that purchase price was less than home market price in some instances, the manufacturer has since revised his prices and purchase price has not been less than home market price since that time.

As to sales made prior to the price revisions, it was determined that the quantities and the margin involved were not more than insignificant.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

Assistant Secretary of the Treasury.

ATOMIC ENERGY COMMISSION

[Docket No. 27-18]

DEPARTMENT OF THE NAVY, U.S. NAVAL RADIOLOGICAL DEFENSE LABORATORY

Notice of Amendment of Byproduct Material License

Please take notice that since no requests for a formal hearing have been filed following the filing of notice of proposed amendment of License No. 4-487-6, held by the Department of the Navy, U.S. Naval Radiological Defense Laboratory, San Francisco 24, Calif., with the Federal Register Division on December 26, 1961, the Atomic Energy Commission has this date issued Amendment No. 1 to License No. 4-487-6. This amendment authorizes: (1) Renewal of the license for a period of two (2) years; (2) possession of 500 curies of byproduct material at any one time instead of the 150 curies of byproduct material previously authorized; and (3) the licensee to conduct the waste disposal activities in accordance with revised procedures which supersede and are not less restrictive than previously submitted procedures.

Notice of proposed amendment was published in the FEDERAL REGISTER on December 27, 1961, 26 F.R. 12539.

Dated at Germantown, Md., January 29, 1962.

STATE OF CALIFORNIA

Proposed Agreement for Assumption of Certain AEC Regulatory Authority

Notice is hereby given that the U.S. Atomic Energy Commission is publishing for public comment, prior to action thereon, a proposed agreement received from the Governor of the State of California for the assumption of certain of the Commission regulatory authority pursuant to section 274 of the Atomic Energy Act of 1954, as amended.

A summary of the California program submitted to the Commission is set forth below as Appendix A to this notice. A copy of the complete text of the California program, including proposed California regulations, is available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained by writing to the Director, Office of Radiation Standards, United States Atomic Energy Commission, Washington 25, D.C. All interested persons desiring to submit comments and suggestions for the consideration of the Commission in connection with the proposed agreement should send them in triplicate to the Secretary, U.S. Atomic Energy Commission, Washington 25, D.C., within 30 days after initial publication in the FEDERAL REGISTER.

Exemptions from the Commission's regulatory authority which would implement this proposed agreement, as well as other agreements which may be entered into under section 274 of the Atomic Energy Act, as amended, were published as proposed Part 150 to the Commission's regulations in FEDERAL REGISTER issuances of Sept. 29, 1961; Oct. 6, 1961; Oct. 13, 1961; Oct. 20, 1961; 26 F.R. 9174, 9428, 9678, 9873. In reviewing this proposed agreement, interested persons should also consider the aforementioned proposed exemptions, which the Commission still has under consideration.

Dated at Germantown, Md., this 9th day of January 1962.

For the Atomic Energy Commission.

WOODFORD B. MCCOOL,
Secretary.

Agreement Proposed by the State of California Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended, for the Assumption of Certain of the AEC's Regulatory Authority

Whereas, the United States Atomic Energy Commission (hereinafter referred to as the Commission) is authorized under section 274b. of the Atomic Energy Act of 1954, as amended, to enter into an agreement with the Governor of any State providing for discontinuance of the regulatory authority of the Commission under Chapters 6, 7, and 8 and section 161 of that Act with respect to any or all of the following materials within the State; namely, byproduct materials, source materials, and special nuclear materials in quantities not sufficient to form a critical mass (hereinafter referred to as agreement materials); and

Whereas, the Governor of the State of California (hereinafter referred to as the State) is authorized under section 25830 of the California Health and Safety Code to enter into such an agreement, which agreement shall become effective when ratified by the State Legislature; and

Whereas, the Governor of the State has certified on December 15, 1961, that the State has a program for the control of radiation hazards adequate to protect the public health and safety with respect to agreement materials within the State, and that the State desires to assume the regulatory responsibility discontinued by the Commission for such materials; and

Whereas, the Commission has found on ---------- that the State program is compatible with the Commission's program for the regulation of agreement materials, and that the State program is adequate to protect the public health and safety with respect to such materials; and

Whereas, the Commission and the State recognize the desirability and importance of maintaining compatibility between their respective programs for the control of agreement materials with respect to public health and safety; and

Whereas, the Commission and the State agree that reciprocal recognition of licenses issued by the Commission and by all States which enter into agreements with the Commission similar to this agreement (hereinafter referred to as agreement States) is of great importance for the development of the uses of agreement materials and that such reciprocal recognition must be based upon continuing compatibility of the programs of the Commission and such States for the control of agreement materials;

Now, therefore, it is hereby agreed between the Commission and the Governor of the State, acting in behalf of the State, as follows:

Article I. For purposes of this agreement:

A. "Byproduct materials," "critical mass," and "ocean or sea" have the meanings given to such terms in Part 150 of the Commission's regulations in effect on the ratification date of this agreement.

B. "Source material," "special nuclear material," "production facility," and "utilization facility" have the meanings given to such terms in those parts of the Commission's regulations that are incorporated by reference in Part 150 and that are in effect on the ratification date.

C. "Ratification date" means the date on which the California Legislature transmits to the Governor for signature a bill ratifying this agreement.

Article II. Subject to the exceptions stated in Article III, the Commission shall discontinue, as of the effective date of this agreement, the regulatory authority of the Commission under Chapters 6, 7, and 8 and section 161 of the Atomic Energy Act of 1954, as amended, with respect to the following materials within the State:

A. Byproduct materials;

B. Source materials;

C. Special nuclear materials in quantities such that the amount authorized for possession at any one time under any one license is not sufficient to form a critical mass.

Article III. This agreement does not provide for discontinuance of any Commission responsibility and authority with respect to regulation of:

A. The construction and operation of any production or utilization facility;

B. The export from or import into the United States of byproduct, source, or special nuclear material, or of any production or utilization facility;

C. The disposal into the ocean or sea of byproduct, source, or special nuclear waste materials;

D. The disposal of such other byproduct, source, or special nuclear material as the Commission determines by regulation or order should, because of the hazards or potential hazards thereof, not be so disposed of without a license from the Commission.

Article IV. Notwithstanding this agreement, the Commission is authorized:

A. By rule, regulation, or order to require that the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source, byproduct, or special nuclear material shall not transfer possession or control of such product except pursuant to a license issued by the Commission; and

B. To issue rules, regulations, or orders under subsection 161 b. or i. of the Atomic Energy Act of 1954, as amended, to protect the common defense and security, to protect restricted data, or to guard against the loss or diversion of special nuclear material.

Article V. Each party to this agreement will:

A. Use its best efforts to maintain compatibility between its program for the control of agreement materials and the programs of the other party and of other agreement States. To this end, each party will consult with the other and with all agreement States prior to any modification of its regulations for the control of agreement materials and will seek to arrive at a common solution of differences, to be incorporated insofar as practicable into the regulations of both parties and all agreement States concurrently.

B. Provide for reciprocal recognition of licenses for agreement materials issued by the other party or by any agreement State, subject to such conditions as to duration of such recognition of each license, reporting of information, and compliance with regulations as are deemed necessary to protect the health and safety of the public. Such recognition is conditioned upon the continuance of program compatibility in accordance with paragraph A of this article.

Article VI. This agreement, upon acceptance by the Commission and the Governor of the State and ratification by law of the State, shall become effective on July 1, 1962.

Article VII. The Commission, upon its own initiative, after reasonable notice and opportunity for hearing to the State, or upon request of the Governor of the State, may terminate or suspend this agreement and reassert the licensing and regulatory authority vested in it under the Atomic Energy Act of 1954, as amended, if the Commission finds that such termination or suspension is required to protect the public health and safety.

APPENDIX A

Summary of California's Proposed Policies and Procedures for the Licensing and Regulation of Byproduct, Source, and Special Nuclear Materials

State policy and courses of action with respect to atomic energy development and radiation protection have been the subject of California legislative consideration for a number of years. Public hearings by the Assembly Interim Committee on Public Health in 1958 led to the enactment of the Atomic Energy Development and Radiation Protection Law in 1959, which:

1. Declared it to be State policy to "encourage the constructive development of industries producing or utilizing atomic energy and radiation and to eliminate unnecessary exposure of the public to ionizing radiation."

2. Established the position of Coordinator of Atomic Energy Development and Radiation Protection in the Governor's Office.

3. Directed the Department of Public Health to institute a program for the registration of sources of radiation.

The Congress, also in 1959, amended the Atomic Energy Act of 1954 to permit for the first time a transfer of certain regulatory authority from the U.S. Atomic Energy Commission to qualified states in accordance with negotiated agreements.

In implementation of the State statute and with a view toward appraising the desirability or necessity for a broad system of radiation control, including assumption of authority from the AEC, the registration program was so designed as to obtain a maximum of information regarding radiation use in California. The Assembly Interim Committee on Public Health, following public hearings on these subjects in 1960, concluded that a comprehensive program of radiation control should be instituted promptly and that the state should prepare to enter into agreement with the Atomic Energy Commission, subject to approval of such an agreement by the Legislature. The Coordinator of Atomic Energy Development and Radiation Protection, after consultation with the Advisory Council and the Departmental Coordinating Committee of his Office, and with representatives of industry and the professional groups that use atomic energy and radiation, made a similar recommendation in his annual report to the Governor and the Legislature in January 1961.

As a result of these recommendations, Assembly Bill 1975 was introduced in the 1961 session of the Legislature, providing the framework for such a program, including enabling provisions to permit the Governor to enter into agreement with the Atomic Energy Commission. The bill was derived in large measure from suggested legislation of the Council of State Governments. It was widely circulated and critically reviewed by a number of interested and affected persons and groups, and was revised to take into account appropriate comments. After extensive consideration by Committees of the Legislature, including several public hearings at which all interested parties were afforded opportunity to be heard, the measure was enacted as the Radiation Control Law (Chapter 1711, Laws of 1961).

The statute directed the State Department of Public Health to adopt regulations for effectuating the purposes of this legislation. In drafting regulations, the Department was guided by the statutory provision for compatibility with the standards and regulatory programs of the Federal government, an integrated effective system of regulation within the State, and a system consonant insofar as possible with those of other states. The regulations were drawn largely from models developed jointly by the Atomic Energy Commission, the U.S. Public Health Service, and the Council of State Governments; and from recommendations of the National Committee on Radiation Protection and Measurement.

Assistance in drafting the regulations was obtained from a number of individuals, agencies, and groups, including the Atomic Energy Commission, the U.S. Public Health Service, the California Coordinator of Atomic Energy Development and Radiation Protection, several California state and local agencies, and a distinguished twelve-member Advisory Committee. This Advisory Committee included representation from industry, labor, medicine, dentistry, medical physics, and local health departments.

Two public meetings were held under the auspices of the Department of Public Health to permit interested persons to present their views on the proposed regulations. These meetings were publicized in advance through regular news media. In addition, notices of the meetings, together with copies of the proposed regulations, were sent to some 500 persons and groups known to be concerned. Such notices were mailed to all persons who had previously requested notifications of this sort; known leaders of affected groups; leading industries, distributors, manufacturers, and insurance carriers; leading universities and colleges; major hospitals; the California Manufacturers' Association; the California Medical Association; and others.

The first such meeting was held in Los Angeles on October 17, 1961, and 56 persons attended. The second meeting was held in Berkeley on October 20, with 64 persons in attendance. Each meeting lasted more than five hours and the proposed regulations were considered in detail. The notice announcing the meetings stated that written comments would also be welcomed. This was reiterated to those in attendance at the meetings. A number of written comments were received and given full consideration.

Following the public meetings, the Advisory Committee met to consider suggestions made at the meetings and in correspondence. This led to a final redrafting of the regulations. Copies were sent to all persons and groups that had received the initial draft.

In accordance with section 25734 of the Health and Safety Code, this final draft was submitted for review by the Coordinator of Atomic Energy Development and Radiation Protection and was approved for public notice of a hearing to be held before the State Board of Public Health. Such notice was published thirty days in advance of the hearing date in accordance with section 11423 of the Government Code, and notice of the hearing was also mailed to all persons and groups to whom copies of the proposed regulations had been sent. At the hearing on December 8, 1961, full opportunity was given to all interested persons to be heard before action was taken. The Board adopted the regulations and they constitute Title 17, Chapter 5, Subchapter 4, sections 30100 to 30397, inclusive, of the Administrative Code of California.

SECTION 1. *The Radiation Control Program.* The radiation control program of the State is designed to regulate all sources of radiation other than those for which regulatory responsibility is to be retained by the U.S. Atomic Energy Commission. As the term "radiation sources" is used hereinafter in this narrative, it is intended to mean those sources under the control of the State. The

sources are divided into two major categories; radioactive materials and radiation machines. Radioactive materials are to be regulated under a licensing program similar to the existing program of the U.S. Atomic Energy Commission, requiring possession of a license prior to acquisition or use of such materials. Radiation machines and certain generally licensed radioactive materials will be subject to a registration program involving the reporting of information by the registrant and the right of inspection by the State for compliance with prescribed safety standards. Each of these two major segments of the program is to be supported by a schedule of fees which relates to that specific part of the program. The agency charged with the responsibility of promulgating regulations and issuing licenses is the State Department of Public Health. A portion of the inspection and enforcement activities will be delegated by specific agreement to the Division of Industrial Safety of the State Department of Industrial Relations and may be delegated to local health agencies of cities and counties as the latter develop and demonstrate competence.

The regulations adopted by the State Department of Public Health will be controlling in this program throughout the State. As agreements for the delegation of responsibility for inspection and enforcement by other agencies are developed, it is planned to insure that no duplication or overlapping or jurisdiction occurs.

SEC. 2. *Licensing.* Provision is made for the issuance of both specific and general licenses comparable to those issued by the U.S. Atomic Energy Commission. Such licenses are required for the possession of radioactive materials above exempt amounts or concentrations, regardless of the mode of formation of such materials.

The responsibility for licensing of radioactive materials has been assigned by statute to the State Department of Public Health. The statute requires that Department to enter into agreement with the Division of Industrial Safety of the Department of Industrial Relations for the performance of certain inspection and enforcement activities. When such an agreement is concluded, it will allocate to that Division, among other duties, the responsibility for technical evaluations of license applications relating to industrial uses in general, prior to issuance of such licenses by the Department of Public Health. The Department of Public Health will itself conduct such technical evaluations with respect to other uses. As authorized by the Statute, the Department of Public Health plans to enter into agreement with such local health agencies as demonstrate adequate competence, authorizing them to conduct technical evaluations of license applications.

It is planned to make pre-licensing inspection a part of the evaluation procedure in general. In connection with licensing procedures, provision is made to give opportunity for all interested persons to be heard. With respect to human use of radioactive materials, the Department of Public Health will appoint a committee of not less than three qualified physicians to review license applications and make recommendations thereon. The Department will also have on its staff one or more physicians with special competence in radiological health who will review the recommendations of this committee.

SEC. 3. *Inspection.* Inspection for compliance with regulations and with license conditions will be carried on by the Department of Public Health, the Division of Industrial Safety, and any local health agencies with which agreements have been made as described in section 2—Licensing. Each license will be assigned to a single agency for such purposes.

Based upon the existing number and kind of the specific licenses, a priority system will be established under which inspection of the most hazardous activities will be conducted at least once each six months, and the remainder on a less frequent basis, depending upon the relative hazard. Initial priorities will be established on the basis of the pre-licensing evaluation and may be modified in accordance with subsequent inspections. It is expected that all licensed activities will be inspected at least once in two years.

Most inspections will be scheduled visits; a significant number may be on an unannounced basis. Inspection visits will usually entail a comprehensive review by the inspector of the licensee's equipment, facilities, in the handling or storage of radioactive material, the procedures in effect, including actual operation, and interviewing the personnel directly involved. The inspector will review the licensee's survey methods and results, personnel monitoring practices and results, the posting and labeling used, the instructions to personnel, and the methods and apparent effectiveness of maintaining control of people in the restricted area. He will review the licensee's records of receipts, transfers, and inventory of licensed material. He may physically check the inventory. He will examine records concerning disposal to the sewerage system and burial in the soil, if pertinent. He may make measurements of radiation levels. Prior to leaving the licensee's premises, he will meet with management to discuss the results of his inspection. During this meeting, he will attempt to answer questions concerning the regulatory program.

The inspector will prepare a report in sufficient detail to inform his supervisor of the facts and circumstances observed during the inspection. These reports will provide the basis for any necessary enforcement action. Appropriate elements of this information will be filed in the various agencies as needed. The Department of Public Health will review the operation of this system to insure that timely and adequate inspections are performed and that appropriate actions are taken.

In addition, there will be investigations of incidents and complaints involving licensed materials and operations to determine the cause, the steps taken by the licensee to cope with the incident, whether or not there was noncompliance with a regulation, and the steps the licensee is taking to avoid recurrence of the incident.

Licensees will be informed of the results of all inspections, first orally at the time of the inspection, and by letter or notice from the inspecting agency.

SEC. 4. *Enforcement.* Reports of inspections of licensees' activities will be evaluated by the inspecting agency to determine the status of compliance of the licensees with license conditions and regulations. If no item of noncompliance is observed, the licensee is so informed. If only minor matters of noncompliance, such as improper signs, failure to label, etc., are involved, which, at the time of the inspection, the licensee agrees to correct, the licensee will be informed in writing of the items of noncompliance and that corrective action will be reviewed during the next inspection. If the inspection reveals a noncompliance of a more serious nature, the licensee will be required to inform the inspecting agency in writing, usually within 15 to 30 days, as to corrective action taken and the date completed. In these cases, the inspecting agency representative will either conduct a prompt follow-up inspection or the matter will be reviewed during a regular inspection to insure that corrective action has, in fact, been accomplished. If the reply does not satisfactorily explain the noncompliance and assure that further violations will be prevented, the inspecting agency will take such administrative actions as are available to them.

It is expected that most of the enforcement functions will be administratively consummated by the inspecting agency. In cases where this is not successful, the inspecting agency will refer the matter to the State Department of Public Health, which may issue an order to show cause why the license should not be modified or terminated. In that event, there is provision for formal hearing in accordance with the California Administrative Procedures Act, and for judicial review of the final order resulting from such hearing. There is also provision for emergency action without notice or hearing, but such emergency action is subject to a prompt hearing upon request of the licensee. Among the enforcement procedures available to the State Department of Public Health are modification, suspension, or revocation of licenses, injunctive relief, and criminal sanctions afforded in the courts.

SEC. 5. *Participation by other agencies.* The statute provides for participation in the radiation control program by the State Division of Industrial Safety and by local health agencies in accordance with agreements that may be made between such agencies and the State Department of Public Health, subject to review by the Coordinator of Atomic Energy Development and Radiation Protection. Such agreements will permit the technical evaluation of license applications, the conducting of inspections for compliance with licenses and regulations, and such enforcement activities as may be administratively consummated within the agency. When further enforcement proceedings are required, involving formal hearings upon the suspension or revocation of licenses, such hearings will be conducted by the State Department of Public Health. Participating agencies will be required to maintain equivalent standards to those maintained by the State Department of Public Health with respect to educational and experience requirements of technical personnel engaged in the program, numbers of personnel in proportion to numbers of assigned licenses, adequacy of kinds and amounts of equipment and facilities, and procedures followed in inspection and enforcement. Inspecting agencies will be required to insure compliance by licensees with the license conditions and with the rules and regulations promulgated under the Radiation Control Law.

The statute permits the existence of local ordinances and regulations that are consistent with State Law and regulations. It provides that only the State shall assess a fee and that the proceeds from such fees shall be equitably distributed between the participating agencies. These provisions will be incorporated in agreements for the participation of such agencies in the program.

SEC. 6. *Organization and Personnel.* The radiation control program will be established in the Bureau of Radiological Health, an existing organizational unit of the State Department of Public Health. Technical positions in the existing program of this bureau are listed below. Personnel will be utilized in the control program to the degree required.

Acting Chief.
Senior Health Physicist.
Senior Engineer.
4 Associate Health Physicists—One position unfilled.
Associate Statistician.
2 Consultant Physicians—One position unfilled.
Consultant Engineer.

Upon consummation of an agreement with the AEC, the following additional personnel will be employed, as available, to perform license evaluations and to provide supervision over the inspection program:

1 Supervising Health Physicist.
2 Senior Health Physicists.
1 Associate Health Physicist.

The Department expects to maintain as inspectors qualified personnel trained in health physics in the approximate ratio of one for each 175 licensees. During the initial phases, the equivalent number of man-years is planned to be devoted to these purposes by the existing staff. This ratio of inspectors to licenses will also apply to other agencies having inspectional responsibilities.

The educational and experience requirements for the position categories directly related to the licensing program are as follows:

Supervising Health Physicist: Bachelor's degree in physical or life sciences, including or supplemented by courses in health physics or radiation biology. Seven years of responsible professional experience in health physics or a closely related field, at least three years of which must have included principal responsibility for a major program of radiological health.

Senior Health Physicist: Graduation from college with major work in the applied or life sciences and including or supplemented by at least four courses in nuclear or health physics or radiation biology. Five years of responsible professional experience in health physics or a closely related field, at least two years of which must have included responsibility for a major program in radiological health. (Master's degree or equivalent academic work in health physics or closely related fields may be substitutes for two years of experience; one year of Atomic Energy Commission fellowship training may be substituted for one year of experience.) As an alternate to these requirements, two years of experience as an Associate Health Physicist in the California State service will be acceptable.

Associate Health Physicist: Equivalent of college graduation with major work in physical or life sciences, including or supplemented by at least two courses in nuclear or health physics or radiation biology. Three years of responsible professional experience (excluding routine radiation monitoring and surveys) in health physics or closely related fields. (One year of full time graduate work in health physics or closely related fields, or completion of one-year Atomic Energy Commission health physics fellowship may be substituted for one year of required experience.)

IDENTIFICATION OF CARCASSES OF CERTAIN HUMANELY SLAUGHTERED LIVESTOCK

List of Humane Slaughterers

Pursuant to section 4 of the Act of August 27, 1958 (7 U.S.C. 1904) and the statement of policy thereunder in 9 CFR Part 181 the following table lists the establishments operated under Federal inspection under the Meat Inspection Act (21 U.S.C. 71 et seq.) which were officially reported on January 1, 1962, as humanely slaughtering and handling on that date the species of livestock respectively designated for such establishments in the table. Establishments reported after January 1, as using humane methods on January 1 or a later date in January, will be listed in a supplemental list. Previously published lists represented establishments reported in December 1961 or January 1962 as humanely slaughtering and handling the designated species of livestock on December 1 or some later date in December 1961 (27 F.R. 18, 592 and 839). The establishment number given with the name of the establishment is branded on each carcass of livestock inspected at that establishment. The table should not be understood to indicate that all species of livestock slaughtered at a listed establishment are slaughtered and handled by humane methods unless all species are listed for that establishment in the table. Nor should the table be understood to indicate that the affiliates of any listed establishment use only humane methods:

CIGAR-FILLER (TYPE 41) TOBACCO

Notice of Referendum

Notice is hereby given that on February 20, 1962, a referendum will be held of farmers engaged in the production in 1961 of cigar-filler (type 41) tobacco pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended. Notice that consideration would be given to establishing a date for holding the referendum was given in 26 F.R. 9651. The purpose of the referendum is to determine whether the farmers voting favor national marketing quotas for each of the 1962–63, 1963–64 and 1964–65 marketing years for such kind of tobacco. The referendum will be conducted in accordance with the provisions of the act and the regulations governing the holding of referenda on marketing quotas (23 F.R. 3432, 7285; 25 F.R. 5907; and 26 F.R. 10208).

In order that arrangements for holding the referendum may be made in an orderly manner and as much advance notice as possible be given of the date of the referendum, it is essential that this be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the 30-day effective date requirement of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest and this notice shall be effective upon filing of this document with the Director, Office of the Federal Register.

Signed at Washington, D.C., this 30th day of January 1962.

Notice is hereby given that application has been made to the Board of Governors of the Federal Reserve System pursuant to section 3(a)(2) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842), by C. B. Investment Corp., which is a bank holding company located in Houston, Tex., for the prior approval of the Board of the acquisition by applicant of 932 shares of the 10,000 additional voting shares to be issued of The First National Bank of Port Arthur, Port Arthur, Tex.

In determining whether to approve this application submitted pursuant to section 3(a)(2) of the Bank holding Company Act, the Board is required by that act to take into consideration the following factors: (1) The financial history and condition of the company and the bank concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of such acquisition would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking.

Not later than fifteen (15) days after the publication of this notice in the FEDERAL REGISTER, comments and views regardings the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington 25, D.C.

Dated at Washington, D.C., this 29th of January 1962.

By order of the Board of Governors.

[SEAL] MERRITT SHERMAN,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. RI62-307]

SHELL OIL CO.

Order Providing for Hearing on and Suspension of Proposed Change in Rate and Allowing Increased Rate To Become Effective

JANUARY 26, 1962.

On December 28, 1961, Shell Oil Co. (Shell), 50 West 50th Street, New York 20, N.Y., tendered for filing a proposed change in its presently effective rate schedule covering gas produced from the Hugoton Field, Grant County, Kans., and sold subject to the jurisdiction of this Commission to Socony Mobil Oil Co., Inc. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of change, dated December 26, 1961.

Rate schedule designation: Supplement No. 7 to Shell's FPC Gas Rate Schedule No. 77.

Effective date: January 28, 1962. (Effective date is the first day after expiration of the required thirty days' notice.)

Rate in effect: 10.00 cents per Mcf at 14.65 psia.

Proposed increased rate: 11.00 cents per Mcf at 14.65 psia.

Annual increase: $400.

The proposed increased rate reflects a revenue-sharing agreement which is based upon Socony's resale rate to Cities Service. Socony's rate is in effect subject to refund in Docket No. RI61-506. therefore, the increased rate and charge proposed by Shell may be unjust, unreasonable, unduly discriminatory or preferential; or otherwise unlawful.

The Commission finds: It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the Commission enter upon hearing concerning the lawfulness of the changed rate proposed by Shell and that Supplement No. 7 to Shell's FPC Gas Rate Schedule No. 77 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), public hearing shall be held upon the date to be affixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in the above-designated supplement.

(B) Pending hearing and decision thereon, Supplement No. 7 to Shell's Rate Schedule No. 77 is hereby suspended and the use thereof deferred until January 29, 1962, and thereafter until such further time as it is made effective in the manner prescribed by the Natural Gas Act: *Provided, however,* That said supplement shall become effective subject to refund on the date and in the manner herein prescribed if within 20 days from the date of issuance of this order Shell shall execute and file under the captioned and above-designated docket number with the Secretary of the Commission its agreement and undertaking to comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, accompanied by a certificate showing service of copies thereof upon the purchaser under the rate schedule involved. Unless Shell is advised to the contrary within 15 days after the filing of its agreement and undertaking, such agreement and undertaking shall be deemed to have been accepted.

(C) Neither the supplement hereby suspended, nor the rate schedule sought to be altered thereby, shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37) on or before March 15, 1962.

By the Commission.

GORDON M. GRANT,
Acting Secretary.

[1] The stated effective date is the effective date proposed by respondent.
[2] Redetermined rate increase.
[3] The pressure base is 14.65 psia.
[4] Includes dehydration charge of 0.5 cent per Mcf paid by buyer.
[5] Includes 1.75 cents per Mcf tax reimbursement.
[6] Pressure base is 15.025 psia.
[7] Periodic rate increase.
[8] The stated effective date is the first day after expiration of the required statutory notice.
[9] Includes 0.5 cent per Mcf for gathering and dehydration charged by seller.
[10] Tax reimbursement.
[11] Favored-Nation rate increase.
[12] Includes 0.25 cent per Mcf dehydration charge paid by buyer.
[13] Includes 1.75 cents per Mcf Louisiana severance tax reimbursement.

[1] This order does not provide for the consolidation for hearing or disposition of the several matters covered herein, nor should it be so construed.

Pan American Petroleum Corp.'s (Pan American) notice of change reflecting a tax increase for gas sold to Texas Eastern Transmission Corp. from the Port Lynn Field, Miller County, Ark., was submitted pursuant to Pan American's contract clause concerning additional taxes and reflects reimbursement of a portion of the newly enacted Arkansas gas conservation assessment (87.5 percent of 0.05 cent) effective January 1, 1962.

The proposed increased rates exceed the applicable area price levels set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR Ch. I, Part 2, § 2.56).

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon hearings concerning the lawfulness of the several proposed changes and that the above-designated supplements be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), public hearings shall be held upon dates to be fixed by notices from the Secretary concerning the lawfulness of the several proposed increased rates and charges contained in the above-designated supplements.

(B) Pending hearings and decisions thereon, the above-designated rate supplements are hereby suspended and the

use thereof deferred until the date indicated in the above "Date Suspended Until" column, and thereafter until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplements hereby suspended, nor the rate schedules sought to be altered thereby, shall be changed until these proceedings have been disposed of or until the periods of suspension have expired, unless otherwise ordered by the Commission.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before March 12, 1962.

By the Commission.

The Applicants in Docket Nos. CI61-470, CI61-483, CI61-688, CI61-1685, CI62-149, CI62-278, and CI62-279 state that the volume of gas available for delivery under the respective contracts has declined to the point where it is no longer economically feasible to continue the operation.

The Applicant in Docket No. CI62-14 seeks authorization to terminate deliveries of gas from two wells to Hope Natural Gas Co. in order to divert such gas through its own production system to its Fairmont, W. Va., plant. Hope Natural Gas Co. has agreed to partial cancellation of the gas purchase contract, the application states.

The Applicant in Docket Nos. CP62-117 and CP62-118 seeks authorization to abandon service from its pipelines and to remove positive meters and appurtenant facilities. The purchasers of the gas transported through these facilities have requested and the Applicant has agreed to termination of service and cancellation of the gas purchase contracts.

Each of the independent producer Applicants has filed a notice of cancellation of its related rate schedule.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 6, 1962 at 9:30 a.m., e.s.t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before February 23, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1961 and Succeeding Crop Years

POTATOES

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended, the above-identified regulations are amended effective beginning with the 1962 crop year for potatoes in the following respects:

§ 401.3 [Amendment]

1. The table following paragraph (a) of § 401.3 of this chapter is amended effective beginning with the 1962 crop year for potatoes by adding the following insertion immediately below that portion of the table showing a closing date for peanuts:

Potatoes	May 15

2. The following section is added:

§ 401.37 The potato endorsement.

The provisions of the potato endorsement for the 1962 and succeeding crop years are as follows:

1. *Causes of loss insured against.* The insurance provided is against unavoidable loss of production due to wildlife, insect infestation, plant disease, earthquake, drought, flood, hail, wind, frost, freeze, lightning, fire, excessive rain, snow, hurricane, tornado and any other unavoidable causes of loss due to adverse weather conditions, subject, however, to any exceptions, exclusions or limitations with respect to such causes of loss that are set forth on the county actuarial table.

2. *Insured crop.* The insured crop shall be potatoes of the variety shown on the county actuarial table as insurable. Insurance shall not attach on any insurance unit on which the planted acreage is less than two acres.

3. *Production guarantee and price.* (a) The provisions of section 3 of the policy with respect to guaranteed production and amounts of insurance per acre shall not be applicable under this endorsement. For each crop year of the contract the production guarantee, and the price at which indemnities shall be computed shall be those established by the Corporation and shown on the county actuarial table.

(b) At the time the application for insurance is made the applicant shall elect the price at which indemnities shall be computed from among those shown on the county actuarial table. If such applicant fails to make an election or elects a price not shown on the actuarial table the price which shall be in effect shall be the amount provided on the county actuarial table for such purposes. As to any succeeding crop year any insured may change the price which was in effect for a prior crop year and make a new election by notifying the county office in writing of such election before contracts are terminated for indebtedness for the crop year for which the election is to become effective. If no such change is made the price at which indemnities shall be computed shall be the price most recently in force but shall not exceed the maximum price as shown on the county actuarial table.

4. *Insurance period.* Insurance on any insured acreage shall attach at the time the potatoes are planted and shall cease upon the earlier of harvest or October 20 of the crop year.

5. *Claims for loss.* (a) In lieu of subsection 11(c) of the policy, the following shall apply: Losses shall be determined separately for each insurance unit (hereinafter called "unit"). The amount of loss with respect to any unit shall be determined by (1) multiplying the insured acreage of potatoes on the unit by the applicable production guarantee per acre, which product shall be the production guarantee for the unit, (2) subtracting therefrom the total production to be counted for the unit, (3) multiplying the remainder by the insured interest, and (4) multiplying this result by the applicable price for computing indemnities: *Provided,* That if for the insurance unit the insured fails to report all of his interest or insurable acreage the amount of loss shall be determined with respect to all of his interest and insurable acreage, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under section 2 of this policy, the amount of loss shall be reduced proportionately.

The total production to be counted for an insurance unit shall be determined by the Corporation and shall include all harvested production and any appraisals made by the Corporation for unharvested, or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or put to another use without the consent of the Corporation: *Provided,* That the total production to be counted for any acreage not harvested nor considered as harvested within the meaning of the term "harvested" shall be not less than 25 percent of the production guarantee for such acreage: *Provided, further,* That the production to be counted for any acreage of potatoes which is abandoned or put to another use without the consent of the Corporation shall be the production guarantee provided on the county actuarial table for such acreage.

(b) Notwithstanding the provisions of paragraph (a) of this section, if the production to be counted does not meet the quality specifications shown on the county actuarial table due to insurable causes occurring within the insurance period it shall be reduced by the factor for that purpose shown on such actuarial table.

6. *Meaning of terms.* For the purpose of insurance on potatoes the terms: (a) "Insurance unit," notwithstanding section 21(g) of the policy, means the insurable acreage of potatoes in the county in which (1) one person at the time of planting has the entire interest in the crop, or (2) the same two or more persons at the time of planting have the entire interest in the crop: *Provided, however,* The Corporation and the insured may agree in writing before insurance attaches in any crop year to divide the insured's insurable acreage of potatoes in the county into two or more units, taking into consideration separate and distinct farm operations.

(b) "Harvest" or "harvested" means the digging of potatoes. For the purpose of determining any loss under the contract any acreage shall not be considered as harvested unless the Corporation determines that at the time of harvest the production harvested therefrom equals not less than 25 percent of the production guarantee for such acreage.

7. *Cancellation, termination for indebtedness, and discount dates.* (a) For each crop year of the contract the cancellation date shall be the December 31 and the termination date for indebtedness shall be the May 15 immediately preceding the beginning of the crop year for which the cancellation or the termination is to become effective.

(b) For the 1962 crop year only the discount date shall be December 31, 1962.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516)

Adopted by the Board of Directors on January 22, 1962.

[SEAL] EARLL H. NIKKEL,
Secretary,
Federal Crop Insurance Corporation.

Approved: January 30, 1962.

JAMES T. RALPH,
Assistant Secretary.

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1961 and Succeeding Crop Years

BARLEY

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended, the above-identified regulations are amended effective beginning with the 1963 crop year in the following respects:

1. Subparagraph (1) of paragraph (a) of § 401.3 of this chapter is amended, effective beginning with the 1963 crop year, to read as follows:

§ 401.3 Application for insurance.

(a) • • •

(1) In all counties in Oregon and Washington, in any county in Idaho with an October 31 closing date, and in any county in Colorado with an August 31 closing date, in which barley is an insurable crop, an application for insurance on barley may be filed until the March 31 following the closing date, provided that in such cases winter barley will not be insured for the first barley crop year of the contract.

2. The portion of the table following paragraph (a) of § 401.3 of this chapter under the heading "Barley" is amended effective beginning with the 1963 crop year by inserting the following immediately below the line pertaining to "California":

(Closing Date)

BARLEY

Colorado:	
Logan, Phillips and Sedgwick Counties	Aug. 31
All other Colorado Counties	Mar. 31

3. The barley endorsement, published in § 401.17 of this chapter, is amended effective beginning with the 1963 crop year to read as follows:

§ 401.17 The barley endorsement.

The provisions of the barley endorsement for the 1963 and succeeding crop years are as follows:

1. *Causes of loss insured against.* The insurance provided is against unavoidable loss of production due to wildlife, insect infestation, plant disease, earthquake, drought, flood, hail, wind, frost, freeze, winter-kill, lightning, fire, excessive rain, snow, hurricane, tornado, and any other unavoidable cause of loss due to adverse weather conditions, subject however, to any exceptions, exclusions or limitations with respect to such causes of loss that are set forth in the county actuarial table.

2. *Insured crop.* Insurance shall not attach on acreage on which it is determined by the Corporation that barley is (a) seeded with flax or other small grains or vetch, or (b) not seeded for harvest as grain as determined by the Corporation.

3. *Bushel guarantee, and price per bushel.* (a) The provisions of section 3 of the policy with respect to guaranteed production and amounts of insurance per acre shall not be applicable under this endorsement. For each crop year of the contract the bushel guarantee, and the price at which indemnities shall be computed shall be those established by the Corporation and shown on the county actuarial table.

(b) The bushel guarantee per acre shown on the county actuarial table shall be increased by two bushels for any harvested acreage on which the amount harvested is two or more bushels per acre.

At the time the application for insurance is made the applicant shall elect a price per bushel at which indemnities shall be computed from among those shown on the county actuarial table. Any insured with a contract in force prior to the 1963 crop year may elect the price per bushel to be in effect beginning with the 1963 crop year. If any applicant or insured fails to make an election or elects a price per bushel not shown on the actuarial table the price per bushel which shall be in effect shall be the amount provided on the county actuarial table for such purposes.

As to any succeeding crop year any insured may change the price per bushel which was in effect for a prior crop year and make a new election by notifying the county office in writing of such election before contracts are terminated for indebtedness for the crop year for which the election is to become effective. If no such change is made, the price per bushel at which indemnities shall be computed shall be the price most recently in force under the contract but for any crop year shall not exceed the maximum price per bushel as shown on the county actuarial table.

4. *Insurance period.* Insurance on any insured acreage shall attach at the time the barley is seeded and shall cease upon threshing or removal from the field, whichever occurs first, but in no event shall insurance remain in effect later than October 31 of the calendar year in which the barley is normally harvested.

5. *Claims for loss.* (a) In lieu of subsection 11(c) of the policy, the following shall apply: Losses shall be determined separately for each insurance unit (hereafter called "unit"). The amount of loss with respect to any unit shall be determined by (1) multiplying the insured acreage of barley on the insurance unit by the applicable bushel guarantee per acre, which product shall be the bushel guarantee for the unit, (2) subtracting therefrom the total production to be counted for the unit, (3) multiplying the remainder by the insured interest, and (4) multiplying this result by the applicable price per bushel for computing indemnities: *Provided*, That if for the insurance unit the insured fails to report all of his interest or insurable acreage the amount of loss shall be determined with respect to all of his interest and insurable acreage, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under section 2 of the policy, the amount of loss shall be reduced proportionately.

The total production to be counted for a unit shall be determined by the Corporation and, subject to the provisions hereinafter, shall include all threshed production and any appraisals made by the Corporation for unthreshed, unharvested, or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or put to another use without the consent of the Corporation: *Provided*, That the production to be counted on any acreage of barley which, with the consent of the Corporation, is planted in the current crop year, before harvest becomes general, to any other crop insured under the regulations of the Corporation, shall be 50 percent of the bushel guarantee for such acreage or the appraised production whichever is greater: *Provided*, That on any acreage from which less than two bushels per acre are harvested, the total production to be counted under the provision of this section shall be that amount in excess of two bushels per acre, except that the production to be counted for any acreage of barley which is abandoned or put to another use without the consent of the Corporation shall be the bushel guarantee provided on the county actuarial table.

(b) The total production to be counted shall include any harvested production from acreage initially seeded for purposes other than for harvest as grain as determined by the Corporation.

(c) In determining total production volunteer small grains and volunteer vetch growing with the seeded barley crop, and small grains seeded in the growing barley crop on acreage on which the Corporation has not given its consent to be put to another use shall be counted as barley on a weight basis.

(d) Notwithstanding the provisions of paragraph (a) of this section for determining production to be counted, the production to be counted of any threshed barley which does not grade No. 4 or better (determined in accordance with Official Grain Standards of the United States), because of poor quality due to insurable causes occurring within the insurance period and would not meet this grade requirement if properly handled, shall be adjusted by (1) dividing the value per bushel of the damaged barley as determined by the Corporation, by the market price per bushel at the local market for barley grading No. 4, at the time the loss is adjusted, and (2) multiplying the result thus obtained by the number of bushels of such damaged barley.

6. *Meaning of Terms.* For the purpose of insurance on barley the terms:

(a) "Insurance unit," notwithstanding section 21(g) of the policy, means the insurable acreage of barley in the county in which (1) one person at the time of planting has the entire interest in the crop, or (2) the same two or more persons at the time of planting have the entire interest in the crop: *Provided, however*, The Corporation and the insured may agree in writing before insurance attaches in any crop year to divide the insured's insurable acreage of barley in the county into two or more units, taking into consideration separate and distinct farm operations.

(b) "Harvest" means the mechanical severance from the land of matured barley for threshing.

7. *Cancellation and termination for indebtedness dates.* For each year of the contract the cancellation date and the termination date for indebtedness are the following applicable dates immediately preceding the beginning of the crop year for which the cancellation or the termination is to become effective: *Provided, however*, That for the purposes of determining the applicable cancellation and termination dates only, and notwithstanding section 21(e) of the policy, the crop year for spring planted barley insured in all counties with a March 15 cancellation date shall be considered to mean that period in which the winter barley crop in such counties is normally planted and normally harvested, and shall be designated by reference to the calendar year in which the crop is normally harvested.

State and county	Cancellation date	Termination date for indebtedness
California	Mar. 15	Aug. 31
Colorado:		
Logan, Phillips, and Sedgwick Counties	do	Do.

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1961 and Succeeding Crop Years

WHEAT

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended, the above-identified regulations are amended effective beginning with the 1963 crop year in the following respects:

1. That portion of subparagraph (2) preceding the first colon of paragraph (a) of § 401.3 of this chapter is amended, effective beginning with the 1963 crop year, to read as follows:

§ 401.3 Application for insurance.

(a) • • •

(2) In counties where wheat is an insurable crop an application for insurance on wheat may be filed until the March 31 following the closing date in all counties in Montana, in any county in North Dakota and South Dakota in which insurance is not limited to spring wheat only on the county actuarial table, in Linn and Malheur Counties, Oregon, and in Bonneville, Cassia, Fremont, and Madison Counties, Idaho, but in any such case for the first wheat crop year of the contract, winter wheat in all of such counties and spring wheat planted on land which is non-irrigated in Bonneville, Cassia, Fremont and Madison Counties, Idaho, will not be insured:

2. The portion of the table following paragraph (a) of § 401.3 of this chapter under the heading "Wheat" is amended effective beginning with the 1963 crop year to read as follows:

(Closing Dates)

WHEAT

California, Colorado, Kansas, Montana, Nebraska, New Mexico, Oklahoma, Texas, and Wyoming	Aug. 31
Idaho:	
Idaho County and all Idaho counties lying north thereof	Oct. 31
All Idaho counties lying south of Idaho County, except Bingham, Gooding, Jerome, Lincoln, Minidoka and Twin Falls Counties	Sept. 15
Bingham, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls Counties	Mar. 31
Minnesota and North Dakota	Mar. 31
North Carolina, Kentucky, Tennessee and South Carolina	Oct. 15
Oregon and Washington	Oct. 31
South Dakota:	
Bennett, Faulk, Hand, Jones, Lyman, Mellette, Potter, Sully, and Tripp Counties	Aug. 31
All other South Dakota Counties	Mar. 31
All other States	Sept. 15

3. The wheat endorsement, published in § 401.32 of this chapter, is amended effective beginning with the 1963 crop year to read as follows:

§ 401.32 The wheat endorsement.

The provisions of the wheat endorsement for the 1963 and succeeding crop years are as follows:

1. *Causes of loss insured against.* The insurance provided is against unavoidable loss of production due to wildlife, insect infestation, plant disease, earthquake, drought, flood, hail, wind, frost, freeze, winter-kill, lightning, fire, excessive rain, snow, hurricane, tornado, and any other unavoidable cause of loss due to adverse weather conditions, subject however, to any exceptions, exclusions or limitations with respect to such causes of loss that are set forth in the county actuarial table.

2. *Insured crop.* Insurance shall not attach on acreage on which it is determined by the Corporation that wheat is (a) seeded with flax or other small grains, vetch, Austrian winter peas, or dry edible peas, or (b) not seeded for harvest as grain as determined by the Corporation.

3. *Annual premium.* (a) There will be a reduction in the annual wheat premium for each insurance unit of 4 percent for the first full 200 acres of insured wheat acreage on the unit and an additional 2 percent reduction for each additional full 100 acres: *Provided, however*, That the total reduction shall not exceed 20 percent.

(b) Whether or not the insured is eligible for the reduction provided in section 4(b) of the policy, the insured's annual wheat premium may be reduced in lieu thereof for any year by not to exceed 50 percent if it is determined by the Corporation that the accumulated balance (expressed in bushels) of premiums over indemnities on consecutively insured wheat crops preceding the current crop year equals or exceeds his total bushel guarantee based on the amount per acre shown on the county actuarial table.

4. *Bushel guarantee and price per bushel.* (a) The provisions of section 3 of the policy with respect to guaranteed production and amounts of insurance per acre shall not be applicable under this endorsement. For each crop year of the contract the bushel guarantee, and the price at which indemnities shall be computed shall be those established by the Corporation and shown on the county actuarial table.

(b) The bushel guarantee per acre shown on the county actuarial table shall be increased by one and one-half bushels for any harvested acreage on which the amount harvested is one and one-half or more bushels per acre.

At the time the application for insurance is made the applicant shall elect a price per bushel at which indemnities shall be computed from among those shown on the county actuarial table. Any insured with a contract in force prior to the 1963 crop year may elect the price per bushel to be in effect beginning with the 1963 crop year. If any applicant or insured fails to make an election or elects a price per bushel not shown on the actuarial table, the price per bushel which shall be in effect shall be the amount provided on the county actuarial table for such purposes.

As to any succeeding crop year any insured may change the price per bushel which was in effect for a prior crop year and make a new election by notifying the county office in writing of such election before contracts are terminated for indebtedness for the crop year for which the election is to become effective. If no such change is made, the price per bushel at which indemnities shall be computed shall be the price most recently in force under the contract but for any crop year shall not exceed the maximum price per bushel as shown on the county actuarial table.

5. *Insurance period.* Insurance on any insured acreage shall attach at the time the wheat is seeded and shall cease upon threshing or removal from the field, whichever occurs first, but in no event shall insurance remain in effect later than October 31 of the calendar year in which the wheat is normally harvested.

6. *Claims for loss.* (a) In lieu of subsection 11(c) of the policy, the following shall apply: Losses shall be determined separately for each insurance unit (hereafter called "unit"). The amount of loss with respect to any unit shall be determined by (1) multiplying the insured acreage of wheat on the unit by the applicable bushel guarantee per acre, which product shall be the bushel guarantee for the unit, (2) subtracting therefrom the total production to be counted for the unit, (3) multiplying the remainder by the insured interest, and (4) multiplying this result by the applicable price per bushel for computing indemnities: *Provided*, That if for the insurance unit the insured fails to report all of his interest or insurable acreage the amount of loss shall be determined with respect to all of his interest and insurable acreage, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under section 2 of the policy, the amount of loss shall be reduced proportionately.

The total production to be counted for a unit shall be determined by the Corporation and, subject to the provisions hereinafter, shall include all threshed production and any appraisals made by the Corporation for unthreshed, unharvested, or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or

put to another use without the consent of the Corporation: *Provided*, That the production to be counted on any acreage of wheat which, with the consent of the Corporation, is planted in the current crop year, before harvest becomes general, to any other crop insured under the regulations of the Corporation, shall be 50 percent of the bushel guarantee for such acreage or the appraised production whichever is greater: *Provided*, That on any acreage from which less than one and one-half bushels per acre are harvested, the total production to be counted under the provision of this section shall be that amount in excess of one and one-half bushels per acre, except that the production to be counted for any acreage of wheat which is abandoned or put to another use without the consent of the Corporation shall be the bushel guarantee provided on the county actuarial table.

(b) The total production to be counted shall include any harvested production from acreage initially seeded for purposes other than for harvest as grain as determined by the Corporation.

(c) In determining total production volunteer small grains, volunteer Austrian winter peas, volunteer dry edible peas, and volunteer vetch growing with the seeded wheat crop, and small grains seeded in the growing wheat crop on acreage on which the Corporation has not given its consent to be put to another use, shall be counted as wheat on a weight basis.

(d) Notwithstanding the provisions of paragraph (a) of this section for determining production to be counted, the production to be counted of any threshed wheat which does not grade No. 3 or better, and in addition, does not grade No. 4 or 5 on the basis of test weight only but otherwise grades No. 3 or better (determined in accordance with Official Grain Standards of the United States) because of poor quality due to insurable causes occurring within the insurance period and would not meet these grade requirements if properly handled, shall be adjusted by (1) dividing the value per bushel of the damaged wheat as determined by the Corporation, by the market price per bushel at the local market at the time the loss is adjusted for wheat grading No. 3, and (2) multiplying the result thus obtained by the number of bushels of such damaged wheat.

7. *Meaning of terms.* For purposes of insurance on wheat the terms:

(a) "Insurance unit," notwithstanding section 21(g) of the policy, means the insurable acreage of wheat in the county in which (1) one person at the time of planting has the entire interest in the crop, or (2) the same two or more persons at the time of planting have the entire interest in the crop: *Provided, however*, The Corporation and the insured may agree in writing before insurance attaches in any crop year to divide the insured's insurable acreage of wheat in the county into two or more units, taking into consideration separate and distinct farm operations.

(b) "Harvest" means the mechanical severance from the land of matured wheat for threshing.

8. *Cancellation and termination for indebtedness dates.* For each year of the contract the cancellation date and termination date for indebtedness are the following applicable dates immediately preceding the beginning of the crop year for which the cancellation or the termination is to become effective: *Provided, however*, That for purposes of determining the applicable cancellation and termination dates only, and notwithstanding section 21(e) of the policy, the crop year for spring planted wheat insured in all counties with a March 15 cancellation date shall be considered to mean that period in which the winter wheat crop in such counties is normally planted and normally harvested, and shall be designated by reference to the calendar year in which the crop is normally harvested: *And provided, further*, That in any county in Montana and any county in North Dakota and South Dakota in which insurance is not limited to spring wheat only on the county actuarial table, an insured may cancel his wheat crop insurance contract applicable to any such county for any crop year any time prior to the December 31 following the cancellation date for that crop year if he does not have an interest in any winter wheat crop seeded for harvest in such county in that crop year, as determined by the Corporation.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Orange Reg. 3]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Limitation of Shipments

§ 905.309 Orange Regulation 3.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, including Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of oranges, including Temple oranges, grown in the production area, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on January 30, 1962, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of oranges, including Temple oranges, and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade, diameter, standard pack, and standard box, as used herein, shall have the same meaning as is given to the respective term in the United States Standards for Florida Oranges and Tangelos (§§ 51.1140–51.1178 of this title; 25 F.R. 8211).

(2) During the period beginning at 12:01 a.m., e.s.t., February 5, 1962, and ending at 12:01 a.m., e.s.t., February 12, 1962, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(i) Any oranges, including Temple oranges, grown in the production area, which do not grade at least U.S. No. 1 Russet;

(ii) Any oranges, except Temple oranges, grown in the production area, which are of a size smaller than 2⅜6 inches in diameter, except that a tolerance of 10 percent, by count, of oranges smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in said United States Standards for Florida Oranges and Tangelos: *Provided*, That in determining the percentage of oranges in any lot which are smaller than 2⅜6 inches in diameter, such percentage shall be based only on those oranges in such lot which are of a size 2⅛6 inches in diameter or smaller; or

(iii) Any Temple oranges, grown in the production area, which are of a size smaller than 2⅜6 inches in diameter, except that a tolerance of ten percent, by count, of Temple oranges smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in the aforesaid United States Standards for Florida Oranges and Tangelos.

[Grapefruit Reg. 3]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Limitation of Shipments

§ 905.310 Grapefruit Regulation 3.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 905 as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of all grapefruit, grown in the production area, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on January 30, 1962, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit, and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade, diameter, standard pack, and standard box, as used herein, shall have the same meaning as is given to the respective term in the United States Standards for Florida Grapefruit (§§ 51.750–51.783 of this title; 26 F.R. 163).

(2) During the period beginning at 12:01 a.m., e.s.t., February 5, 1962, and ending at 12:01 a.m., e.s.t., February 19, 1962, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(i) Any grapefruit, grown in the production area, which do not grade at least U.S. No. 1: *Provided*, That such grapefruit may have discoloration to the extent permitted under the U.S. No. 2 Russet grade, and may have slightly rough texture caused only by speck type melanose;

(ii) Any seeded grapefruit, grown in the production area, which are smaller than 3⅛6 inches in diameter, except that a tolerance of 10 percent, by count, of seeded grapefruit smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in said United States Standards for Florida Grapefruit; or

(iii) Any seedless grapefruit, grown in the production area, which are smaller than 3⅜6 inches in diameter, except that a tolerance of 10 percent, by count, of seedless grapefruit smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in said United States Standards for Florida Grapefruit.

[Tangerine Reg. 3]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Limitation of Shipments

§ 905.311 Tangerine Regulation 3.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of tangerines, grown in the production area, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on January 30, 1962, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the de-

cared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines, and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade, diameter, and standard pack, as used herein, shall have the same meaning as is given to the respective term in the United States Standards for Florida Tangerines (§§ 51.1810–51.1834 of this title; 25 F.R. 8216).

(2) During the period beginning at 12:01 a.m., e.s.t., February 5, 1962, and ending at 12:01 a.m., e.s.t., July 31, 1962, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(i) Any tangerines, grown in the production area, that do not grade at least U.S. No. 2 Russet; or

(ii) Any tangerines, grown in the production area, that are of a size smaller than the size that will pack 246 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions 9½ x 9½ x 19⅛ inches; capacity 1,726 cubic inches).

[Tangelo Reg. 3]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Limitation of Shipments

§ 905.312 Tangelo Regulation 3.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangelos, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of tangelos, grown in the production area, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after an open meeting of the Growers Administrative Committee on January 30, 1962, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangelos; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangelos, and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade, diameter, standard pack, and standard box, as used herein, shall have the same meaning as is given to the respective term in the United States Standards for Florida Oranges and Tangelos (§§ 51.1140–51.1178 of this title; 25 F.R. 8211).

(2) During the period beginning at 12:01 a.m., e.s.t., February 5, 1962, and ending at 12:01 a.m., e.s.t., July 31, 1962, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(i) Any tangelos, grown in the production area, which do not grade at least U.S. No. 2 Russet.

[Navel Orange Reg. 5]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

§ 907.305 Navel Orange Regulation 5.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act by tending to establish and maintain such orderly marketing conditions for such oranges as will provide, in the interests of producers and consumers, an orderly flow of the supply thereof to market throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish under the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on February 1, 1962.

(b) *Order.* (1) The respective quantities of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a.m., P.s.t., February 4, 1962, and ending at 12:01 a.m., P.s.t., February 11, 1962, are hereby fixed as follows:

(i) District 1: 225,000 cartons;

(ii) District 2: 375,000 cartons;

(iii) District 3: Unlimited movement;

(iv) District 4: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," "District 4," and "carton" have the same meaning as when used in said amended marketing agreement and order.

[Lemon Reg. 5]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

§ 910.305 Lemon Regulation 5.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011), because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on January 30, 1962.

(b) *Order.* (1) The respective quantities of lemons grown in California and Arizona which may be handled during the period beginning at 12:01 a.m., P.s.t., February 4, 1962, and ending at 12:01 a.m., P.s.t., February 11, 1962, are hereby fixed as follows:

(i) District 1: 9,300 cartons;

(ii) District 2: 186,000 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in the said amended marketing agreement and order.

[Lemon Reg. 6]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

§ 910.306 Lemon Regulation 6.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011), because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on January 30, 1962.

(b) *Order.* (1) During the period beginning at 12:01 a.m., P.s.t., February 4, 1962, and ending at 12:01 a.m., P.s.t., June 3, 1962, no handler shall handle any lemons, grown in District 1, District 2, or District 3, which are of a size smaller than 2.03 inches in diameter, which shall be the largest measurement at right angles to a straight line running from the stem to the blossom end of the fruit: *Provided,* That not to exceed 5 percent, by count, of the lemons in any type of container may measure less than 2.03 inches in diameter.

(2) As used in this section, "handle," "handler," "District 1," "District 2," and "District 3" shall have the same meaning as when used in said amended marketing agreement and order.

Dated: February 1, 1962.

PART 970—CARROTS GROWN IN SOUTH TEXAS

Limitation of Shipments

Findings. (a) Pursuant to Marketing Agreement No. 142 and Order No. 970 (7 CFR Part 970), regulating the handling of carrots grown in designated counties

in South Texas, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674), and upon the basis of the recommendation and information submitted by the South Texas Carrot Committee, established pursuant to said marketing agreement and order, and upon other available information, it is hereby found that the amendment to the limitation of shipments hereinafter set forth will tend to effectuate the declared policy of the act.

(b) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, or engage in public rule making procedure, and that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1001–1011) in that (1) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (2) more orderly marketing in the public interest than would otherwise prevail, will be promoted by regulating the handling of carrots in the manner set forth below, on and after the effective date of this amendment, (3) compliance with this amendment will not require any special preparation on the part of handlers which cannot be completed by the effective date, (4) reasonable time is permitted under the circumstances, for such preparation, (5) information regarding the committee's recommendation has been made available to producers and handlers in the production area, and (6) this amendment relieves restrictions on the handling of carrots grown in the production area.

Order, as amended. In § 970.302 (26 F.R. 10124, 27 F.R. 335) delete paragraph (b), and in lieu thereof substitute new paragraph (b), as set forth below.

§ 970.302 Limitation of shipments.

* * * * *

(b) *Sizing requirements*—(1) *Medium-to-large.* 1 3/16 inch minimum diameter to 1½ inches maximum diameter, 5½ inches minimum length;

(2) *Jumbos.* 1 inch minimum diameter to 3 inches maximum diameter and 5½ inches minimum length.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date. February 1, 1962, to become effective February 3, 1962.

Special Civil Air Regulation; Facilitation of Experiments With Exterior Lighting Systems

Special Civil Air Regulation No. SR–392B, adopted on February 25, 1957, permits experimentation with exterior lighting systems, which do not comply with the standards prescribed in the Civil Air Regulations, on aircraft with standard airworthiness certificates. Several conditions are imposed to insure that the number of aircraft engaged in the experiments is reasonably limited; that the experimental exterior lights are in fact installed for bona fide experimentation; and that the results of such experimentation become generally available. This special regulation expires on February 25, 1962.

In a notice of proposed rule making contained in Draft Release No. 61–27 and published in the FEDERAL REGISTER, December 23, 1961 (26 F.R. 12294), the Agency gave notice that it has under consideration the termination of SR–392B and requested comments from interested persons concerning this matter. In response to such request, the Agency has received numerous reports, arguments and other evidence. However, the volume of the comments received is such that there is not sufficient time remaining to review and evaluate such comments prior to the termination of SR–392B. Therefore, in order to afford the Agency the opportunity to fully consider all the relevant matter presented and to take whatever additional rule making action that may be indicated, it is necessary to extend the termination date of SR–392B to June 25, 1962.

Since this regulation continues in effect the provisions of the previous regulation and imposes no additional burden upon any person, compliance with the notice and public procedure provisions of the Administrative Procedure Act is unnecessary and good cause exists for making this regulation effective on less than 30 days' notice.

In consideration of the foregoing, the following Special Civil Air Regulation is adopted to become effective on February 3, 1962:

Contrary provisions of the Civil Air Regulations notwithstanding, experimental exterior lighting equipment which does not comply with the relevant specifications contained in the Civil Air Regulations may, subject to the approval of the Administrator, be installed and used on aircraft for the purpose of experimentation intended to improve exterior lighting for a period not to exceed six months: *Provided*, That:

(1) The Administrator may grant approval for additional periods if he finds that experiments can be reasonably expected to contribute to improvements in exterior lighting;

(2) Not more than 15 aircraft possessing a U.S. certificate of airworthiness may have installed at any one time experimental exterior lighting equipment of one basic type;

(3) The Administrator shall prescribe such conditions and limitations as may be necessary to insure safety and avoid confusion in air navigation;

(4) The person engaged in the operation of the aircraft shall disclose publicly the deviations of the exterior lighting from the relevant specifications contained in the Civil Air Regulations at times and in a manner prescribed by the Administrator; and

(5) Upon application for approval to conduct experimentation with exterior lighting, the applicant shall advise the Administrator of the specific purpose of the experiments to be conducted; and, at the conclusion of the approved period of experimentation, he shall advise the Administrator of the detailed results thereof.

This regulation supersedes Special Civil Air Regulation No. SR–392B and shall terminate June 25, 1962, unless sooner superseded or rescinded.

SUBCHAPTER C—AIRCRAFT REGULATIONS

[Reg. Docket No. 996; Amdt. 396]

PART 507—AIRWORTHINESS DIRECTIVES

Navion, Navion A, B, D, E, F, and G Aircraft

A proposal to amend Part 507 of the regulations of the Administrator to include an airworthiness directive requiring repetitive inspections of the gear actuating parts and replacement of defective parts for Navion, Navion A, B, D, E, F, and G aircraft, which will supersede AD 50–24–1 (21 F.R. 9499), was published in 26 F.R. 12042.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 507.10(a) of Part 507 (14 CFR Part 507), is hereby amended by adding the following new airworthiness directive:

NAVION. Applies to Navion, Navion A, B, D, E, F, and G aircraft.

Compliance required within the next 25 hours' time in service after the effective date of this AD and at each periodic inspection thereafter.

The landing gear selector valve end fitting P/N 145–58145–3 (heat treated and non-heat treated) has a service history of failure during attempts to extend the gear. To preclude further difficulties:

Inspect the gear actuating system in accordance with Navion Service Letter No. 81 dated March 31, 1961. Any defective parts found as a result of this inspection must be replaced prior to further flight.

This supersedes AD 50–24–1 (21 F.R. 9499).

This amendment shall become effective March 6, 1962.

Acting Director, Flight Standards Service.

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 61–FW–89]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

Alteration

On September 26, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 9053) stating that the Federal Aviation Agency proposed to extend intermediate altitude VOR Federal airway No. 1741 from the Chattanooga, Tenn., VOR as a 10-mile wide airway to the McDonough, Ga., VOR.

No adverse comments were received regarding the proposed amendment.

Interested persons have been afforded an opportunity to participate in the making of the rule herein adopted, and due consideration has been given all relevant matter presented.

The substance of the proposed amendment having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated in the notice, the following action is taken:

In § 600.1741 (26 F.R. 1093) the following changes are made:

a. In the caption "(Chattanooga, Tenn., to Cincinnati, Ohio)" is deleted and "(McDonough, Ga., to Cincinnati, Ohio)" is substituted therefor.

b. In the text "From the Chattanooga, Tenn., VOR via Bowling Green, Ky., VOR; INT of the Bowling Green VOR 009° and the Nabb, Ind., VOR 215° radials;" is deleted and "From the McDonough, Ga., VOR 10–mile wide airway to the Chattanooga, Tenn., VOR; thence via the Bowling Green, Ky., VOR; to the INT of the Bowling Green VOR 009° and the Nabb, Ind., VOR 215° radials;" is substituted therefor.

This amendment shall become effective 0001 e.s.t., April 5, 1962.

In the Matter of Lewis Apparel Stores, Inc., a Corporation, and Morris Lewis, Leon Lewis, and David Lewis, Individually and as Officers of Said Corporation

Consent order requiring operators of a large number of retail clothing stores in eastern and midwestern States to cease attempting to obtain information concerning alleged delinquent debtors by subterfuge through such practices as their use, on printed cards requesting the current address and employment of such delinquents, of the name "Regional Statistical Bureau" and a return address in Washington, D.C., both of which, together with the setup and phraseology of the form, represented and implied to the recipient that the request was being made by a branch of the United States Government.

The order to cease and desist, together with further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Lewis Apparel Stores, Inc., a corporation, and its officers, and Morris Lewis, Leon Lewis, and David Lewis, individually and as officers of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the obtaining of information concerning delinquent debtors, or in the collection of, or attempting to collect, accounts, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Using the name "Regional Statistical Bureau," or any other name of similar import, to designate, describe, or refer to respondents' business.

2. Representing, directly or by implication, that requests for information concerning delinquent debtors are from the United States Government, or any agency or branch thereof, or that their business is in any way connected with the United States Government.

3. Using, or placing in the hands of others for use, any forms, questionnaires or other materials, printed or written, which do not clearly and expressly state that the purpose for which the information is requested is that of obtaining information concerning delinquent debtors.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 16, 1961.

By the Commission.

SUBCHAPTER A—GENERAL

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Potassium Permanganate Preparations as Prescription Drugs

Since publication in the FEDERAL REGISTER of August 23, 1960 (25 F.R. 8073), of § 3.7 (21 CFR 3.7), additional information has been received about certain veterinary products. It is apparent that the items in question are unsuitable for use

by man and are unlikely to be diverted into human medicine channels. Therefore, the Commissioner of Food and Drugs, pursuant to section 701(a) of the Federal Food, Drug, and Cosmetic Act and under the authority delegated to him by the Secretary of Health, Education, and Welfare (25 F.R. 8625), orders that § 3.7(c) (2), (3), (4), and (5) be amended. As amended, these paragraphs read as follows:

§ 3.7 Potassium permanganate preparations as prescription drugs.

• • • • •

(c) • • •

(2) Potassium permanganate labeled for use as a prescription component in human drugs under the exemption provided in § 1.106(k) of this chapter or labeled for manufacturing use under the exemption provided in § 1.106(l) will be regarded as misbranded unless the label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

(3) These drugs will be regarded as misbranded when intended for veterinary use unless the label bears the legend, "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian"; *Provided, however,* That this shall not apply to a drug labeled and marketed for veterinary use if such drug contains not more than 50 percent of potassium permanganate and includes other ingredients which make it unsuitable for human use and unlikely that the article would be used in an attempt to induce abortion.

(4) Any preparation of potassium permanganate intended for over-the-counter sale for human use internally or by application to any mucous membranes or for use in the vagina will be regarded as misbranded under the provisions of section 502(f) (1) and (2) and section 502(j) of the act.

(5) Any other preparation of potassium permanganate intended for over-the-counter sale for human use will be regarded as misbranded under section 502(f)(1) and (2) and section 502(j) of the act unless, among other things, all of the following conditions are met:

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Tolerance for Residues of Sodium 2,2-Dichloropropionate

A petition was filed with the Food and Drug Administration by Dow Chemical Company, Midland, Michigan, requesting the establishment of a tolerance for residues of sodium 2,2-dichloropropionate, as 2,2-dichloropropionic acid, in or on coffee at 2 parts per million.

The Secretary of Agriculture has certified that this pesticide chemical is useful for the purposes for which a tolerance is being established.

After consideration of the data submitted in the petition and other relevant material which show that the tolerance established in this order will protect the public health, and by virtue of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)) and delegated to the Commissioner of Food and Drugs by the Secretary (25 F.R. 8625), the regulations for tolerances for pesticide chemicals in or on raw agricultural commodities are amended by adding to § 120.150 (21 CFR 120.150 (26 F.R. 1627)) a tolerance for the subject pesticide chemical in or on coffee:

§ 120.150 Tolerances for residues of sodium 2,2-dichloropropionate.

• • • • •

2 parts per million in or on coffee.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective on the date of its publication in the FEDERAL REGISTER.

Proposed Rule Making

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 959]

[AO–322–A1]

ONIONS GROWN IN SOUTH TEXAS

Decision With Respect to Proposed Amendments to Marketing Agreement and Order; and Referendum Order

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674), and the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Edinburg, Texas, November 28, 1961, pursuant to notice thereof which was published in the FEDERAL REGISTER (26 F.R. 10772), upon proposed amendments to Marketing Agreement No. 143 and Order No. 959 (7 CFR Part 959 (formerly Order No. 133 Part 1033)), regulating the handling of onions grown in South Texas.

On the basis of the evidence introduced at the aforesaid hearing and the record thereof, a recommended decision in this proceeding was filed on December 29, 1961, with the Hearing Clerk, United States Department of Agriculture, and notice thereof was published in the January 5, 1962, FEDERAL REGISTER (27 F.R. 108). The notice allowed ten days after publication (or until January 15, 1962) for filing exceptions thereto. Upon request from the South Texas Onion Committee for an extension of time, the period for filing exceptions was extended to not later than the close of business on January 19, 1962 (27 F.R. 411).

Exceptions filed. Within the period provided therefor, four exceptions to the findings in the recommended decision were filed by interested parties, and one statement was filed which does not constitute an exception. They are as follows:

(a) An exception led by the South Texas Onion Committee, Mercedes, Texas, the proponents of the proposed amendments to the marketing agreement and order for onions produced in South Texas, supports the need for shipping holidays but clarifies the method of application and the duration of such holidays by stating that such holidays should be authorized for Sundays only and to be applied uniformly over the entire production area, not merely a portion thereof.

(b) An exception filed by Charles Wetegrove Co., Inc., Raymondville, Texas, supports the findings with respect to the need for shipping holidays but disagrees with the method of application in that a week end holiday should not be enforced consecutively with a special holiday.

(c) An exception filed by Wetegrove Produce Co., Raymondville, Texas, is the same as exception (b) listed above.

(d) An exception filed by Cullum & Jones, Del Rio, Texas, objects to shipping holidays, as such.

(e) A statement was filed by Dixondale Plant Farms, Carrizo Springs, Texas, supporting the shipment of only number one onions regardless of color or size. As this statement does not constitute an exception a ruling on it is unnecessary.

Rulings on exceptions. The need for establishing holidays prohibiting the packaging and loading of onions on Sundays and other special periods is supported by substantial evidence in the record of hearing on the proposed amendments. There was some controversy, however, as to the duration of such holidays arising out of the method of application. The effect of exception (a), which was filed by the proponents of the proposed amendments, is to clarify this matter and thus eliminate the controversy by restricting the use of this authority to Sundays only. Consequently, since there is no conflict with the record testimony which supports the need for shipping holidays on Sundays, exception (a), filed by the South Texas Onion Committee, is granted. Therefore, the provision on holidays should be revised to limit such holidays to Sundays only, and such holidays, when established, to be applicable uniformly to the entire production area.

No conflict is evident between two other exceptions filed, namely exceptions (b) and (c), and the ruling on exception (a). Hence, to the extent that these exceptions are in agreement with this ruling, they are granted.

Exception (d) objects to shipping holidays but gives no reason or argument based on the record of hearing for such objection. Since this exception is at variance with the record evidence, it is denied.

Material issues, findings and conclusions. The material issues, findings and conclusions, and the general findings of the recommended decision set forth in the FEDERAL REGISTER (27 F.R. 108), except for the holiday provision and the finding thereon which differ from the above rulings, are hereby approved and adopted as the material issues, findings and conclusions, and the general findings of this decision as if set forth in full herein.

Amendment of the marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, As Amended, Regulating the Handling of Onions Grown in South Texas" and "Order Amending the Order Regulating the Handling of Onions Grown in South Texas" which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

It is hereby ordered, That all of this decision, except the annexed marketing agreement, as amended, be published in the FEDERAL REGISTER. The regulatory provisions of the said marketing agreement, as amended, are identical with those contained in the annexed order, which will be published with this decision.

Referendum order. Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674), it is hereby directed that a referendum be conducted among producers who, during the calendar year 1961 (which is hereby determined to be a representative period for the purpose of such referendum), were engaged, in the production area as defined in § 959.4 of this part, in the production of onions for market to ascertain whether such producers favor the issuance of the annexed order.

The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection with Marketing Orders (Except those Applicable to Milk and its Products) to Become Effective Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (15 F.R. 5176). The ballots used in the referendum shall contain a summary describing the proposed amendments.

W. J. Cremins and K. W. Schaible of the Fruit and Vegetable Division, Agricultural Marketing Service, are hereby designated as agents of the Secretary of Agriculture to conduct such referendum jointly or severally. Said agents may appoint any person or persons to assist them in performing their functions hereunder.

Ballots to be cast in the referendum and copies of the text of the said amendments and the order may be obtained from any referendum agent or appointee.

Order[1] Amending the Order Regulating the Handling of Onions Grown in South Texas

§ 959.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order, and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674) and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held at Edinburg, Texas, on November 28, 1961, upon proposed amendments to Marketing Agreement No. 143 and Order No. 959 (7 CFR Part 959), regulating the handling of onions grown in South Texas. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that :

(1) The said order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act with respect to onions produced in the production area, by establishing and maintaining such orderly marketing conditions therefor as will tend to establish, as prices to the producers thereof, parity prices and by protecting the interest of the consumer (i) by approaching the level of prices which it is declared in the act to be the policy of Congress to establish by a gradual correction of the current level of prices at as rapid a rate as the Secretary deems to be in the public interest and feasible in view of the current consumptive demand in domestic and foreign markets, and (ii) by authorizing no action which has for its purpose the maintenance of prices to producers of such onions above the parity level, and (iii) by authorizing the establishment and maintenance of such minimum standards of quality and maturity, and such grading and inspection requirements as may be incidental thereto, as will tend to effectuate such orderly marketing of such onions as will be in the public interest;

(2) The said order, as hereby amended, regulates the handling of onions grown in the production area in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing order upon which hearings have been held;

(3) The said order, as hereby amended, is limited in application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The said order, as hereby amended, prescribes, so far as practicable, such different terms, applicable to different parts of the production area, as are necessary to give due recognition to the differences in the production and marketing of onions grown in the production area; and

(5) All handling of onions as defined in this part is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

It is, therefore, ordered, That, on and after the effective date hereof, the handling of onions grown in the production area as defined herein shall be in conformity to, and in compliance with, the terms and conditions of said order, as hereby amended, and such terms and conditions are as follows:

1. Amend § 959.7 *Handle* to read as follows:

§ 959.7 Handle.

"Handle" or "ship" means to package, sell, transport, or in any way to place onions in the current of the commerce within the production area or between the production area and any point outside thereof. Such term shall not include the transportation, sale, or delivery of field-run onions to a person in the production area who is a registered handler.

2. Amend § 959.12 *Pack* to read as follows:

§ 959.12 Pack.

"Pack" means a quantity of onions specified by grade, size, weight, or count, or by type or condition of container, or any combination of these recommended by the committee and approved by the Secretary.

3. Amend § 959.31 *Alternate members* to read as follows:

§ 959.31 Alternate members.

An alternate member of the committee shall act in the place and stead of the member for whom he is an alternate, during such member's absence or when designated to do so by the member for whom he is an alternate. In the event both a member of the committee and his alternate are unable to attend a committee meeting, the member or his alternate or the committee (in that order) may designate another alternate from the same district and the same group (handler or grower) to serve in such member's place and stead. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor of such member is selected and has qualified. The committee may request the attendance of alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members.

4. Add new subparagraph (5) to § 959.52(b) to read as follows:

§ 959.52 Issuance of regulations.

* * * * *

(b) Such regulations may:

* * * * *

(5) Establish holidays by prohibiting throughout the entire production area the packaging and loading of onions on Sundays.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

[F.R. Doc. 62–1148; Filed, Feb. 2, 1962; 8:47 a.m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

MILK IN LOUISVILLE-LEXINGTON, KENTUCKY, AND OHIO VALLEY MARKETING AREAS

Notice of Recommended Decision and Opportunity to File Written Exceptions on Proposed Amendments to Tentative Marketing Agreements and Orders

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Secretary, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreements, and orders regulating the handling of milk in the Louisville-Lexington, Kentucky, and Ohio Valley marketing areas. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D.C., not later than the close of business the 5th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreements and to the orders, were formulated, was conducted at Louisville, Kentucky, on September 18–27, 1961, pursuant to notice thereof which was issued August 25, 1961 (26 F.R. 8105).

Proposals considered at this hearing pertained to (1) the consolidation under a single order of two marketing areas where the handling of milk is presently regulated by the Louisville-Lexington (Order No. 95) and the Ohio Valley (Order No. 46) Federal milk orders and (2) the amendment of the two separate orders irrespective of whether the proposed consolidation is or is not adopted.

On November 6, 1961 (26 F.R. 10597), a recommended decision was issued by the Department relating only to the material issue of whether the Ohio Valley order should be amended to provide that a cooperative association may be the handler for bulk tank milk of its producer members for which it assumes responsibility for the handling from the farm to a pool plant, such amendment to include appropriate conforming changes throughout the order. Subsequently, the Department issued a final decision on November 21, 1961 (26 F.R. 11079), and a final order on November 27, 1961 (26 F.R. 11284), concerning this material issue. The other material issues on the record were reserved for a further decision on that record. These issues are

the subject of the decision contained herein.

The material issues on the record of the hearing relate to:

1. Consolidation of the Louisville-Lexington order and the Ohio Valley order into one order.
2. Marketing area.
3. Provisions of the consolidated order with respect to:
   (a) Milk to be pooled and priced;
   (b) Classification and allocation of milk;
   (c) Class prices;
   (d) Payments on unpriced milk disposed of in the marketing area from nonpool plants;
   (e) Payments to producers; and
   (f) Administrative and miscellaneous provisions.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Consolidation of orders.* Order No. 95 (new number) which regulates the handling of milk in the Louisville-Lexington marketing area and Order No. 46 (new number) which regulates the handling of milk in the Ohio Valley marketing area should be consolidated into one order to be designated as Order No. 46.

Kyana Milk Producers, Inc., a cooperative association representing approximately 3,300 member producers, proposed that the handling of milk in the present Louisville-Lexington and Ohio Valley marketing areas be regulated under one consolidated order. This association represents nearly all of the producers who supply the regular handlers in both markets with the exception of producers recently shifted from another Federal order market to the Louisville-Lexington market. Of the approximately 3,300 members, about 2,300 are associated with the Louisville-Lexington market while the remaining members are associated with the Ohio Valley market.

The merger on May 1, 1961, of four cooperative associations in the Louisville-Lexington and Ohio Valley markets into one association under the name of Kyana Milk Producers has made this association the responsible marketing agent for all but a small portion of the total producer milk supplies in the two markets. The association directs the movement of producer milk from farms to plants and assumes the responsibility for supplying handlers with their day-to-day fluid milk requirements. The association also arranges for the disposition of the surplus milk of both markets. The performance of these marketing functions is facilitated by the operation of a plant located at Louisville which serves as an equalization plant. Milk accumulated at this plant is either moved to handlers' plants in response to their varying milk needs or is moved to manufacturing plants.

The cooperative association desires that the two orders be consolidated so that it may perform its marketing functions in a manner which is efficient in response to the needs of the markets it serves and which is equitable to its entire membership. The achievement of these objectives would be facilitated if the markets served are under a single order regulation. In order to gain efficiency in the handling of milk flexibility in movements of milk among plants served by the cooperative association would be desirable.

Movement of milk between plants under the separate orders presents classification and allocation problems which would not be present with regard to transfers of milk between plants under the same order. For example, priority is given to producer milk in the allocation of Class I milk under each order. Hence, milk received at a pool plant from a plant regulated under another order is given a secondary status with respect to assignment to Class I milk. Moreover, separate regulation may inhibit to some degree the shifting of producers between plants under the different orders. A base and excess plan is used in the Ohio Valley order and a take-out and payback seasonal incentive plan is used in the Louisville-Lexington order. These separate seasonal plans between the two orders also tend to hinder shifts of producers between the markets. All these distinctions would be eliminated in a combined order and they would facilitate the marketing problems of the cooperative association.

The distribution systems of the handlers under the two orders overlap both within the two marketing areas and in unregulated areas. Milk distribution routes originating from Louisville-Lexington order plants extend over a large part of the Ohio Valley marketing area. Under these circumstances it is desirable that all of the handlers under the two orders be under a single regulation which will provide one pricing arrangement. Under the separate orders different classification systems, different class prices and different utilizations of milk have resulted in price disparities between the two markets. A single pricing system under one order is therefore desirable for pricing milk throughout the entire consolidated area.

To accomplish the merger effectively and most equitably, the assets in the custody of the market administrator in administrative and producer-settlement funds under the Ohio Valley order should be merged with assets in similar funds under the Louisville-Lexington order. Any liabilities of such funds of the individual orders should be paid from the new funds so created. To distribute such funds under one order to producers and handlers under that order would unduly burden the producers and handlers now regulated by the other order. To distribute the funds under both orders and again accumulate the necessary reserves would entail considerable administrative detail for no good purpose.

2. *Marketing area.* The marketing area of the consolidated order should include all of the territory within the marketing areas of the present Louisville-Lexington and Ohio Valley orders plus the additional counties of Knox, Daviess, Martin, Orange and Washington in the State of Indiana and the counties of Mercer, Boyle and Garrard in the State of Kentucky. This territory may appropriately be designated as the "Louisville-Lexington-Evansville marketing area."

The marketing area of the Louisville-Lexington order now includes those counties in Indiana and twenty counties in the north central part of Kentucky. The marketing area of the present Ohio Valley order adjoins the western boundary of the Louisville-Lexington marketing area and includes nine Indiana counties and eleven Kentucky counties.

In conformity with the conclusion of this decision that the Louisville-Lexington and Ohio Valley orders should be consolidated, all of the territory now included in the marketing areas of these two orders should be included in the marketing area of the consolidated order.

Besides the proposal by Kyana Milk Producers to combine the marketing areas of the two orders, various proposals were made to add certain other areas either to the individual marketing areas or to the combined area. In Indiana, Sullivan, Greene, Knox, Daviess, Martin, Lawrence, Orange, and Washington Counties were proposed as part of the consolidated marketing area. Of these counties, Knox and Daviess were also proposed as a part of the Ohio Valley marketing area. In Kentucky, Todd and Logan Counties were proposed to be added to the Ohio Valley marketing area and Mercer, Boyle, and Garrard Counties were proposed to be added to the Louisville-Lexington marketing area. Deletion of Montgomery County, Kentucky, from the Louisville-Lexington marketing area was also proposed.

Of the eight Indiana counties proposed to be included in the consolidated marketing area, Orange and Washington were proposed by a handler operating a pool plant under the Ohio Valley order. These two counties, and the other six previously named, were also proposed by the operator of a nonpool plant at Vincennes, Indiana. This plant ordinarily disposes of more than 20 percent of its fluid disposition on routes in the Ohio Valley marketing area. It also has disposition in the marketing areas regulated by the Louisville-Lexington and the Suburban St. Louis orders. Under the pool plant standards recommended herein this plant would be fully regulated as a pool plant.

Extension of regulation to the five Indiana counties of Knox, Daviess, Martin, Orange, and Washington would bring under full-regulation as pool plants two other plants at Vincennes in Knox County, a plant at Loogootee in Martin County, and a plant at Salem in Washington County. By including these five counties in the area, most of the sales made by each of these plants would be inside the marketing area. Nearly one-half of the sales from the Vincennes plant operated by the proponent would be in the marketing area herein proposed.

There is only a small quantity of milk sold in this 5-county area by a plant which may not qualify as a pool plant. That plant, located at Robinson, Illinois, accounts for minor percentages of sales in these five counties.

The proposed extension of regulation is necessary to provide for orderly marketing of milk in such areas through application of class prices to be paid by handlers disposing of milk in such areas and a uniform system of accounting for milk, including pooling with other fully regulated handlers.

Handlers not subject to regulation who distribute milk in these counties pay farmers prices approximating order blend prices irrespective of actual use of milk. Proponents complained that because of unregulated competitors' ability to purchase milk for Class I use at a price equal to order blend prices, proponents are at a disadvantage in supplying fluid outlets in these counties. Unregulated plants in these areas do not carry a full year-round supply of milk, but depend on supplemental receipts from other plants, and thus are able to maintain a high level of Class I utilization while nevertheless paying farmers a price equal only to blend prices under nearby orders.

Handlers presently regulated by the Ohio Valley or Louisville-Lexington orders and the Vincennes plant which would be regulated under the pooling requirements of this proposed order have the following percentages of total fluid milk product sales in each of these counties: Knox 43, Daviess 56, Martin 50, Orange 69, and Washington, more than 99. In Knox County another 5 percent of total sales are made by a handler regulated under the Indianapolis order.

Lawrence, Greene, and Sullivan Counties in Indiana should not be included in the marketing area.

A handler located at Seymour in Jackson County has about 18 percent of its sales in Lawrence County through a distribution outlet at Bedford and has minor sales in Washington and Orange Counties. This plant's distribution in Lawrence County accounts for about 40 percent of the sales in the county. A plant at Bloomington, Indiana, has distribution in Lawrence County estimated to be about 30 percent of the total, and has distribution in Greene County estimated to be 40 percent of the total. Distribution in Greene and Lawrence Counties by the plant at Bloomington represents about 22 percent of its fluid sales. While these plants at Seymour and Bloomington would be fully regulated if Greene and Lawrence Counties were included in the marketing area, the major part of their fluid disposition would be outside of territory now regulated or proposed to be regulated. Such disposition would be substantially in competition with plants which would not be regulated under the proposed order. It is concluded that these two counties should not be included in the marketing area.

With respect to Sullivan County, the data provided by proponent reveal some inconsistencies which prevent a definite conclusion as to the merits of the proposal. It is clear, however, that some of the fluid distribution in Sullivan County is by plants not now regulated under any Federal order, nor is it expected that they would qualify as pool plants if Sullivan County were included in the proposed marketing area.

Boyle, Mercer, and Garrard Counties in Kentucky should be included in the marketing area to be regulated by the order. The fluid distribution in these counties by five plants which maintain a high Class I utilization while nevertheless paying farmers a price equal only to an order blend price constitutes a competitive advantage which is disruptive to the orderly marketing of milk in these areas. The extension of the regulation in these three Kentucky counties is expected to include as fully regulated plants all plants now disposing of milk in these counties. Distribution outside of the territory here adopted for the marketing area by plants which would be brought under regulation by this extension is very largely in competition only with plants which would be subject to Federal order regulation. The application of class pricing and uniform accounting for milk under a system of market pooling will establish orderly marketing conditions in these three counties.

In Boyle County, Kentucky, about half of the fluid sales are by regulated handlers. A small percentage of this distribution is regulated under the Cincinnati Federal order, and most of it under the Louisville-Lexington order. Another 25 percent of the sales are by a plant at Somerset partially regulated under the Louisville-Lexington order by virtue of sales in presently regulated territory. These sales, and disposition by a presently unregulated plant located in the county at Danville, account for most of the fluid disposition in the county.

In Mercer County, Kentucky, more than 70 percent of the fluid milk disposition is by plants now regulated under the Louisville-Lexington order. About 7 percent of the sales are by a plant at Campbellsville, Kentucky, which is partially regulated under the order by virtue of sales in presently regulated territory. The remainder of the milk distribution in the county is by an unregulated plant located in the county at Harrodsburg.

In Garrard County, Kentucky, about 65 percent of the fluid milk distribution is by handlers presently regulated under the Louisville-Lexington order. About 10 percent of the distribution in the county is by the plant at Somerset partially regulated by virtue of its sales in the area presently regulated by the order. The remainder of the sales are by an unregulated plant located in the county at Lancaster.

This three-county area thus is served preponderantly by handlers presently regulated. Effectiveness of the regulation in fulfilling the purpose of establishing orderly marketing conditions will be improved by inclusion of this territory in the marketing area.

A proposal made to delete Montgomery County, Kentucky, from the marketing area should not be adopted. This proposal was made by a handler whose pool plant is located at Morehead, Kentucky, and whose sales in the area represent about 10–12 percent of his Grade A receipts. Approximately 45 percent of the fluid sales in the county are from this plant. About 14 percent of the distribution in the county is out of a plant regulated under the Cincinnati order and the remainder is by plants regulated under the Louisville-Lexington order.

The proposed deletion was requested to enable the proponent to pay a higher price to his own dairy farmer suppliers rather than make payments into the producer-settlement fund. However, if Montgomery County were deleted from the marketing area the handler would become unregulated and would not be required to pay the minimum prices established by the order. Nevertheless, all of the other handlers selling in the county would continue to be regulated by virtue of their sales in other counties within the marketing area. Although such handlers account for more than one-half of the total distribution in the county, they would then be in competition there with a plant not required to pay minimum prices for milk.

Todd and Logan Counties, Kentucky, should not be included in the marketing area of the proposed order. In Logan County, all fluid distribution is by federally regulated plants, but more of the disposition is by Nashville order plants than by plants under the Louisville-Lexington and Ohio Valley orders. The evidence with respect to Todd County shows considerable disparity in the testimony of witnesses as to the share of the fluid disposition regulated under the Louisville-Lexington, Ohio Valley, Nashville and Paducah orders. None of the sales in Todd County are by unregulated plants. The evidence is not sufficient to conclude whether these counties should be included in the marketing area of the proposed order. Inasmuch as all milk sold in these counties is sold by regulated plants, the problem of orderly marketing is not acute.

3. *Provisions of the consolidated order.* Many of the provisions of the Louisville-Lexington and Ohio Valley orders which have been found to be appropriate for regulating the handling of milk in these markets are similar and therefore appropriate for regulating the handling of milk in the proposed marketing area. The provisions in which there are substantive differences in the two orders or those for which changes are considered are discussed below.

(a) *Milk to be pooled and priced.* The determination of the milk to be pooled and priced under the consolidated order may be facilitated by defining the several types of milk and milk products and those persons and facilities associated with the handling of such milk and milk products. For purposes of the consolidated order, definitions similar to those contained in the Louisville-Lexington order will be suitable in most cases.

A producer should be defined as a person who produces milk on a dairy farm which is approved by a duly constituted health authority for the production of milk for fluid disposition, which milk is received at a pool plant, or by a cooperative association, or is diverted as described in subsequent findings. Health authority approval would include approval of milk by the authority to administer the regulations governing the

quality of milk acceptable to agencies of the United States Government for fluid consumption in its institutions or bases located in the marketing area. The proposed exclusion of dairy farmers whose permit is temporary or on an emergency basis is not adopted. It was not shown that such approvals constitute a problem in this market. A producer's connection with the market should be established by receipt of his milk at a pool plant. In the instance of bulk tank milk for which a cooperative association is a handler, the cooperative is the first handler receiving such milk. Accordingly, the term "producer" is intended to include such dairy farmers whose milk is delivered by a cooperative association as a handler to other handlers' pool plants.

Marketing conditions necessitate the handling of reserve milk by diversion from producers' farms to nonpool plants. This is often the more economical method of moving the milk rather than assembling it first at a pool plant which has no need for the milk and then moving it to a nonpool manufacturing plant. In the interest of assuring an adequate, stable supply for the fluid market, and a stable market for producers, a dairy farmer should retain his producer status during reasonable periods while his milk is diverted to a nonpool plant. The Louisville-Lexington order allows unlimited diversion of producer milk by a cooperative association. Diversion by other handlers is allowed, but with a limitation with respect to each producer that his milk shall not be diverted for more than one-half of the number of days in any of the months of October, November, January, and February. It is concluded that the same kind of diversion allowance may apply properly in the case of all handlers. Official notice is taken of the fact that manufacturing facilities are being installed in Kyana Milk Producers' pool plant at Louisville. This will tend to reduce the need for diversion. Accordingly, diversion of a producer's milk by any handler should be allowed on any day in the months of December and March through September, and on not more than one-half of the days of the month in any of the months of October, November, January and February. In view of the provision that a cooperative association may be the handler on bulk tank milk and the fact that the supply for the market is largely from members of the cooperative association which requested such provision, diversion between pool plants, now provided for in both orders, will no longer be necessary.

So as to provide proper location pricing and accountability for milk diverted to nonpool plants, such milk shall be deemed to be received at the pool plant as part of the plant receipts if diverted by the operator of the plant. In case of diversions to nonpool plants by a cooperative association, the location of receipt shall be deemed to be the location of the plant from which diverted.

A handler should be defined as a person who operates a city plant or a country plant. Also, a cooperative association should be a handler with respect to producer milk diverted by it to nonpool plants. A cooperative association should be allowed to act as the handler also with respect to milk of its producer members which is picked up in bulk at the farm by tank trucks owned by, operated by, or under contract to such association and delivered in such trucks (or in trucks similarly under the control of the association into which the milk may be reloaded) to pool plants of other handlers. With respect to the Ohio Valley market, findings and conclusions have already been made on this record to adopt such a provision in a decision issued November 21, 1961 (26 F.R. 11079). Because of the similarity of considerations with respect to the proposed new marketing area, repetition of such findings and conclusions is unnecessary in this instance. The same provision should be adopted in the consolidated order.

The term "producer-handler" should be defined as presently in the Ohio Valley order. This is a more specific definition than that contained in the Louisville-Lexington order in that it requires the producer-handler to provide proof to the market administrator that the operation is his personal enterprise and risk.

The terms "city plant" and "country plant" in the Louisville-Lexington order closely correspond to the two types of "fluid milk plant" in the Ohio Valley order. The first type of fluid milk plant in the Ohio Valley order disposes of "Grade A" fluid milk products on routes in the marketing area, and the second type is a plant which supplies the first type of plant, or is approved to do so. The terms "city plant" and "country plant" in the consolidated order will serve to define plants performing such functions, but these definitions are not indicative of whether the plants meet order requirements which would subject them to full regulation.

Pool plant provisions similar to those of the Louisville-Lexington order should be adopted for the consolidated order, subject to some modifications. With the expanded marketing area adopted herein, the smaller percentage requirement (10 percent of receipts from dairy farmers, cooperative associations and country plants rather than the 25 percent required in the Ohio Valley order) of distribution in the marketing area for pool plant qualification is suitable for all plants likely to be associated with the market. Another basis for qualification should be added, however, whereby a plant distributing an average of 13,500 pounds or more of Class I milk per day in the marketing area would become fully regulated, even though this amount represents less than 10 percent of the receipts previously mentioned. Under the provisions of the present orders, a plant with a large volume of Class I business could acquire a large percentage of the total Class I distribution in the marketing area without becoming subject to full regulation. Any plant which distributes within the marketing area a volume of Class I milk equal to one percent or more of the total Class I milk in the market is an important competitive factor, however, and should be subject to full regulation, even though its volume represents less than 10 percent of its total Class I business.

The total Class I disposition in the two marketing areas by all pool plants regulated by the Louisville-Lexington and Ohio Valley orders plus the sales of nonpool plants in these areas averages approximately 1,350,000 pounds per day. The order, therefore, should provide for full regulation of any plant whose distribution of Class I milk in the marketing area amounts to an average of 13,500 pounds or more per day. Use of the fixed figure rather than 1 percent of the total Class I sales will afford plants an opportunity to know beforehand whether they will be subject to regulation and will permit them to adjust their business accordingly. A constant figure will also tend to avoid the shifting in and out of the pool of plants whose distribution in the area might be fairly constant but might become more or less than one percent as total Class I milk in the pool varies.

The requirements for country plants should be increased for the months of October through March to require that 50 percent of the receipts in the month from approved dairy farmers and from cooperative associations are delivered to city plants. No country plants now qualify as pool plants for the Louisville-Lexington market on the basis of the present 10 percent shipping requirements, nor are there any pool country plants qualified under the Ohio Valley order where a 50 percent requirement is contained in the present order. The 50 percent requirement will guarantee a fuller association of a country plant with the market if it is to be pooled, and is appropriate in view of the adequacy of supply represented by present producer sources of milk. In the months of April through September, a country plant should qualify on the basis of either its prior qualification in all of the preceding months of October through March or on the basis of shipment of 40 percent of its receipts to city plants.

Provision should be made for pool status of a country plant operated by a cooperative association if two-thirds of the milk of its members approved by health authorities to supply milk which may be disposed of as Grade A milk is delivered from farms to pool plants of other handlers or is transferred from the association's plant to such pool plants.

A similar provision is now contained in the Louisville-Lexington order, requiring, however, that 75 percent of member milk be supplied to other pool plants. The current provision also qualifies the cooperative association plant in any month of March through September if it had qualified as a pool plant on the percentage basis in each of the preceding months of October through February.

The plant of the cooperative association has served as an equalization supply plant for the entire Louisville-Lexington market. In view of the extension of membership of the association to the Ohio Valley market, the association stated that the plant would perform the same function in the consolidated marketing area.

With the prevalence of bulk milk tanks on farms in these markets, much of the milk supply of processing plants moves in bulk form directly from farms to such plants. Changes in daily requirements of processing plants may be met by the cooperative association through rearrangement of the bulk tank movement of milk from farms to plants. Under these circumstances the most efficient movement of milk by the association, in its role of supplying milk processing plants, does not require that more than a small part of the milk move through the association's plant. For this reason it is not practical for the association plant to qualify for pool status on the basis of shipments from the plant to other pool plants. Nevertheless, the plant is essential to the service provided by the association in meeting daily requirements of the handlers. Besides serving as a standby plant from which milk may be transferred to pool plants, it also serves as an assembly plant for milk in excess of other handler's needs. Such milk constitutes part of the reserve supply of the market which must be disposed of primarily for use in manufactured dairy products which may involve shipment to nonpool plants. Other reserve milk has been disposed of by the cooperative association by diversion from producers' farm to nonpool plants for manufacturing.

As the authorized agent to market the milk of its members, who constitute 90 percent or more of the producers in the combined market, Kyana Milk Producers bears the burden of disposing of the reserve milk in the manner described. Because of the essential part this plant plays in such reserve handling operations, it is necessary that producers maintain their producer status when their milk must be moved to this plant. It is desirable, however, that a standard of performance be provided to assure that such a plant is substantially associated with the market. The requirement with respect to deliveries of member milk to pool plants provides such a standard. In view of the volume of reserve milk to be handled, the requirement that two-thirds of the member milk be delivered to other pool plants should be substituted for the present 75 percent requirement in the Louisville-Lexington order. The plant may qualify for pool status on this basis in any month. In the months of March through September pool status should continue to be allowed on the basis of prior pool status in each of the months of October through February.

Because of the closeness of other marketing areas and overlapping of distribution of handlers under these and other orders, provision should be made for a method to determine under which order a plant should be regulated if it qualifies under more than one order. The Louisville-Lexington order now provides that such a plant shall not be a pool plant if it qualifies under another order unless the plant has disposed of a greater quantity of milk in the Louisville-Lexington marketing area and to pool plants under this order than in the marketing area under the other order during each of the preceding three months and does also in the current month. A similar provision is contained in the Ohio Valley order. This provision should be adopted in the consolidated order.

Plants so determined to be subject to another order while disposing of milk in this market should be required to file such reports as the market administrator may require and to allow verification of such reports. Any exception to the described rule of determination should be based on a special determination by the Secretary for the particular plant.

"Producer milk" is a term defined as milk received by handlers from producers in the manner described in the preceding findings with respect to "producer". In the case of any tank truck loads of milk which are split between plants and for which a cooperative association is not the handler, the entire load shall be deemed to have been received at the first pool plant at which milk is withdrawn from the tank truck unless a different arrangement is agreed upon by the operators of the plants.

The definition of the term "fluid milk product" is convenient for establishing the definition of Class I milk and other terms in the order. Because of the relationship of this term to the Class I milk definition, discussion of the fluid milk product definition is covered under the findings and conclusions with respect to classification.

A definition of "other source milk" may be adopted similar to that in the Ohio Valley order, which differs from that in the Louisville-Lexington order only in that it specifically excludes beginning inventory. Bulk tank milk received from a cooperative association for which it is the handler should also be excluded. This term serves to describe a type of milk receipt other than producer milk, milk from pool plants or a cooperative association in its capacity as a pool handler, and beginning inventory of "fluid milk products". It should include receipts of products other than "fluid milk products", including those produced at the plant, which are reprocessed, or converted to another product in the plant during the month.

The definitions of "Chicago butter price" and "nonfat dry milk price" are adopted from the Ohio Valley order.

(b) *Classification and allocation of milk.* Class I milk should be defined as all skim milk and butterfat disposed of as any fluid milk product or which is not accounted for as Class II milk. For this purpose the definition of "fluid milk product" should mean milk, skim milk, buttermilk, flavored milk, milk drinks (plain or flavored), reconstituted milk or skim milk, fortified milk or skim milk (including "diet" foods), cream, (sweet or sour), half and half, or any mixture in fluid form of milk or skim milk and cream (except ice cream mix, frozen dessert mix, evaporated milk, condensed milk, aerated cream products, eggnog, and cultured sour mixtures not labeled as Grade A) which are neither sterilized nor packaged in hermetically sealed containers.

Class I milk thus defined includes all fluid products which health authorities in the marketing area generally require to be made from milk from locally inspected sources.

Reconstituted milk and skim milk disposition should be considered as Class I milk utilization. The state of Kentucky requires that nonfat dry milk used in fluid products be of "Grade A" quality. These products compete for the same Class I milk sales as do fresh whole milk or skim milk, and if made from other source milk, could displace producer milk which is available for the same purpose. It is necessary, therefore, that such products be accounted for as Class I milk and in a quantity which includes the normal quantity of water originally associated with the nonfat milk solids. This type of accounting is necessary to return to producers a value commensurate with the Class I utilization of the handler.

Fortified fluid milk drinks, similarly, should be Class I milk to the extent of the weight of an equal volume of milk, skim milk or cream of the same butterfat content. To this extent, such fortified products compete with whole fluid milk, skim milk and cream in the fluid market and tend to displace producer milk from Class I uses if not properly accounted for as Class I milk.

To maintain proper accounting for such items, the nonfat milk solids added to such fortified items should be converted to their fluid skim milk equivalent. The total quantity of product so calculated, which would include the normal quantity of water originally associated with the nonfat milk solids, less the quantity classified as Class I milk, would be accounted for as Class II milk. Proper accounting for all uses of skim milk and butterfat similarly requires that if any of the water contained in the milk from which a product is made is removed, the pounds of skim milk used or disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids.

Several handler proposals would call for the lowest classification to apply to milkshake mixes containing 15 percent or more of total milk solids and dietary fluid milk products.

"Milk shake mixes" which may be disposed of generally to soda fountains and similar establishments are essentially a form of fortified fluid milk product. Fresh fluid milk provides the liquid portion of the product to which the solids are added. The resulting product is intended for fluid consumption. On this basis milk shake mixes are not distinguishable from other fortified fluid milk products and should be classified in the same manner.

Fluid "diet" milk products similarly are a form of a low-fat milk drink fortified with added nonfat milk solids. Sweetening and flavoring ingredients are also added. The product is prepared by adding the nonfat milk solids and flavoring ingredients to fresh fluid milk or skim milk. Such fluid diet milk products thus are essentially fortified milk drinks

which compete with other fluid milk product disposition. Although standards of identity have not been established by health authorities with respect to "diet" milk products, Grade A milk is used in the preparation of the diet products. It is to be presumed under the circumstances of preparation of the product as described by proponents that they do use and depend on the supply of fresh milk of Grade A quality to provide the fluid part of the product.

It was proposed by Kyana Milk Producers that the consolidated order have only two classes of utilization. The kinds of utilization now included in Class II and Class III in the Louisville-Lexington order would be combined into one class resulting in a Class II milk definition similar to that which applies in the Ohio Valley order. A single price, accordingly, would be established for all reserve milk under the consolidated order. Handler proposals with respect to classification of certain specialty items under a three-class system are interpreted as not being opposed to a two-class system.

It is concluded that a two-class system should be adopted for the consolidated order. This system will tend to provide better marketing opportunities for reserve milk. The single price for all reserve milk will tend to encourage handlers to use the reserve producer milk in the higher-valued uses. It may induce handlers to use greater quantities of producer milk for cottage cheese and ice cream, now priced at the higher Class II price under the Louisville-Lexington order. With respect to ice cream disposition in the marketing area, handlers to a large degree now depend on nonpool sources for their supply of this product. A health requirement of Grade A milk for the manufacture of cottage cheese applies only in Louisville, and, accordingly, cottage cheese from other sources may be distributed in all other parts of the marketing area.

Class II milk should be defined to include all skim milk and butterfat used to produce products not included in Class I milk. Products specifically exempted from the Class I definition such as ice cream mix, frozen dessert mix, evaporated milk, and condensed milk would be Class II milk. Other manufactured dairy products which would be Class II milk include cottage cheese, any other type of cheese, butter, dry milk and nonfat dry milk. Frozen cream is generally a storage item intended for use in ice cream, butter, or other nonfluid use, and is properly a Class II disposition. The proposed two-class system would place eggnog and aerated cream products in Class II. Cultured sour mixtures which include cheese and nondairy food materials are commonly referred to as a "dip" specialty and are not distributed as a Grade A product. Skim milk and butterfat used in these products should be Class II milk if not distributed under a Grade A label.

Class II milk would include fluid product disposition for livestock feed and skim milk dumped upon prior notice product. Skim milk and butterfat used in as prescribed by the market administrator. This is merely a continuance of the lowest classification under both orders which now applies to such disposition. Also included would be fluid milk products disposed of in bulk to bakeries, candy or soup manufacturers, and other commercial establishments which do not dispose of any of such bulk receipts in the form of fluid milk products. These are ordinarily uses for which manufactured milk products may be used, although disposition from pool plants to such establishments may be most conveniently made in fluid milk product form. Such a classification provision is now contained in the Louisville-Lexington order. Ending inventories of fluid milk products should also be classified as Class II milk for accounting purposes. Inventories of fluid milk products would be subject to reclassification in the subsequent month in the manner now provided in the Ohio Valley order.

Butterfat and skim milk used to produce Class II products should be considered to be classified when so used. Handlers will need to maintain stock records on such products, however, to permit audit of their utilization records by the market administrator. Class II products from any source used in the production of any product, including products in Class I milk, should be considered to be a receipt of other source milk. This will maintain priority of assignment of current receipts of producer milk to Class I utilization.

Loss of skim milk and butterfat in plant operations is commonly referred to as "plant shrinkage". It is also ordinary experience in the case of farm bulk tank milk that there is some handling loss between the aggregate of amounts of milk measured at the farms from which a tank truckload is obtained and the quantity of milk delivered to a plant. Since there must be complete accounting for all milk received from producers, it is necessary that all shrinkage be accounted for as a classified use. Shrinkage should be classified in the lowest class as is presently done under the Louisville-Lexington and Ohio Valley orders. Such classification, in conjunction with reasonable limits, provides an equitable accounting procedure for handlers.

A maximum total shrinkage allowance in Class II of 2 percent will be reasonable in relation to ordinary operating efficiency. This total allowance would be made up of 0.5 percent with respect to milk received from producers and transferred to other handlers, plus 1.5 percent with respect to milk so received but not transferred. The 1.5 percent would also apply to bulk receipts which are transfers from other pool plants or bulk tank milk received from a cooperative association. No shrinkage allowance would apply to milk diverted to nonpool plants. Any shrinkage in excess of these allowances should be classified as Class I milk. These limitations on shrinkage and the attendant method of classification are necessary to protect the classification system from the effects of inadequate records and inefficient handling of milk. These considerations do not require that similar limitations apply to receipts of other source milk.

The shrinkage allowances as described would provide a 0.5 percent allowance to a cooperative association with respect to bulk tank milk for which it is the handler making delivery of such milk to pool plants. This allowance would apply in the absence of notification by the pool plant operator to the market administrator that he is purchasing such bulk tank milk from the cooperative association on the basis of farm weights and tests. If the pool plant operator elects to pay on farms weights and tests, the entire 2 percent shrinkage allowance would be available to him with respect to such milk.

Proration of total shrinkage between pool milk and other source milk received at a pool plant should reflect the varying shrinkage limits just described which may apply to pool milk. Otherwise, a disproportionate share of the total shrinkage could be assigned to pool milk. This situation may be accommodated by prorating the total shrinkage between the maximum pounds of pool milk shrinkage allowable divided by 0.02 and the total pounds of other source milk.

Each handler must be held responsible for a full accounting of all his receipts of skim milk or butterfat in any form. A handler who first receives milk from dairy farmers should be responsible for establishing the classification of, and making payment for, such milk. Fixing responsibilities in this manner is necessary to effectively administer the provisions of the order.

Except for the limited quantities of shrinkage that may be classified in Class II, all skim milk and butterfat for which the handler cannot establish utilization should be classified as Class I milk. This provision is necessary to remove any advantage that might accrue to handlers who fail to keep complete and accurate records and to assure that dairy farmers receive payment for their milk on the basis of proof should be on the handler to establish the utilization of any milk as other than Class I.

The two present orders apply special classification provisions to fluid milk products transferred and diverted in bulk form from pool plants to other plants. The transfer provisions of the two orders are in many respects similar, allowing for the three-class system in the Louisville-Lexington order as opposed to the two-class system in the Ohio Valley order. The provisions of the Ohio Valley order with respect to classification of such movements of milk to other pool plants or to nonpool plants are adopted as modified by the amendment effective December 1, 1961 (26 F.R. 11284), based on the record of this hearing, and with exceptions as noted herein. These provisions establish rules for assignment of transferred fluid milk products to utilization in the transferee plant. The amendment referred to provides specific rules for milk for which a cooperative association is the handler and which milk is delivered from producers' farms to a handler's pool plant in tank trucks.

Under the order proposed herein, the reference points with respect to distance of shipments to nonpool plants would be Louisville, Kentucky, and Jeffersonville, Indiana. Nonpool plants located within 250 miles of these two cities will provide sufficient outlets for reserve milk not needed by pool plants, and such distance will appropriately limit the addition of expense upon the market administrator for travel and verification of use of milk at such nonpool plants. Transfers of milk, skim milk, or cream in bulk from pool plants to nonpool plants within such distance would be Class I or Class II according to rules set forth in the attached proposed order which are very similar to the transfer provisions in the present Ohio Valley order. Transfers beyond this distance would be Class I milk. Exception is made, however, with respect to the classification of certain skim milk and butterfat which is transferred from a pool plant to a nonpool plant which disposed of cream for Class II use to a second nonpool plant. Since this involves disposition by the first nonpool plant rather than use in the nonpool plant, a special provision for classification was requested. The second transfer described by proponent would be to a point beyond 250 miles from any of the reference points previously named. Bulk cream transferred from the nonpool plant should be classified as Class II milk in the amount claimed by the operator of the pool plant if he established that such cream was moved from the nonpool plant without Grade A certification in containers labeled to show that the contents were for manufacturing use only and that such shipment was invoiced accordingly. The pool handler should also afford the market administrator sufficient opportunity to verify such shipments.

Milk transferred from a pool plant to a producer-handler should be Class I milk. To maintain a distinction between producer-handlers and pool plant operators, the definition of producer-handler does not contemplate receipt of milk from farms other than those of the producer-handler. Accordingly, the transfer provisions of the consolidated order should not provide for diversion of milk from producers' farms to producer-handlers.

The procedure for allocating producer milk to Class I and Class II adopted for the order proposed herein is similar to that presently used in the Louisville-Lexington order. However, certain modifications of this procedure are desirable. The proposed order should provide that sour cream and liquid dietary products be assigned to Class I milk (in the amount allowable pursuant to the classification provisions) if they have been classified and priced as Class II milk under the Chicago order and Class I milk under the Cincinnati order, respectively, and are received by pool plants in consumer packages and disposed of in the same packages. A plant which is expected to become fully regulated under the consolidated order presently receives packaged sour cream which has been priced as Class II milk under the Chicago order and distributes it on routes in the same packages. Similarly, a plant regulated under the Louisville-Lexington order receives packaged liquid dietary products which have been priced as Class I milk under the Cincinnati order and distributes these products on routes in the same packages. Neither of these types of products is produced or packaged in the respective transferee plants. Under the Chicago order, Class II milk is priced at a level generally as high as Class I milk. This method of allocation will accommodate the procurement of specialized products in the manner described by proponents.

A further modification should provide that shrinkage which was "set aside" in the first step of the allocation procedure be "added back" after the assignment of other source milk and beginning inventory but prior to the assignment of inter-handler transfers. This will allow such shrinkage to be allocated to the kinds of receipts for which this shrinkage has been computed.

(e) *Class prices.* In the following findings and conclusions on Class I and Class II prices, reference is made to prices which have prevailed in a number of Federal order markets. For this purpose official notice is taken of price announcements published during the period of March 1960 through October 1961 for each of the months when the order was effective by market administrators for the following markets: Chicago, Cincinnati, Indianapolis, Nashville, Paducah, Suburban St. Louis, and Tri-State. Official notice is also taken of price announcements for the Louisville-Lexington and Ohio Valley markets published by the market administrator for the months of September through December 1961.

Class I price. The Class I price under the new order for milk testing 3.5 percent butterfat should be the sum of a basic formula price plus $1.25, subject to an adjustment reflecting supply-demand conditions in the market. The Class I price during the period beginning with the effective date of the proposed order through May 1962, however, should not be less than $4.43. The basic formula price should be the higher of the "Midwest condenseries" price or a butter-powder (spray-roller) formula price. The basic formula prices and the Class I prices should be expressed in terms of milk of 3.5 percent butterfat content.

Kyana Milk Producers proposed that the Class I price for the consolidated order be the sum of a basic formula price plus $1.40. The basic formula price would be the average price paid for manufacturing grade milk at plants in Minnesota and Wisconsin (hereinafter referred to as the Minnesota-Wisconsin price), as reported by the United States Department of Agriculture, adjusted to a 3.8 percent butterfat basis. A proprietary handler proposed at the hearing that the basic formula price be based on a butter-powder formula.

Most of the Federal milk orders in surrounding markets have basic formula prices which use the higher of the Midwest condenseries price or a butter-powder formula price. Some orders also include the average price at local manufacturing plants as an alternative, but such prices have not been high enough to be the effective basic formula price. Alignment of Class I prices among the several markets in the region may be more easily maintained by using similar basic formula price alternatives. It is, therefore, desirable to continue the use of the same type of basic formula price as is generally effective in the region unless the Minnesota-Wisconsin manufacturing milk price is adopted as the basic formula price on a regional basis.

Official notice is taken of a notice of hearing issued January 8, 1962 (27 F.R. 314), for 36 markets, including the Louisville-Lexington and Ohio Valley marketing areas on a proposal to use the average price of manufacturing grade milk in Minnesota and Wisconsin, adjusted to 3.5 percent butterfat, as the basic formula price in each of the markets. Such hearing was held in Chicago, Illinois, January 17, 18, and 19, 1962. The consolidated order here under consideration, when issued, should reflect the determinations made on the basis of the Chicago hearing record.

The Midwest condenseries price and the butter-powder formula price adopted herein as the basic formula price alternative are the same as those now included in the Louisville-Lexington and Ohio Valley orders. The Louisville-Lexington order also includes as an alternative the average price of seven local manufacturing plants. In view of the continued ineffectiveness of the local manufacturing plant price in the basic formula price, it is not included as part of the basic formula price in the consolidated order.

The present stated differential of $1.25 should be continued. A Class I price differential is only part of the Class I pricing mechanism, and its proper amount should be judged on the basis of its influence upon the resulting level of price. In view of the increasing volume of milk supplied as compared to Class I sales of handlers in the two markets, it is unnecessary that any increase in the price level be provided through raising the Class I price differential. The present $1.25 differential provides a good basis for maintaining price alignment with nearby markets. The annual levels of Class I price differentials in nearby markets are as follows: Cincinnati, $1.30; Indianapolis, $1.25; Paducah, $1.30; and Nashville, $1.35.[1] Though the Suburban St. Louis order does not use a Class I price differential, its Class I price does reflect (for base zone) a differential over the Chicago order basic formula price of $1.30, subject, however, to the supply-demand adjustments in the Chicago and St. Louis orders.

A supply-demand adjuster similar to that now used in the Louisville-Lexington order should be adopted. This adjuster should be modified in that the standard utilization percentage should be raised from 137 to 144. It should also be limited in its operation so that the adjustment from one month to the next would not exceed four cents.

[1] A location differential deduction of 10 cents applies at plants in Kentucky 50 miles or more, but less than 70 miles from Nashville.

The provisions of the Agricultural Marketing Agreement Act require that prices established by milk orders reflect supply and demand conditions for milk in the market. While many of the elements of supply and demand on a national scale are reflected in the basic formula price, this pricing mechanism does not assure that all local factors will be reflected in the Class I price. In the Louisville-Lexington market the substantial changes in recent years in the ratio of producer milk supplies to Class I disposition show that this relationship is significant and should be considered in the establishment of the Class I price. In the Ohio Valley market it is clear that the similarity of marketing conditions and the inter-relationships which have led to the consideration of consolidating the two markets argue that the relationship of producer milk supplies to Class I disposition is similarly significant for the proposed combined market.

For a recent 12-month period (November 1960 through October 1961), the average of the monthly ratios of producer receipts to gross Class I utilization for the Louisville-Lexington market was 150, such ratios ranging from a low of 121 in November 1960 to a high of 175 in June 1961. A review of preceding years shows that for the same monthly periods the average production-Class I disposition ratios were 142 for the 1955–1956 period, 147 for the 1956–1957 period, 141 for the 1957–1958 period, 135 for the 1958–1959 period, and 134 for the 1959–1960 period.

For the Ohio Valley market, data for similar 12-month periods are not available, because the order first became effective March 1, 1960. The longest comparable periods for purposes of comparison are March through October of each of the years of 1960 and 1961. The average of the monthly ratios of producer receipts to gross Class I utilization for the periods of March through October of 1960 and 1961 for the Ohio Valley market were 125 and 136, respectively.

The increases shown in the production-sales ratios in the Louisville-Lexington market since 1960 have been due to the substantial increases in production. Although production figures reflect the increase resulting from the expansion of the marketing area on March 1, 1960, it is clear that production has increased considerably more in this market than have the corresponding Class I sales. Also the average daily production per farm has increased from an average of 577 pounds to an average of 624 pounds between these periods. In the Ohio Valley market, the increase in the production-sales ratio was a result of both a decrease in Class I sales and an increase in production. During the March–October period of 1961, Class I sales were 4 percent less while production was 4.3 percent more as compared to the same period in 1960. The average daily production per farm for this market increased from an average of 502 pounds to an average of 556 pounds between these periods. (Official notice is taken of market statistics published monthly for the Louisville-Lexington and Ohio Valley Federal milk orders by the market administrator for the months of August through November 1961.)

With the prices which have prevailed the supply of milk has increased relative to sales. Therefore no increase in price is warranted at this time. In order to properly reflect future changes in the local supply and demand conditions a supply-demand adjustor of the type contained in the Louisville-Lexington order is adopted with some modifications as explained in subsequent findings and conclusions.

A new standard annual level of utilization should be adopted for the supply-demand adjustment computation. The standard annual utilization percentage (137 percent) which was adopted in the Louisville-Lexington order by amendment effective March 1, 1960, has not appropriately reflected recent market conditions and thus has not provided a suitable basis on which to make supply-demand price adjustments. Suspension and amendment actions have been taken which have limited the full effect of the supply-demand adjustor in all but the initial month of its operation, May 1961.[1] A new standard for the consolidated order should be established at a level such that the average Class I price currently effective in the two markets would result from the application of such a new standard in relation to the current level of utilization.

A standard utilization percentage of 144 will maintain an average price for the combined area equal to the price ($4.431) which has prevailed in the two markets during the six-month period of July through December 1961. For this period the average Class I price on a 3.5 percent butterfat basis under the Ohio Valley order, using a differential of $1.253 over the basic formula price, would have been $4.558. The average Louisville-Lexington order Class I price for the same six-month period, on a 3.5 percent butterfat basis, was $4.376. A weighted average of these prices, using the average proportionate volumes of Class I milk in the respective markets in the period June through November 1961, results in an average of $4.431. Prices in each market were very stable in this period, and the average for the six months is very close to the average of the two markets in each of the six months.

Such an application of the supply-demand adjustor will allow continuation of the same average level of price of the two markets as has existed in recent months, subject to further adjustments based on future changes in the market situation. The price level herein proposed will result in a lower price for farmers who have been producers under the Ohio Valley order, as a result of the averaging of the prices of the two markets. Evidence with respect to changing supply conditions in the Ohio Valley market shows that the reduction in the applicable Class I price is in accord with the changes in market conditions. Such changing market conditions would need to be recognized in the price for that marketing area regardless of whether the two markets are combined.

To assure additional stability in price changes produced by the supply-demand adjustor, it is provided that the price adjustment for any one month shall not differ from that of the previous month by more than 4 cents per hundredweight. The total amount of adjustment should not at any time exceed 50 cents.

Producer and handler groups both asked that no supply-demand provision be included in the new order, and further asked that if such a price adjustor is included, that it be moderate and limited in its effect. Two handlers asked that the effective date of a supply-demand adjustor be delayed until after 18 months of experience under the new order. Producers proposed specifically (1) that any negative price adjustment be limited to 6 percent of the average basic formula price for the previous year; (2) that the measure of the relationship of supplies to Class I disposition be based on two twelve-month moving averages such as in the St. Louis order; (3) that the Class I disposition used in the calculation include sales by nonpool plants in the marketing area; and (4) that any supply-demand adjustor not result in a price change as long as Class I disposition is 67 percent or more of producer milk or less than 71 percent.

The proposals that no supply-demand adjustor apply under the new order are denied on the basis of preceding findings and conclusions. The effective date of a supply-demand adjustor should not be delayed for an 18-month period as requested by producers and handlers. The substantial changes in the supply-demand situation in recent years require that these conditions be reflected in the Class I price under the new order as soon as possible.

The type of supply-demand adjustor used in the Louisville-Lexington order is preferable to that proposed by producers based on two twelve-month moving averages, since it will react more promptly to recent conditions in the market. The method of calculation of the supply-demand adjustment under the Louisville-Lexington order is explained in the decisions issued February 8, 1960, and July 18, 1961. Essentially, it provides for calculation of the percentages that producer milk is of gross Class I utilization of pool plants in the three most recent two-month periods for which data are available. Comparison of these two-month percentages with seasonally adjusted standards provides the basis for Class I price adjustments. Seasonal adjustment of the annual standard is based on supply and utilization data for the 37-month period ending with the second month preceding the month for which the price adjustment is computed. Price stability is achieved by eliminating indicated adjustments if they are in a direction opposite from that indicated by the most recent two-month percentage and eliminating indicated adjustments in excess of the most recent percentage.

Inasmuch as the Ohio Valley order was issued effective March 1, 1960, data on a 37-month basis for plants regulated under that order would not be available until after March 1963. Since, however, the calculations depend entirely upon ratios (in some cases expressed as percentages) of quantities of producer milk to Class I utilization, the changes in marketing area do not prevent use of currently available data for calculation of a supply-demand adjustor. The month of June 1962, would be the first month for which a price adjustment could be computed if two full years of data for the Ohio Valley market are included. The effect of the supply-demand adjustor adopted herein is accordingly limited prior to June 1962 by establishing a minimum Class I price of $4.43.

The proposal to retain all Class I sales in the marketing area in the supply-demand computation, regardless of whether such sales are by pool plants or nonpool plants is denied. Such a provision would be insensitive to the competition of handlers regulated under other orders who may secure sales outlets in this market. The levels of the Class I price in this market should reflect loss of sales by pool plants in such circumstances as a part of the supply-demand situation affecting the marketing of producer milk.

Class prices under the proposed order are expressed in terms of milk testing 3.5 percent butterfat. This is done for the purpose of achieving uniformity among markets so that prices will be readily comparable to all interested parties. This need not affect the butterfat content of milk received or disposed of under the order. This change in the method of quoting the Class I price has been accomplished by changing the butterfat value included in the basic formula prices to reflect the 3.5 percent butterfat test.

Class II price. Class II milk under the consolidated order should be priced for the months of September through March at the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the United States Department of Agriculture, adjusted to a 3.5 percent butterfat basis, and for the months of April through August at such price less 10 cents.

The Louisville-Lexington order presently provides two separate prices for milk going into manufacturing uses. The Class II price, applicable primarily to cottage cheese and ice cream, is the highest of four alternative prices. These are the Midwest condenseries price, a butter-powder (spray-roller) formula price, a butter-powder (spray) formula price, or a butter-cheese formula price. The Class III price applies primarily to American cheese, butter, dry milk powder, and condensed milk. For the months of September through March this price is the higher of a butter-powder (spray-roller) formula price or the average announced price at seven local manufacturing plants. For the remaining five months of the year the Class III price is the higher of a butter-powder (roller) formula price or the average local manufacturing plants price.

The Ohio Valley order presently provides one classification (Class II) for all milk going into manufacturing uses. For the months of September through February Class II milk is priced at the higher of the Midwest condenseries price or a butter-powder (spray-roller) formula price. For the months of March through August such milk is priced at the average announced price at five local manufacturing plants plus 20 cents.

Previous reference has been made in this decision to the cooperative association's proposal that the consolidated order use a two-class system under which all milk going into manufacturing uses would be Class II milk. In conjunction with this arrangement they proposed that the price for Class II milk be the Minnesota-Wisconsin manufacturing milk price, adjusted to a 3.8 percent butterfat basis by the butterfat differential resulting from multiplying the Chicago butter price by 0.12. A representative of a dairy firm which operates unregulated manufacturing plants located in and around the Louisville-Lexington and Ohio Valley marketing areas proposed at the hearing that if the Minnesota-Wisconsin price were used as a basis for pricing milk going into manufacturing uses the order price should be 15 cents less than the Minnesota-Wisconsin price adjusted to a 3.8 percent butterfat test. A group of proprietary handlers regulated under the Louisville-Lexington order proposed that the Class II price under that order be amended to delete the butter-cheese formula price from the list of Class II price alternatives.

The price for manufacturing grade milk in the two-State area of Minnesota and Wisconsin is issued by the State-Federal Crop Reporting Service on about the 5th day of each month for milk received at manufacturing plants in these States in the previous month. Plant operators report the total pounds of manufacturing grade milk received from farmers, the butterfat content, and total money paid to farmers for the milk delivered at their plants. The two-State area is one in which there is a heavy concentration of manufacturing grade milk and where many plants are competing for such a supply. In Minnesota about 80 percent of the milk sold off of farms is manufacturing grade and in Wisconsin, about 65 percent. About 50 percent of the total manufacturing grade milk sold off farms in the United States is produced in these two States.

Comparisons made herein between the proposed Class II price formulas and the formula prices under the two orders exclude the effect of the butter-cheese formula price under the Louisville-Lexington order. In a decision issued by the Secretary on July 18, 1961 (26 F.R. 6547), based on a public hearing held May 22, 1961, it was concluded that the butter-cheese formula price should be removed from the list of price alternatives in the basic formula price of the Louisville-Lexington order. It was concluded that the butter-cheese formula price had increased to levels representing improper relationships to other measures of the value of manufacturing milk used in this and nearby order markets for basic formula prices. In view of this it is appropriate that comparisons of proposed formulas for pricing reserve milk with current formulas in effect in the two orders not reflect the butter-cheese formula price. When the order was amended August 1, 1961, this formula price was retained as part of the Class II pricing mechanism, however, because the Class II price was not an issue at the hearing.

For the 12-month period of November 1960 through October 1961 the Class II price in the Louisville-Lexington order, without the effect of the butter-cheese formula price, averaged $3.37 for milk testing 3.5 percent butterfat. The Class III price for the same period averaged $3.14 for milk of 3.5 percent butterfat content. The comparable Ohio Valley Class II price averaged $3.19. The Minnesota-Wisconsin manufacturing milk series adjusted to a 3.5 percent butterfat basis using the butterfat differential as proposed by producers would have averaged $3.26. The proposal made by the operator of nonpool manufacturing plants that the Class II price be 15 cents less than the Minnesota-Wisconsin series would have resulted in an average Class II price for this period three cents lower than the average Louisville-Lexington Class III price. A representative of this firm testified, however, that these plants paid ungraded shippers premiums which resulted in prices 10 to 15 cents over the Class III price.

For the period since the Ohio Valley order has been in effect (March 1960 through October 1961) the combined returns to producers under both orders for milk other than Class I, excluding the effect of the butter-cheese formula price, averaged $3.13 for milk at 3.5 percent butterfat test. The Minnesota-Wisconsin manufacturing milk price during this period averaged $3.19 for milk of the same test.

The pricing formulas for reserve milk under the two orders provide seasonal variation by using different price factors for Class III milk under the Louisville-Lexington order (April through August) and Class II milk under the Ohio Valley order (March through August) for the months of heavier milk production. These seasonal changes in the formulas for reserve milk prices would normally produce greater seasonal variation than there might be in the Minnesota-Wisconsin manufacturing milk prices. For milk of 3.5 percent butterfat test during the periods of April through August 1960 and 1961, the Minnesota-Wisconsin price averaged 21 cents over the Louisville-Lexington Class III price and 17 cents over the Ohio Valley Class II price. In the intervening period of September 1960 through March 1961 the Minnesota-Wisconsin price averaged 10 cents over the Louisville-Lexington Class III price and 2 cents under the Ohio Valley Class II price. In the period September 1959 through March 1960 the Minnesota-Wis-

consin price averaged one cent under the Louisville-Lexington Class III price.

It is concluded that some seasonal adjustment of the Minnesota-Wisconsin manufacturing milk price would be necessary to properly reflect the seasonal marketing conditions affecting reserve milk in this market. The evidence does not establish, however, that the general level of price for reserve milk should be substantially different from average levels which have prevailed for the combined area. Experience in recent years has been that reserve milk readily moved to manufacturing outlets without evidence of distressed sales. On the other hand, the price levels have not induced pool plants to accumulate unneeded supplies intended primarily for manufacturing. In order to promote the orderly handling of reserve milk for the proposed consolidated marketing area, including adjustment for the seasonal changes in quantities of reserve milk and prices at which it can be disposed of, it is concluded that a formula (including seasonal adjustments) which would have yielded in the March 1960 through October 1961 period about the same average return as prevailed in the two-market area (excluding the effect of the butter-cheese formula price) should be adopted. Of the various formulas proposed, the Minnesota-Wisconsin series represents the best index of changing values of manufacturing milk based on prices which competing manufacturing plants offer for milk of manufacturing grade. Such paying prices reflect the supply and demand of manufactured dairy products within a highly co-ordinated marketing system which is national in scale. It is concluded that a price for reserve milk within the purposes expressed in the preceding discussion will be provided by use of the Minnesota-Wisconsin price subject to a seasonal deduction of 10 cents for the months of April through August.

During the 20-month period of March 1960 through October 1961 this price formula for milk testing 3.5 percent butterfat would have averaged $3.14 per hundredweight. For the same period the average of prices under the two orders for milk other than Class I milk (excluding the effect of the butter-cheese formula) was $3.13 for milk of the same test. This average reflects in each month the relative quantities of milk in each class under each order.

The announced average price paid by the Minnesota and Wisconsin plants is at the weighted average butterfat test of the milk received at these plants. Since it is concluded in this decision that the consolidated order prices should be announced on a 3.5 percent butterfat basis, it is necessary that the announced Minnesota-Wisconsin prices be adjusted to this basis. The cooperative association proposed that adjustment of these prices be made by using a differential equal to the average quotation for the month for Grade A (92-score) butter at Chicago times 0.12. This differential is presently used as butterfat differentials under both orders in pricing Class II and Class III milk and should likewise be used in the consolidated order for adjusting the announced Minnesota-Wisconsin price to a 3.5 percent butterfat basis.

Butterfat differentials. The prices paid by handlers for Class I milk should be subject to a butterfat differential for each one-tenth of one percent of butterfat content equal to 0.125 times the Chicago butter price of the preceding month. This is the same differential which now applies under the Louisville-Lexington order and which closely approximates the average of differentials which apply under the Ohio Valley order. The Class II price should be adjusted by a butterfat differential equal to 0.120 times the Chicago butter price of the month in which the milk was received. This differential is the same as currently applies in the Ohio Valley order and is slightly higher than the differentials which apply to Class II and Class III milk under the Louisville-Lexington order. It is concluded that these differentials will properly reflect the value of butterfat as used by handlers in the respective classes.

Location differentials. A system of location differentials similar to those which apply to the Class I prices under the present two orders should be adopted but should be modified in relation to the extent of the enlarged marketing area for the proposed consolidated order. Location differentials should apply to Class I milk at plants which are located more than 85 miles from the nearest of the following points: The City Halls in Lexington, Louisville, Madisonville, Elizabethtown and Danville, in Kentucky, and Evansville in Indiana.

In the Louisville-Lexington order, the basing points for location differentials are the City Halls in Louisville and Lexington, whichever is nearer to the plant at which the milk is received from producers. No location differential applies at plants located less than 85 miles from such points. For plants 85 miles or more but less than 95 miles from such points, a location differential of 15 cents per hundredweight is provided, and for greater distances an additional adjustment of 1.5 cents for each additional 10 miles. In the Ohio Valley order the County Courthouses in Evansville, Indiana, and Owensboro, Kentucky, are used as points of reference. For plants located 80 miles but less than 90 miles from such points, an adjustment of 13 cents per hundredweight is deducted, and for distances beyond this, 1.5 cents is deducted for each additional 10 miles.

The evidence with respect to cost of transporting milk does not justify any significant departure from the rates of location differentials used presently in the Louisville-Lexington order. The initial distance of 85 miles from the selected points of reference, which now applies in the Louisville-Lexington order, is adopted herein to apply to the several points of reference in the enlarged marketing area. Additional basing points should be designated at the following locations in the marketing area: Madisonville, Elizabethtown and Danville, Kentucky. These new basing points will provide a better system of location differentials with respect to plants in Southern Kentucky located close to the marketing area and will result in better alignment of prices with prices in nearby Federal order markets. The basing point at Owensboro, Kentucky, will then be unnecessary, and is eliminated.

For plants located beyond 85 miles but less than 95 miles from the reference points named, a location adjustment of 15 cents should apply, and for distances beyond this an additional adjustment of 1.5 cents for each 10 miles should apply. These rates are the same as now apply in the Louisville-Lexington order.

(d) *Payments with respect to unpriced milk.* For effective regulation it is necessary that the order provide for payments to the producer-settlement fund with respect to other source milk allocated to Class I milk at pool plants. Payments should also be made by operators of nonpool plants which dispose of Class I milk on routes in the marketing area.

For purposes of the proposed order, provisions for such payments similar to those of the Louisville-Lexington order are adopted. Under that order, compensatory payments into the producer-settlement fund are required to be made by nonpool plants disposing of Class I milk in the marketing area, such payments to be made, however, under one of two options. Under one option, the payment is based on the quantity of Class I milk disposed of in the marketing area by the nonpool plant, allowing credit, however, for milk which is received by the nonpool plant from pool plants and which is classified as Class I milk. The per hundredweight rates of payment required for the months of January through September are the difference between the Class I price and the Class III price, and for other months, the difference between the Class I price and the uniform price. The prices used in the calculation are subject to appropriate location and butterfat differentials. These rates of payment are deemed necessary to offset the advantage nonpool handlers would otherwise have in using unregulated milk for Class I disposition in the marketing area.

Under the second option, the operator of the nonpool plant may elect that his obligation to the producer-settlement fund be computed as the difference between what his obligation for all milk handled would be if his plant were a pool plant (subject to specified rules with respect to interplant transfers) and the amount of his payments to farmers whose milk production is qualified for the fluid market. In this computation allowance is made for any obligations incurred by the same plant under other orders.

The compensatory payment provisions of the Ohio Valley order are quite similar. The Ohio Valley order differs in that the rate of payment under the first option is the difference between the Class I price and the uniform price in the months of August through March rather than October through December. Another difference is that the Ohio Valley order does not allow credit for Class I milk received at the nonpool plant from a pool plant.

Parties at the hearing requested certain modifications of the system used in the Louisville-Lexington order. One handler asked that under the new order the rate be the difference between the

Class I price and the Class II price in all months. Two handlers asked that credit not be allowed for receipt of Class I milk at a nonpool plant from a pool plant. A nonpool plant operator proposed that credit be allowed to a pool plant operator for compensatory payments under another order on milk disposed of in the marketing area under that order from a nonpool plant also operated by the same handler and to which the pool plant supplied milk. Proponent of the latter proposal did not testify at the hearing and information in the record does not provide a basis for judging the merits of the proposal. A further proposal would have required that crediting of receipts of pool Class I milk, in computing the compensatory payment obligation of a nonpool plant, be allowed only if the nonpool plant paid a price for such milk equal to the Class I price plus 45 cents. This was intended to offset an advantage proponent claimed that nonpool plants have in paying their farmers in the months when order blend prices are reduced by the seasonal incentive plan.

The rates of payment needed to offset the advantage in use of unpriced milk are those now applicable under the Louisville-Lexington order. The seasonal changes in these rates represent the seasonally changing values of other source milk which might be obtained for Class I use in the proposed marketing area. The additional option presently provided in the two orders should be continued. This optional computation is that based on the obligation which would apply if such plant were a pool plant, less payments by the plant operator to dairy farmers who constitute the plant's supply for fluid market disposition. The basis for the several compensatory payment provisions discussed herein have been set forth in prior decisions on these orders. It is concluded here that the findings and conclusions of such decisions apply appropriately to the proposed order.

The provisions of the proposed order do not require compensatory payments on milk classified and priced as Class I milk under another Federal order. Under the requirements of the Act, prices in every order must be established according to the supply and demand conditions of the market which necessarily include price relationships with other markets. Accordingly, prices in this market should be in alignment with prices of other Federal order markets, thus preventing any price advantage that needs to be offset with respect to use of other source milk priced as Class I milk under another order.

The application of regulation to an enlarged marketing area, and adoption of pool plant provisions providing for more inclusive regulation than under the Ohio Valley order, are expected to reduce the quantity of other source milk disposed of in the marketing area. In view of these changes, the more stringent requirements proposed by handlers are considered unnecessary. Production areas of plants which would be fully regulated and of those which might be partially regulated by virtue of disposition in the marketing area do not overlap to a degree such that nonpool plants could obtain a competitive procurement advantage under the system of compensatory payments adopted herein.

All funds collected from such compensatory payments should be added to the producer-settlement fund. The handler receiving other source milk on which a payment accrues should be obligated to make the compensatory payments to the producer-settlement fund. There will be no difference in actual amount so paid for milk whether the payment is required of the handler or of the operator of the unregulated plant from which the other source milk was obtained. Because the handler makes the actual distribution of the milk in the marketing area, and because he reports the utilization to the market administrator, he is, from an administrative view, the logical person to make the payment.

(e) *Payments to producers.* The payment provisions contained in the proposed order are in the same form as such provisions of the Louisville-Lexington order except for minor changes. The butterfat differential applicable to the uniform price should be an average of the Class I and Class II butterfat differentials weighted by the quantities of butterfat in producer milk classified in each class. These butterfat differentials were proposed by the producer association. It has been concluded in the foregoing considerations that the proposed Class I and Class II butterfat differentials will provide proper pricing of butterfat in relation to its value in the respective classes. The proposed producer butterfat differential will serve to distribute to producers a return for the butterfat content of their milk in line with average classified utilization by handlers.

Location differentials should apply to uniform prices to producers according to the location of plants at which producer milk is received (or delivered in the case of bulk tank milk for which a cooperative association is the handler). This differential should be at the same rate as the Class I location differentials so as to properly reflect the value of producer milk for the fluid market.

Producers requested that the fall production incentive program now operating in the Louisville-Lexington market be continued under the proposed order for the enlarged area. This seasonal pricing plan is preferred by producers over the base-excess plan in the Ohio Valley order. The fall production incentive plan is retained in the proposed order as a means of stabilizing the seasonal variations of production. Testimony on behalf of producers held that the change in the plan applicable to the present Ohio Valley producers would have little, if any, effect on the annual income of such producers.

Producer representatives maintained, however, that participation of producers in the fall premium payments in the months of September through December should be limited to producers who have made a proportionate contribution in the preceding spring and summer months of April through July. Concern was expressed with respect to the possibility of large groups of producers being shifted from nearby markets to this market in the fall period.

This proposal conflicts with the purpose of the fall premium plan as part of a Federal milk order. The plan is a method of inducing farmers to produce milk for the market in a more even pattern throughout the year. The money collected in the months of April through July is an accumulation of payments from handlers and does not represent contributions by producers. The money is held in the producer-settlement fund until it is distributed to producers in the fall months. This fund of money must necessarily be paid out on all milk of dairy farmers who have been determined to qualify as producers in the fall months. To do otherwise would require discrimination among qualified producers with respect to pricing. The record does not present a basis which could justify such discrimination.

(f) *Administrative and miscellaneous provisions.* The Class I price and butterfat differential should be announced on the 8th day of the month. This is the date of announcement presently used under the Ohio Valley order and will provide earlier information to the market than the Louisville-Lexington order provision. On the same date the Class II price and butterfat differential of the preceding month should be announced. The uniform price to producers for milk received in the previous month should be announced on or before the 12th day of the month.

Reports on receipts and utilization of milk handled during the month should be due at the office of the market administrator on the 8th day after the end of such month. Handlers should be notified of their obligations on the 13th day after the end of the month. Payments to producers should be made on or before the last day of the month for milk received during the first 15 days of the month at a rate not less than the Class II price for 3.5 percent milk of the preceding month and without adjustment for butterfat content and hauling. Final payment should be made to producers on or before the 17th day following the month in which the milk was received. Payments to a cooperative association for member milk would be required two days earlier.

Payroll reports should be submitted by handlers on or before the 20th day following the end of the month. The proposed order continues the provision now contained in both orders requiring the market administrator on or before the 15th day after the end of the month to report, upon request, to a cooperative association the percentage of milk used in each class by each handler to which the association or member delivered milk.

Both orders now provide for deductions from payments to producers of money to be used by the market administrator for certain marketing services. These include providing market information to producers, verification of weights, and sampling and testing of milk received from producers for whom such services are not being rendered by a qualified cooperative association. The rate of deduction is five cents per hun-

dredweight under the Louisville-Lexington order and six cents under the Ohio Valley order. Under the proposed order the rate now applied in the Louisville-Lexington order should be sufficient to cover such expense. In lieu of these deductions, the order would require payments to a qualified cooperative association determined to be providing such services for producers. The rate of such payments would be according to the authorization given by the producer.

For expense of administration, the Louisville-Lexington order requires payments at the rate of 3 cents per hundredweight while the rate under the Ohio Valley order is 4 cents. The three-cent rate should apply under the new order. Handlers operating pool plants would be obligated to pay such rate with respect to milk received there from producers or from a cooperative association acting as a handler on bulk tank milk it causes to be delivered from the farm to such plant. Milk diverted by a handler (including a cooperative association) would also be subject to such a payment. Payment would be required on other source milk received by a pool plant and assigned to Class I milk. Nonpool plant operators would be required to pay an administrative assesament in amounts depending on their choice of option with respect to meeting their obligations to the producer-settlement fund. If the nonpool plant operator elects to make payment to the producer-settlement fund on the amount of Class I milk disposed of in the marketing area, his payment for expense of administration would be on such amount, allowing credit, however, for milk received from pool plants which is classified as Class I milk. If the nonpool plant operator elects to have his obligation computed at the difference between his payments to his qualified dairy farmers who constitute his Grade A milk supply and the amount which would be his obligation as a pool plant operator, then his obligation for administrative expense would be based on his entire receipts of Grade A milk from dairy farmers and any other receipts allocated to Class I milk, with allowance, however, for similar payments under another Federal order.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended marketing agreement and order amending the orders. The following order amending the orders regulating the handling of milk in the Louisville-Lexington, Kentucky, and Ohio Valley marketing areas is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the amended orders, as hereby proposed to be amended:

DEFINITIONS

§ 1046.1 Act.

"Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

§ 1046.2 Secretary.

"Secretary" means the Secretary of Agriculture or any other officer or employee of the United States authorized to exercise the powers or to perform the duties pursuant to the Act of the said Secretary of Agriculture.

§ 1046.3 Department.

"Department" means the United States Department of Agriculture or other Federal agency authorized to perform the price reporting functions specified in this part.

§ 1046.4 Person.

"Person" means any individual, partnership, corporation, association or any other business unit.

§ 1046.5 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk or its products for its members.

§ 1046.6 Louisville-Lexington-Evansville marketing area.

"Louisville-Lexington-Evansville marketing area", hereinafter called the "marketing area", means all territory geographically located within the perimeter boundaries of Anderson, Bourbon, Daviess, Fayette, Franklin, Garrard, Grayson, Hancock, Hardin, Henderson, Henry, Hopkins, Jefferson, Jessamine, Larue, Madison, McLean, Meade, Mercer, Montgomery, Muhlenberg, Nelson, Ohio, Oldham, Scott, Shelby, Spencer, Union, Webster, and Woodford Counties in the State of Kentucky, and Clark, Crawford, Daviess, Dubois, Floyd, Gibson, Harrison, Knox, Martin, Orange, Perry, Pike, Posey, Spencer, Vanderburgh, Warrick, and Washington Counties in the State of Indiana, including all municipal corporations and institutions owned or operated by the Federal, State or local governments lying wholly or partially within such territory.

§ 1046.7 Producer.

"Producer" means any person, except a producer-handler:

(a) Who produces milk on a dairy farm which is approved by a duly constituted health authority for the production of milk for fluid disposition (this definition shall include approval of milk by the authority to administer the regulations governing the quality of milk acceptable to agencies of the U.S. Government for fluid consumption in its institutions or bases located in the marketing area during any month in which such milk is disposed of to such institutions or bases); and

(b) Whose milk so produced pursuant to paragraph (a) of this section is received at a pool plant or by a cooperative association in its capacity as a handler pursuant to § 1046.8(c) or diverted in accordance with the conditions set forth in § 1046.14.

§ 1046.8 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a city plant or a country plant;

(b) Any cooperative association with respect to milk diverted by it in accordance with the conditions set forth in § 1046.14; and

(c) Any cooperative association with respect to the milk of its producer members which is delivered for the account of the cooperative association from the farm to the pool plant(s) of another handler in a tank truck owned by, operated by, or under contract to such cooperative association if the cooperative association has notified in writing prior to delivery both the market administrator and the handler to whom the milk is delivered that it wishes to be the handler for such milk. Such milk shall be considered as having been received by the cooperative association at the location of the plant to which it was delivered.

§ 1046.9 Producer-handler.

"Producer-handler" means any person who processes and packages milk from his own farm production, distributes any portion of such milk in the marketing area on a route and receives no fluid milk products from other dairy farmers or nonpool plants: *Provided*, That such person provides proof satisfactory to the market administrator that (a) the care and management of all of the dairy animals and other resources necessary to produce the entire amount of fluid milk handled (excluding transfers from pool plants) is the personal enterprise of and at the personal risk of such person, and (b) the operation of the processing and distributing business is the personal enterprise of and at the personal risk of such person.

§ 1046.10 City plant.

"City plant" means a plant where milk is processed or packaged and from which fluid milk products permitted to be labeled as "Grade A" by a duly constituted health authority are disposed of on a route(s) in the marketing area.

§ 1046.11 Country plant.

"Country plant" means a milk plant, other than a city plant, which is approved by a duly constituted health authority to supply milk, skim milk or cream to a city plant(s) for disposition as "Grade A" milk and at which milk is received during the month from persons described in § 1046.7(a) or from a cooperative association in its capacity as a handler pursuant to § 1046.8(c).

§ 1046.12 Pool plant.

"Pool plant" means:

(a) A city plant, other than a plant operated by a producer-handler, which meets the following requirements:

(1) For each of the months of May through October not less than 30 percent and for each of the months of November through April not less than 50 percent of the fluid milk products received during the two months immediately preceding from persons described in § 1046.7(a), from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), from country plants and from pool plants in containers not larger than a gallon are disposed of as Class I milk from such plant during such two-month period to all outlets except such disposition to pool plants in containers larger than a gallon: *Provided*, That, if such utilization percentage for the two preceding months cannot be ascertained by the market administrator, the respective percentages shall apply to receipts and sales during the current month; and

(2) An amount of Class I milk equal to not less than an average of 13,500 pounds per day or not less than 10 percent of the fluid milk products received during the current month from persons described in § 1046.7(a), from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), and from country plants is distributed on routes in the marketing area;

(b) A country plant during any of the months of October through March from which not less than 50 percent, and during other months not less than 40 percent, of the receipts of milk at such plant from persons described in § 1046.7(a) and from a cooperative association in its capacity as a handler pursuant to § 1046.8(c) are moved to and received at a city plant in the form of milk, skim milk or cream;

(c) A country plant during the months of April through September from which not less than 50 percent of the combined receipts of milk from persons described in § 1046.7(a) and from a cooperative association in its capacity as a handler pursuant to § 1046.8(c) during the preceding period of October through March were moved to and received at a city plant(s) in the form of milk, skim milk, or cream, unless the operator of such plant notifies the market administrator in writing on or before March 15 of withdrawal of the plant from the pool for the months of April through September next following; and

(d) A country plant which is operated by a cooperative association if (1) two-thirds or more of the milk from persons described in § 1046.7(a) who are members of such association is delivered during the month from farms to the pool plant(s) of other handlers or transferred by such association from its plant to the pool plant(s) of other handlers or (2) such plant qualified as a pool plant pursuant to subparagraph (1) of this paragraph during each of the immediately preceding consecutive months of October through February.

§ 1046.13 Nonpool plant.

"Nonpool plant" means any milk manufacturing, processing or bottling plant other than a pool plant.

§ 1046.14 Producer milk.

"Producer milk" means only that skim milk and butterfat contained in milk from producers which is:

(a) Received from producers at a pool plant for the account of the person operating such plant: *Provided*, That, in the case of milk other than that delivered by a cooperative association pursuant to § 1046.8(c), when withdrawals of milk are made at more than one pool plant from the same load delivered by farm tank pickup truck and in the absence of agreement between the operators of such pool plants as to the reporting of and payment for such milk, the entire load shall be deemed to have been received at the first pool plant at which any of such milk was withdrawn;

(b) Diverted from a pool plant to a nonpool plant for the account of the operator of the pool plant or for the account of a cooperative association: *Provided*, That such milk so diverted shall be deemed to have been received at the pool plant from which it is diverted if diverted for the account of the handler operating such plant or at the location of the pool plant from which diverted if diverted for the account of a cooperative association: *And provided further*, That producer milk pursuant to this paragraph shall not include the milk of any person during any of the months of October, November, January and February on days on which it is diverted by a handler to a nonpool plant in excess of one-half of the number of days of delivery during the month; or

(c) Received by a cooperative association in its capacity as a handler pursuant to § 1046.8(c).

§ 1046.15 Fluid milk product.

"Fluid milk product" means milk, skim milk, buttermilk, flavored milk, milk drinks (plain or flavored), reconstituted milk or skim milk, fortified milk or skim milk (including "diet" foods), cream (sweet or sour), half and half, or any mixture in fluid form of milk or skim milk and cream (except ice cream mix, frozen dessert mix, evaporated milk, condensed milk, aerated cream products, eggnog, and cultured sour mixtures not labeled as Grade A) which are neither sterilized nor packaged in hermetically sealed containers.

§ 1046.16 Other source milk.

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month in the form of fluid milk products except (1) fluid milk products received from pool plants, (2) producer milk and milk received from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), or (3) opening inventory; and

(b) Products other than fluid milk products from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month.

§ 1046.17 Route.

"Route" means delivery (including disposition from a plant store or from a distribution point and distribution by a vendor) of a fluid milk product(s) to a wholesale or retail outlet(s) other than to a:

(a) Milk plant(s);

(b) Distribution point(s); or

(c) Food processing plant(s) for use other than for fluid consumption.

§ 1046.18 Chicago butter price.

"Chicago butter price" means the arithmetical average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago as reported for the month by the Department.

§ 1046.19 Nonfat dry milk price.

"Nonfat dry milk price" means the arithmetical average of the weighted averages of the carlot prices per pounds of spray and roller process nonfat dry milk for human consumption, f.o.b. Chicago area manufacturing plants, as published for the month by the Department.

MARKET ADMINISTRATOR

§ 1046.20 Designation.

The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall

be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1046.21 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1046.22 Duties.

The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to the following:

(a) Within 45 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 1046.88 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 1046.87) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination and furnish such information and reports as may be requested by the Secretary;

(g) Verify all reports and payments of each handler by audit of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends, or by such investigation as the market administrator deems necessary;

(h) Prepare and disseminate to the public such statistics and such information as he deems advisable and as do not reveal confidential information;

(i) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 5 days after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 1046.30 through 1046.32, or payments pursuant to §§ 1046.61, 1046.80, 1046.84, and 1046.86 through 1046.88;

(j) On or before the 15th day after the end of each month, report to each cooperative association, which so requests, with respect to milk delivered by such association or by its members to each handler during the month: (1) The percentage of such receipts classified in each class; and (2) the percentage relationship of such receipts to the total pounds of Class I milk available to assign to such receipts exclusive of the Class I milk disposed of by such handler to the pool plant(s) of other handlers and to nonpool plants. For the purpose of these reports, the milk received from such association shall be treated on a pro rata basis of the total producer milk received by such handler during the month;

(k) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, and notify each handler in writing the prices and butterfat differentials determined for each month as follows:

(1) On or before the 8th day of each month, the Class I price and butterfat differential for the month and the Class II price and butterfat differential for the preceding month computed pursuant to §§ 1046.51 and 1046.52; and

(2) On or before the 12th day after the end of each month, the uniform price computed pursuant to § 1046.71, and the butterfat differential computed pursuant to § 1046.81;

(l) On or before the 13th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing:

(1) The net obligation computed for such handler pursuant to § 1046.70; and

(2) The amounts to be paid by such handler pursuant to §§ 1046.61, 1046.84, 1046.87, and 1046.88.

REPORTS, RECORDS AND FACILITIES

§ 1046.30 Reports of receipts and utilization.

(a) Each cooperative association in its capacity as a handler and each handler with respect to each of his pool plants shall report for the month to the market administrator in the detail and on forms prescribed by the market administrator, such reports to be due at the office of the market administrator not later than the 8th day after the end of such month:

(1) The quantities of skim milk and butterfat contained in receipts of producer milk (including such handler's own farm production);

(2) The quantities of skim milk and butterfat contained in fluid milk products received from other pool plants and in milk received from a cooperative association in its capacity as a handler pursuant to § 1046.8(c);

(3) The quantities of skim milk and butterfat contained in other source milk;

(4) Inventories of fluid milk products on hand at the beginning and end of the month;

(5) The utilization of all skim milk and butterfat required to be reported pursuant to this section, including a separate statement, if required by the market administrator, of the disposition of Class I milk other than on routes operated wholly or partially within the marketing area; and

(6) Such other information with respect to his receipts and utilization of butterfat and skim milk as the market administrator may prescribe;

(b) Each handler operating a city plant which is a nonpool plant shall report on or before the applicable date specified in paragraph (a) of this section his receipts of milk from dairy farmers and all other sources and the utilization of such receipts in accordance with § 1046.40 as prescribed by the market administrator.

§ 1046.31 Payroll reports.

On or before the 20th day after the end of each month, each handler who received milk from producers or from a cooperative association of producers, and each handler operating a nonpool plant subject to § 1046.61(c) shall submit to the market administrator for each of his pool plants, or nonpool plants subject to § 1046.61(c), his producer or dairy farmer payroll for deliveries during the month which shall show (a) the total pounds of milk received from each producer, producer cooperative association or dairy farmer, and the average butterfat content of such milk, (b) the prices paid and the amount of payment to each producer, producer cooperative association, or dairy farmer, and (c) the nature and amount of any credits, deductions, or charges involved in such payments.

§ 1046.32 Other reports.

(a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler shall report to the market administrator, as soon as possible after first receiving milk from any producer, the name and address of such producer, the date upon which such milk was first received, and the plant at which such milk was received.

(c) On or before the 10th day after the request of the market administrator, each handler shall submit a schedule of rates which are charged and paid for the transportation of milk from the farm of each producer to such handler's plant. Changes in such schedule of rates and the effective dates thereof shall be reported to the market administrator within 10 days.

§ 1046.33 Records and facilities.

Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts, records, and reports of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of producer milk and other source milk;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream, and milk products handled;

(c) Payments to producers, including supporting records of all deductions and

written authorization from each producer of the rate per hundredweight or other method for computing hauling charges on such producer milk; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream, and other milk products on hand at the beginning and end of each month.

§ 1046.34 Retention of records.

All books and records required under this part to be available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c(15)(A) of the Act or a court action specified in such notice, the handler shall retain such books and records, or specified records and books until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 1046.40 Skim milk and butterfat to be classified.

All skim milk and butterfat which is required to be reported pursuant to §§ 1046.30 and 1046.61 shall be classified by the market administrator pursuant to the provisions of §§ 1046.41 through 1046.46.

§ 1046.41 Classes of utilization.

Subject to the conditions set forth in §§ 1046.42 through 1046.44, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except skim milk and butterfat disposed of in fluid form pursuant to paragraph (b) (4) and (5) of this section: *Provided*, That fluid milk products which have been fortified with nonfat milk solids shall be Class I in an amount equal only to the weight of an equal volume of unfortified milk, skim milk, and cream of the same butterfat content; and

(2) Not accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than a fluid milk product;

(2) Used to produce frozen cream;

(3) In fluid milk products which have been fortified with nonfat milk solids which is not accounted for as Class I milk pursuant to the proviso in paragraph (a)(1) of this section;

(4) Disposed of for livestock feed or, in the case of skim milk only, dumped, upon prior notice as prescribed by the market administrator;

(5) Disposed of in bulk to bakeries, candy or soup manufacturers and other commercial food manufacturing establishments which do not dispose of any such receipts in the form of fluid milk products;

(6) In inventories of fluid milk products;

(7) In shrinkage, excluding shrinkage of other source milk, not to exceed the following:

(i) Two percent of skim milk and butterfat, respectively, in producer milk physically received at a pool plant; plus

(ii) One and one-half percent of skim milk and butterfat, respectively, in milk received at a pool plant from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), except that if the handler operating such pool plant files notice with the market administrator on or before the date he submits his monthly report applicable to such milk pursuant to § 1046.30 that he is purchasing such milk on the basis of weights determined at the farm from farm bulk tank measurements the applicable percentage shall be two percent; plus

(iii) One and one-half percent of skim milk and butterfat, respectively, in fluid milk products received at a pool plant in bulk as a transfer from other pool plants; less

(iv) One and one-half percent of skim milk and butterfat, respectively, in fluid milk products transferred in bulk from a pool plant to other plants; and plus

(v) One-half of one percent of skim milk and butterfat, respectively, in producer milk received by a cooperative association in its capacity as a handler pursuant to § 1046.8(c), unless the exception provided in subdivision (ii) of this subparagraph applies; and

(8) In shrinkage of other source milk.

§ 1046.42 Shrinkage.

In computing shrinkage for the purposes of § 1046.41(b) (7) and (8) the market administrator shall determine the shrinkage of skim milk and butterfat, respectively, in the following manner:

(a) Compute the total shrinkage for each handler, or for each pool plant in the case of those handlers operating pool plants, by subtracting the skim milk and butterfat, respectively, classified as Class I milk pursuant to § 1046.41(a)(1) and as Class II milk pursuant to § 1046.41 (b) (1) through (6) (subject to the provisions of §§ 1046.43 through 1046.45) from the receipts of the skim milk and butterfat, respectively, required to be reported pursuant to § 1046.03; and

(b) Prorate the total shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (a) of this section between:

(1) The maximum pounds of skim milk and butterfat shrinkage allowable pursuant to § 1046.41(b)(7) divided by 0.02, and

(2) The total pounds of other source milk received in bulk in the form of fluid milk products.

§ 1046.43 Responsibility for classification of milk.

(a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect.

§ 1046.44 Transfers.

Skim milk or butterfat disposed of by a handler from a pool plant or by a cooperative association in its capacity as a handler pursuant to § 1046.8 (b) or (c) shall be classified as follows:

(a) As Class I milk if transferred in the form of a fluid milk product to a pool plant of the same handler or of another handler unless utilization in Class II is claimed by the handler (or handlers) in their reports submitted pursuant to § 1046.30 or such milk is classified pursuant to paragraph (b) of this section: *Provided*, That the skim milk or butterfat so classified as Class II milk shall be limited to the amount of skim milk or butterfat, respectively, remaining in Class II milk in the transferee plant after making the assignments pursuant to § 1046.46(a) (1) through (8) and the corresponding steps of § 1046.46 (b), and any additional amount of skim milk or butterfat so transferred shall be classified as Class I milk: *And provided further*, That if the transferor plant has other source milk during the month, the skim milk or butterfat so transferred shall be classified at both plants so as to allocate the highest priced available class utilization to the producer milk at both plants: *And provided also*, That in no case shall the assignment of transferred skim milk or butterfat to Class I in the transferee plant exceed the difference between the transferee plant's total receipts of milk and milk products and utilization by the transferee plant in Class II;

(b) If a specified utilization of skim milk and butterfat transferred to a pool plant of another handler by a cooperative association in its capacity as a handler pursuant to § 1046.8(c) is not claimed by both handlers pursuant to paragraph (a) of this section, such skim milk and butterfat shall be classified pro rata to the respective amounts remaining in each class at the pool plant of the receiving handler after making the assignments pursuant to § 1046.46(a)(8) and the corresponding step of § 1046.46 (b) and after assignment of milk for which specified classification has been claimed by handlers pursuant to paragraph (a) of this section;

(c) As Class I milk if transferred to a producer-handler in the form of a fluid milk product;

(d) As Class I milk if transferred or diverted in the form of milk, skim milk or cream in bulk to a nonpool plant located less than 250 airline miles from the City Hall in either Louisville, Kentucky, or Evansville, Indiana, unless:

(1) The handler claims classification in Class II in his report submitted to the market administrator pursuant to § 1046.30;

(2) The operator of the nonpool plant maintains books and records showing the receipts and utilization of all skim milk and butterfat at such plant which are

made available if requested by the market administrator for verification;

(3) An amount of skim milk and butterfat, respectively, of not less than that so claimed by the handler was used in the nonpool plant in products included in Class II milk or was disposed of by the nonpool plant in the form of cream in bulk if the handler meets the requirements specified in subdivisions (i), (ii), and (iii) of this subparagraph:

(i) Claims classification of such cream as Class II;

(ii) Establishes that such cream was transferred without Grade A certification, each shipping container was tagged or labeled to show that the contents were for manufacturing use only, and the shipment of such cream was invoiced accordingly; and

(iii) Affords the market administrator at least 24 hours notice prior to shipment of such cream so that he may verify such shipment;

(4) The classification reported by the handler results in an amount of skim milk and butterfat in Class I milk claimed by all handlers transferring or diverting milk to such nonpool plant of not less than the amount of assignable Class I milk remaining after the following computation:

(i) From the total skim milk and butterfat, respectively, in fluid milk products disposed of from such nonpool plant and classified as Class I milk pursuant to the classification provisions of this order applied to such nonpool plant, subtract the skim milk and butterfat, respectively, received at such plant directly from dairy farmers who hold permits to supply "Grade A" milk and who the market administrator determines constitute the regular source of supply for such nonpool plant; and

(ii) From the remaining amount of Class I milk, subtract the skim milk and butterfat, respectively, in fluid milk products received from another market and which is classified and priced as Class I milk pursuant to another order issued pursuant to the Act: *Provided*, That the amount subtracted pursuant to this subdivision shall be limited to such markets' pro rata share of such remainder based on the total receipts of skim milk and butterfat, respectively, at such nonpool plant which are subject to the pricing provisions of an order issued pursuant to the Act; and

(5) If the skim milk and butterfat, respectively, transferred, or diverted by all handlers to such a nonpool plant and reported as Class I milk pursuant to this paragraph is less than the skim milk and butterfat assignable to Class I milk pursuant to subparagraph (4) of this paragraph, an equivalent amount of skim milk and butterfat shall be reclassified as Class I milk pro rata in accordance with the claimed Class II classification reported by each of such handlers; and

(c) As Class I milk if transferred or diverted in the form of milk, skim milk or cream in bulk to a nonpool plant located 250 airline miles or more from the City Hall in either Louisville, Kentucky, or Evansville, Indiana.

§ 1046.45 Computation of the skim milk and butterfat in each class.

For each month the market administrator shall correct for mathematical and other obvious errors the reports of receipts and utilization submitted pursuant to § 1046.30 by each handler and shall compute the total pounds of skim milk and butterfat, respectively, in Class I milk and Class II milk for such handler: *Provided*, That if any of the water contained in the milk from which a product is made is removed before such product is disposed of by a handler, the hundredweight of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids.

§ 1046.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1046.45 the market administrator shall determine for each pool plant the classification of producer milk received at the pool plant(s) of each handler each month as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk classified pursuant to § 1046.41(b)(7) (i) through (iv);

(2) Subtract from the total pounds of skim milk in Class I milk (i) the pounds of skim milk received in the form of sour cream in consumer packages and disposed of in the same packages as Class I milk if such sour cream is classified and priced as Class II milk under the Chicago Federal milk order (Order No. 30) and (ii) the pounds of skim milk received in the form of liquid dietary products in consumer packages and disposed of in the same packages as Class I milk to the extent of the amount allowable pursuant to § 1046.41(a)(1) if such products are classified and priced as Class I milk under the Cincinnati Federal milk order (Order No. 33);

(3) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source milk which are not subject to the Class I pricing provisions of an order issued pursuant to the Act and which have not been subtracted pursuant to subparagraph (2)(i) of this paragraph;

(4) Subtract from the remaining pounds of skim milk in Class II milk an amount equal to such remainder, or the product obtained by multiplying the pounds of skim milk in producer milk by 0.05, whichever is less;

(5) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source milk which are subject to the Class I pricing provisions of another order issued pursuant to the Act and which have not been subtracted pursuant to subparagraph (2)(ii) of this paragraph;

(6) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (4) of this paragraph;

(7) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month;

(8) Add to the remaining pounds of skim milk in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph;

(9) Subtract from the remaining pounds of skim milk in each class the skim milk in fluid milk products received from the pool plants of other handlers and from a cooperative association in its capacity as a handler pursuant to § 1046.8(c) according to its classification determined pursuant to § 1046.44 (a) or (b); and

(10) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk received in producer milk, subtract such excess from the remaining pounds of skim milk in series beginning with Class II. Any amount of excess so subtracted shall be called "overage."

(b) Butterfat shall be allocated in accordance with the same procedure prescribed for skim milk in paragraph (a) of this section.

Minimum Prices

§ 1046.50 Basic formula price.

The basic formula price shall be the higher of the prices as computed to the nearest one-tenth of a cent by the market administrator pursuant to paragraphs (a) and (b) of this section:

(a) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Company and Location
Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus amounts calculated pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Multiply the Chicago butter price by 4.2, and

(2) From the nonfat dry milk price, subtract 5.5 cents and multiply the difference by 8.2.

§ 1046.51 Class prices.

Subject to the provisions of §§ 1046.52 and 1046.53 the minimum class prices for milk per hundredweight for the month shall be determined by the market administrator as follows:

(a) *Class I milk.* The price for Class I milk shall be the basic formula price for the preceding month plus $1.25, plus or minus a supply-demand adjustment of not more than 50 cents computed pursuant to subparagraphs (1) through (6) of this paragraph: *Provided*, That the Class I price during the period beginning with the effective date of this amendment through May 1962 shall not be less than $4.43:

(1) Calculate the percentage that total receipts of producer milk were of the total Class I milk at all pool plants for each of the following periods (using for those months included in this computation which are prior to the effective date of this order the quantities of receipts and utilization which have been established for such months under the Louisville-Lexington order and the Ohio Valley order):

(i) The 24-month period ending with the third preceding month, and

(ii) The two-month period ending with the second preceding month and the corresponding two-month period of each of the two preceding years;

(2) Determine the simple average of the percentages for the three two-month periods computed pursuant to subparagraph (1)(ii) of this paragraph and divide by the percentage for the 24-month period determined pursuant to subparagraph (1)(i) of this paragraph;

(3) Add to the quotient obtained pursuant to subparagraph (2) of this paragraph the corresponding ratios for each of the 11 months immediately preceeding and divide by 12;

(4) Multiply 144 percent by the result obtained by dividing the ratio computed pursuant to subparagraph (2) of this paragraph by the ratio computed pursuant to subparagraph (3) of this paragraph;

(5) Determine the net deviation percentage by subtracting the percentage determined pursuant to subparagraph (4) of this paragraph from the percentage determined pursuant to subparagraph (1)(ii) of this paragraph for the second and third preceding months; and

(6) If the net deviation percentage computed pursuant to subparagraph (5) of this paragraph is a minus value, add to the Class I price, or if such net deviation percentage is a plus value, subtract from the Class I price an amount which is two-thirds of the total number of cents (rounding any fraction to the nearest tenth of a cent) computed pursuant to subdivisions (i), (ii), and (iii) of this subparagraph: *Provided*, That any such supply-demand adjustment shall not result in a change from the adjustment effective for the preceding month of more than 4 cents:

(i) One cent times each such percentage point of net deviation; plus

(ii) One cent times the lesser of:

(a) Each such percentage point of net deviation, or

(b) Each percentage point of net deviation of like direction (plus or minus, with any net deviation percentage of opposite direction considered to be zero for purposes of computations of this subparagraph) computed pursuant to subparagraph (5) of this paragraph for the month immediately preceding; plus

(iii) One cent times the least of:

(a) Each such percentage point of net deviation,

(b) Each percentage point of net deviation of like direction computed pursuant to subparagraph (5) of this paragraph for the month immediately preceding, or

(c) Each percentage point of net deviation of like direction computed pursuant to subparagraph (5) of this paragraph for the second preceding month.

(b) *Class II milk.* The price for Class II milk for the months of September through March shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the delivery period, and for the months of April through August such price less 10 cents: *Provided*, That such reported price shall be adjusted to a 3.5 percent butterfat basis by the butterfat differential computed pursuant to § 1046.52(b) and rounded to the nearest one-tenth of a cent.

§ 1046.52 Butterfat differentials to handlers.

For each one-tenth of one percent that the weighted average butterfat test of milk which is classified as Class I or Class II is more or less than 3.5 percent, there shall be added to or subtracted from, as the case may be, the price for such class a butterfat differential (computed to the nearest one-tenth of a cent) determined as follows:

(a) *Class I milk.* Multiply the Chicago butter price for the preceding month by 0.125.

(b) *Class II milk.* Multiply the Chicago butter price for the month by $0.120.

§ 1046.53 Location differentials to handlers.

For that milk received from producers or from a cooperative association in its capacity as a handler pursuant to § 1046.8(c) at a pool plant located at any point which is 85 miles or more from the City Hall in Evansville, Indiana, or Louisville, Lexington, Danville, Elizabethtown, or Madisonville, Kentucky, whichever is nearer, by the shortest hard-surfaced highway distance as determined by the market administrator, and which is classified as Class I milk, the price specified in § 1046.51(a) shall be reduced at the rate set forth in the following schedule according to the location of the pool plant where such milk is received:

	Rate per hundredweight (cents)
Distance from City Hall:	
85 miles but less than 95 miles	15.0
For each additional 10 miles or fraction thereof an additional	1.5

Provided, That for the purpose of calculating such location differential, fluid milk products which are transferred between pool plants shall be assigned to any remainder of Class II milk in the transferee plant after making the calculations prescribed in § 1046.46(a)(8) and the comparable steps in § 1046.46(b) for such plant, such assignment to transferor plants to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

§ 1046.54 Use of equivalent prices.

If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

Application of Provisions

§ 1046.60 Producer-handlers.

Sections 1046.50 through 1046.53, 1046.61, 1046.70, 1046.71, and 1046.80 through 1046.89 shall not apply to a producer-handler.

§ 1046.61 Obligation of handlers operating a nonpool plant which is a city plant.

Each handler, except a producer-handler, in his capacity as the operator of a nonpool plant which is a city plant shall:

(a) On or before the 8th day after the end of the month make reports to the market administrator with respect to the disposition of Class I milk in the marketing area and such other information on the total receipts and utilization of skim milk and butterfat at each of such plants as the market administrator may require, except that a handler selecting the option provided in paragraph (c) of this section at the time his report is filed shall report in accordance with §§ 1046.30 and 1046.31 as though such plant(s) were a pool plant; and

(b) On or before the 15th day after the end of the month pay to the market administrator, unless such handler elects at the time of reporting pursuant to paragraph (a) of this section the option provided pursuant to paragraph (c) of this section, the amounts specified in subparagraphs (1) and (2) of this paragraph:

(1) An amount for deposit in the producer-settlement fund equal to the rate of payment for unpriced milk pursuant to § 1046.70(c) multiplied by the hundredweight of skim milk and butterfat disposed of from such plant as Class I milk (computed in accordance with § 1046.45) on routes in the marketing area during such month less the skim milk and butterfat, respectively, received from a pool plant during the month and classified as Class I milk under this part; and

(2) An amount for administrative assessment equal to the rate specified in § 1046.88 with respect to skim milk and butterfat disposed of from such plant as Class I milk (computed in accordance with § 1046.45) on routes in the marketing area during such month less the skim milk and butterfat, respectively, received from a pool plant during the month and classified as Class I milk under this part; or

(c) On or before the 18th day after the end of the month pay to the market administrator the amounts specified in subparagraphs (1) and (2) of this paragraph:

(1) An amount for deposit in the producer-settlement fund equal to any plus amount remaining after deducting from the obligation that would have been computed pursuant to § 1046.70 for such non-

pool plant, and for any country plant (meeting the requirements equivalent to § 1046.12 (b) or (c)) which serves as a source of milk for such nonpool plant, if such plant(s) were a pool plant(s), the amounts specified in subdivisions (i) and (ii) of this subparagraph: *Provided*, That in the application of § 1046.44 for the purpose of this subparagraph, milk transferred or diverted from such nonpool plant(s) to a pool plant shall be classified as Class I and Class II milk in the same ratio as other source milk is allocated to each class in such pool plant pursuant to § 1046.46(a)(3) and the corresponding step of § 1046.46(b): *And provided further*, That in the application of § 1046.46(a)(9) and the corresponding step of § 1046.46(b), receipts of fluid milk products at such nonpool plant from a pool plant(s) shall be allocated to the class in which such products are classified at the pool plant(s) pursuant to § 1046.44 (d) or (e):

(i) The gross payments made on or before the 17th day after the end of the month for milk received at such plant(s) during the month from dairy farmers meeting the conditions in § 1046.7(a); and

(ii) Any payments to the producer-settlement funds under other orders issued pursuant to the Act applicable to milk handled at such plant during the month as a partially regulated plant under such other orders; and

(2) An amount for administrative assessment equal to the amount which would have been computed pursuant to § 1046.88 if such nonpool plant had been a pool plant during the month: *Provided*, That such amount shall be reduced by any amounts paid for the month as an administrative expense assessment determined on the basis of Class I milk disposed of on routes in other marketing areas pursuant to the terms under such other orders issued pursuant to the Act: *And provided further*, That if less Class I milk is disposed of from such plant on routes in the Louisville-Lexington-Evansville marketing area than is disposed of during the month on routes in another marketing area(s) as defined in an order(s) issued pursuant to the Act, and if an administrative expense assessment is applied at such plant as if a fully regulated (pool) plant under such order pursuant to the order for the marketing area where the volume of Class I milk disposed of from such plant is greatest, no administrative expense assessment shall be applied under this order.

§ 1046.62 Plants subject to other Federal orders.

Unless determined otherwise by the Secretary, the provisions of this part shall not apply to a milk plant during any month in which the milk at such plant would be subject to the pricing and pooling provisions of another order issued pursuant to the Act unless such plant meets the requirements for a pool plant pursuant to § 1046.12 and a greater volume of fluid milk products is disposed of from such plant to pool plants and to retail or wholesale outlets located in the Louisville-Lexington-Evansville marketing area than in the marketing area regulated pursuant to such other order during the current month and each of the three months immediately preceding: *Provided*, That the operator of a plant which is exempted from the provisions of this order pursuant to this section shall, with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

DETERMINATION OF UNIFORM PRICE

§ 1046.70 Net obligation of each handler.

The net obligation of each handler for milk received during each month from producers shall be a sum of money computed by the market administrator as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to §§ 1046.40 through 1046.46 by the applicable class prices and add together the resulting amounts;

(b) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 1046.46 by the applicable class prices;

(c) Add the amount computed by multiplying the pounds of skim milk and butterfat subtracted from Class I milk pursuant to § 1046.46(a)(3) and the corresponding step of § 1046.46(b) by the price resulting from the following computations:

(1) For the months of January through September, subtract from the Class I price adjusted by the Class I butterfat and location differentials at the nearest plant(s) from which an equivalent amount of other source milk was received and the Class II price adjusted by the Class II butterfat differential; and

(2) For the months of October through December, subtract from the Class I price adjusted by the Class I butterfat differential the uniform price computed pursuant to § 1046.71 adjusted by the producer butterfat differential;

(d) Add the amount computed by multiplying the difference between the Class II price for the preceding month and the Class I price for the current month by the hundredweight of producer milk classified as Class II milk during the preceding month or the hundredweight of milk subtracted from Class I milk pursuant to § 1046.46(a)(7) and the corresponding step of § 1046.46(b), whichever is less; and

(e) Add the amount computed by multiplying the pounds of skim milk and butterfat subtracted from Class I milk pursuant to § 1046.46(a)(7) and the corresponding step of § 1046.46(b) which is in excess of the skim milk and butterfat applied pursuant to paragraph (d) of this section and the skim milk and butterfat subtracted from Class II milk pursuant to § 1046.46(a)(5) and the corresponding step of § 1046.46(b) in the preceding month by the applicable rate determined pursuant to paragraph (c) (1) or (2) of this section for the month.

§ 1046.71 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the net obligations computed pursuant to § 1046.70 for all handlers who made the reports prescribed in § 1046.30 for the month and who are not in default of payments pursuant to § 1046.84 for the preceding month;

(b) Subtract, if the average butterfat content of the producer milk included in these computations is greater than 3.5 percent, or add, if such average butterfat content is less than 3.5 percent an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 3.5 percent by the butterfat differential computed pursuant to § 1046.81 and multiplying the resulting figure by the total hundredweight of such milk;

(c) Add an amount equal to the sum of the deductions to be made from producer payments for location differentials pursuant to § 1046.82;

(d) Subtract for each of the months of April, May, June and July an amount computed by multiplying the total hundredweight of producer milk included in these computations by 12 percent of the simple average of the basic formula prices, computed to the nearest cent, for the 12 months of the preceding calendar year (using prices computed according to the basic formula provisions of this order for any periods prior to the effective date of this order);

(e) Add an amount representing one-half of the cash balance on hand in the producer-settlement fund after deducting the total amount of contingent obligations to handlers pursuant to § 1046.85(a) and the balance held pursuant to paragraph (d) of this section for payment pursuant to § 1046.85(b);

(f) Divide the resulting total by the total hundredweight of producer milk included in these computations; and

(g) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (f) of this section. The resulting figure shall be the uniform price.

PAYMENTS

§ 1046.80 Time and method of payment for producer milk.

Except as provided in paragraph (c) of this section, each handler shall make payment to each producer for milk received from such producer as follows:

(a) On or before the last day of each month for milk received during the first 15 days of the month from such producer who has not discontinued delivery of milk to such handler, an amount computed at not less than the Class II price for 3.5 percent milk for the preceding month without deduction for hauling;

(b) On or before the 17th day after the end of each month for milk received from such producer during such month, an amount computed at not less than the uniform price per hundredweight plus the per hundredweight payment provided by § 1046.85(b) for the month, subject to the butterfat differential computed pursuant to § 1046.81, and plus or minus adjustments for errors made in previous payments to such producer and less (1) the payment made pursuant to paragraph (a) of this section, (2) the location differential pursuant to § 1046.82, (3) marketing service deductions pursuant to § 1046.87 and (4) proper deductions authorized by such producer which, in the case of a deduction for hauling, shall be in writing and signed by such producer or, in the case of members of a cooperative association which is marketing the producer's milk, by such association;

(c)(1) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association in lieu of payments pursuant to paragraphs (a) and (b) of this section, each handler shall pay to the cooperative association on or before the second day prior to the dates specified in paragraphs (a) and (b), respectively, of this section, an amount equal to the sum of the individual payments otherwise payable to such producers without the deductions provided by paragraphs (b) (3) and (4) of this section: *Provided*, That deductions for supplies authorized by such producer may be made. The foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day of the month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association.

(2) A copy of each such request, promise to reimburse and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination.

(d) In making the payments to producers pursuant to paragraph (b) of this section, each handler shall furnish each producer a supporting statement which shall show for each month the following:

(1) The identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required pursuant to this part;

(4) The rate which is used in making the payment if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer.

(e) In making payments to a cooperative association pursuant to paragraph (c) of this section, each handler shall report to such cooperative association for each such producer on forms approved by the market administrator as follows:

(1) On or before the 20th day of the month, the total pounds of milk received during the first 15 days of such month, and

(2) On or before the 7th day of the following month, the total pounds of milk received each month, together with the butterfat content of such milk and the amount of deductions claimed by such handler.

(f) Each handler shall pay to the cooperative association on or before the 10th day of the following month for milk received from a cooperative association for which it is a handler pursuant to § 1046.8(c) an amount computed at not less than the value of such milk at the minimum prices for milk in each class subject to the applicable location and butterfat differentials.

§ 1046.81 Butterfat differentials to producers.

In making payment to producers pursuant to § 1046.80(b) each handler shall add to the uniform price not less than, or subtract from the uniform price not more than, as the case may be, for each one-tenth of one percent that the butterfat content of the milk received from the producer is above or below 3.5 percent, a butterfat differential computed by the market administrator by multiplying the total pounds of butterfat in producer milk classified in Class I and Class II milk during the month pursuant to §§ 1046.40 through 1046.46 by the respective butterfat differential for each class, dividing the sum of such values by the total pounds of such butterfat, and rounding the resulting figure to the nearest one-tenth of a cent.

§ 1046.82 Location differentials to producers.

In making payments to producers pursuant to § 1046.80(b) a handler shall deduct from the uniform price, with respect to all milk received from producers, not more than the appropriate zone differential provided in § 1046.53.

§ 1046.83 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1046.61, 1046.84 and 1046.86 and out of which he shall make all payments pursuant to §§ 1046.85 and 1046.86: *Provided*, That payments due any handler shall be offset by payments due from such handler.

§ 1046.84 Payments to the producer-settlement fund.

On or before the 15th day after the end of each month, each handler shall pay to the market administrator any amount by which the net obligation of such handler for the month is greater than an amount computed by multiplying the hundredweight of milk received by him from producers during the month by the uniform price adjusted by the producer butterfat and location differentials.

§ 1046.85 Payments out of the producer-settlement fund.

(a) On or before the 16th day after the end of each month, the market administrator shall pay to each handler for payment to producers any amount by which the net obligation of such handler for the month is less than an amount computed by multiplying the hundredweight of milk received by him from producers during the month by the uniform price adjusted by the producer butterfat and location differentials: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

(b) On or before the 16th day after the end of each of the months of September, October, November, and December, the market administrator shall pay out of the producer-settlement fund to each handler for all milk for which payment is to be made to producers pursuant to § 1046.80(b) for such month and to each cooperative association for all producer milk for which such association is receiving payments pursuant to § 1046.80 (c) for such month at the following rate per hundredweight: For the months of September through November, divide one-fourth of the aggregate amount set aside in the producer-settlement fund pursuant to § 1046.71(d) during the immediately preceding period of April through July, and for the month of December, divide the balance remaining in such fund by the hundredweight of producer milk received by all handlers during the month (computed to the nearest cent per hundredweight).

§ 1046.86 Adjustment of accounts.

(a) Whenever verification by the market administrator of payments by any handler discloses errors made in payments to the producer-settlement fund, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days, make payment to the market administrator of the amount so billed. Whenever such verification discloses that payment is due from the market administrator to any handler, pursuant to § 1046.85, the market administrator shall, within 15 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer for milk received by such handler, discloses payment of less than is required by § 1046.80, the handler shall pay any amount so due not later than the time of making payment to producers next following such disclosure.

(b) Overdue accounts: Any unpaid obligation of a handler or of the market administrator pursuant to §§ 1046.80,

1046.84, 1046.85, 1046.86(a), 1046.87, or 1046.88 shall be increased one-half of one percent each month or fraction thereof, compounded monthly, until such obligation is paid.

§ 1046.87 Marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers pursuant to § 1046.80(b), shall deduct 5 cents per hundredweight, or such amount not in excess thereof as the Secretary may prescribe, with respect to all milk received by such handler from producers (other than such handler's own farm production) during the month and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received from such producers and to provide such producers with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) Each cooperative association which is actually performing the services described in paragraph (a) of this section, as determined by the market administrator, may file with a handler a claim for authorized deductions from the payments otherwise due to its producer members for milk delivered to such handler. Such claim shall contain a list of the producers for whom such deductions apply, an agreement to indemnify the handler in the making of the deductions, and a certification that the association has an unterminated membership contract with each producer. In making payments to producers for milk received during the month, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, deductions in accordance with the association's claim and shall pay the amount deducted to the association within 15 days after the end of the month.

§ 1046.88 Expense of administration.

As his pro rata share of the expense of the administration of this part, each handler, excluding a cooperative association in its capacity as a handler pursuant to § 1046.8(c), shall pay to the market administrator on or before the 15th day after the end of each month 3 cents per hundredweight, or such lesser amount as the Secretary may prescribe, for each hundredweight of skim milk and butterfat contained in his receipts during the month of (a) producer milk (including such handler's own farm production), (b) milk received from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), and (c) other source milk allocated to Class I milk pursuant to § 1046.46(a)(3) and the corresponding step of § 1046.46(b). A handler operating a city plant which is a nonpool plant shall pay administrative assessments in accordance with § 1046.61.

§ 1046.89 Termination of obligations.

The provisions of this section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled, and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producer(s) or cooperative association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deductions of set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files pursuant to section 8c(15)(A) of the Act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

§ 1046.90 Effective time.

The provisions of this part, or any amendment to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated, pursuant to § 1046.91.

§ 1046.91 Suspension or termination.

Any or all provisions of this part, or any amendment to this part, shall be suspended or terminated as to any or all handlers after such reasonable notice as the Secretary may give and shall, in any event, terminate whenever the provisions of the Act authorizing it cease to be in effect.

§ 1046.92 Continuing power and duty.

(a) If upon the suspension or termination of any or all provisions of this part there are any obligations arising under this part, the final accrual or ascertainment of which requires further acts by any handler, by the market administrator or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate, shall (1) continue in such capacity until discharged, (2) from time to time account for all receipts and disbursements and, if so directed by the Secretary, deliver all funds or property on hand, together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct, and (3) if so directed by the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant to this part.

§ 1046.93 Liquidation after suspension or termination.

Upon the suspension or termination of any or all provisions of this part, except §§ 1046.34, 1046.89, and 1046.91 through 1046.93, the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid and owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1046.100 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 1046.101 Separability of provisions.

If any provision of this part, or its application to any person, or circumstances, is held invalid, the application of such provision and of the remaining provisions of this part to other persons or circumstances shall not be affected thereby.

Signed at Washington, D.C., on January 31, 1962.

FRANK J. WELCH,
Assistant Secretary.

FEDERAL AVIATION AGENCY

[14 CFR Parts 600, 601]

[Airspace Docket No. 61-NY-86]

FEDERAL AIRWAY, ASSOCIATED CONTROL AREAS, AND REPORTING POINTS

Proposed Revocation

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering amendments to Parts 600 and 601 of the regulations of the Administrator, the substance of which is stated below.

Red Federal airway No. 8 presently extends from Lock Haven, Pa., to Crystal Lake, Pa. The Federal Aviation Agency is considering revoking Red 8. It is the policy of this Agency to revoke L/MF airways wherever adequate VOR airways are available, and it appears that the route from Lock Haven to Crystal Lake, Pa., is adequately served by the numerous VOR Federal airways in this area. In addition, the Federal Aviation Agency IFR peak-day airway traffic survey for the period of July 1, 1960, to June 30, 1961, shows a maximum of one aircraft movement on Red 8. Therefore, it appears that the retention of this airway is unjustified as an assignment of airspace. Accordingly, the Federal Aviation Agency proposes to revoke Red 8 and its associated control areas. Adoption of this proposal would not result in discontinuance of the low frequency navigational aids associated with Red 8.

Any proposal to discontinue one or more of these aids would be circularized separately and interested persons would be afforded an opportunity to comment. Concurrently with this action, § 601.4206, relating to reporting points associated with Red 8 would also be revoked.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Eastern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, New York International Airport, Jamaica 30, N.Y. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 29, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

RESTRICTED AREA AND FEDERAL AIRWAY

Proposed Designation and Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering amendments to §§ 600.6169 and 608.47 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency has under consideration a proposal by the Department of the Army for the designation of a restricted area at Sioux Ordnance Depot, Sidney, Nebr., as follows:

Boundaries. A circular area with a 2400-foot radius centered at latitude 41°15'13" N., longitude 103°04'50" W.

Designated altitudes. Surface to 7,400 feet MSL.

Time of designation. 0900 to 2100 MST, Monday through Friday.

Using agency. Commanding Officer, Sioux Ordnance Depot, Sidney, Nebr.

The proposed restricted area would provide special use airspace for the neutralization of ammunition by a process known as burning. The Department of the Army advises that this process is considered a hazard to aircraft since an uncontrolled explosion may occur at any time during the burning operation.

Low altitude VOR Federal airway No. 169 would overlap the proposed restricted area to a minor degree (approximately one-half mile). To preclude the necessity of prior coordination for the use of this segment of airway and to afford maximum flexibility of operations, the description of Victor 169 would be altered to exclude the portion which would lie within the proposed restricted area. The exclusion of this portion of Victor 169 would provide adequate separation between enroute operations along the airway and operations within the proposed restricted area since the maximum allowable tolerance of the VOR navigation aid (Sidney, Nebr., VOR) at this distance from the facility would permit an even greater reduction in the airway width.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City 10, Mo. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 29, 1962.

CONTROL ZONE

Proposed Designation

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to Part 601 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency is considering the designation of a control zone within a 5-mile radius of Stallings Field, Kinston, N.C. (latitude 35°19'40" N., longitude 77°37'05" W.), and within 2 miles either side of the Kinston VOR 047° True radial extending from the

VOR to 8 miles northeast. The time of designation would coincide with the hours of operation of the aviation weather reporting service provided by Piedmont Airlines from 0700 to 2330 eastern standard time, daily. Variances in the time of weather reporting would alter the time of designation of the control zone and would be reported in advance of such changes by the issuance of a Notice to Airmen.

The proposed control zone would provide protection for aircraft executing prescribed instrument approach procedures at Stallings Field. Communications would be provided by the FAA's New Bern Flight Service Station.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Southern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 52 Fairlie Street NW., Atlanta 3, Ga. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 30, 1962.

CONTROL ZONE

Proposed Designation

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to Part 601 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency has under consideration the designation of a part-time control zone at Oshkosh, Wis. The proposed control zone would be designated within a 7-mile radius of the Winnebago County Airport, Oshkosh, Wis. (latitude 43°59'20" N., longitude 88°33'15" W.) and within 2 miles either side of the Oshkosh VOR 176° True radial extending from the VOR to 8 miles south, from 0600 to 2200 hours local standard time daily. This control zone would provide protection for aircraft executing prescribed instrument approach procedures to the Winnebago County Airport. In addition, the 7-mile radius is required to contain the flight paths of aircraft executing standard instrument departures. Communications and weather service would be provided for aircraft operating within the proposed control zone by the Federal Aviation Agency control tower scheduled to be commissioned in May 1962. If this proposal is adopted, the control zone would not be made effective prior to the time communications and weather service are available.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City 10, Mo. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

JET ADVISORY AREA

Proposed Designation

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 602.300 of the regulations of the Administrator, the substance of which is stated below.

In accordance with Special Civil Air Regulation No. 444 (26 F.R. 292) the Federal Aviation Agency has under consideration the designation of a terminal radar jet advisory area within the continental control area from flight level 240 to flight level 390 inclusive and within 16 miles either side of the following instrument departure route from the San Francisco/Oakland, Calif., Metropolitan area.

From the San Francisco, Calif., VOR via the intersection of the San Francisco VOR 304° and the Sacramento, Calif., VORTAC 233° True radials; thence via the Sacramento VORTAC 233° True radial to the intersection of the Sacramento VORTAC 239° and the Linden, Calif., VORTAC 269° True radials; thence via the Linden VORTAC 269° True radial to the Linden VORTAC; thence via the Linden VORTAC 046° and the Reno, Nev., VOR 208° True radials to the Reno VOR.

The designation of this proposed terminal radar jet advisory area would provide a defined area wherein jet advisory service would be provided to civil turbojet aircraft departing the San Francisco/Oakland Metropolitan area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. JET ADVISORY AREAS

Proposed Designation

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 602.300 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency has under consideration the designation of additional terminal radar jet advisory areas at Tampa, Fla. It is proposed to designate terminal radar jet advisory areas within the continental control area from flight level 240 to flight level 390 inclusive within 16 miles either side of the following departure/arrival routes at Tampa:

1. St. Petersburg, Fla., VORTAC to the Ocala, Fla., VORTAC.

2. St. Petersburg VORTAC via the St. Petersburg VORTAC 320° True radial to the boundary of the continental control area.

3. Gainesville, Fla., VOR via the intersection of the Gainesville VOR 231° and the St. Petersburg VORTAC 350° True radials; thence south via the St. Petersburg VORTAC 350° True radial to the boundary of the continental control area.

The designation of these proposed terminal radar jet advisory areas would provide defined areas wherein jet advisory service would be provided to civil turbojet aircraft departing the Tampa/St. Petersburg Metropolitan area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. RESTRICTED AREA

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 608.25 of the regulations of the Administrator, the substance of which is stated below.

The China Lake South, Calif., Restricted Area R-2506 is an area of approximately 89 square miles assigned to the Commander, Naval Ordnance Test Station, China Lake, Calif., and provides restricted airspace for the run-in portion of the loft bombing maneuvers conducted at a target located within the adjacent China Lake Restricted Area R-2505 at latitude 35°46'00" N., longitude 117°44'10" W. R-2506 is designated from the surface to 6,000 feet MSL, sunrise to sunset, Monday through Friday, and provides a 5 nautical mile wide run-in corridor approximately 22 nautical miles in length from the target site.

The Federal Aviation Agency has reviewed information submitted by the Department of the Navy concerning the utilization of this restricted area. This review indicates that the special use airspace assigned to the Naval Ordnance Test Station at China Lake is in excess of that necessary to contain the activities conducted therein. Accordingly, the Federal Aviation Agency is considering the alteration of the assigned special use airspace by reducing the lateral dimensions of R-2506 to the extent necessary to satisfy the minimum requirements for activities associated with the run-in portion of the loft bombing maneuver. This action would reduce the size of R-2506 to an area of approximately 8 square miles which would provide for a 10-nautical mile run-in to the target site.

If this action is taken, R-2506 would be designated as follows:

R-2506 China Lake South, Calif.:

Boundaries. Beginning at latitude 35°37'30" N., Longitude 117°41'40" W.; to latitude 35°35'50" N., longitude 117°41'35" W.; to latitude 35°35'45" N., longitude 117°45'25" W.; to latitude 35°37'30" N., longitude 117°45'30" W.; to the point of beginning.

Designated altitudes. Surface to 6,000 feet MSL.

Time of designation. Sunrise to sunset, Monday through Friday.

Controlling agency. Federal Aviation Agency, Los Angeles ARTC Center.

Using agency. Commander, Naval Ordnance Test Station, China Lake, Calif.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles, 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for

consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 29, 1962.

UNITED NUCLEAR CORP.

Notice of Issuance of Facility License Amendment

Please take notice that the Atomic Energy Commission has issued Amendment No. 3, set forth below, to Facility License No. R-49. The license, as amended, authorizes United Nuclear Corporation to possess and operate the nuclear reactor, designated as the "Pawling Research Reactor" and located at Pawling, New York. This amendment authorizes United Nuclear Corporation (1) to modify the upper end cap design of the outer buffer fuel elements and the means of attaching this fuel to the upper support structure; and (2) to omit a three inch Masonite reflector around the sides of the top of the reactor tank. These authorizations were among those requested by the licensee in an application for amendment dated May 23, 1961.

The Commission has found that operation of the facility in accordance with the license, as amended, will not present undue hazard to the health and safety of the public and will not be inimical to the common defense and security.

The Commission has further found that prior public notice of proposed issuance of this amendment is not necessary in the public interest since operation of the facility in accordance with the license as amended would not present any substantial change in the hazards to the health and safety of the public from those already considered acceptable in connection with the previously approved operation of this facility.

In accordance with the Commission's rules of practice (10 CFR Part 2) the Commission will direct the holding of a formal hearing on the matter of issuance of the license amendment upon receipt of a request therefor from the licensee or an intervener within thirty (30) days after the issuance of the license amendment. Petitions for leave to intervene and requests for a formal hearing shall be filed by mailing a copy to the Office of the Secretary, Atomic Energy Commission, Washington 25, D.C., or by delivery of a copy in person to the Office of the Secretary, Germantown, Maryland or the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

For further details, see (1) the application for license amendment dated May 23, 1961, by United Nuclear Corporation, and (2) a hazards analysis of the proposed amendment prepared by the Division of Licensing and Regulation, both on file at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. A copy of item (2) above may be obtained at the Commission's Public Document Room, or upon request addressed to the Atomic Energy Commission, Washington 25, D.C., Attention: Director, Division of Licensing and Regulation.

AMENDMENT TO FACILITY LICENSE

[License No. R-49; Amdt. 3]

License No. R-49, as previously amended, is further amended as follows:

1. The licensee is authorized to modify the upper end cap design of the outer buffer fuel elements as described in the application for amendment dated May 23, 1961.

2. The licensee is authorized to omit a three inch Masonite reflector around the sides of the top of the reactor tank as described in the application for amendment dated May 23, 1961.

This amendment is effective as of the date of issuance.

Date of issuance: January 29, 1962.

[Rev. S. O. 562, Taylor's I.C.C. Order 140]

MIDLAND VALLEY RAILROAD CO.

Rerouting and Diversion of Traffic

In the opinion of Charles W. Taylor, Agent, the Midland Valley Railroad Company, due to bridge damage near Arkansas City, Kansas, is unable to transport traffic routed over its lines.

It is ordered, That:

(a) Rerouting traffic: Midland Valley Railroad Company and its connections, being unable to transport traffic in accordance with shippers routing because of bridge damage are hereby authorized to divert or reroute traffic moving over its lines over any available route to expedite the movement.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: The carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is diverted or rerouted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to such traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 4:00 p.m., January 30, 1962.

(g) Expiration date: This order shall expire at 11:59 p.m., February 15, 1962, unless otherwise modified, changed, suspended or annulled.

It is further ordered. That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D.C., January 29, 1962.

AUTHORITY: §§ 1127.0 to 1127.101 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1127.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the San Antonio, Texas, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such amount not to exceed 4 cents per hundredweight as the Secretary may prescribe with respect to skim milk and butterfat (i) received from producers, (ii) received at a pool plant as other source milk and allocated to Class I milk, or (iii) distributed as Class I milk in the marketing area from a nonpool plant during such preceding month.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than February 1, 1962. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Assistant Secretary of Agriculture was issued December 11, 1961, and the decision containing all amendment provisions of this order, was issued January 9, 1962. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective February 1, 1962, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER. (Sec. 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011.)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the San Antonio, Texas, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended to read as follows:

DEFINITIONS

§ 1127.1 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended, by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

§ 1127.2 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the United States authorized to exercise the powers and to perform the duties of the said Secretary of Agriculture.

§ 1127.3 Person.

"Person" means any individual, partnership, corporation, association, or any other business unit.

§ 1127.4 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association (a) to have its entire activities under the control of its members, (b) to have full authority in the sale of milk of its members, and (c) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act".

§ 1127.5 San Antonio, Texas, marketing area.

"San Antonio, Texas, marketing area" hereinafter called the "marketing area" means all the territory including all municipal corporations and all Federal military reservations, facilities and installations located within the boundaries of Bexar County, Texas.

§ 1127.6 Distributing plant.

"Distributing plant" means all the buildings, premises, and facilities of a plant:

(a) Which is approved by an appropriate health authority having jurisdiction in the marketing area or by another health authority whose certification is accepted by such health authority for the processing of Grade A milk or which is acceptable to an agency of the Federal government for distribution of milk to its installations in the marketing area;

(b) In which milk or skim milk is processed or packaged; and

(c) From which Class I milk is disposed of during the month on routes in the marketing area or from which Class I milk is supplied to installations located in the marketing area of an agency of the Federal government.

§ 1127.7 Supply plant.

"Supply plant" means all the buildings, premises, and facilities of a plant equipped to either receive or cool milk which is approved by the appropriate health authority to supply fluid milk for distribution as Grade A milk in the marketing area, and from which an amount equal to not less than 50 percent of its receipts from dairy farmers, who would be producers if the plant qualified as a pool plant, are shipped to a distributing plant during the month: *Provided*, That any plant which qualifies as a supply plant for each of the months of July through February shall be considered to be a supply plant for the following months of March through June of such year, except that if the operator of such plant files a written request with the market administrator, supply plant status shall be terminated as of the first of the following month.

§ 1127.8 Pool plant.

"Pool plant" means:

(a) A distributing plant (other than one exempt pursuant to § 1127.60) which disposes of as Class I milk on routes in the marketing area 15 percent or more of its receipts of milk during the month from pool plants and from dairy farmers conforming to the requirements set forth in § 1127.11;

(b) A supply plant; and

(c) Any plant approved by an appropriate health authority having jurisdiction in the marketing area to supply milk for distribution as Grade A milk in the marketing area which is operated by a cooperative association, and 50 percent or more of the producer milk of members is received during the month in the pool plants of other handlers, or is transferred to such plants from the plant of the cooperative association.

§ 1127.9 Nonpool plant.

"Nonpool plant" means any plant, other than a pool plant, engaged in receiving, manufacturing or distributing milk.

§ 1127.10 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any person in his capacity as the operator of a nonpool plant from which Class I milk is disposed of on routes in the marketing area;

(c) A cooperative association with respect to the milk of a member producer diverted to a nonpool plant for its account pursuant to § 1127.11 for each day's milk production that such producer's milk is diverted during the month. Milk so diverted shall be deemed to have been received by the association at a pool plant at the location of the pool plant at which the milk was received prior to diversion; and

(d) A cooperative association with respect to the producer milk of its members which is delivered directly from the farm to the pool plant of a handler in a tank truck owned and operated by or under contract to such cooperative association unless the cooperative association notifies the market administrator and the handler to whom the milk is delivered in writing, prior to the first day of the month, that it does not desire to be the handler for such milk. Milk for which the cooperative association is the handler pursuant to this paragraph shall be deemed to have been received by the association at a pool plant at the location of the pool plant to which it is delivered.

§ 1127.11 Producer.

"Producer" means any person who produces milk, (a) under a dairy farm permit or rating for the production of milk to be disposed of for consumption as Grade A milk, issued by an appropriate health authority having jurisdiction in the marketing area or by another health authority whose certification is accepted by such health authority, or (b) which is acceptable to an agency of the Federal Government for fluid consumption in its institutions or bases located in the marketing area; which is received directly from the farm at a pool plant or diverted from a pool plant to a nonpool plant for the account of a cooperative association: *Provided*, That if the days of production of such person for which milk is diverted exceeds one-third of the days of production that milk is delivered to a pool plant during the month, such milk shall cease to be producer milk for the entire period of such diversion. This definition shall not include any person with respect to milk produced by him which is received by a handler partially exempt, pursuant to § 1127.60, nor shall it include a dairy farmer during the months of March through June, if milk from the same dairy farmer (or farm) was received at a nonpool plant operated by the same handler, as other than producer milk, on more than half the days of delivery during the preceding months of July through February, except that in the application of this proviso to operations prior to July 1, 1961, the period from the effective date of this amended order through February 1961 shall be substituted for the period of July through February otherwise indicated.

§ 1127.12 Producer milk.

"Producer milk" means any skim milk or butterfat contained in milk of a producer received at a pool plant or diverted by a cooperative association in accordance with § 1127.10(c).

§ 1127.13 Other source milk.

"Other source milk" means all skim milk and butterfat:

(a) Other than that contained in producer milk or in receipts of fluid milk products from pool plants;

(b) In products designated as Class II milk pursuant to § 1127.41(b) from any source (including those of a plant's own production) which are reprocessed or converted to another product in the plant during the month; and

(c) In any disappearance of non-fluid milk products not otherwise accounted for.

§ 1127.14 Fluid milk products.

"Fluid milk products" means milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream or any mixture of cream and milk or skim milk (except eggnog, cultured sour cream, frozen storage cream and bulk ice cream and frozen dairy product mixes).

§ 1127.15 Route.

"Route" means any delivery of Class I milk (including any delivery by a vendor or disposition at a plant store) to wholesale or retail outlets, except deliveries in bulk form to other pool plants.

MARKET ADMINISTRATOR

§ 1127.20 Designation.

The agency for the administration of this part shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1127.21 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1127.22 Duties.

The market administrator shall:

(a) Within 30 days following the date upon which he enters upon his duties, execute and deliver to the Secretary a bond, conditioned upon the faithful performance of his duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 1127.88 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 1127.87) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as the Secretary may request;

(g) Verify all reports and payments of each handler by audit, or such other means as the market administrator finds necessary, of such handler's records and of the records of any other person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts has not:

(1) Made reports pursuant to §§ 1127.30 to 1127.31, or

(2) Made payments pursuant to § 1127.61 and §§ 1127.80 to 1127.88.

(i) On or before the twelfth day after the end of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report the milk so received shall be assigned to each class in the proportion that the total producer milk in each class is to the total receipts of producer milk by such handler;

(j) Notify handlers and make announcement by such other means as he deems appropriate of prices as follows:

(1) On or before the tenth day of each month the Class I price for such month computed pursuant to § 1127.51 and the Class I butterfat differential computed pursuant to § 1127.53;

(2) On or before the fifth day of each month the prices of Class II and Class II–A milk for the preceding month computed pursuant to § 1127.52 and the butterfat differential for Class II and Class II–A milk computed pursuant to § 1127.53; and

(3) On or before the twelfth day of each month for the preceding month the uniform price computed pursuant to § 1127.71, and the butterfat differential to producers computed pursuant to § 1127.81.

(k) Prepare and publish such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS, AND FACILITIES

§ 1127.30 Reports of receipts and utilization.

On or before the 7th day after the end of each month, each handler shall report to the market administrator in the detail and on forms prescribed by the market administrator for each of his pool plants as follows:

(a) The quantities of skim milk and butterfat contained in producer milk;

(b) The quantities of skim milk and butterfat contained in (or represented by) receipts from pool plants;

(c) The quantities of skim milk and butterfat contained in receipts of other source milk;

(d) The quantities of skim milk and butterfat contained in receipts of Class II and Class II–A products disposed of in the form in which received without further processing or packaging by the handler;

(e) The utilization of all skim milk and butterfat required to be reported pursuant to this section; and

(f) Such other information with respect to the receipt and utilization of skim milk and butterfat as the market administrator may prescribe.

§ 1127.31 Reports of payments to producers.

On or before the 20th day after the end of each month, each handler who received milk from producers shall submit to the market administrator his producer payroll for the month, which shall show for each producer:

(a) His total deliveries of milk;

(b) The average butterfat content of such milk; and

(c) The net amount of such handler's payments to such producer with the prices, deductions, and charges involved.

§ 1127.32 Records and facilities.

Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all skim milk and butterfat received from any source;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and other milk products handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and other milk products on hand at the beginning and end of each month.

§ 1127.33 Retention of records.

All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c(15)(A) of the Act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly, upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 1127.40 Skim milk and butterfat to be classified.

All skim milk and butterfat received within the month at a pool plant in the form of producer milk, other source milk, or receipts from other pool plants shall be classified by the market administrator pursuant to the provisions of §§ 1127.41 to 1127.46.

§ 1127.41 Classes of utilization.

Subject to the conditions set forth in §§ 1127.43 and 1127.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat:

(1) Disposed of in the form of fluid milk products: *Provided, however*, That when any such product is fortified with nonfat milk solids the amount of skim milk to be classified as Class I shall be only that amount equal to the weight of skim milk in an equal volume of unfortified product of the same nature and butterfat content;

(2) Contained in inventories of fluid milk products on hand at the end of the month; and

(3) All other skim milk and butterfat not specifically accounted for as Class II milk or Class II–A milk;

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than those designated as Class I in paragraph (a) of this section or as Class II–A in paragraph (c) of this section;

(2) Disposed of for livestock feed;

(3) In shrinkage allocated to (i) receipts of other source milk in the form of fluid milk products, (ii) receipts of producer milk in an amount not to exceed one-half of one percent of the total receipts of skim milk and butterfat received from producers at the pool plant, plus one and one-half percent of the total pounds of skim milk and butterfat in milk received at a pool plant from producers and in bulk as milk in fluid form from other pool plants (including milk received from a cooperative association in its capacity as a handler pursuant to § 1127.10(d)) and which are not disposed of in bulk as milk in fluid form to another pool plant;

(4) Skim milk contained in any fortified product designated in subparagraph (a)(1) of this section in excess of the pounds of skim milk in such product classified as Class I pursuant to such subparagraph; and

(c) Class II–A milk shall be all skim milk and butterfat used to produce Cheddar cheese.

§ 1127.42 Shrinkage.

The market administrator shall allocate shrinkage to a handler's receipts at pool plants as follows:

(a) Compute the total shrinkage of skim milk and butterfat; and

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat in milk of producers and other source milk received in the form of fluid milk products.

§ 1127.43 Responsibility of handlers and reclassification of milk.

(a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat classified as Class II or Class II–A shall be reclassified if such skim milk or butterfat is later disposed of (whether in original or other form) in another classification.

§ 1127.44 Transfers.

Skim milk or butterfat transferred or diverted from a pool plant in the form of milk, skim milk, or cream shall be classified:

(a) As Class I milk, if transferred to the pool plant of another handler, unless utilization as Class II or Class II–A milk is mutually reported in writing to the market administrator by both handlers on or before the 7th day after the end of the month within which such transfer occurred, and the amount of skim milk or butterfat so assigned to Class II or Class II–A does not exceed the amount of skim milk or butterfat, respectively, remaining in Class II or Class II–A utilization by the transferee-handler after the subtraction of other source milk pursuant to § 1127.46: *Provided*, That the skim milk and butterfat so transferred shall be classified so as to result in a maximum assignment of producer milk first to Class I milk and secondly to Class II milk. In no case shall the assignment to Class I milk in the transferee plant be greater than the difference between its total receipts of milk and its total utilization of such milk in Class II and Class II–A.

(b) As Class I milk, if transferred or diverted to a nonpool plant except as:

(1) The transferring or diverting handler claims utilization as Class II milk or Class II–A milk;

(2) The operator of the nonpool plant maintains books and records showing the receipts and utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, in which case skim milk and butterfat so transferred or diverted shall be allocated to the highest use classification remaining after subtracting in series beginning with the highest use classification, the skim milk and butterfat in milk received at the nonpool plant directly from dairy farmers who the market administrator determines constitute its regular source of supply for Class I milk.

(c) As Class II milk if transferred subject to verification by the market administrator to a wholesale food manufacturing establishment which has no Class I disposition of skim milk or butterfat.

§ 1127.45 Computation of skim milk and butterfat in each class.

For each month, the market administrator shall correct for mathematical and for other obvious errors the report submitted by each handler and shall compute the pounds of skim milk and butterfat in each class of milk for such handler. Skim milk contained in any product utilized, produced, or disposed of by the handler during the month shall be considered to be an amount equivalent to the nonfat milk solids contained in such products, plus all of the water originally associated with such solids.

§ 1127.46 Allocation of skim milk and butterfat classified.

(a) The pounds of skim milk remaining in each class after making the following computations for each handler for each month shall be the pounds of skim milk in such class allocated to producer milk received by such handler during such month.

(1) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in fluid milk products which were on hand at the beginning of the month;

(2) Subtract from the pounds of skim milk in each class the pounds of skim milk received from other pool plants in a form other than milk, skim milk, or cream according to its classification pursuant to § 1127.41;

(3) Subtract from the pounds of skim milk remaining in Class II milk the plant shrinkage of skim milk in producer milk classified as Class II milk pursuant to § 1127.41(b)(3)(ii);

(4) Subtract from the pounds of skim milk in Class I milk the pounds of skim milk received from a nonpool plant in the form of packaged fluid milk products which are not in excess of the pounds of skim milk transferred to such plant from the pool plant of the handler in fluid form and classified as Class I milk;

(5) Subtract from the pounds of skim milk remaining in each class beginning with the lowest priced class the pounds of skim milk in other source milk which were received in the form of nonfluid milk products other than condensed skim milk or nonfat dry milk;

(6) Subtract from the pounds of skim milk remaining in each class beginning with the lowest priced class the pounds of skim milk in other source milk received in the form of condensed skim milk or nonfat dry milk;

(7) Subtract from the pounds of skim milk remaining in each class beginning with the lowest priced class the pounds of skim milk in other source milk received in the form of fluid milk products which were not subject to the Class I pricing and payment provisions of another order issued pursuant to the Act and on which a compensatory payment has not been paid under the order;

(8) Subtract from the pounds of skim milk remaining in each class beginning with the lowest priced class the pounds of skim milk in other source milk received in the form of fluid milk products which were subject to the Class I pricing and payment provisions of another order issued pursuant to the Act or on which a compensatory payment had been paid under another order;

(9) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received from other pool plants according to the class to which they were assigned pursuant to § 1127.44(a);

(10) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (3) of this paragraph and if the pounds of skim milk remaining in all classes exceed the pounds of skim milk received from producers, subtract such excess from the pounds of skim milk remaining in the various classes in series beginning with the lowest priced class.

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the same manner prescribed for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of Class I, Class II, and Class II–A milk computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 1127.50 Minimum prices.

Subject to the appropriate differentials computed pursuant to §§ 1127.53 and 1127.54 each handler shall pay in the manner set forth in §§ 1127.70 to 1127.86 for milk received at his pool plant from producers at not less than the prices per hundredweight set forth in §§ 1127.51 and 1127.52.

§ 1127.51 Class I milk.

The Class I milk price shall be the price for Class I milk established under Federal Order No. 126 regulating the handling of milk in the North Texas marketing area plus 42 cents.

§ 1127.52 Class II and Class II–A milk.

(a) *Class II milk.* During April, May, and June, the price per hundredweight for Class II milk shall be the price computed pursuant to subparagraph (1) of this paragraph, less 14 cents or the price computed pursuant to paragraph (b) of this section, whichever is higher. During all other months, the Class II price shall be the price computed pursuant to subparagraph (1) of this paragraph or paragraph (b) of this section, whichever is higher.

(1) The sum of the amounts computed pursuant to subdivisions (i) and (ii) of this subparagraph, rounded to the nearest cent:

(i) Multiply by 4.4, the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the United States Department of Agriculture during the month;

(ii) From the average of the carlot prices per pound of nonfat dry milk for human consumption, spray process, f.o.b. manufacturing plants in the Chicago area as reported by the United States Department of Agriculture for the period from the 26th day of the preceding month through the 25th day of the current month, subtract 5 cents and multiply by 8.16.

(b) *Class II–A milk.* The minimum price per hundredweight to be paid by each handler for milk received at his plant from producers and classified as Class II–A milk shall be computed by multiplying by 8.4 the average of the daily prices paid per pound of cheese at Wisconsin Primary markets ("Cheddars" f.o.b. Wisconsin assembling points, cars or truckloads) as reported by the Department for the month involved and rounding to the nearest cent.

§ 1127.53 Butterfat differentials to handlers.

If the average butterfat content of the milk of any handler allocated to any class pursuant to § 1127.46 is more or less than 4.0 percent, there shall be added to the respective class price, computed pursuant to §§ 1127.51 and 1127.52 for each one-tenth of 1 percent, that the average butterfat content of such milk is above 4.0 percent, or subtracted for each one-tenth of 1 percent that such average butterfat content is below 4.0 percent, an amount equal to the butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the United States Department of Agriculture during the appropriate month by the applicable factor listed below:

(a) *Class I milk.* Multiply such price for the preceding month by 0.125;

(b) *Class II and Class II–A milk.* Multiply such price for the current month by 0.108.

§ 1127.54 Location adjustment credit to handlers.

For milk which is received from producers at a pool plant located more than 50 miles from the City Hall, in San Antonio, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator and which is classified as Class I milk, the price specified in § 1127.51 shall be reduced 1.5 cents per hundredweight for each 10 miles or fraction thereof that such plant is distant from the City Hall in San Antonio, Texas: *Provided*, That in calculating such adjustments, transfers to a pool plant at which a location adjustment is not applicable or at which it is less than at the transferor plant may be assigned to Class I only to the extent that Class I disposition at the transferee plant exceeds 95 percent of the receipts from producers and a cooperative association(s) in its capacity as a handler pursuant to § 1127.10(d) at such plant. Such assignment to transferor plants shall be made first to plants at which no location adjustment credit is applicable and then in sequence to plants at which the lowest rate of such adjustment credit would apply.

§ 1127.55 Use of equivalent prices.

If for any reason the price quotation required by this part for computing class prices or for any other purpose is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATIONS OF PROVISIONS

§ 1127.60 Handlers subject to other Federal orders.

The provisions of this part shall not apply with respect to the operation of any plant specified in paragraph (a) or (b) of this section except that the operator thereof shall, with respect to total receipts of skim milk and butterfat at such plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator, and, in the event he has disposed of on routes in the marketing area Class I milk which was neither classified nor priced under such other order or on which a compensatory payment was not made under any other order, shall pay to the market administrator on or before the 13th day of each month an amount computed by multiplying the total volume of such Class I milk disposed of on routes in the marketing area from such plant during the preceding month by the rate of compensatory payment computed pursuant to § 1127.65.

(a) A plant meeting the requirements for pooling pursuant to § 1127.8(a) which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in such other Federal order marketing area than was disposed of on routes in this marketing area, except that if such plant was subject to all of the provisions of this part in the immediately preceding month, it shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its Class I route disposition is made in such other marketing area unless notwithstanding the provisions of this paragraph it is fully regulated under such other order.

(b) A plant meeting the requirements for pooling pursuant to § 1127.8(a) which also meets the pooling requirements of another Federal order on the basis of route distribution in such other marketing area and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in this marketing area than is so disposed of in such other marketing area, but which plant is fully regulated under such other Federal order.

§ 1127.61 Handlers operating nonpool plants.

Each handler who is the operator of a nonpool plant whose milk is not subject to the classification and Class I pricing provisions of another order issued pursuant to the Act shall report, as required pursuant to § 1127.30, reporting receipts from dairy farmers in lieu of such information with respect to producers, shall allow verification of such reports, and on or before the 13th day of each month he shall pay to the market administrator an amount computed by multiplying the total volume of Class I milk disposed of on routes in the marketing area from such nonpool plant during the preceding month by the rate of compensatory payments computed pursuant to § 1127.65.

UNPRICED MILK

§ 1127.65 Rate of payment on unpriced milk.

The rate of payment per hundredweight applicable to other source milk which has not been subject to the classification and Class I pricing provisions of another order issued pursuant to the Act or on which a compensatory payment has not been made pursuant to another order and which is assigned to Class I use at pool plants or which is disposed of as Class I milk on routes in the marketing area from nonpool plants shall be calculated as follows:

(a) For the months of February through July, subtract the Class II prices adjusted by the Class II butterfat differential, from the Class I price, adjusted by the Class I butterfat differential, and, except in the case of condensed skim milk and nonfat dry milk, by the location adjustment pursuant to § 1127.54 which would be applicable if the nonpool plant were a pool plant; and

(b) During the months of January and August, subtract from the Class I price, adjusted by the Class I butterfat differential, the uniform price to producers, adjusted by the Class I butterfat differential.

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

§ 1127.70 Computation of value of milk for each handler.

For each month the market administrator shall compute the value of milk for each handler as follows:

(a) *Handlers who receive milk from producers:*

(1) Multiply the quantity of producer milk in each class computed pursuant to § 1127.46 by the applicable class price;

(2) If any overage has been deducted pursuant to § 1127.46 (a) and (b), multiply such amount by the applicable class price;

(3) For the months of January through August, multiply the hundredweight of other source skim milk and butterfat subtracted from Class I milk pursuant to § 1127.46(a) (5) through (7) and (b) by the applicable rate determined pursuant to § 1127.65; and

(4) Add together the resulting amounts in (1) through (3) of this paragraph.

(b) *Handlers who operate pool plants but who receive no milk from producers:*

(1) If any overage has been deducted pursuant to § 1127.46 (a) and (b), multiply such amount by the applicable class price;

(2) For the months of January through August, multiply the hundredweight of other source skim milk and butterfat subtracted from Class I milk pursuant to § 1127.46(a) (5) through (7) and (b) by the applicable rate determined pursuant to § 1127.65; and

(3) Add the resulting amounts in (1) and (2) of this paragraph.

§ 1127.71 Computation of uniform price for pool milk.

For each month the market administrator shall compute the uniform price for all milk received from producers as follows:

(a) Combine into one total the amounts computed pursuant to § 1127.70 (a) and (b) for all handlers who made the reports prescribed in § 1127.30 and who are not in default of payments required pursuant to §§ 1127.80 and 1127.84;

(b) Add an amount representing not less than one-half of the unobligated cash balance in the producer-settlement fund account pursuant to § 1127.83;

(c) Add the total value of the location adjustments to producers computed pursuant to § 1127.82;

(d) Subtract if the average butterfat content of the producer milk of handlers included in the computations pursuant to paragraph (a) of this section is greater than 4.0 percent, or add if such average is less than 4 percent, an amount computed by multiplying the amount by which such average butterfat content varies from 4.0 percent by the butterfat differential computed pursuant to § 1127.81 and multiply the resulting amount by the hundredweight of such milk;

(e) Divide by the total hundredweight of producer milk of handlers included in the computation pursuant to paragraph (a) of this section;

(f) Subtract not less than 4 cents nor more than 5 cents. The resulting figure shall be the uniform price per hundredweight for all milk of 4.0 percent butterfat content received from producers.

PAYMENT FOR MILK

§ 1127.80 Time and method of payment.

(a) Each handler shall pay to a cooperative association on or before the 13th day of the month, for milk received from it during the preceding month for which such association is a handler pursuant to § 1127.10(d), the value of such milk at not less than the applicable class prices: *Provided, however*, That for each hundredweight of milk so received during the first 15 days of any month, such handler shall, upon written request of the cooperative association make an advance payment to such association by the 26th day of the month at not less than the Class II price of the preceding month, in which case the obligation of the handler otherwise payable on or before the 13th day of the following month shall be reduced by the amount of such advance payment.

(b) Except as provided in paragraph (3) of this section, each handler shall make payment to each producer for milk received from such producer as follows:

(1) On or before the last day of each month, for milk received during the first 15 days of such month at not less than the price per hundredweight for Class II milk for the preceding month;

(2) On or before the 15th day after the end of the month during which the milk was received at not less than the uniform price per hundredweight computed for such month pursuant to § 1127.71 subject to the following adjustments: (i) the butterfat differential pursuant to § 1127.81, (ii) the location adjustment pursuant to § 1127.82, (iii) the payment made pursuant to subparagraph (1) of this section, (iv) marketing service deductions pursuant to § 1127.87, and (v) proper deductions authorized by such producer: *Provided*, That if by such date such handler has not received full payment pursuant to § 1127.85, he may reduce his total payment to all producers pro rata by not more than the amount of reduction in payments from the market administrator; he shall, however, complete such payments pursuant to this subparagraph not later than the date for making such payments next following receipt of the balance due from the market administrator;

(3) (i) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association, each handler shall on or before the 20th day of each month furnish the cooperative association information showing the daily and total pounds of milk received from each of the association's member producers for the first 15 days of such month and, on or before the 10th day after the end of each month, such information for the 16th through the end of such month, and shall pay to such association on or before the 26th and 13th day of each month, in lieu of payments pursuant to subparagraphs (1) and (2) respectively, of this paragraph an amount equal to the sum of the individual payments otherwise payable to such producers. The foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association.

(ii) A copy of each such request, promise to reimburse and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion, through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination.

(4) In making the payments to producers pursuant to subparagraphs (2) and (3) of this paragraph, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement which shall show:

(i) The month for which payment is made and the identity of the handler and of the producer;

(ii) The total pounds and average butterfat test of milk received from such producer;

(iii) The minimum rate or rates at which payment to such producer is required;

(iv) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(v) The amount or rate per hundredweight of each deduction claimed by the handler; together with a description of the respective deductions; and

(vi) The net amount of payment to such producer.

§ 1127.81 Producer butterfat differential.

In making payments pursuant to § 1127.80 there shall be added to the uniform price for each one-tenth of one percent that the average butterfat content of such milk is above 4.0 percent not less than, or there may be deducted from the uniform price for each one-tenth of one percent that the average butterfat content of such milk is below 4.0 percent not more than an amount computed as follows: Multiply by 1.1 the simple average computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the

United States Department of Agriculture during the month, divide the result by 10 and round to the nearest one-tenth of a cent.

§1127.82 Location adjustment to producers.

In making payments to producers pursuant to § 1127.80 for that milk which is received from producers at a pool plant located more than 50 miles from the City Hall in San Antonio, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator, the handler may deduct an amount equal to not more than 1.5 cents per hundredweight for each 10 miles or fraction thereof that such plant is distant from the City Hall in San Antonio, Texas.

§ 1127.83 Producer-settlement fund.

The market administrator shall establish a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers, pursuant to §§ 1127.60, 1127.61, 1127.84, and 1127.86 and out of which he shall make all payments, pursuant to §§ 1127.85 and 1127.86.

§ 1127.84 Payments to the producer-settlement fund.

On or before the 13th day after the end of each month each handler, including a cooperative association which is a handler, shall pay to the market administrator the amount by which the value of milk for such handler pursuant to § 1127.70, for such month exceeds the obligation pursuant to § 1127.80(b) of such handler to producers for milk received during the month.

§ 1127.85 Payments out of the producer-settlement fund.

On or before the 14th day after the end of the month during which the milk was received, the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the value of the milk received by such handler from producers during the month as determined pursuant to § 1127.70 is less than the value of such milk calculated at the uniform price adjusted by the producer butterfat differential and the location adjustment to producers.

§ 1127.86 Adjustment of accounts.

Whenever audit by the market administrator of any handler's books, reports, records, or accounts discloses errors resulting in money due:

(a) The market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payment set forth in the provisions under which such error occurred.

§ 1127.87 Marketing service.

(a) *Marketing service deduction.* Except as set forth in paragraph (b) of this section each handler, in making payments to producers (other than himself) shall make a deduction of six cents per hundredweight of milk or such lesser deduction as the Secretary from time to time may prescribe. Such deductions shall be paid by the handler to the market administrator on or before the 15th day after the end of the month. Such moneys shall be expended by the market administrator for verification of weights and tests of milk received from such producers and in providing market information to such producers.

(b) *Marketing service deduction with respect to producers who are members of or are marketing through a cooperative association.* In the case of each producer who is a member of, or who has given written authorization for the rendering of marketing services and the taking of a deduction therefor to a cooperative association, which the Secretary has determined is performing the services described in paragraph (a) of this section, such handler, in lieu of the deduction specified under paragraph (a) of this section, shall deduct from the payments to such producer the amount per hundredweight specified by such association which is not in excess of the rate authorized by such producer and shall pay such deduction to the cooperative association entitled to receive it on or before the 15th day after the end of the month during which such milk was received.

§ 1127.88 Payment of administration expense.

As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may from time to time prescribe, with respect to skim milk and butterfat (a) received from producers, (b) received at a pool plant as other source milk and allocated to Class I milk, or (c) distributed as Class I milk in the marketing area from a nonpool plant during such preceding month.

§ 1127.89 Termination of obligation.

The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to the following information:

(1) The amount of the obligation;

(2) The delivery period during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the agreement (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c(15)(A) of the Act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1127.90 Effective time.

The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 1127.91.

§ 1127.91 Suspension or termination.

The Secretary may suspend or terminate this part or any provision of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the Act. This part shall terminate in any event whenever the provisions of the Act authorizing it cease to be in effect.

§ 1127.92 Continuing obligations.

If, upon the suspension or termination of any or all provisions of this part there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1127.93 Liquidation.

Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1127.100 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 1127.101 Separability of provisions.

If any provision of this part or its application to any person or circumstances is held invalid, the application of such provision, and the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

Effective date: February 1, 1962.

Signed at Washington, D.C., on January 30, 1962.

CHARLES S. MURPHY,
Under Secretary.

AUTHORITY: §§ 1129.0 to 1129.111 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1129.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Austin-Waco marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in, the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro rata share of such expense, 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight, as the Secretary may prescribe with respect to all (a) receipts of producer milk including such handler's own production, (b) other source milk at a fluid milk plant which is classified as Class I milk and, (c) Class I milk disposed of during the month on routes (including routes operated by vendors) to retail or wholesale outlets (except fluid milk plant) located in the marketing area from a nonfluid milk plant.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than February 1, 1962. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Assistant Secretary of Agriculture was issued December 11, 1961, and the decision containing all amendment provisions of this order, was issued January 9, 1962. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective February 1, 1962, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER. (Sec. 4(c) Administrative Procedure Act, 5 U.S.C. 1001–1011.)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least three-fourths of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Austin-Waco marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

DEFINITIONS

§ 1129.1 Act.

"Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

§ 1129.2 Secretary.

"Secretary" means the Secretary of Agriculture or such other officer or employee of the United States as is authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 1129.3 Department.

"Department" means the United States Department of Agriculture or such other Federal agency as is authorized to perform the price reporting functions specified in this part.

§ 1129.4 Person.

"Person" means any individual, partnership, corporation, association, or any other business unit.

§ 1129.5 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 10, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members.

§ 1129.6 Austin-Waco marketing area.

"Austin-Waco Marketing Area" hereinafter called the marketing area means all territory, including all municipal corporations and all Federal military reservations, facilities and installations, located within or partially within the boundaries of Travis, Hays, Lampasas, Burnet, Caldwell, Bastrop, Williamson, Bell, Falls, McLennan, Coryell, Comal and Guadalupe Counties, all in the State of Texas.

§ 1129.7 Zone I.

"Zone I" means all territory south of the northern boundaries of Guadalupe, Comal, Kendall, Kerr, Edwards and Val Verde Counties, all in the State of Texas and all territory south of a boundary formed by United States Highway 90 east of the marketing area to the Colorado River and thence south along the Colorado River.

§ 1129.8 Distributing plant.

"Distributing plant" means any milk processing or packaging plant from which Class I milk equal to more than an average of 500 pounds per day or 5 percent, whichever is less, of the Grade "A" milk and skim milk received from dairy farmers or other plants, is disposed of during the month on a route(s) operated partially or wholly in the marketing area.

§ 1129.9 Supply plant.

"Supply plant" means any plant from which fluid milk, fluid skim milk or cream is received at a distributing plant:

(a) For any of the months of February through July, on four or more days during the month, or in an amount equal to a daily average of not less than 3,300 pounds for such month; and

(b) For any of the months of August through January:

(1) On ten or more days during the month, or in an amount equal to a daily average of not less than 8,300 pounds for such month; or

(2) On four or more days during the month, or in an amount equal to a daily average of not less than 3,300 pounds for such month, and such plant was a supply plant pursuant to (a) during any month of the immediately preceding period of February through July.

§ 1129.10 Fluid milk plant.

"Fluid milk plant" means (a) a distributing plant or a supply plant, and (b) any plant approved by the appropriate health authority to supply milk for distribution as Grade A milk in the marketing area if such plant is operated by a cooperative association, and 75 percent or more of the milk of the members of such association, including receipts pursuant to § 1129.13(b), is received at the fluid milk plants of other handlers.

§ 1129.11 Nonfluid milk plant.

"Nonfluid milk plant" means any milk manufacturing, processing, or bottling plant other than a fluid milk plant.

§ 1129.12 Approved plant.

"Approved plant" means: (a) A fluid milk plant, (b) any milk plant from which Class I milk is disposed of on a route in the marketing area.

§ 1129.13 Handler.

"Handler" means (a) any person in his capacity as the operator of one or more approved plants, and (b) a cooperative association with respect to the milk of any producer (1) which it diverts to a nonfluid milk plant, or (2) which it causes to be delivered directly from the farm, in bulk tank pickup trucks(s) owned and/or operated by, or under contract to, the cooperative association, to the fluid milk

other handler: *Provided*, That such milk shall be deemed to have been received by the cooperative association at the location of the fluid milk plant to which it is delivered, except that such milk shall be considered as a receipt of producer milk by the operator of such fluid milk plant for the purpose of §§ 1129.41(b)(4), 1129.42, 1129.46(a)(1) and 1129.95.

§ 1129.14 Route.

"Route" means the delivery (including delivery by a vendor or sale at a plant store) of milk, skim milk, buttermilk, cream or flavored milk drinks other than as follows:

(a) Delivery in bulk to a milk plant, or

(b) Delivery in consumer packages from a milk processing plant to a distributing plant in an amount not in excess of the amount of producer milk received by such processing plant during the month from the operator of such distributing plant and classified as Class I milk: *Provided*, That for the purposes of this paragraph milk so transferred to such processing plant shall be considered to be producer milk to the extent that total receipts during the month of producer milk by the operator of such distributing plant exceed his gross Class I sales less: (1) Receipts of Class I milk from other fluid milk plants; (2) milk transferred as Class I milk to such milk processing plant; and (3) milk received in consumer packages from such milk processing plant.

§ 1129.15 Producer.

"Producer" means any person, except a producer-handler, who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority, which milk is (a) received at a fluid milk plant or

(b) Diverted for his account by the operator of a fluid milk plant or cooperative association from such plant to a nonfluid milk plant during the period January through July and on not more than one-third of the days of delivery during the month for the period August through December: *Provided*, That milk so diverted shall be deemed to have been received by the diverting handler at the plant from which it was diverted.

§ 1129.16 Producer milk.

"Producer milk" means all skim milk and butterfat contained in milk produced by a producer and received at a fluid milk plant directly from producers or diverted from such a plant pursuant to § 1129.15.

§ 1129.17 Other source milk.

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month in the form of products designated as Class I milk pursuant to § 1129.41(a)(1), except (1) such products received from other fluid milk plants, or (2) producer milk; and

(b) Products designated as Class II milk pursuant to § 1129.41(b)(1) from any source (including those produced at the plant) which are reprocessed or converted into another product during the month.

§ 1129.18 Producer-handler.

"Producer-handler" means a person who operates both a dairy farm(s) and a milk processing or bottling plant at which milk is received from the dairy farm(s) of such person but from no other dairy farm: *Provided*, That such person shall furnish to the market administrator for his verification, subject to review by the Secretary, evidence that the maintenance, care and management of the dairy animals and other resources necessary for the production of milk in his name are and continue to be the personal enterprise of and at the personal risk of such producer and the processing, packaging and distribution of the milk are and continue to be the personal enterprise of and at the personal risk of such producer in his capacity as a handler.

§ 1129.19 Chicago butter price.

"Chicago butter price" means the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department.

MARKET ADMINISTRATOR

§ 1129.20 Designation.

The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1129.21 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1129.22 Duties.

The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to the following:

(a) Within 45 days following the date on which he enters upon his duties or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 1129.95 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 1129.94) necessarily incurred by him in maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Verify all reports and payments of each handler by audit of such handler's records and the records of any other handler or person upon whose disposition of milk such handler claims classification of skim milk and butterfat and by such investigation as the market administrator deems necessary;

(h) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, after the date upon which he is required to perform such acts, has not made reports pursuant to § 1129.30 to § 1129.32, inclusive, or payments pursuant to § 1129.90 to § 1129.93, inclusive;

(i) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, and notify each handler in writing:

(1) On or before the 6th day of each month, the minimum price for Class I milk computed pursuant to § 1129.50 and the Class I butterfat differential computed pursuant to § 1129.52(a), both for the current month, and the minimum price for Class II milk computed pursuant to § 1129.51 and the Class II butterfat differential computed pursuant to § 1129.52(b), both for the previous month; and

(2) On or before the 12th day after the end of each of the months, the uniform price for each handler computed pursuant to § 1129.72 and the butterfat differential computed pursuant to § 1129.91;

(j) On or before the 12th day after the end of each month, mail to each handler at his last known address, a statement showing for such handler:

(1) The amount and value of producer milk in each class and the totals thereof;

(k) On or before the 12th day after the end of each month, report to each cooperative association, which so requests, the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the milk so received shall be prorated to each class in the proportion that the total receipts of milk from producers by such handler were used in each class;

(l) Prepare and make available for the benefit of producers, consumers, and handlers such general statistics and such

information concerning the operations hereof as are necessary and essential to the proper functioning of this part; and

(m) Upon request, furnish to a cooperative association for its members the data reported pursuant to § 1129.31 (a), (b) and (c).

REPORTS, RECORDS AND FACILITIES

§ 1129.30 Reports of receipts and utilization.

On or before the 7th day after the end of each month, each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator for each of his approved plants as follows:

(a) The quantities of skim milk and butterfat contained in milk received from each producer;

(b) The quantities of skim milk and butterfat contained in products designated as Class I milk pursuant to § 1129.41(a) received from fluid milk plants of other handlers;

(c) The quantities of skim milk and butterfat in other source milk;

(d) The quantities of skim milk and butterfat contained in inventories of products designated as Class I milk pursuant to § 1129.41(a) on hand at the beginning and end of the month;

(e) The utilization of all skim milk and butterfat required to be reported pursuant to this section including a statement of the disposition of Class I milk outside the marketing area; and

(f) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 1129.31 Payroll reports.

On or before the 20th day of each month each handler, except a producer-handler, shall submit to the market administrator his producer payroll for deliveries of milk for the preceding month for each of his fluid milk plants which shall show for each producer:

(a) His name and address;

(b) The total pounds and the average butterfat test of milk received;

(c) The number of days if less than the entire month for which milk was received;

(d) Net amount of such handler's payment, together with the price(s) paid and the nature and amount of any deductions.

§ 1129.32 Other reports.

(a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe;

(b) Each handler, who causes milk to be diverted for his account directly from producers' farms to an unapproved plant, shall prior to such diversion, report to the market administrator and to the cooperative association, of which such producer is a member, his intention to divert such milk, the proposed date or dates of such diversion, and the plant to which such milk is to be diverted.

§ 1129.33 Records and facilities.

Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all receipts of producer milk and other source milk;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and other milk products handled;

(c) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and milk products on hand at the beginning and end of each month; and

(d) Payments to producers and cooperative associations including any deductions authorized by producers and disbursement of money so deducted.

§ 1129.34 Retention of records.

All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records is necessary in connection with a proceeding under section 8c(15)(A) of the act or a court action specified in such notice the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 1129.40 Skim milk and butterfat to be classified.

All skim milk and butterfat at fluid milk plants which is required to be reported for the month pursuant to § 1129.30, shall be classified by the market administrator pursuant to the provisions of §§ 1129.41 to 1129.46, inclusive.

§ 1129.41 Classes of utilization.

Subject to the conditions set forth in §§ 1129.43 and 1129.44, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat (1) disposed of in fluid form as milk, skim milk, buttermilk, flavored milk drinks, cream, cultured sour cream, any mixture of cream and milk or skim milk (other than frozen storage cream, aerated cream products, eggnog, ice cream mix or other frozen mixes, evaporated or condensed milk and any milk product contained in hermetically sealed containers): *Provided, however*, That when any such product is fortified with nonfat milk solids the amount of skim milk to be classified as Class I shall be only that amount equal to the weight of skim milk in an equal volume of unfortified product of the same nature and butterfat content, and (2) not accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than those designated as Class I milk pursuant to paragraph (a) of this section;

(2) Disposed of and used for livestock feed;

(3) Contained in inventory of milk and milk products designated as Class I milk pursuant to subparagraph (a)(1) of this section on hand at the end of the month;

(4) In shrinkage not to exceed 2 percent of skim milk and butterfat, respectively, in producer milk and other source milk; and

(5) Skim milk contained in any fortified product designated pursuant to paragraph (a)(1) of this section in excess of the pounds of skim milk in such product classified as Class I pursuant to such subparagraph.

§ 1129.42 Shrinkage.

The market administrator shall assign shrinkage at the fluid milk plant(s) of each handler as follows:

(a) Compute the shrinkage of skim milk and butterfat classified as Class II milk; and

(b) Assign the amounts pro rata to the handler's receipts of skim milk and butterfat, respectively, in producer milk and in other source milk.

§ 1129.43 Responsibility of handlers and reclassification of milk.

(a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified as Class II milk;

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect.

§ 1129.44 Transfers.

Skim milk or butterfat disposed of each month from a fluid milk plant shall be classified:

(a) In the classification indicated by both handlers in their reports submitted for the month to the market administrator pursuant to § 1129.30 if transferred in the form of products designated as Class I milk in § 1129.41(a)(1) to a fluid milk plant of another handler, except a producer-handler: *Provided*, That the percentage of the total quantities of skim milk and butterfat, respectively, in products thus transferred and assigned to Class I milk shall not be greater than the percentage of skim milk and butterfat in producer milk classified as Class I milk in the plant of the transferee handler: *And provided further*, That if either or both handlers have other source milk during the month, the skim milk or butterfat so transferred shall be classified at both plants so as to allocate the greatest possible Class I utilization to the producer milk of both handlers;

(b) As Class I milk, if transferred to a producer-handler in the form of products designated as Class I milk in § 1129.41(a)(1);

(c) As Class I milk, if transferred or diverted in the form of milk, skim milk or cream in bulk to a nonfluid milk plant located more than 400 miles distant by the shortest highway distance as determined by the market administrator;

(d) As Class I milk, if transferred or diverted in the form of milk, skim milk or cream in bulk to a nonfluid milk plant located not more than 400 miles distant by the shortest highway distance as determined by the market administrator, unless the following conditions are met:

(1) The transferring-handler claims Class II utilization in a product specified in § 1129.41(b);

(2) The operator of such nonfluid milk plant keeps adequate books and records showing the utilization of all skim milk and butterfat received at such plant and the market administrator is permitted to examine such books and records for the purpose of verification; and

(3) The Class I milk, as defined pursuant to § 1129.41(a) in such nonfluid milk plant does not exceed the receipts of skim milk and butterfat in milk received during the month from dairy farmers, who the market administrator determines, constitute the regular source of supply for such plant: *Provided*, That any Class I milk in excess of receipts from such dairy farmers shall be assigned to milk, skim milk, or cream so transferred or diverted.

§ 1129.45 Computation of the skim milk and butterfat in each class.

For each month, the market administrator shall correct for mathematical and for other obvious errors the reports of receipts and utilization for the fluid milk plant(s) of each handler and shall compute the pounds of butterfat and skim milk in Class I milk and Class II milk for such handler: *Provided*, That if any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 1129.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1129.45 the market administrator shall determine the classification of producer milk received at the fluid milk plant(s) of each handler each month as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk assigned to producer milk pursuant to § 1129.42(b);

(2) Subtract from the pounds of skim milk in Class I milk the pounds of skim milk received as Class I products in consumer packages from a nonfluid milk plant which are not in excess of the pounds of skim milk transferred or diverted by the handler to such nonfluid milk plant as Class I milk;

(3) Subtract from the remaining pounds of skim milk in series beginning with Class II milk, the pounds of skim milk in other source milk as defined pursuant to § 1129.17;

(4) Subtract from the remaining pounds of skim milk in series beginning with Class II milk, the pounds of skim milk contained in inventory on hand at the beginning of the month and classified pursuant to § 1129.41(b)(3);

(5) Subtract from the remaining pounds of skim milk in each class the received from the fluid milk plants of skim milk contained in products designated as Class I milk in § 1129.41(a)(1) received from the fluid milk plants of other handlers and in milk received from a cooperative association in its capacity as a handler pursuant to § 1129.13(b)(2), according to the classification of such skim milk as determined pursuant to § 1129.44(a);

(6) Add to the remaining pounds of skim milk in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(7) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk contained in producer milk, subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk. Any amount so subtracted shall be known as "overage."

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section;

(c) Determine the weighted average butterfat content of the Class I and Class II milk allocated to producer milk.

MINIMUM PRICES

§ 1129.50 Class I milk.

Subject to the provisions of §§ 1129.52 and 1129.53 the minimum price per hundredweight to be paid by each handler for producer milk received at his fluid milk plant and classified as Class I milk shall be the price for Class I milk established under Federal Order No. 126 regulating the handling of milk in the North Texas marketing area, plus 38 cents.

§ 1129.51 Class II milk.

Subject to provisions of § 1129.52 the minimum price per hundredweight to be paid by each handler for producer milk received at his fluid plant and classified as Class II milk shall be the price computed pursuant to paragraph (a) of this section, less 14 cents or the price computed pursuant to paragraph (b) of this section, whichever is higher, during April, May, and June; and for each of the other months, the price computed pursuant to paragraph (a) or paragraph (b) of this section, whichever is higher:

(a) The sum of the plus values computed as follows:

(1) Subtract 3 cents from the Chicago butter price, add 20 percent thereof, and multiply by 4.0.

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound for nonfat dry milk, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents and multiply by 8.16.

(b) The price per hundredweight computed by multiplying by 8.4 the average of the daily prices paid per pound of cheese at Wisconsin Primary markets ("Cheddars" f.o.b. Wisconsin assembling points, cars, or truckloads) as reported by the Department for the months and rounding to the nearest cent.

§ 1129.52 Butterfat differential to handlers.

For milk containing more or less than 4 percent butterfat, the class prices pursuant to §§ 1129.50 and 1129.51 shall be increased or decreased, respectively, for each one-tenth of one percent butterfat by the appropriate rate, rounded in each case to the nearest one-tenth cent, determined as follows:

(a) *Class I milk.* Multiply the Chicago butter price for the preceding month by 0.120.

(b) *Class II milk.* Multiply the Chicago butter price for the current month by 0.110.

§ 1129.53 Location adjustments to handlers.

For that milk which is received from producers at a fluid milk plant located outside of Zone I and classified as Class I milk the price specified in § 1129.50 shall be reduced 1.5 cents for each 10 miles or fraction thereof by the straight line distance as determined by the market administrator that the County Court House of the county in which such plant is located is from the County Court House in New Braunfels, Texas.

§ 1129.54 Use of equivalent prices.

If for any reason a price quotation required by this order for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1129.60 Producer-handlers.

Sections 1129.40 through 1129.46, 1129.50 through 1129.54, 1129.70 through 1129.72, and 1129.90 through 1129.96 shall not apply to a producer-handler.

§ 1129.61 Plants subject to other Federal orders.

The provisions of this part shall not apply with respect to any plant specified in paragraph (a), (b), or (c) of this section except that the operator thereof shall, with respect to total receipts of skim milk and butterfat at such plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) An approved distributing plant which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in such other Federal order marketing area than is disposed of on routes (other

than to a distributing plant(s)) in the Austin-Waco marketing area.

(b) An approved distributing plant which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes (other than to a distributing plant(s)) in the Austin-Waco marketing area than is disposed of on routes in such other Federal order marketing area, but which plant is, nevertheless, fully regulated under such other Federal order.

(c) An approved supply plant which (1) meets the pooling requirements of another Federal order and from which greater qualifying shipments are made during the month to plants regulated under such other order than are made to plants regulated under this part, or (2) retains automatic pooling status under another Federal order.

DETERMINATION OF UNIFORM PRICE

§ 1129.70 Net obligation of handlers.

The net obligation of each handler for producer milk received at his fluid milk plant(s) during each month shall be a sum of money computed by the market administrator as follows:

(a) Multiply the pounds of such milk in each class by the applicable class price and add together the resulting amounts;

(b) Add the amount computed by multiplying the pounds of overage deducted from each class pursuant to § 1129.46 (a)(7) and (b) by the applicable class price;

(c) Add an amount computed as follows:

(1) Determine the pounds if any, that the skim milk or butterfat in inventory, subtracted from Class I milk pursuant to § 1129.46 (a)(4) and (b) is not in excess of the pounds in producer milk classified as Class II milk (other than as shrinkage) for the preceding month; and (2) multiply such pounds by the difference between the Class I price in the current month and the Class II price in the preceding month adjusted by the appropriate butterfat differentials;

(d) Add or subtract, as the case may be, an amount necessary to correct errors discovered by the market administrator in the verification of reports of such handler of his receipts and utilization of skim milk and butterfat for previous months.

§ 1129.71 Computation of aggregate value used to determine uniform prices.

For each month the market administrator shall compute an aggregate value for each handler from which to determine the uniform price(s) per hundredweight for producer milk of 4.0 percent butterfat content as follows:

(a) Add to the amount computed pursuant to § 1129.70 the total value of the location differential pursuant to § 1129.90 (b) or (c);

(b) Add or subtract for each one-tenth percent that the average butterfat content of producer milk received by such handler is less or more, respectively, than 4.0 percent, an amount computed by multiplying such difference by the butterfat differential to producers, as determined pursuant to § 1129.91 and multiplying the result by the total hundredweight of producer milk; and

(c) Add the amount represented by any deductions made for eliminating fractions of a cent in computing the uniform price(s) for such handler for the preceding month.

§ 1129.72 Computation of uniform prices for handlers.

For each month, the market administrator shall compute a uniform price for producer milk received by each handler as follows:

(a) Divide the aggregate value computed pursuant to § 1129.71 by the total hundredweight of producer milk received by such handler. The result, less any fraction of a cent, shall be known as the uniform price for such handler for milk of 4.0 percent butterfat content, at fluid milk plants in Zone I.

PAYMENTS

§ 1129.90 Payments to producers.

Except as provided in paragraph (d) of this section, each handler shall make payment to each producer for milk received from such producer as follows:

(a) On or before the 28th day of each month, for milk received during the first 15 days of the month at not less than the Class II price for the preceding month;

(b) On or before the 15th day after the end of each of the months for milk received during such month, an amount computed at not less than the uniform price per hundredweight pursuant to § 1129.72 subject to the butterfat differential computed pursuant to § 1129.91 and the location differential computed pursuant to § 1129.92; plus or minus adjustments for errors made in previous payments to such producers; and less (1) payment made pursuant to paragraph (a) of this section; (2) marketing service deductions pursuant to § 1129.94 and (3) proper deductions authorized by such producer;

(c) On or before the 13th and 26th days of each month in lieu of the payments pursuant to paragraphs (a) and (b) of this section, respectively, each handler shall pay to a cooperative association for milk which it caused to be delivered to such handler from producers and for which such cooperative association is not a handler pursuant to § 1129.13, if such cooperative association is authorized to collect such payments for its member-producers and has so requested the handler, an amount equal to the sum of the individual payments otherwise payable to such producers.

(d) On or before the 13th and 26th days of each month, each handler shall pay to a cooperative association for milk which was caused to be delivered to such handler by such cooperative association, and for which such cooperative association is a handler pursuant to § 1129.13 (b), an amount not less than the value of such milk computed by multiplying the pounds of such milk allocated to each class pursuant to § 1129.46 by the applicable class prices including the differentials prescribed by the order.

(e) In making the payments to producers pursuant to paragraphs (b) and (c) or (d) of this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement which shall show for each month:

(1) The month and the identity of the handler and of the producer;

(2) The daily and total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required pursuant to this part;

(4) The rate which is used in making the payment if such rate is other than the applicable rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer.

§ 1129.91 Butterfat differential to producers.

The applicable uniform prices to be paid pursuant to § 1129.90 to producers delivering milk to each handler shall be increased or decreased for each one-tenth of one percent which the butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying the Chicago butter price for the month by 0.110.

§ 1129.92 Location differential to producers.

In making payment to producers pursuant to § 1129.90, the uniform price to be paid for producer milk received at a fluid milk plant located outside of Zone I shall be reduced 1.5 cents for each 10 miles or fraction thereof by the straight line distance as determined by the market administrator that the County Court House of the county in which such plant is located is from the County Court House in New Braunfels, Texas.

§ 1129.93 Adjustment of accounts.

Whenever audit by the market administrator of any handler's reports, books, records, or accounts, or verification of weights and butterfat tests of milk or milk products discloses errors resulting in money due a producer or the market administrator from such handler or due such handler from the market administrator, the market administrator shall notify such handler of any amount so due, and payment thereof shall be made on or before the next date for making payments, as set forth in the provisions under which such error occurred.

§ 1129.94 Marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers for milk (other than milk of his own production) pursuant to § 1129.90, shall deduct 6 cents per hundredweight, or such amount not exceeding 6 cents per hundredweight, as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of each month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of handlers

for producers who are not receiving such service from a cooperative association;

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers on or before the 13th day after the end of each month and pay such deductions to the cooperative association of which such producers are members, furnishing a statement showing the amount of any such deductions and the amount of milk for which such deduction was computed for each producer.

§ 1129.95 Expense of administration.

As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 15th day after the end of the month, 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to all (a) receipts of producer milk, including such handlers' own production; (b) other source milk at a fluid milk plant which is classified as Class I milk; and (c) Class I milk disposed of during the month on routes located in the marketing area from a nonfluid milk plant other than a plant defined in § 1129.61.

§ 1129.96 Termination of obligations.

The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or wilful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler within the applicable period of time, files pursuant to section 8c(15)(A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1129.100 Effective time.

The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 1129.101.

§ 1129.101 Suspension or termination.

The Secretary may suspend or terminate this part or any provisions of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the act. This part shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 1129.102 Continuing obligations.

If, upon the suspension or termination of any or all provisions of this part, there are any obligations thereunder, the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1129.103 Liquidation.

Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable and execute and deliver all assignment or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidating and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1129.110 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his Agent or Representative in connection with any of the provisions of this part.

§ 1129.111 Separability of provisions.

If any provision of this part or its application to any person or circumstances is held invalid the application of such provision and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

Effective date: February 1, 1962.

Signed at Washington, D.C., on January 30, 1962.

CHARLES S. MURPHY,
Under Secretary.

AUTHORITY: §§ 1132.0 to 1132.111 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1132.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Texas Panhandle marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 5 cents per hundredweight or such amount not to exceed 5 cents per hundredweight as the Secretary may prescribe, with respect to butterfat and skim milk contained in (i) producer milk, (ii) other source milk at a pool plant which is allocated to Class I milk, and (iii) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant not subject to the classification and pricing provisions of another Federal order.

(b) *Additional findings.* (1) It is necessary in the public interest to make this order amending the order effective not later than February 1, 1962. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

(2) The provisions of the said order are known to handlers. The recommended decision of the Assistant Secretary of the United States Department of Agriculture was issued November 29, 1961, and the decision of the Under Secretary containing all amendment provisions of this order, was issued December 27, 1961. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective February 1, 1962, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER. (Sec. 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011.)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Texas Panhandle marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

DEFINITIONS

§ 1132.1 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

§ 1132.2 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 1132.3 Department.

"Department" means the United States Department of Agriculture or any other Federal agency authorized to perform the price reporting functions of the United States Department of Agriculture.

§ 1132.4 Person.

"Person" means any individual, partnership, corporation, association, or other business unit.

§ 1132.5 Cooperative association.

"Cooperative association" means any cooperative marketing association which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk or its products for its members.

§ 1132.6 Texas Panhandle marketing area.

"Texas Panhandle marketing area", hereinafter called the "marketing area", means all of the territory within the counties of Armstrong, Briscoe, Carson, Childress, Collingsworth, Dallam, Deaf Smith, Donley, Gray, Hall, Hansford, Hartley, Hemphill, Hutchinson, Moore, Oldham, Ochiltree, Potter, Randall, Roberts, Sherman, Swisher, and Wheeler, all in the State of Texas, and Beckham in the State of Oklahoma.

§ 1132.7 Producer.

"Producer" means any person, except a producer-handler, who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority, which milk is (a) received at a pool plant, or (b) diverted from a pool plant to a nonpool plant for the account of either the operator of the pool plant or a cooperative association (1) any day during the months of March through June and (2) on not more than 15 days during any of the months of July through February: *Provided*, That milk diverted pursuant to this section shall be deemed to have been received at the location of the plant from which diverted.

§ 1132.8 Distributing plant.

"Distributing plant" means a plant which is approved by an appropriate health authority for the processing or packaging of Grade A milk and from which any fluid milk product is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) located in the marketing area.

§ 1132.9 Supply plant.

"Supply plant" means a plant from which milk, skim milk or cream which is acceptable to the appropriate health authority for distribution in the marketing area under a Grade A label is shipped during the month to a pool plant qualified pursuant to § 1132.10(a).

§ 1132.10 Pool plant.

"Pool plant" means:

(a) A distributing plant from which a volume of Class I milk equal to not less than 50 percent of the Grade A milk received at such plant from dairy farmers and from other plants is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) and not less than 15 percent of such receipts are so disposed of to such outlets in the marketing area: *Provided*, That if a portion of a plant is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authorities for the receiving, processing or packaging of any fluid milk product for Grade A disposition, it shall not be considered as part of a pool plant pursuant to this section.

(b) A supply plant from which the volume of fluid milk products shipped during the month to pool plants qualified pursuant to paragraph (a) of this section is equal to not less than 50 percent of the Grade A milk received at such plant from dairy farmers during such month: *Provided*, That if such shipments are not less than 75 percent of the receipts of Grade A milk at such plant during the immediately preceding period of September through November, such plant may, upon written application to the market administrator on or before March 1 of any year, be designated as a pool plant for the months of March through June of such year: *And provided further*, That if a portion of a plant is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing or packaging of any fluid milk product for Grade A disposition, it shall not be considered as part of a pool plant pursuant to this section.

§ 1132.11 Nonpool plant.

"Nonpool plant" means any milk manufacturing, processing or bottling plant other than a pool plant.

§ 1132.12 Handler.

"Handler" means (a) any person in his capacity as the operator of one or more distributing or supply plants, (b) any cooperative association with respect to the milk of producers diverted by the association for its own account from a pool plant to a nonpool plant, or (c) any cooperative association with respect to the milk of its member producers which it causes to be delivered directly from the farm to the pool plant of another handler in a tank truck owned and operated by, or under contract to, such cooperative association, if the cooperative association notifies the market administrator and the handler to whom the milk is delivered in writing that it wishes to become the handler for such milk. The cooperative association shall be considered the handler for such bulk tank milk, effective the first day of the month following receipt of such notice, and milk so delivered shall be deemed to have been received by the cooperative association at a pool plant at the location of the pool plant to which it is delivered.

§ 1132.13 Producer-handler.

"Producer-handler" means any person who operates a dairy farm and a distributing plant but who receives no milk from other dairy farmers.

§ 1132.14 Producer milk.

"Producer milk" means only that skim milk or butterfat contained in milk (a) received at the pool plant directly from producers, or (b) diverted from a pool plant to a nonpool plant in accordance with the conditions set forth in § 1132.7.

§ 1132.15 Fluid milk product.

"Fluid milk product" means milk (including concentrated milk), skim milk (including reconstituted skim milk), buttermilk, milk drinks (plain or flavored), cream, or any fluid mixture of cream and milk or skim milk (except storage cream, aerated cream products, eggnog, ice cream mix, evaporated or condensed milk, and sterilized products packaged in hermetically sealed containers): *Provided*, That when any such product is fortified with nonfat milk solids the amount of skim milk to be included within this definition shall be only that amount equal to the weight of skim milk in an equal volume of an unfortified product of the same nature and butterfat content.

§ 1132.16 Other source milk.

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month in the form of fluid milk products except (1) fluid milk products received from pool plants, or (2) producer milk; and

(b) Products other than fluid milk products from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month.

§ 1132.17 Chicago butter price.

"Chicago butter price" means the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department.

§ 1132.18 Base milk.

"Base milk" means milk received at a pool plant from a producer during any of the months of March through June which is not in excess of such producer's daily base computed pursuant to § 1132.85

multiplied by the number of days in such month.

§ 1132.19 Excess milk.

"Excess milk" means milk received at a pool plant from a producer during any of the months of March through June which is in excess of base milk received from such producer during such month, and milk received during such month from a producer for whom no base can be computed pursuant to § 1132.95.

MARKET ADMINISTRATOR

§ 1132.25 Designation.

The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1132.26 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1132.27 Duties.

The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to the following:

(a) Within 45 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount, and with reasonable surety thereon, covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 1132.88 (1) the cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses, except those incurred under § 1132.87, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 1132.30 and 1132.31, or payments pursuant to §§ 1132.80, 1132.84, 1132.86, 1132.87, and 1132.88;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be required by the Secretary;

(h) Verify all reports and payments of each handler by audit of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends, or by such investigation as the market administrator deems necessary;

(i) Prepare and disseminate to the public such statistics and such information as he deems advisable and as do not reveal confidential information;

(j) Publicly announce on or before:

(1) The 5th day of each month, the minimum price for Class I milk, pursuant to § 1132.51(a), and the Class I butterfat differential, pursuant to § 1132.52(a), both for the current month; and the minimum price for Class II milk, pursuant to § 1132.51(b), and the Class II butterfat differential, pursuant to § 1132.52(b), both for the preceding month;

(2) The 10th day after the end of the months of July through February the uniform price pursuant to § 1132.72 and the producer butterfat differential pursuant to § 1132.81;

(3) The 10th day after the end of each of the months of March through June, the uniform prices for base milk and excess milk pursuant to § 1132.73 and the producer butterfat differential pursuant to § 1132.81; and

(k) On or before the 10th day after the end of each month, report to each cooperative association, which so requests, the percentage of the milk caused to be delivered by the cooperative association or by its members to the pool plant(s) of each handler during the month, which was utilized in each class. For the purpose of this report, the milk so delivered shall be allocated to each class for each handler in the same ratio as all producer milk received by such handler during the month.

REPORTS, RECORDS AND FACILITIES

§ 1132.30 Reports of receipts and utilization.

On or before the 7th day after the end of each month, each handler, except a producer handler, shall report for such month to the market administrator in the detail and on forms prescribed by the market administrator:

(a) The quantities of skim milk and butterfat contained in receipts of producer milk, and the aggregate quantities of base and excess milk;

(b) The quantities of skim milk and butterfat contained in fluid milk products received from other pool plants;

(c) The quantities of skim milk and butterfat contained in other source milk;

(d) The quantities of skim milk and butterfat contained in producer milk diverted to nonpool plants pursuant to § 1132.7;

(e) Inventories of fluid milk products on hand at the beginning and end of the month; and

(f) The utilization of all skim milk and butterfat required to be reported pursuant to this section, including a separate statement of the disposition of Class I milk outside the marketing area.

§ 1132.31 Other reports.

(a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler, except a producer-handler, shall report to the market administrator in detail and on forms prescribed by the market administrator:

(1) On or before the 20th day after the end of the month for each of his pool plants his producer payroll for such month which shall show for each producer: (i) His name and address, (ii) the total pounds of milk received from such producer, including, for the months of March through June, the total pounds of base and excess milk, (iii) the number of days, if less than the entire month for which milk was received from such producer, (iv) the average butterfat content of such milk, and (v) the net amount of such handler's payment, together with the price paid and the amount and nature of any deductions;

(2) On or before the first day other source milk is received in the form of any fluid milk product at his pool plant(s), his intention to receive such product, and on or before the last day such product is received, his intention to discontinue receipt of such product;

(3) Prior to his diversion of producer milk to a nonpool plant, his intention to divert such milk, the proposed date or dates of such diversion and the plant to which such milk is to be diverted; and

(4) Such other information with respect to his utilization of butterfat and skim milk as the market administrator may prescribe.

§ 1132.32 Records and facilities.

Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations, together with such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipt and utilization of all skim milk and butterfat handled in any form during the month;

(b) The weights and butterfat and other content of all milk, skim milk, cream and other milk products handled during the month;

(c) The pounds of skim milk and butterfat contained in or represented by all milk products on hand at the beginning and end of each month; and

(d) Payments to producers and cooperative associations including the amount and nature of any deductions and the disbursement of money so deducted.

§ 1132.33 Retention of records.

All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records is necessary in connection with a proceeding under section 8c(15)(A) of the act or a court action specified in such notice the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 1132.40 Skim milk and butterfat to be classified.

The skim milk and butterfat which are required to be reported pursuant to § 1132.30 shall be classified each month by the market administrator, pursuant to the provisions of §§ 1132.41 through 1132.46.

§ 1132.41 Classes of utilization.

Subject to the conditions set forth in § 1132.44, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat (1) disposed of in the form of a fluid milk product (except as provided in paragraph (b)(2) of this section) and (2) not accounted for as Class II milk;

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat (1) used to produce any product other than a fluid milk product; (2) disposed of and used for livestock feed; (3) contained in inventory of fluid milk products on hand at the end of the month; (4) reflecting the skim milk equivalent of nonfat milk solids used in the fortification of any fluid milk product and not accounted for as Class I milk pursuant to § 1132.41(a) by virtue of the proviso of § 1132.15; and (5) in shrinkage allocated to receipts of producer milk and other source milk (except milk diverted to a nonpool plant pursuant to § 1132.7) but not in excess of 2 percent of such receipts of skim milk and butterfat, respectively: *Provided*, That with respect to milk for which a cooperative association is the handler pursuant to § 1132.12(c), shrinkage incurred shall be allocated to the cooperative association in an amount not to exceed 0.5 percent of the total receipts of skim milk and butterfat in such milk and the pool plant to which it is delivered for processing shall be allocated shrinkage incurred in an amount not to exceed one and one-half percent of the total pounds of skim milk and butterfat in such milk.

§ 1132.42 Shrinkage.

The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of skim milk and butterfat for each handler; and

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat contained in producer milk and in other source milk.

§ 1132.43 Responsibility of handlers and reclassification of milk.

(a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise;

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect.

§ 1132.44 Transfers.

Skim milk or butterfat disposed of each month from a pool plant shall be classified:

(a) As Class I milk, if transferred in the form of a fluid milk product to the pool plant of another handler, except a producer-handler, unless utilization as Class II milk is claimed by both handlers in their reports submitted for the month to the market administrator pursuant to § 1132.30: *Provided*, That the skim milk or butterfat so assigned to Class II milk shall be limited to the amount thereof remaining in Class II milk in the plant of the transferee-handler after the subtraction of other source milk pursuant to § 1132.46 and any additional amounts of such skim milk or butterfat shall be classified as Class I milk: *And provided further*, That if either or both handlers have received other source milk, the skim milk or butterfat so transferred shall be classified at both plants so as to allocate the greatest possible Class I utilization to the producer milk of both handlers;

(b) As Class I milk, if transferred to a producer-handler in the form of fluid milk product;

(c) As Class I milk, if transferred or diverted in the form of a fluid milk product to a nonpool plant located more than 350 miles by the shortest highway distance as determined by the market administrator from the nearest point in the marketing area;

(d) As Class I milk, if transferred or diverted in the form of a fluid milk product in bulk to a nonpool plant located not more than 350 miles by the shortest highway distance as determined by the market administrator from the nearest point in the marketing area unless:

(1) The transferring or diverting handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 1132.30 for the month within which such transaction occurred;

(2) The operator of such nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for the purpose of verification; and

(3) The skim milk and butterfat in the fluid milk products (except in ungraded cream disposed of for manufacturing uses) disposed of from such nonpool plant do not exceed the receipts of skim milk and butterfat in milk received during the month from dairy farmers who the market administrator determines constitute the regular source of supply for such plant: *Provided*, That any skim milk or butterfat in fluid milk products (except in ungraded cream disposed of for manufacturing uses) disposed of from the nonpool plant which is in excess of receipts from such dairy farmers shall be assigned to the fluid milk products so transferred or diverted and classified as Class I milk: *And provided further*, That if the total skim milk and butterfat in fluid milk products which were transferred by all handlers to such nonpool plant during the month is less than the skim milk and butterfat classified as Class I milk pursuant to the preceding proviso hereof, the assignment to Class I milk shall be prorated over the claimed Class II classification reported by each such handler on transfers to the nonpool plant.

§ 1132.45 Computation of the skim milk and butterfat in each class.

For each month, the market administrator shall correct for mathematical and for other obvious errors the reports of receipts and utilization for the pool plant(s) of each handler and shall compute the pounds of butterfat and skim milk in Class I milk and Class II milk for such handler: *Provided*, That if any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water reasonably associated with such solids in the form of whole milk.

§ 1132.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1132.45 the market administrator shall determine the classification of producer milk received at the pool plant(s) of each handler each month as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk assigned to producer milk pursuant to § 1132.41(b);

(2) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source milk received in the form of fluid milk products which were not subject to the Class I pricing provisions of an order issued pursuant to the act;

(3) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source milk other than that received in the form of fluid milk products;

(4) Whenever the total receipts of producer milk by all handlers are less

than 110 percent of Class I sales by all handlers, subtract from the remaining pounds of skim milk in Class II milk an amount equal to such remainder, or the product obtained by multiplying the pounds of skim milk in producer milk by 0.05, whichever is less.

(5) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source received in the form of fluid milk products which are subject to the Class I pricing provisions of another order issued pursuant to the act;

(6) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (4) of this paragraph;

(7) Subtract from the remaining pounds of skim milk in each class the skim milk in fluid milk products received from the pool plants of other handlers according to the classification of such products as determined pursuant to § 1132.44(a);

(8) Subtract from the remaining pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month;

(9) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph and if the remaining pounds of skim milk in both classes exceed the pounds of skim milk contained in producer milk, subtract such excess from the remaining pounds of skim milk in series beginning with Class II. Any amount of excess so subtracted shall be called "overage".

(b) Butterfat shall be allocated in accordance with the same procedure prescribed for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of producer milk remaining in each class computed pursuant to paragraphs (a) and (b) of this section.

Minimum Prices

§ 1132.50 Basic formula price.

The basic formula price shall be the highest of the prices computed pursuant to paragraphs (a) and (b) of this section, rounded to the nearest cent.

(a) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following milk plants for which prices have been reported to the market administrator or to the Department, divided by 3.5 and multiplied by 4.0:

Present Operator and Location

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price obtained by adding together the amounts calculated pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Subtract 3 cents from the Chicago butter price and multiply the remainder by 4.8; and

(2) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, and multiply by 8.16.

§ 1132.51 Class prices.

Subject to the provisions of §§ 1132.52 and 1132.53, the class prices per hundredweight for the month shall be as follows:

(a) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month, plus $2.15 during the months of July through February and plus $1.85 during all other months.

(b) *Class II milk price.* For the months of July through February, the price for Class II milk shall be the price computed pursuant to § 1132.50(b), and for the months of March through June, such price less 15 cents.

§ 1132.52 Butterfat differentials to handlers.

For milk containing more or less than 4.0 percent butterfat, the class prices for the month calculated pursuant to § 1132.51 shall be increased or decreased, respectively, for each one-tenth percent butterfat at the appropriate rate, rounded to the nearest one-tenth cent, determined as follows:

(a) *Class I price.* Multiply the Chicago butter price for the preceding month by 0.120.

(b) *Class II prices.* Multiply the Chicago butter price for the current month by 0.110.

§ 1132.53 Location differentials to handlers.

For that milk which is received from producers at a pool plant located 100 miles or more from the City Hall, Amarillo, Texas, by the shortest hard-surfaced highway distance, as determined by the market administrator, and which is transferred to a distributing plant which is a pool plant in the form of a fluid milk product and assigned to Class I pursuant to the proviso of this section, or otherwise classified as Class I milk, the price specified in § 1132.51(a) shall be reduced at the rate set forth in the following schedule according to the location of the pool plant where such milk is received from producers:

Distance from the Amarillo City Hall (miles):	*Rate per hundredweight (cents)*
100 but less than 110	15.0
For each additional 10 miles or fraction thereof an additional	1.5

Provided, That for the purpose of calculating such location differential, fluid milk products which are transferred between pool plants shall be assigned to any remainder of Class II milk in the transferee-plant after making the calculations prescribed in § 1132.46(a)(5), and the comparable steps in (b) for such plant, such assignment to transferor plants to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

§ 1132.54 Use of equivalent prices.

If for any reason a price quotation required by this order for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

§ 1132.55 Cheddar cheese credit.

On and after the effective date hereof through February 1962, any milk used to produce Cheddar cheese or transferred in the form of milk from a pool plant to a nonpool plant and there used to produce Cheddar cheese shall be assigned to such use by the market administrator and shall be subject to a credit computed as follows: Multiply the rate by which the per hundredweight Class II price for milk containing 4.0 percent butterfat exceeds the amount (rounded to the nearest tenth of a cent) obtained by multiplying by 9.0 the average of the daily prices paid per pound of cheese at Wisconsin Primary markets ("Cheddars" f.o.b. Wisconsin assembling points, cars or truckloads) as reported by the Department during the month, by the hundredweight of Class II milk not in excess of the combined volume of skim milk and butterfat remaining after the computation specified in § 1132.46(a)(7) and the corresponding step of § 1132.46(b) less any overage deducted pursuant to § 1132.46(a)(9) and the corresponding step of § 1132.46(b), which was either used to produce Cheddar cheese or transferred in the form of milk from a pool plant to a nonpool plant and there used to produce Cheddar cheese: *Provided*, That in the event the plant at which the Cheddar cheese was produced also received milk to be classified and priced under some other Federal order(s) on the basis of its specific use in Cheddar cheese and the volume of milk so used in such plant was less than the combined volume of milk to be so classified and priced under this and such other order(s), then the hundredweight of milk to which this paragraph is applicable shall be a pro rata share of such use determined by computing the percentage that the volume of milk for which Cheddar cheese use is claimed under this order is of the total volume of Federal order milk for which such use is claimed and applying that percentage to the volume of milk so used in such plants.

Application of Provisions

§ 1132.60 Producer-handlers.

Sections 1132.40 through 1132.46, 1132.50 through 1132.53, 1132.70 through 1132.73, 1132.80 through 1132.88, and 1132.95 through 1132.97 shall not apply to a producer-handler.

§ 1132.61 Plants subject to other Federal orders.

The provisions of this part shall not apply with respect to the operation of any plant specified in paragraphs (a) or (b) of this section except that the operator thereof shall, with respect to total receipts of skim milk and butterfat at such plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) A distributing plant meeting the requirements of § 1132.10(a) which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in such other Federal order marketing area than was disposed of to retail and wholesale outlets (excluding pool plants) in this marketing area, except that if such plant was subject to all the provisions of this order in the immediately preceding month, it shall continue to be subject to all the provisions of this order until the third consecutive month in which a greater proportion of its Class I disposition is made in such other marketing area unless notwithstanding the provisions of this paragraph it is regulated under such other order.

(b) A distributing plant meeting the requirements of § 1132.10(a) which also meets the pooling requirements of another Federal order on the basis of distribution in such other marketing area and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month to retail and wholesale outlets (excluding pool plants) in this marketing area than is disposed of on routes in such other marketing area but which plant is nevertheless fully regulated under such other Federal order.

§ 1132.62 Handlers operating nonpool plants.

None of the provisions from §§ 1132.44 through 1132.53, inclusive, or from §§1132.70 through 1132.85, inclusive, shall apply in the case of a handler in his capacity as the operator of a nonpool plant, except that such handler shall, on or before the 13th day after the end of each month, pay to the market administrator for deposit into the producer-settlement fund an amount calculated by multiplying the total hundredweight of butterfat and skim milk disposed of as Class I milk from such plant to retail or wholesale outlets (including sales by vendors and plant stores) in the marketing area during the month, by the rate determined pursuant to § 1132.63.

§ 1132.63 Rate of payment on unpriced milk.

The rate of payment per hundredweight to be made by handlers on unpriced other source milk allocated to Class I milk shall be any plus amount calculated as follows:

(a) During the months of March through June, subtract from the Class I price adjusted by the Class I butterfat and location differentials applicable at a pool plant of the same location as the nonpool plant supplying such other source milk, the Class II price adjusted by the Class II butterfat differential; and

(b) During the months of July through February subtract from the Class I price f.o.b. such nonpool plant the uniform price to producers adjusted by the Class I butterfat differential.

Determination of Uniform Prices To Producers

§ 1132.70 Computation of value of milk for each handler.

The value of producer milk received during each month by each handler shall be a sum of money computed by the market administrator as follows:

(a) Multiply the pounds of milk in each class by the applicable class price and add together the resulting amounts;

(b) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 1132.46(a)(9) and the corresponding step of (b) by the applicable class prices;

(c) Add the amount obtained in multiplying the difference between the Class II price for the preceding month and the Class I price for the current month by the hundredweight of producer milk classified in Class II less shrinkage during the preceding month, or the hundredweight of milk subtracted from Class I pursuant to § 1132.46(a)(8) and the corresponding step of (b), whichever is less; and

(d) Add an amount calculated by multiplying the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 1132.46(a)(2) and (3) and the corresponding step of (b), by the rate of payment on unpriced milk determined pursuant to § 1132.63 at the nearest nonpool plant(s) from which an equivalent amount of other source skim milk or butterfat was received: *Provided*, That if the source of any such fluid milk product received at a pool plant is not clearly established or if such skim milk and butterfat is received or used in a form other than as a fluid milk product such product shall be considered to have been received from a source at the location of the pool plant where it is classified.

(e) Deduct the amount of any credits computed for such handler pursuant to § 1132.55.

§ 1132.71 Computation of aggregate value used to determine uniform prices.

For each month the market administrator shall compute an aggregate value from which to determine uniform prices per hundredweight for producer milk, of 4.0 percent butterfat content, f.o.b. plants located within 100 miles of the City Hall of Amarillo, Texas, as follows:

(a) Combine into one total the values computed pursuant to § 1132.70 for all handlers who made the reports prescribed in § 1132.30 for such month, except those in default of payments required pursuant to § 1132.84 for the preceding month;

(b) Add or subtract for each one-tenth percent that the average butterfat content of producer milk represented by the values included under paragraph (a) of this section is less or more, respectively, than 4.0 percent, an amount computed by multiplying such differences by the butterfat differential to producers, and multiplying the result by the total hundredweight of producer milk;

(c) Add an amount equal to the sum of the location differential deductions to be made pursuant to § 1132.82; and

(d) Add an amount equal to one-half of the unobligated cash balance in the producer-settlement fund.

§ 1132.72 Computation of uniform price.

For each of the months of July through February, the market administrator shall compute a uniform price for producer milk of 4.0 percent butterfat content f.o.b. pool plants located within 100 miles of the City Hall of Amarillo, Texas, as follows:

(a) Divide the aggregate value computed pursuant to § 1132.71 by the total hundredweight of producer milk included in such computations; and

(b) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (a) of this section. The resulting figure shall be the uniform price for producer milk.

§ 1132.73 Computation of uniform prices for base milk and excess milk.

For each of the months of March through June, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 4.0 percent butterfat content, f.o.b. pool plants located within 100 miles of the City Hall of Amarillo, Texas, as follows:

(a) From the reports submitted by handlers pursuant to § 1132.30, determine the aggregate classification of producer milk included in the computation of value pursuant to § 1132.71 and the total hundredweight of such milk which is base milk and which is excess milk;

(b) Determine the value of such excess milk on a 4 percent butterfat basis by multiplying the total hundredweight of such milk which is not greater than the total Class II milk pursuant to paragraph (a) of this section by the Class II milk price and by adding thereto the value obtained by multiplying the hundredweight of such excess milk which is greater than the quantity of such Class II milk by the Class I milk price;

(c) Divide the value of excess milk obtained in paragraph (b) of this section by the total hundredweight of such milk, and subtract not less than 4 nor more than 5 cents from the price thus com-

puted. The resulting figure shall be the uniform price for excess milk;

(d) Subtract the value of excess milk obtained in paragraph (b) of this section from the aggregate value of all milk obtained in § 1132.71; and

(e) Divide the amount obtained in paragraph (d) of this section by the total hundredweight of base milk obtained in paragraph (a) of this section, and subtract not less than 4 cents nor more than 5 cents from the price thus computed. The resulting figure shall be the uniform price for base milk.

PAYMENTS

§ 1132.80 Time and method of payment for producer milk.

Except as provided in paragraph (c) of this section, each handler shall make payment to each producer for milk received from such producer as follows:

(a) On or before the last day of each month, for milk received during the first 15 days of the month, at not less than the Class II price for the preceding month;

(b) On or before the 15th day after the end of each month, for milk received during such month, an amount computed at not less than the uniform prices per hundredweight pursuant to §§ 1132.72 and 1132.73 subject to the butterfat differential computed pursuant to § 1132.81 plus or minus adjustments for errors made in previous payments to such producer; and less (1) payment made pursuant to paragraph (a) of this section, (2) location differential deductions pursuant to § 1132.82, (3) marketing service deductions pursuant to § 1132.87, and (4) proper deductions authorized by such producer: *Provided*, That if such handler has not received full payment for such month pursuant to § 1132.85 he may reduce uniformly per hundredweight for all producers his payments pursuant to this paragraph by an amount not in excess of the per hundredweight reduction in payment from the market administrator. The handler shall make such balance of payment to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payment is received from the market administrator;

(c)(1) Upon receipt of a written request from a cooperative association which determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association each handler shall pay to the cooperative association on or before the 13th and 26th days of each month, in lieu of payments pursuant to paragraphs (a) and (b), respectively, of this section an amount equal to the sum of the individual payments otherwise payable to such producers. The foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association.

(2) A copy of each such request, promise to reimburse and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination.

(3) Each handler who receives milk from a cooperative association which collects payments for its members pursuant to subparagraph (1) of this paragraph shall, on or before the 20th of each month, furnish such association information showing the daily and total pounds milk received from each of the association's member producers for the first fifteen days of such month and, on or before the fifth day after the end of each month, such information for the 16th through the end of such month.

(d) In making the payments to producers pursuant to paragraphs (b) and (c) of this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement in such form that it may be retained by the producer, which shall show:

(1) The month and identity of the handler and of the producer;

(2) The daily and total pounds and the average butterfat content of milk received from such producer, including for the months of March through June, the pounds of base milk and excess milk;

(3) The minimum rate or rates at which payment to the producer is required pursuant to the order;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer or cooperative association.

§ 1132.81 Butterfat differentials to producers.

The applicable uniform prices to be paid each producer pursuant to § 1132.80 shall be increased or decreased for each one-tenth of one percent which the butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying the total pounds of butterfat in the producer milk allocated to Class I and Class II milk during the month pursuant to § 1132.46 by the respective butterfat differential for each class, dividing the sum of such values by the total pounds of such butterfat, and rounding the resultant figure to the nearest one-tenth of a cent.

§ 1132.82 Location differentials to producers.

In making payment pursuant to § 1132.80 the uniform price pursuant to § 1132.72 and the uniform price for base milk pursuant to § 1132.73 to be paid for milk which is received from producers at a pool plant located 100 miles or more from the City Hall, Amarillo, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator shall be reduced at the rate set forth in the following schedule according to the location of the pool plant where such milk is received from producers:

Distance from the Amarillo City Hall (miles):	*Rate per hundredweight (cents)*
100 but less than 110	18.0
For each additional 10 miles or fraction thereof on additional	1.8

§ 1132.83 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1132.62, 1132.84, and 1132.86, and out of which he shall make all payments pursuant to §§ 1132.85 and 1132.86: *Provided*, That payments due to any handler shall be offset by payments due from such handler.

§ 1132.84 Payments to the producer-settlement fund.

On or before the 12th day after the end of each month each handler shall pay to the market administrator the amount by which the value of milk for such handler, pursuant to § 1132.70, for such month exceeds the obligation, pursuant to § 1132.80, of such handler to producers for milk received during the month.

§ 1132.85 Payments out of the producer-settlement fund.

On or before the 13th day after the end of each month, the market administrator shall pay to each handler, the amount by which the obligation, pursuant to § 1132.80, of such handler to producers for milk received during the month exceeds the value of milk for such handler computed pursuant to § 1132.70. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section the market administrator shall reduce uniformly per hundredweight such payments and shall complete such payments as soon as the appropriate funds are available.

§ 1132.86 Adjustment of errors in payment.

Whenever verification by the market administrator of payments by any handler discloses errors made in payments to the producer-settlement fund pursuant to § 1132.84, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, pursuant to § 1132.85, the market administrator shall, within 15 days,

make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer or cooperative association for milk received by such handler discloses payment of less than is required by § 1132.80, the handler shall pay such balance due such producer or cooperative association not later than the time of making payment to producers or cooperative associations next following such disclosure.

§ 1132.87 Marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1132.80(b), shall deduct 6 cents per hundredweight or such lesser amounts as the Secretary may prescribe, with respect to all milk received by such handler from such producer (except such handler's own farm production), during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of milk received by handlers from such producers during the month and to provide such producers with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) Producers' cooperative associations: In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

§ 1132.88 Expense of administration.

As his pro rata share of the expense of the administration of the order, each handler shall pay to the market administrator, on or before the 15th day after the end of each month, 5 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to butterfat and skim milk contained in (a) producer milk, (b) other source milk at a pool plant which is allocated to Class I milk pursuant to § 1132.46, and (c) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant not subject to the classification and pricing provisions of another order issued pursuant to the act.

§ 1132.89 Adjustment of overdue accounts.

There shall be added to any balance due the market administrator pursuant to §§ 1132.62, 1132.84, 1132.86, 1132.87, and 1132.88 an amount equal to one-half of one percent of such balance for each month or any portion thereof that payment of the balance is overdue.

§ 1132.90 Termination of obligations.

The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or wilful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market adminstrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler within the applicable period of time, files pursuant to section 8c(15)(A) of the act, a petition claiming such money.

DETERMINATION OF BASE

§ 1132.95 Daily base.

The daily base for each producer shall be the amount obtained by dividing the total pounds of producer milk received from such producer by all handlers during the months of September through December immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of December inclusive, less the number of days for which no deliveries are made, but not less than 112 days.

§ 1132.96 Base rules.

The following rules shall apply in connection with the establishment of bases:

(a) A base shall apply to deliveries of milk by the producer for whose account that milk was delivered during the months of September through December;

(b) An entire base shall be transferred from a person holding such base to any other person effective as of the first day of any month following receipt by the market administrator of an application for such transfer. Such application shall be on a form approved by the market administrator and shall be signed by the baseholder and by the person to whom such base is to be transferred: *Provided*, That if a base is held jointly, the entire base shall be transferable only upon receipt of such application signed by all joint holders.

§ 1132.97 Announcement of established bases.

On or before February 15 of each year the market administrator shall notify each producer and the handler receiving milk from such producer of the daily base established by such producer.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1132.100 Effective time.

The provisions of this part, or any amendments to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 1132.101 Suspension or termination.

The Secretary shall suspend or terminate any or all of the provisions of this part, whenever he finds that it obstructs or does not tend to effectuate the declared policy of the act. This part shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

§ 1132.102 Continuing power and duty of the market administrator.

(a) If, upon the suspension or termination of any or all of the provisions of this part, there are any obligations arising hereunder, the final accrual or ascertainment or which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all funds or property on hand together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct; and (3) if so directed by the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

§ 1132.103 Liquidation after suspension or termination.

Upon the suspension or termination of any or all provisions of this part the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under this control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1132.110 Separability of provisions.

If any provision of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

§ 1132.111 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

Effective date: February 1, 1962.

Signed at Washington, D.C., January 30, 1962.

CHARLES S. MURPHY,
Under Secretary.

Title 3—THE PRESIDENT

Executive Order 10990

REESTABLISHING THE FEDERAL SAFETY COUNCIL

WHEREAS section 33(c) of the Federal Employees' Compensation Act, as amended (5 U.S.C. 784), declared it to be the purpose of the Congress to reduce the number of accidents and injuries among Government officers and employees, encourage safe practices, eliminate work hazards and health risks, and reduce compensable injuries; and

WHEREAS section 35 of that Act, as amended (5 U.S.C. 785), further disclosed the interest of the Congress in the promotion of safety in Federal agencies and establishments; and

WHEREAS the Federal Employees' Compensation Act, as amended and as modified by Reorganization Plan No. 19 of 1950 (hereinafter referred to as the Act), directs the heads of Government departments and agencies to develop, support, and foster organized safety promotion, and to keep such records of injuries and accidents to persons covered by the Act, and to make such statistical and other reports upon such forms as the Secretary of Labor may prescribe; and

WHEREAS the preponderance of accidents involving employees in the Federal service occur in field operations, the heads of executive departments and agencies, and through them, their supervisory staffs, including regional and field staffs, must exert leadership in the establishment of a sound accident prevention program at both the national and regional level; and

WHEREAS representatives of Federal employees should share a similar concern for the establishment of such programs; and

WHEREAS the President is authorized by the Act to establish by Executive order a safety council composed of representatives of Government departments and agencies to serve as an advisory body to the Secretary of Labor in furtherance of the safety program carried out by the Secretary pursuant to section 33 of the Act and to undertake such other measures as he deems proper to prevent injuries and accidents to persons covered by the Act:

NOW, THEREFORE, by virtue of the authority vested in me by section 33(c) of the Act and as President of the United States, it is hereby ordered as follows:

SECTION 1. *Establishment of Council.* There is hereby established in the Department of Labor the Federal Safety Council, hereinafter referred to as the Council. The Council shall be composed of a Chairman, to be designated by the Secretary of Labor, and one qualified representative of each of the several executive departments and agencies and of the municipal government of the District of Columbia (hereinafter referred to as members). The heads of the departments and agencies and the Board of Commissioners of the District of Columbia shall designate the members representing them, respectively, and may also designate suitable alternate members. The Secretary of Labor may, as he deems appropriate, appoint representatives of national or international unions, having Federal employees as members, to serve as consultants to the various committees established by the Council. The Chairman, members, alternate members, and consultants shall serve, as such, without compensation from the United States.

SEC. 2. *Purpose and functions of Council.* The Council shall serve in an advisory capacity to the Secretary of Labor in matters relating to the safety of civilian employees of the Federal government and the municipal government of the District of Columbia and the furtherance

of the safety program carried out by the Secretary pursuant to section 33 of the Act. It shall advise the Secretary of Labor with respect to the development and maintenance of adequate and effective safety organizations and programs in the several departments and agencies of the Federal government and the municipal government of the District of Columbia and with respect to criteria, standards, and procedures designed to eliminate work hazards and health risks and to prevent injuries and accidents in Federal employment.

SEC. 3. *Council affiliates, committees, and officers.* The Council shall include as an integral part of its organizational structure and operations such affiliates, hereafter established by the Council or now existing, in such manner and to such extent as it deems necessary properly and efficiently to perform its functions. The Council shall establish such committees, and may choose such officers (other than its chairman), as it finds necessary for carrying out its functions.

SEC. 4. *Regulations.* The Secretary of Labor shall prescribe appropriate regulations governing the activities and functions of the Council.

SEC. 5. *Administrative and budgetary arrangements.* The Secretary of Labor shall make available necessary office space and furnish the Council necessary equipment, supplies, and staff services.

SEC. 6. *Continuity.* The Federal Safety Council established by this order shall be deemed to constitute a continuation of the Federal Safety Council heretofore existing under the provisions of Executive Order No. 10194 of December 19, 1950.

SEC. 7. *Revocation.* Executive Order No. 10194 of December 19, 1950, is hereby superseded.

On December 8, 1961, there was published in the FEDERAL REGISTER (26 F.R. 11804), a notice with respect to a proposal to amend § 74.3(a), Part 74, Subchapter C, Chapter I, Title 9, Code of Federal Regulations. After due consideration of all relevant material and pursuant to the provisions of sections 1 through 4 of the Act of March 3, 1905, as amended, sections 1 and 2 of the Act of February 2, 1903, as amended, and sections 4 through 7 of the Act of May 29, 1884, as amended (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126), § 74.3(a) of said Part 74 is hereby amended to read as follows:

§ 74.3 Designation of eradication areas.

(a) Notice is hereby given that sheep in the following States, Territories, and parts thereof as specified, are being handled systematically to eradicate scabies in sheep and such States, Territories, and parts thereof, are hereby designated as eradication areas:

(1) Hawaii, Illinois, New Jersey, New York, Pennsylvania, Tennessee, and Wisconsin;

(2) That portion of South Dakota lying east of the Missouri River;

(3) The following counties in Kansas: Barber, Barton, Cloud, Ellsworth, Harper, Harvey, Kingman, Lincoln, Mcpherson, Mitchell, Osborne, Ottawa, Pratt, Reno, Republic, Rice, Russell, Sedgwick, Smith, Stafford, and Sumner Counties;

(4) All Counties in Nebraska except Banner, Box Butte, Cheyenne, Dawes, Deuel, Garden, Kimball, Morrill, Sheridan, Sioux, and Scottsbluff;

(5) All Counties in New Mexico except that portion of McKinley and San Juan Counties occupied by the Navajo Indian Reservation;

(6) All of the State of North Dakota except that area lying west of the Missouri River and State Highway No. 8, beginning at a point where said river intersects the South Dakota boundary line and continuing along said river to a point on the Garrison Dam Reservior directly south of the intersection of State Highways Nos. 23 and 8; thence, directly north to the intersection of State Highways Nos. 23 and 8; thence, north along State Highway No. 8 to the North Dakota-Canadian boundary; and

(7) The following counties in Michigan: Alger, Baraga, Chippewa, Delta, Dickinson, Gogebic, Houghton, Iron, Keweenaw, Luce, Mackinac, Marquette, Menominee, Ontonagon, and Schoolcraft Counties.

(Secs. 4-7, 23 Stat. 32, as amended, secs. 1, 2, 32 Stat. 791-792, as amended, secs. 1-4, 33 Stat. 1264, as amended, 1265, as amended; 21 U.S.C. 111-113, 115, 117, 120 121, 123-126; 19 F.R. 74, as amended)

Effective date. The foregoing amendment shall become effective 30 days after publication in the FEDERAL REGISTER.

The amendment adds the State of Pennsylvania to the list of eradication areas since the cooperative sheep scabies eradication program is now being conducted in such State. The entire State of Pennsylvania is presently included in the infected areas as sheep scabies is known to exist in such State. Hereafter, the restrictions pertaining to the interstate movement of sheep from or into infected and eradication areas as contained in 9 CFR Part 74, as amended, will apply to this State.

Done at Washington, D.C., this 31st day of January 1962.

M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

Title 14—AERONAUTICS AND SPACE

Chapter II—Civil Aeronautics Board

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. No. ER-350]

PART 289—EXEMPTION OF AIR CARRIERS FROM AGREEMENT FILING REQUIREMENTS OF SECTION 412 OF THE FEDERAL AVIATION ACT OF 1958

Expansion of Scope

FEBRUARY 1, 1962.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of February 1962.

The Board, by publication in 26 F.R. 10180 and by circulation of notice of proposed rule making, EDR-37, proposed amendments to Part 289 of the Economic Regulations, 14 CFR Part 289, which would expand the scope of the exemption contained therein to include certain additional types of agreements and make the exemption applicable to certain agreements in which supplemental air carriers and indirect air carriers are parties.

No comments were received in opposition to the proposal. One comment was received which requested that the exemption in Part 289 be expanded to include ground service agreements involving supplemental air carriers. However, the Board on the basis of the information and data presently before it is not prepared to find that ground service agreements involving supplemental air carriers are of such a routine nature as to qualify for the exemption contained in Part 289.

The Board has made only one minor editorial change in the title of the part from that proposed in the notice.

The Board finds that enforcement of section 412(a) of the Act insofar as it would require air carriers to file the agreements described in § 289.3, as amended herein, would be an undue burden on such air carriers by reason of the limited extent of, or unusual circumstances affecting, their operations and is not in the public interest.

Interested persons have been afforded an opportunity to participate in the making of these amendments, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Board hereby amends Part 289 of its Economic Regulations (14 CFR Part 289), effective March 8, 1962, as follows:

§ 289.1 [Amendment]

1. Amend the definition of certificated route air carrier in § 289.1(a) by insert-

ing after "section 401" the additional designations "(d) (1) or (2)".

2. By adding to § 289.1 the following definitions:

(b) "Indirect air carrier" means any citizen of the United States[1] who engages indirectly in interstate, overseas or foreign air transportation[2] of property only, and who: (1) Does not engage in the operation of aircraft in air transportation, and (2) does not engage in air transportation pursuant to any Board order authorizing air express services under a contract with a direct air carrier.

(c) "Supplemental air carrier" means any air carrier which holds authority from the Board to engage in supplemental air transportation.

3. By amending § 289.2 to read:

§ 289.2 Exemption of air carriers.

Air carriers are hereby exempted from the filing requirements of section 412(a) of the Act with respect to any type of agreement listed in § 289.3 of this part, and amendments thereto, and from filing any subsequent amendment to an agreement which was filed prior to the effective date of this part where such filed agreement and the amendment qualify for an exemption under this part; except that such exemption does not apply to an agreement or an amendment to an agreement that:

(a) Is between "affiliated" carriers within the meaning of that term as it is used in Part 261 of this subchapter; or

(b) Amends an existing agreement which itself is ineligible for exemption under this part; or

(c) Is a resolution or similar action of the members of an association of air carriers; or

(d) Is violative of the "anti-trust laws" as that term is defined in section 1 of the Clayton Act, 15 U.S.C. 12.

§ 289.4 [Redesignation]

4. By redesignating present § 289.3 as § 289.4.

5. By adding a new § 289.3 to read:

§ 289.3 Types of agreements which need not be filed.

(a) *Ground services and facilities.* Agreements between certificated route air carriers, or between any such air carrier(s) and any foreign air carrier(s), for the furnishing of ground facilities, ground equipment, ground service, or building or ground space: *Provided*, That the fees or charges therefor are known or anticipated not to exceed $50,000 during any twelve-month period: *And, provided further*, That in case the aggregate annual charge under an agreement believed to fall within this exemption at the time of execution thereof exceeds the dollar limitation in any twelve-month period, the carrier shall (1) report promptly the total amount paid, and (2) file the agreement with the Board under section 412(a) of the Act upon request by the Director of the Board's Bureau of Economic Regulation.

(b) *Free or reduced-rate transportation.* Agreements between certificated route air carriers, or between supplemental air carriers, or between certificated route carriers and supplemental carriers, or between any such air carriers and foreign air carriers for the issuance or interchange of free or reduced-rate transportation: *Provided*, That such agreements do not provide for the issuance or interchange of passes for free or reduced-rate transportation other than as described in documents filed pursuant to § 223.6 of Part 223 of this subchapter.

(c) *Pick-up and delivery.* Agreements between certificated route air carriers or indirect air carriers on the one hand and surface motor carriers on the other hand for pick-up and delivery of property: *Provided*, That all of the points named in the agreement and the rates and charges to the public for such service are set forth in tariffs filed by the air carriers with the Board pursuant to Part 221 of this subchapter.

6. By amending the title of the Part to read as set forth above.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324. Interpret or apply secs. 101(3), 412, and 416 (b) of the Act, 72 Stat. 737, 770, 771; 49 U.S.C. 1301, 1382, and 1386)

Chapter III—Federal Aviation Agency

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 61-WA-196]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

Alteration

The purpose of this amendment is to alter the segment of VOR Federal airway No. 1695 between Poughkeepsie, N.Y., and Concord, N.H.

This segment of Victor 1695 is designated via the intersection of the Poughkeepsie VOR 043° and the Concord VOR 231° True radials. Adequate navigational guidance between these facilities is lacking on this segment of Victor 1695. Therefore, action is taken herein to redesignate the segment of Victor 1695 from the Poughkeepsie VOR via the Keene, N.H., VOR to the Concord VOR. This action will retain substantially the present alignment for Victor 1695 and would provide precise navigational guidance on this airway segment.

Since this amendment is minor in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective more than 30 days after publication.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582), the following action is taken:

In the text of § 600.1695 (26 F.R. 1091, 7328), "From the Poughkeepsie, N.Y., VOR via the INT of the Poughkeepsie VOR 043° and the Concord, N.H., VOR 231° radials; Concord VOR;" is deleted and "From the Poughkeepsie, N.Y., VOR via the Keene, N.H., VOR; Concord, N.H., VOR;" is substituted therefor.

This amendment shall become effective 0001 e.s.t., April 5, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on January 31, 1962.

D. D. THOMAS,
Director, Air Traffic Service.

[F.R. Doc. 62-1178; Filed, Feb. 5, 1962; 8:45 a.m.]

[Airspace Docket No. 61-WA-227]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

Revocation of Segment

The purpose of this amendment to § 600.6861 of the regulations of the Administrator is to revoke a segment of VOR Federal airway No. 861.

VOR Federal airway No. 861 is a preferred route extending from Branchville, N.J., to Boston, Mass. Revised air traffic control procedures in the New York terminal area have obviated the requirement for the segment of this airway between Branchville and Poughkeepsie, N.Y. Accordingly, action is taken herein to revoke this airway segment.

Since these amendments impose no additional burden on any person, notice and public procedure hereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, these amendments will become effective more than 30 days after publication.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) the following actions are taken:

In § 600.6861 (26 F.R. 8626) the following changes are made:

1. In the caption "New York, N.Y. (Newark), Metropolitan Area" is deleted and "Poughkeepsie, N.Y.," is substituted therefor.

2. In the text "From the INT of the Sparta, N.J., VOR 300° and the Tannersville, Penn., VORTAC 055° radials; via the Poughkeepsie, N.Y., VOR;" is deleted and "From the Poughkeepsie, N.Y., VOR via the" is substituted therefor.

These amendments shall become effective 0001 e.s.t., April 5, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on January 31, 1962.

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration of Federal Airway and Associated Control Areas

On July 7, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 6106), stating that the Federal Aviation Agency proposed to designate a north alternate to VOR Federal airway No. 120 between Great Falls, Mont., and Lewistown, Mont. It was further stated that the control areas associated with this airway segment would extend upward from 700 feet above the surface to the base of the continental control area, and that separate actions will be initiated on an area basis to implement Amendment 60-21 to Part 60 of the Civil Air Regulations.

The Department of the Air Force offered no objection to the proposed amendment. No other comments were received.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated in the notice, the following actions are taken:

In § 600.6120 (14 CFR 600.6120) the text is amended to read:

§ 600.6120 VOR Federal airway No. 120 (Mullan Pass, Idaho, to Mason City, Iowa).

From the Mullan Pass, Idaho, VOR via the Great Falls, Mont., VOR; Lewistown, Mont., VOR, including a N alternate via the INT of the Great Falls VOR 074° and the Lewistown VOR 308° radials; Miles City, Mont., VORTAC; Dupree, S. Dak., VORTAC; Pierre, S. Dak., VOR; Sioux Falls, S. Dak., VORTAC; to the Mason City, Iowa, VORTAC.

In § 601.6120 (14 CFR 601.6120) the text is amended to read:

§ 601.6120 VOR Federal airway No. 120 control areas (Mullan Pass, Idaho, to Mason City, Iowa).

All of VOR Federal airway No. 120 including a N alternate.

These amendments shall become effective 0001 e.s.t., April 5, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on January 31, 1962.

Director, Air Traffic Service.

[Airspace Docket No. 61-WA-16]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration of Federal Airway and Associated Control Areas

On March 10, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 2093), stating that the Federal Aviation Agency proposed to designate a low altitude VOR Federal airway from Princeton, Maine, to Millinocket, Maine, and to designate the control areas associated with this airway segment to extend upward from 1,200 feet above the surface. The Air Transport Association of America concurred with the proposed amendment. The Air Line Pilots Association and the Department of the Air Force offered no objections. The Department of the Navy suggested that the floor of the control areas associated with the proposed airway segment be established at 1,500 feet above terrain in lieu of 1,200 feet as proposed in the Notice.

On September 30, 1961, a supplemental notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 9242), stating that the Federal Aviation Agency determined that application of Amendment 60-21 to Part 60 of the Civil Air Regulations to the control areas associated with this airway segment should be deferred until such time as all control areas in the vicinity of Princeton and Millinocket can be altered by applying Amendment 60-21. Accordingly, it was proposed to designate the control areas associated with this airway segment to extend upward from 700 feet above the surface to the base of the continental control area.

The Director of Aeronautics, Massachusetts Aeronautics Commission, in commenting on the Supplemental Notice requested that Amendment 60-21 be applied to the airway segment as proposed in the notice. No other comments were received regarding the supplemental notice.

The proposed airway segment would extend approximately 43 miles between Millinocket and Princeton. Only 13 miles of this airway segment would be outside of presently designated controlled airspace, the floor of which is 700 feet above the surface. If Amendment 60-21 were applied to the control areas associated with this airway segment, it would result in approximately 30 miles of dual designated controlled airspace with floors of both 700 feet and 1,200 feet above the surface. This, in turn, would only tend to confuse the pilot attempting to operate in this area.

This airway segment will be an extension of Victor 314 which is presently designated between Princeton and St. John, New Brunswick, Canada.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated herein and in the notice and supplemental notice, the following actions are taken:

1. Section 600.6314 (26 F.R. 2679) is amended to read:

§ 600.6314 VOR Federal airway No. 314 (Millinocket, Maine, to St. John, New Brunswick, Canada).

From the Millinocket, Maine, VOR via the Princeton, Maine, VOR; to the St. John, New Brunswick, Canada, VOR, excluding the portion which lies outside the United States.

2. Section 601.6314 (26 F.R. 2679) is amended to read:

§ 601.6314 VOR Federal airway No. 314 control areas (Millinocket, Maine, to St. John, New Brunswick, Canada).

All of VOR Federal airway No. 314.

These amendments shall become effective 0001 e.s.t., April 5, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on January 31, 1962.

D. D. THOMAS,
Director, Air Traffic Service.

MISCELLANEOUS AMENDMENTS TO CHAPTER

The following miscellaneous amendments have been made to this chapter:

SUBCHAPTER C—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

Subpart A—Eligibility Requirements

In § 203.4 paragraph (b) is amended to read as follows:

§ 203.4 Approval of other institutions.

* * * * *

(b) *Special requirements applicable to supervised institutions.* (1) To obtain approval a mortgagee shall meet the following requirements:

(i) The mortgagee shall be subject to the inspection and supervision of a governmental agency which is required by law to make periodic examinations of the mortgagee's books and accounts; and

(ii) The mortgagee shall submit satisfactory evidence that it has sound capital funds of a value not less than $100,000 or, if a mutual company or association without capital funds, that it has a net worth of not less than $100,000.

(2) Mortgagees approved prior to January 31, 1962, shall be required, within a period of time to be prescribed by the Commissioner, to increase their capital funds or net worth to not less than $100,000.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709)

SUBCHAPTER F—URBAN RENEWAL HOUSING INSURANCE AND INSURED IMPROVEMENT LOANS

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

In Part 220 in the Table of Contents a new § 220.616 is added, former § 220.616 is redesignated as § 220.618 and § 220.620 through 220.625 and § 220.631 are revoked as follows:

Sec.
220.616 Cost certification requirements—loans $40,000 or less.
220.618 Cost certification requirements—loans over $40,000.
220.620 through 220.625 [Revoked].
220.631 [Revoked].

In § 220.125 new paragraphs (d), (e), and (f) are added as follows:

§ 220.125 Cost certification requirements.

* * * * *

(d) Any agreement, undertaking statement or certification required in connection with cost certification shall specifically state that it has been made, presented and delivered for the purpose of influencing an official action of the Commissioner and may be relied upon as a true statement of the facts contained therein.

(e) Upon the Commissioner's approval of the borrower's certification, such certification shall be final and incontestable except for fraud or material misrepresentation on the part of the borrower.

(f) The borrower shall keep and maintain adequate records of all costs of any construction improvements or other cost items not representing work under the general contract and shall require the builder to keep similar records and, upon request by the Commissioner, shall make available for examination such records, including any collateral agreements.

In § 220.612 a new paragraph (c) is added as follows:

§ 220.612 Assurance of completion.

* * * * *

(c) An irrevocable letter of credit acceptable to the Commissioner and the mortgagee which is issued by an institution satisfactory to them in an amount at least equal to 10 percent of the estimated cost of construction of the project improvements.

In Part 220 a new § 220.616 is added as follows:

§ 220.616 Cost certification requirements—loans $40,000 or less.

When the principal amount of the loan is $40,000 or less the following provisions shall apply:

(a) *Certification agreement.* The lender shall submit with the application for commitment an agreement on a form prescribed by the Commissioner, executed by the borrower and the lender, in which:

(1) The borrower agrees to execute, upon completion of the improvements, a certificate of the actual cost of the improvements.

(2) The borrower and the lender agree that if the actual cost of the improvements is less than the amount authorized in the commitment, the amount of the loan shall not exceed the actual cost of the improvements, and that the amount of the loan shall be further adjusted to the lowest $50 multiple where the amount is not in excess of $10,000, or adjusted to the lowest $100 multiple where the amount exceeds $10,000.

(b) *Certificate and adjustment.* No loan shall be insured unless in accordance with the agreement between the borrower and the lender.

(1) The required certification of actual cost is made by the borrower; and

(2) The amount of the loan is adjusted to reflect the actual cost of the improvements.

(c) *Cost computation.* The term "actual cost of the improvements" shall mean the cost to the borrower of the improvements, after deducting the amount of any kickbacks, rebates, or trade discount received in connection with the improvements, and including:

(1) The amounts paid under any contract for the improvements, labor, materials, and for any other items of expense approved by the Commissioner; and

(2) A reasonable allowance for contractor's profit, in an amount approved by the Commissioner, where the Commissioner determines that there is an identity of interest between the borrower and the contractor.

§§ 220.616—220.625, 220.631 [Revocation].

In Part 220 §§ 220.616 through 220.625 and § 220.631 are revoked.

§ 220.618 Cost certification requirements—loans over $40,000.

When the principal amount of the loan is over $40,000 the following provisions shall apply:

(a) *Certification of cost requirements.* Prior to initial endorsement of the loan for insurance, the borrower, the lender and the Commissioner shall enter into an agreement approved by the Commissioner for the purpose of precluding any excess of loan proceeds over the actual cost of the improvements to the project. Under this agreement the borrower shall agree to:

(1) Disclose its relationship with the builder, including any collateral agreement, and with subcontractors and suppliers;

(2) Enter into a construction contract the terms of which shall depend on whether or not there exists an identity of interest between the borrower and the builder;

(3) Execute a certificate of actual costs upon completion of the improvements; and

(4) Apply any excess of loan proceeds over the actual cost to the borrower of the improvements in reduction of the outstanding balance of the principal of the loan.

(b) *Form of contract.* The form of contract between the borrower and the builder shall be in accordance with the following:

(1) *Lump sum contract.* If the Commissioner determines that neither the borrower nor any of the officers, directors or stockholders of the borrower have any interest in the builder or contractor, there may be used a lump sum contract providing for payment of a specified amount.

(2) *Fixed fee contract.* If the Commissioner determines that the borrower, its officers, directors or stockholders have any interest, financial or otherwise in the builder or contractor, the form of contract shall provide for payment of the actual cost of construction not to exceed an upset price and may provide for payment of a builder's fixed fee not exceeding a reasonable allowance as established by the Commissioner in accordance with customary practices in the area.

(c) *Certificates as to subcontracts.* If the Commissioner determines that the borrower, its officers, directors or stockholders have any interest, financial or otherwise, in any subcontractor or material supplier, the borrower shall certify in form prescribed by the Commissioner, prior to final endorsement of the loan for insurance, that the amounts paid to such subcontractor or material supplier were not more than the rate prevailing in the locality for similar type of labor and materials.

(d) *Certificate of actual cost.* The borrower's certificate of actual cost, in form prescribed by the Commissioner, shall be submitted upon completion of the physical improvements to the satisfaction of the Commissioner and prior to final endorsement and shall show the actual cost to the borrower of:

(1) The construction contract, including all costs of construction under a lump sum contract, after deduction of any kickbacks, rebates, trade discounts, or other similar payments to the borrower corporation, or to any of its officers, directors or stockholders;

(2) Architect's fees;

(3) Off-site public utilities and streets not included in the general contract;

(4) Organizational and legal work; and

(5) Other items of expense approved by the Commissioner.

(e) *Fixed fee contract—additional certification.* When the work has been completed under a fixed fee contract, the borrower's certification shall also show:

(1) Allocations of general overhead items as are acceptable to the Commissioner; and

(2) A reasonable allowance for the builder's profit as established by the Commissioner.

(f) *Contractor's certification—fixed fee contract.* A contractor receiving a fixed fee shall certify in form prescribed by the Commissioner as to all actual costs paid for labor, materials, and subcontract work under the general contract exclusive of the builder's fee and less any kickbacks, rebates, trade discounts, or other similar payments to the builder or borrower corporation or any of its officers, directors or stockholders.

(g) *Adjustment resulting from cost certification.* If the principal obligation of the loan exceeds the actual cost to the borrower of the improvement, the loan shall be reduced by the amount of such excess prior to the final endorsement for insurance.

(h) *Certificate of public accountant.* The certificates of actual cost shall be supported by a certificate as to accuracy by an independent Certified Public Accountant or independent public accountant which shall include a statement that the accounts, records and supporting documents have been examined in accordance with generally accepted auditing standards to the extent deemed necessary to verify the actual costs.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 220, 68 Stat. 596, as amended; 12 U.S.C. 1715k)

SUBCHAPTER J—MORTGAGE INSURANCE FOR NURSING HOMES

PART 232—NURSING HOMES MORTGAGE INSURANCE

Section 232.56 is amended by adding a new paragraph (c) to read as follows:

§ 232.56 Assurance of completion.

* * * * *

(c) An irrevocable letter of credit acceptable to the Commissioner and the mortgagee and issued by an institution satisfactory to them.

Section 232.60 is amended to read as follows:

§ 232.60 Escrow for offsite utilities and streets.

The Commissioner may require the deposit with the mortgagee or with an acceptable trustee or escrow agent designated by the mortgagee, under an appropriate agreement, of such cash as may be required for the completion of off-site public utilities and streets. An irrevocable letter of credit acceptable to the Commissioner and the mortgagee and issued by an institution satisfactory to them may be substituted for any cash deposit required by this section.

In § 232.61 paragraph (c) is amended and a new paragraph (d) is added as follows:

§ 232.61 Equity requirements.

* * * * *

(c) *Deposit and use of funds.* Unless other arrangements acceptable to the Commissioner are made, the funds referred to in paragraphs (a) and (b) of this section shall be deposited with and held by the mortgagee in a special account or by an acceptable depository designated by the mortgagee under an appropriate agreement approved by the Commissioner.

(d) *Letter of credit.* An irrevocable letter of credit acceptable to the Commissioner and the mortgagee and issued by an institution satisfactory to them may be substituted for any cash deposit required by paragraph (a) or by subparagraph (b)(2) of this section.

[BDSA Order M-11A, Revised Schedule A of February 1, 1962]

M-11A—COPPER AND COPPER-BASE ALLOYS

Revision of Schedule A—Set-Aside Percentages

This amendment of Schedule A to BDSA Order M-11A is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this order, there was consultation with industry representatives, including trade association representatives, and consideration was given to their recommendations.

This amendment makes changes in Revised Schedule A of August 15, 1957, to BDSA Order M-11A, as amended December 18, 1956. It applies to authorized controlled material orders calling for delivery after March 31, 1962, and provides for a new base period for the determination of average shipments against which set-aside percentages are to be applied. Set-aside percentages for copper controlled material products are also revised.

Schedule A to BDSA Order M-11A is hereby further amended to read as follows:

SCHEDULE A TO BDSA ORDER M-11A

Set-aside Percentages

(See sec. 6(f) of BDSA Order M-11A)

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 33—SPORT FISHING

Wildlife Refuges in Florida and South Carolina

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

FLORIDA

ST. MARKS NATIONAL WILDLIFE REFUGE

Sport fishing on the St. Marks National Wildlife Refuge, Florida, is permitted only on the areas designated by signs as open to fishing. This open area, comprising 44,000 acres or 80 percent of the total area of the refuge, is delineated on a map available at the refuge headquarters and from the office of the Regional Dirctor, Bureau of Sport Fisheries and Wildlife, Peachtree-Seventh Building, Atlanta 23, Georgia. Sport fishing is subject to the following conditions:

(a) Species permitted to be taken: Largemouth bass, bream, pickerel, and other minor species permitted by State regulations.

(b) Open season: St. Marks and Wakulla Units, May 1, 1962, through October 15, 1962. Certain described areas of the Panacea unit north of State Highway No. 372, March 1 through October 15, 1962. The Panacea unit area south of State Highway No. 372, February 1 through December 31, 1962. One hour before sunrise to one hour after sunset.

(c) Daily creel limits: Largemouth bass, 10; Bream, 35; Pickerel, 15; other creel limits for minor species are as prescribed for State regulations.

(d) Methods of fishing. (1) Pole and line, rod and reel, artificial and live baits permitted.

(2) Row boats, canoes, and other floating devices without motors permitted. Boats must be removed from the refuge at the close of each days legal fishing hours.

(3) Trot lines as permitted by the State for sport fishing are allowed, except that lines shall be taken up prior to closing hour of fishing daily.

(e) Other provisions. (1) The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33.

(2) A Federal permit is not required to enter the public fishing area.

(3) The provisions of this special regulation are effective to January 1, 1963.

SOUTH CAROLINA

CAROLINA SANDHILLS NATIONAL WILDLIFE REFUGE

The special regulation permitting sport fishing on the Carolina Sandhills National Wildlife Refuge, South Carolina, § 33.5, published December 20, 1961, in the FEDERAL REGISTER, Volume 26, Number 244, Page 1277 is amended as follows: Black bass, 10; game fish other than bass, 25.

The provisions of this amended special regulation are effective to December 1, 1962.

F. C. GILLETT,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

Proposed Rule Making

FEDERAL AVIATION AGENCY

[14 CFR Part 20]

[Reg. Docket No. 1050; Draft Release No. 62-4]

PILOT AND INSTRUCTOR CERTIFICATES

Relocate Requirement for Dual Instrument Instruction Before Solo From Private Pilot Experience Requirements to Presolo Requirements

Pursuant to the authority delegated to me by the Administrator (14 CFR 405.27), notice is hereby given that there is under consideration a proposal to amend Part 20 of the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted, preferably in duplicate, to the Docket Section of the Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. All communications received on or before April 9, 1962, will be considered by the Administrator before taking action on the proposed rules. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Docket Section for examination by interested persons when the prescribed date for return of comments has expired.

Section 20.34 of the Civil Air Regulations prescribes the aeronautical experience required for an applicant for a private pilot certificate. Paragraph (d) of this section specifies that an applicant shall have had flight instruction by reference to instruments, integrated with the dual flight instruction in primary flight maneuvers given before and after solo. This requirement was adopted through Amendment 20-12 to Part 20 of the Civil Air Regulations which was made effective on March 16, 1960. The preamble to the amendment states its objectives, and concludes that the changes constitute part of the Agency's program to improve the competence of the student pilot as well as the private pilot.

One of the primary objectives expressed was that of applying the knowledge gained through research in primary flight training conducted at West Virginia University. This research demonstrated that students who learn to observe and use flight instruments from the beginning of their flight training are much more proficient in holding attitude, altitude, headings, and airspeeds in normal VFR flight. Later observations by inspectors of the Agency have verified the effectiveness of the program in this respect.

However, the intent of applying the benefits of this program to improve the competence of student pilots is not technically carried out by relating the presolo phase of integrated instrument instruction to private pilot requirements.

It is therefore proposed to make presolo dual instrument instruction a prerequisite for a student pilot solo flight in an airplane within § 20.23 instead of a prerequisite for obtaining a private pilot certificate under § 20.34. This change will better carry out the objective expressed in the preamble to Civil Air Regulations Amendment 20-12.

The changes proposed in § 20.23 would require redesignation of the text in the present section as paragraph (a) and the redesignation of the present paragraphs as subparagraphs. These changes are required so that a new paragraph may be added to the section. This new paragraph (b), gives information about who may give dual instrument flight instruction, and the equipment required; which was previously contained in § 20.34(d). In addition to this new paragraph, the other proposed change in text in § 20.23 is in paragraph (a)(2), which corresponds to present paragraph (b). This change would add a requirement for dual instrument flight instruction to the presolo requirements currently specified. In addition, certain minor editorial corrections have been made in the section. Since the directions for these changes and redesignations would be complicated, the entire section is being repeated in the proposed amendment.

Section 20.34 would be amended by deleting paragraphs (d) and (e) and adding a new paragraph (d). In addition to the material previously included in parargaph (e), this new paragraph will specify the dual flight instruction required after the first solo cross-country flight as a prerequisite for a private pilot certificate.

These changes will not affect the present reference in § 20.34-1 to § 20.34(d). The latter paragraph was added by Civil Air Regulations Amendment 20-12, effective March 16, 1960, without changing the reference in § 20.34-1, which after such date should properly have been to § 20.34(e).

In consideration of the foregoing, it is proposed to amend Part 20 of the Civil Air Regulations (14 CFR Part 20) as follows:

1. By amending § 20.23 to read as follows:

§ 20.23 Requirements for solo flight.

(a) A student pilot may not operate an airplane in solo flight until:

(1) He is familiar with the general and visual flight rules of Part 60 of this chapter (Civil Air Regulations);

(2) He has received dual instruction in such preparatory and flight procedures as preflight inspection, starting, warming up, operating, and stopping the engine; taxiing, takeoffs, landings, and parking; traffic pattern procedures; level flight, turns, climbs, and glides, both by visual reference outside the airplane and solely by reference to instruments; and stalls and emergency landings; and

(3) His student pilot certificate has been endorsed by an appropriately rated flight instructor who has examined him and found him to have complied with the provisions of subparagraphs (1) and (2) of this paragraph and otherwise to be competent to make solo flights.

(b) The dual instruction in the control of an airplane solely by reference to instruments, required by paragraph (a)(2) of this section, shall be given by the holder of a flight instructor certificate with an airplane rating. The airplane shall be equipped with at least a sensitive altimeter, a turn-and-bank indicator, and a means for simulating instrument flight conditions.

2. By amending § 20.34 by deleting paragraphs (d) and (e) and adding a new paragraph (d) to read as follows:

§ 20.34 Aeronautical experience.

* * * * *

(d) Three hours of dual instruction after the first solo cross-country flight, which shall include a review of the procedures and maneuvers previously learned, and additional instruction in preparation for the private pilot flight test, including control of the airplane solely by reference to instruments. The dual instruction in the control of the airplane, solely by reference to instruments, shall be given in accordance with the requirements of § 20.23(b).

(Secs. 313(a), 601, 602; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1422)

Issued in Washington, D.C., on January 29, 1962.

MAGNETIC MATERIALS

Notice of Proposed Rule Making

Pursuant to the authority delegated to me by the Administrator (14 CFR 405.27), notice is hereby given that there is under consideration a proposal to amend Part 49 of the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Docket Section of the Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25,

D.C. All communications received on or before April 9, 1962, will be considered by the Administrator before taking action on the proposed rules. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Docket Section for examination by interested persons when the prescribed date for return of comments has expired.

Explosives and other dangerous articles defined by Part 49 of the Civil Air Regulations do not include magnetic materials. Air shipments of magnets and magnetic devices can adversely influence the accuracy of magnetic compasses and devices unless they are properly packed and kept at a safe distance from the aircraft's compass. In order to safeguard the navigation of aircraft, it is necessary to require the shippers of magnetic materials to clearly mark packages containing magnetic materials and where possible install the keeper bar on permanent magnets. The identification marking of such packages will alert operators of aircraft to arrange their stowage at a location where they will not interfere with the navigational equipment of the aircraft.

In consideration of the foregoing, it is proposed to amend Part 49 of the Civil Air Regulations as follows:

§ 49.1 [Amendment]

1. By amending § 49.1(a) by adding between the words "articles" and "shall" the phrase ", or any other articles specifically regulated by the rules of this part,".

2. By adding a new § 49.16 to read as follows:

§ 49.16 Packing and marking requirements for magnetic materials.

No shipper shall offer magnetic materials for shipment by air unless:

(a) The outside package has been plainly marked "Magnetic Materials";

(b) Magnets or magnetic devices such as magnetrons and light meters have been packed so that the polarities of the individual units oppose one another; and

(c) Permanent magnets, where possible, have the keeper bar installed. No other certification, labeling, or quantity limitations are prescribed for the shipment of magnetic materials by the provisions of this part.

3. By amending § 49.21 by adding a new paragraph (d) to read as follows:

§ 49.21 Cargo location.

• • • • •

(d) Magnetic materials shall not be loaded on the aircraft in the vicinity of the magnetic compasses or compass master units which are a part of the instrument equipment of the aircraft so as to affect their operation. If it is not possible to meet this requirement a special aircraft swing and compass calibration shall be made.

These amendments are proposed under the authority of sections 313(a), 601, 604, 902 of the Federal Aviation Act of 1958 (72 Stat. 752, 775, 778, 784; 49 U.S.C. 1354(a), 1421, 1424, 1472).

Issued in Washington, D.C., on January 29, 1962.

GEORGE C. PRILL,
Director, Flight Standards Service.

FEDERAL AIRWAYS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 600.6210 of the regulations of the Administrator, the substance of which is stated below.

Low altitude VOR Federal airway No. 210 is designated in part from the Farmington, N. Mex., VORTAC via the intersection of the Farmington VORTAC 090° and the Alamosa, Colo., VOR 232° True radials (Horse Lake Intersection) to the Alamosa VOR. The Federal Aviation Agency has under consideration the alteration of this segment of Victor 210 by realigning it from the Farmington VORTAC via the intersection of the Farmington VORTAC 086° and the Alamosa VOR 232° True radials; to the Alamosa VOR. This would provide a lower minimum en route altitude and result in the acquisition of an additional cardinal altitude between Farmington and Horse Lake.

The control areas associated with this segment of Victor 210 are so designated that they would automatically conform to the altered airway. The vertical extent of these control areas would remain as designated pending review of the adjacent airspace. Separate action will be initiated to implement on an area basis Amendment 60-21 to Part 60 of the Civil Air Regulations.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 30, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

CONTROLLED AIRSPACE

Proposed Designation of Control Zone

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to Part 601 of the regulations of the Administrator, the substance of which is stated below.

The Federal Aviation Agency has under consideration designation of a control zone at Morristown, N.J. The proposed control zone would be designated from 0700 to 2300 hours local standard time, daily, within a 5-mile radius of the Morristown Airport (latitude 40°47'50" N., longitude 74°25'05" W.); within 2 miles either side of a line bearing 227° True from the Chatham, N.J., radio beacon extending from the 5-mile radius zone to 8 miles southwest of the radio beacon, and within 2 miles either side of a line bearing 248° True from the Chatham radio beacon extending from the radio beacon to 4 miles southwest of the radio beacon, excluding the portion lying within a one-mile radius of the Hanover, N.J., Airport (latitude 40°50'20" N., longitude 74°20'45" W.). This control zone would provide protection for aircraft executing prescribed instrument approach and departure procedures at the Morristown Airport. Communications and weather reporting service would be provided to aircraft operating within the proposed control zone by the Federal Aviation Agency control tower scheduled to be commissioned at Morristown Airport approximately February 1, 1962.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Eastern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, New York International Airport, Jamaica 30, N.Y. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on January 30, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

AIRCRAFT AND MISSILE EQUIPMENT INDUSTRIES

Notice of Hearing on Definition as Small Business

Notice is hereby given that the Small Business Administration proposes to hold a hearing on the definitions of small business for manufacturers and distributors of aircraft and missile equipment for the purpose of Government procurement. In addition to consideration of the definition of small business for the industries, comments will be accepted concerning their application to subcontractors on Government contracts.

The hearing will take place February 27, 1962, at 10:00 a.m., e.s.t., in Room 1143, 811 Vermont Avenue NW., Washington 25, D.C.

Interested persons may file with the Director, Office of Small Business Size Standards on or before February 22, 1962, written statements of facts, opinions, or arguments concerning the appropriate definitions of small business for manufacturers and distributors of aircraft and/or missile equipment and their use in carrying out the Government procurement subcontracting program. Those persons who wish to make oral statements should notify the Director in writing setting forth the name and title (if any) of the persons who will appear and whom they represent.

All correspondence on this matter shall be addressed to:

Samuel S. Solomon, Director,
Office of Small Business Size Standards,
Small Business Administration,
Washington 25, D.C.

There is no specific definition of small business manufacturers for the missile equipment industry. In such cases the general 500 employee rule is used.

The present definition of small business manufacturers of aircraft equipment for the purpose of Government procurement is a concern that (1) is independently owned and operated, (2) is not dominant in its field of operation, and (3) with its affiliates employs not more than 500 persons, or 1,000 persons for the purpose of bidding on the aircraft equipment set forth below:

(i) Airframes and structural components.
(ii) Aircraft propellers and hubs.
(iii) Wheel and brake systems.
(iv) Jet engines.
(v) Fuel tanks.
(vi) Aircraft hydraulic systems.
(vii) Aircraft vacuum systems.
(viii) Aircraft air-conditioning.
(ix) Heating and pressurizing equipment.
(x) Fire control systems.
(xi) Flight instruments.
(xii) Flight simulators (except small cockpit trainers).
(xiii) Aircraft deicing systems.

The present definition of small business distributors (nonmanufacturers) of aircraft and/or missile equipment for the purpose of Government procurement is a concern which (1) employs 500 persons or less, and (2) supplies the products of small business manufacturers which products have been manufactured or produced in the United States.

Dated: January 26, 1962.

JOHN E. HORNE,
Administrator.

Notice of Proposed Withdrawal and Reservation of Lands

JANUARY 29, 1962.

The Bureau of Sports Fisheries and Wildlife has filed an application, Serial Number Idaho 012996 for the withdrawal of the lands described below, from all forms of appropriation under the public land laws including the mining laws, except the mineral leasing laws and the disposal of materials under the Materials Act of July 31, 1947. The applicant desires the land for The Upper Blackfoot Wildlife Management Area to be administered as a wildlife refuge, public shooting grounds, or game management area. For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, P.O. Box 2237, Boise, Idaho.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

ATOMIC ENERGY COMMISSION

[Docket No. 50-141]

BOARD OF TRUSTEES OF THE LELAND STANFORD JUNIOR UNIVERSITY

Notice of Issuance of Utilization Facility License Amendment

Please take notice that the Atomic Energy Commission has issued Amendment No. 3, set forth below, to Facility License No. R-60, as amended. The license authorizes The Board of Trustees of the Leland Stanford Junior University to operate the pool-type research reactor located on the Stanford University's campus near Palo Alto, California. The amendment incorporates into the license (1) certain changes in the neutron source description and its manipulation in connection with operation of the reactor, and (2) a revised description of the interlocks which are operative during safety blade withdrawal, as described in the applications for license amendment dated October 31, 1961, and January 18, 1962. The Commission has found that the conduct of the proposed activities in accordance with License No. R-60, as amended, will not present undue hazard to the health and safety of the public and will not be inimical to the common defense and security.

The Commission has further found that prior public notice of proposed issuance of this amendment is not necessary in the public interest since the operation of the reactor in accordance with the terms of the license, as amended, does not present any substantial change in the hazards to the health and safety of the public from those previously considered and evaluated in connection with the previously approved operation of the reactor.

In accordance with § 2.102(a) of the Commission's rules of practice (10 CFR Part 2) the Commission will direct the holding of a formal hearing on the matter of issuance of the license amendment upon receipt of a request therefor from the licensee or a petition to intervene pursuant to § 2.705 of the rules of practice within 30 days after the issuance of the license amendment. Petitions for leave to intervene and requests for a formal hearing shall be filed in accordance with the provisions of § 2.700 of the Commission's rules of practice (10 CFR Part 2).

For further details see (a) the applications for amendment submitted by Stanford University dated October 31, 1961, and January 18, 1962, and (b) a related hazards analysis prepared by the Research & Power Reactor Safety Branch of the Division of Licensing and Regulation, both available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. A copy of item (b) above may be obtained at the Commission's Public Document Room, or upon request addressed to the Atomic Energy Commission, Washington 25, D.C., Attention: Director, Division of Licensing and Regulation.

Dated at Germantown, Md., this 30th day of January 1962.

For the Atomic Energy Commission.

ROBERT H. BRYAN,
Chief, Research and Power Reactor Safety Branch, Division of Licensing and Regulation.

[License No. R-60; Amdt. No. 3]

Paragraph 1 of License No. R-60 issued to The Board of Trustees of the Leland Stanford Junior University is hereby amended to read as follows:

1. This license applies to the pool-type heterogeneous, light water-moderated and -reflected training and research reactor (hereinafter referred to as "the reactor") which is owned by the applicant, is located on Stanford University's campus near Palo Alto, Calif., and is described in the application for license dated June 11, 1959, and amendments thereto dated August 21, 1959, January 31, 1961, April 17, 1961, October 31, 1961, and January 18, 1962 (hereinafter collectively referred to as "the application").

This amendment is effective as of the date of issuance.

Date of issuance: January 30, 1962.

For the Atomic Energy Commission.

ROBERT H. BRYAN,
Chief, Research and Power Reactor Safety Branch, Division of Licensing and Regulation.

[Project No. 2082]

PACIFIC POWER & LIGHT CO.

Order Fixing Hearing and Prescribing Procedure

JANUARY 30, 1962.

On August 21, 1961, the State of California, acting by and through its Department of Fish and Game, filed a petition requesting that the Commission prescribe a fish hatchery and appurtenant facilities, pursuant to Article 49 of the license for Project No. 2082, for the incubation of fish eggs, for raising the fish thus hatched, and for stocking the same in the Klamath River in order to maintain or continue normal runs of salmon and steelhead which would be displaced or affected by the Iron Gate development of Pacific Power & Light Company, Licensee for Project No. 2082. Article 49 of the license for Project No. 2082 reads as follows:

Article 49. The Licensee shall construct, maintain, and operate or shall arrange for the construction, maintenance, and operation of artificial propagation facilities and such other permanent fish facilities and protective devices including, but not limited to, fish-hauling trucks, fish screens or ladders, and comply with such reasonable modifications in project structures and operation in the interest of fish life as may be prescribed hereafter by the Commission upon the recommendation of the Secretary of the Interior and the California Department of Fish and Game, after notice and opportunity for hearing.

An answer to the petition was filed by the Licensee on September 13, 1961. In its answer, Licensee denies that a hatchery or any fish rearing facilities are necessary, appropriate, proper or incidental to the Iron Gate development for the purposes related in said petition, or otherwise, including a denial that any such fish facilities are necessary, appropriate, or proper for the maintenance or continuation of normal runs of anadromous fish in the Klamath River.

The Department of Fish and Game and the Licensee have requested a hearing on the issues presented. The procedures hereinafter prescribed are intended to eliminate any cause which might otherwise exist for a protracted hearing: By requiring that the respective parties submit in advance of the hearing relevant facts in support of their respective positions; and by providing for motions to strike improperly prepared testimony, including conclusions and opinions presented without having set forth a proper foundation therefor.

The Commission finds: It is appropriate and in the public interest to hold a public hearing respecting the matters involved and the issues presented, as hereinafter provided.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly section 308 thereof, and the Commission's rules of practice and procedure, a public hearing shall be held on June 4, 1962 at 10 a.m., at the Commission's Regional Office, 555 Battery Street, San Francisco, Calif., respecting the matters involved and issues presented by the aforesaid petition of the Department of Fish and Game and the answer thereto by the Licensee.

(B) The following procedure is prescribed for the public hearing herein ordered:

(1) The Department of Fish and Game of the State of California shall by April 30, 1962, file with the Commission's Secretary an original and ten copies of all of its direct testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Licensee.

(2) The Licensee shall by May 14, 1962, file with the Commission's Secretary, an original and ten copies of all of its testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Department of Fish and Game.

(3) All of the testimony except exhibits, shall be in question and answer form.

(4) No exhibits (except those of which official notice may properly be taken) shall contain narrative material other than brief explanatory notes.

(5) All exhibits (except those of which official notice may properly be taken) shall contain brief and appropriate titles, and the exhibits shall be fully explained in the prepared testimony by the witness or witnesses sponsoring them.

(6) Each witness shall execute an affidavit adopting the testimony for which he assumes responsibility and an original and two conformed copies of such affidavits shall be filed with his prepared testimony.

(7) Any party submitting more than one exhibit shall enclose a cover sheet listing the title of each exhibit in the sequence they wish them to be marked for identification.

(8) Any motions to strike any part of the prepared testimony and exhibits (prior to cross-examination), shall be filed with the Presiding Examiner or Chief Examiner by May 24, 1962; answers thereto shall be filed by May 31, 1962; and rulings on such motions will be made by the Examiner at the time such testimony or exhibits are offered in accordance with subparagraph (9).

(9) Upon the commencement of the hearing and after appearances, opening statements, and other preliminary matters, the exhibits previously filed, as provided above, will be marked for identification in the sequence directed by the Presiding Examiner; and thereafter the Examiner will require that the affidavits of the respective witnesses and their prepared testimony (together with the qualifications of the respective witnesses) previously filed, as provided above, be copied into the record as though read, excepting any part or parts of the prepared testimony with respect to which he may have granted motion to strike.

(10) The Presiding Examiner will specify the order of cross-examination for the information of the parties in making their respective witnesses available for cross-examination.

(C) Requests for extension of time concerning the time for any filings specified herein shall be made in writing, served on all parties and filed with the Presiding Examiner or the Chief Examiner (together with a certificate of service) at least ten days in advance of the dates specified herein (or as may have been extended), and any answers thereto shall be filed with the Presiding Examiner or Chief Examiner within three days after the request for extension.

(D) The Commission's rules of practice and procedure shall apply in this proceeding except to the extent that they are modified or supplemented herein or to the extent that they are further modified or supplemented by the Examiner with the consent of the parties.

By the Commission.

[Project No. 2299]

TURLOCK IRRIGATION DISTRICT, MODESTO IRRIGATION DISTRICT

Order Fixing Hearing and Prescribing Procedure

JANUARY 30, 1962.

The State of California, acting by and through its Department of Fish and Game (Intervener) filed a petition on September 21, 1961, and an amended petition on November 27, 1961, requesting a hearing at which it may submit evidence in support of proposed license provisions for the protection of fish and wildlife resources of the Tuolumne River on which Turlock Irrigation District and Modesto Irrigation District (joint Applicants for license for Project No. 2299) propose to construct, operate and maintain the New Don Pedro project, Project No. 2299.

Several conferences have been held at which representatives of Intervener and the joint Applicants participated. Having been unable to resolve their differences with Intervener, the joint Applicants have also requested a hearing, at the earliest possible date.

The procedures hereinafter prescribed are intended to eliminate any cause which might otherwise exist for a protracted hearing: By requiring that the respective parties submit in advance of the hearing relevant facts in support of their respective positions; and by providing for motions to strike improperly prepared testimony, including conclusions and opinions presented without having set forth a proper foundation therefor.

The Commission finds: It is appropriate and in the public interest to hold a public hearing respecting the matters involved and the issues presented, as hereinafter provided.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly section 308 thereof, and the Commission's rules of practice and procedure, a public hearing shall be held on May 21, 1962 at 10 a.m., at the Commission's Regional Office, 555 Battery Street, San Francisco, Calif., respecting the matters involved and issues presented by the petition to intervene filed July 26, 1961 by the State of California acting by and through its Department of Fish and Game.

(B) The following procedure is prescribed for the public hearing herein ordered:

(1) The Department of Fish and Game of the State of California shall by April 30, 1962, file with the Commission's Secretary an original and ten copies of all of its direct testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Applicants. Copies of license provisions recommended by Intervener shall be filed and served with its prepared direct testimony in support thereof.

(2) The Joint Applicants shall by May 9, 1962, file with the Commission's Secretary, an original and ten copies of all of their testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Department of Fish and Game.

(3) All of the testimony except exhibits, shall be in question and answer form.

(4) No exhibits (except those of which official notice may properly be taken) shall contain narrative material other than brief explanatory notes.

(5) All exhibits (except those of which official notice may properly be taken) shall contain brief and appropriate titles, and the exhibits shall be fully explained in the prepared testimony by the witness or witnesses sponsoring them.

(6) Each witness shall execute an affidavit adopting the testimony for which he assumes responsibility and an original and two conformed copies of such affidavits shall be filed with his prepared testimony.

(7) Any party submitting more than one exhibit shall enclose a cover sheet listing the title of each exhibit in the sequence they wish them to be marked for identification.

(8) Any motions to strike any part of the prepared testimony and exhibits (prior to cross-examination), shall be filed with the Presiding Examiner or Chief Examiner by May 16, 1962; answers thereto shall be filed by May 21, 1962; and rulings on such motions will be made by the Examiner at the time such testimony or exhibits are offered in accordance with subparagraph (9).

(9) Upon the commencement of the hearing and after appearances, opening statements, and other preliminary matters, the exhibits previously filed, as provided above, will be marked for identification in the sequence directed by the Presiding Examiner; and thereafter the Examiner will require that the affidavits of the respective witnesses and their prepared testimony (together with the qualifications of the respective witnesses) previously filed, as provided above, be copied into the record as though read, excepting any part or parts of the prepared testimony with respect to which he may have granted motion to strike.

(10) The Presiding Examiner will specify the order of cross-examination for the information of the parties in making their respective witnesses available for cross-examination.

(C) Requests for extension of time concerning the time for any filings specified herein shall be made in writing, served on all parties and filed with the Presiding Examiner or the Chief Examiner (together with a certificate of service) at least ten days in advance of the dates specified herein (or as may have been extended), and any answers thereto shall be filed with the Presiding Examiner or Chief Examiner within three days after the request for extension.

(D) The Commission's rules of practice and procedure shall apply in this proceeding except to the extent that they are modified or supplemented herein or to the extent that they are further modified or supplemented by the Examiner with the consent of the parties.

Title 3—THE PRESIDENT

Proclamation 3447

EMBARGO ON ALL TRADE WITH CUBA

By the President of the United States of America
A Proclamation

WHEREAS the Eighth Meeting of Consultation of Ministers of Foreign Affairs, Serving as Organ of Consultation in Application of the Inter-American Treaty of Reciprocal Assistance, in its Final Act resolved that the present Government of Cuba is incompatible with the principles and objectives of the Inter-American system; and, in light of the subversive offensive of Sino-Soviet Communism with which the Government of Cuba is publicly aligned, urged the member states to take those steps that they may consider appropriate for their individual and collective self-defense;

WHEREAS the Congress of the United States, in section 620(a) of the Foreign Assistance Act of 1961 (75 Stat. 445), as amended, has authorized the President to establish and maintain an embargo upon all trade between the United States and Cuba; and

WHEREAS the United States, in accordance with its international obligations, is prepared to take all necessary actions to promote national and hemispheric security by isolating the present Government of Cuba and thereby reducing the threat posed by its alignment with the communist powers:

NOW, THEREFORE, I, JOHN F. KENNEDY, President of the United States of America, acting under the authority of section 620(a) of the Foreign Assistance Act of 1961 (75 Stat. 445), as amended, do

1. Hereby proclaim an embargo upon trade between the United States and Cuba in accordance with paragraphs 2 and 3 of this proclamation.

2. Hereby prohibit, effective 12:01 A.M., Eastern Standard Time, February 7, 1962, the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba; and I hereby authorize and direct the Secretary of the Treasury to carry out such prohibition, to make such exceptions thereto, by license or otherwise, as he determines to be consistent with the effective operation of the embargo hereby proclaimed, and to promulgate such rules and regulations as may be necessary to perform such functions.

3. AND FURTHER, I do hereby direct the Secretary of Commerce, under the provisions of the Export Control Act of 1949, as amended (50 U.S.C. App. 2021–2032), to continue to carry out the prohibition of all exports from the United States to Cuba, and I hereby authorize him, under that Act, to continue, make, modify or revoke exceptions from such prohibition.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this third day of February, in the year of our Lord nineteen hundred and sixty-two, and of [SEAL] the Independence of the United States of America the one hundred and eighty-sixth.

JOHN F. KENNEDY

By the President:

DEAN RUSK,
Secretary of State.

Proclamation 3448

IMPORTS OF SHMURAH WHEAT FLOUR FOR RELIGIOUS PURPOSES

By the President of the United States of America
A Proclamation

WHEREAS, pursuant to section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624), the President issued Proclamation No. 2489 of May 28, 1941, which was amended by Proclamation No. 2550 of April 13, 1942, and further amended by Proclamation No. 2584 of April 29, 1943, limiting the quantities of wheat and wheat flour which may be entered or withdrawn from warehouse for consumption; and

WHEREAS certain persons require Shmurah wheat flour in the observance of the Passover holiday, which begins April 19, 1962; and

WHEREAS Shmurah wheat flour is wheat flour that has been thoroughly safeguarded for ritual purposes under rabbinical supervision and which is imported into the United States for use solely for religious and ritual purposes in the making of matzos for Passover; and

WHEREAS the limitations imposed upon the importation of wheat and wheat flour by Proclamation No. 2489, as amended, were never intended to apply to Shmurah wheat flour; and

WHEREAS the estimated quantity of Shmurah wheat flour which would be imported into the United States during any one year would be so insignificant that it could not possibly render or tend to render ineffective, nor materially interfere with, the price-support program undertaken by the Department of Agriculture with respect to wheat; and

WHEREAS it is deemed advisable to clarify the scope of Proclamation No. 2489, as amended, in this respect in order to simplify the administration of the proclamation:

NOW, THEREFORE, I, JOHN F. KENNEDY, President of the United States of America, acting under and by virtue of the authority vested in me by section 22 of the Agricultural Adjustment Act, as amended, do hereby proclaim that the provisions of Proclamation No. 2489, as amended, shall not be deemed to apply to Shmurah wheat flour produced in Israel and entered or withdrawn from warehouse for consumption on and after February 1, 1962: *Provided*, That the written approval of the Secretary of Agriculture or his designated representative is presented at the time of entry or withdrawal from warehouse for consumption. For the purposes of this proclamation "Shmurah wheat flour" means wheat flour which has been thoroughly safeguarded for ritual purposes under rabbinical supervision, as certified to the Secretary of Agriculture by an authorized representative of the government of Israel or its designee, and which is imported into the United States for use solely for religious and ritual purposes in the making of matzos for Passover.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this fifth day of February in the year of our Lord nineteen hundred and sixty-two, and of [SEAL] the Independence of the United States of America the one hundred and eighty-sixth.

JOHN F. KENNEDY

By the President:

DEAN RUSK,
Secretary of State.

Title 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, and Marketing Practices), Department of Agriculture

SUBCHAPTER D—REGULATIONS UNDER THE POULTRY PRODUCTS INSPECTION ACT

PART 81—INSPECTION OF POULTRY AND POULTRY PRODUCTS

Miscellaneous Amendments

Pursuant to the authority conferred by the Poultry Products Inspection Act (21 U.S.C. 451 et seq.), and sections 203 and 205 of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1622, 1624), the regulations governing the inspection of poultry and poultry products (7 CFR Part 81, as amended) are hereby further amended as follows:

§ 81.95 [Amendment]

1. Section 81.95 is amended by adding thereto a new paragraph (d) to read:

(d) (1) The use of chemical additives in or on raw poultry products, other than salt (NaCl) which is added to chilling media in concentrations not in excess of 70 pounds to 10,000 gallons of water as an aid in chilling, shall be permitted only when they are approved by the Administrator, and each unit (whole carcass, disjointed portion, or consumer package thereof) of the poultry product so treated shall be labeled to declare the additive used and the purpose of its use. Notwithstanding the foregoing, the Administrator may authorize the shipment of raw poultry products so labeled only on the shipping container from an official establishment (i) to another official establishment for further processing, packaging and labeling of each unit in accordance with this paragraph and other applicable regulations in this Part, (ii) for sale to institutional users such as hotels and restaurants.

(2) The use of chemical additives, other than basic food stuffs and seasonings, in cooked poultry products shall be permitted only when they are approved by the Administrator. The Administrator may require in addition to listing in the statement of ingredients, a declaration of the additive used and the purpose of its use.

(3) Chemical additives, to be used in the preparation of poultry products, which have not been fully approved by the Administrator prior to the effective date of this amendment, will be approved only if they comply with the following criteria:

(i) The additive shall be safe under the conditions of its intended use.

(ii) The additive shall not promote deception or cause the product to be otherwise adulterated or unwholesome. Scientific data acceptable to the Administrator showing that the additive meets the criteria specified in this paragraph (3) shall be submitted by the person interested in having the additive approved.

§ 81.156 [Amendment]

2. Section 81.156 is amended by adding at the end thereof the following sentence: "However in lieu of such statement the container of imported products shall bear a statement that 'The products contained herein have been approved for importation under P.P.I.A.'"

§ 81.300 [Amendment]

3. In § 81.300 "Alaska" and "Hawaii" are deleted.

§ 81.301 [Amendment]

4. Section 81.301(a) is amended by adding at the end thereof the following: "In determining whether the inspection system of a foreign country is the substantial equivalent of the system maintained by the United States, the Administrator shall review the inspection regulations of the foreign country and make a survey to determine the manner in which the inspection system is administered within the foreign country. The survey of the foreign inspection system may be expedited by payment by the interested Government agency in the foreign country of the travel expenses incurred in making the survey."

§ 81.307 [Amendment]

5. In § 81.307 paragraphs (b) and (c) are deleted.

§ 81.309 [Amendment]

6. In § 81.309(a) the word "and" immediately preceding the figure "(5)" is deleted and the following is added before the period at the end of the paragraph: "; (6) the inspection mark of the country of origin; and (7) the plant number of the establishment at which the product was prepared."

7. Section 81.310 is amended to read:

§ 81.310 Labeling of shipping containers of product for importation.

Shipping containers in which consumer packages of foreign product are shipped to the United States are required to bear in a prominent and legible manner the true name of the product, the name of the country of origin, the plant number of the establishment in which the product was prepared, and the inspection mark of the country of origin. Labeling on shipping containers shall be examined at the time of inspection in the United States and if found to be false or misleading, the product shall be refused.

The amendments in part are intended to prevent the preparation of adulterated or unwholesome products at establishments subject to the Poultry Products Inspection Act and to prevent deception of consumers. For these purposes they establish the procedure and criteria applicable to the approval of chemical additives for use on or in poultry products and specify certain labeling requirements which shall apply to poultry products so treated. Notice of rule-making with respect to this matter was published in the FEDERAL REGISTER and opportunity was afforded interested persons to comment thereon. Due consideration has been given to all comments received and to all other information available to the Agricultural Marketing Service. The amendments are substantially the same as the published proposals in this respect, with the exception that the proposed requirement relating to consumer packaging of poultry products that have been treated with additives has been deleted. However, the provision requiring informative labeling of each unit of product that has been treated is retained. The proposal specifying that an additive must have a beneficial effect on the product as a prerequisite to approval has been deleted as unnecessary. The effect of the additive would obviously have to be considered in determining whether the additive would result in adulteration of the poultry product.

The provisions concerning the approval of foreign poultry inspection systems are intended to clarify existing provisions of the regulations relating to imports and to formalize procedure for payment of survey costs in connection with such approval. The changes in the labeling requirements for products to be imported are needed to identify the products as inspected poultry products. The requirement that the inspection mark of the country of origin be shown on containers is needed to facilitate the movement of imported products in commerce. This is also true of the amendment relating to labeling of shipping containers not bearing marks of inspection.

It does not appear that publication of further notice and other public procedure with respect to the amendments would make additional information available to the Department. It is therefore found under section 4 of the Administrative Procedure Act (5 U.S.C. 1003) that such procedure would be impractical and unnecessary.

The amendments shall become effective 30 days after publication hereof.

Done at Washington, D.C., this 1st day of February 1962.

G. R. GRANGE,
Deputy Administrator,
Marketing Services.

Title 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 6589]

PART 47—DOCUMENTARY STAMP TAXES

On December 24, 1960, notice of proposed rule making with respect to regulations under chapter 34 of the Internal Revenue Code of 1954, as amended, and under those administrative provisions of subtitle F of the Code which have special application to the taxes imposed by such chapter 34 was published in the FEDERAL REGISTER (25 F.R. 13699). The regulations, except where otherwise specifically provided, are applicable in respect of transactions occurring on or after January 1, 1959, and supersede § 148.1–1 of the Regulations on Certain Excise Tax Matters under Excise Tax Technical Changes Act of 1958 (26 CFR 148.1–1). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the regulations as so proposed are hereby adopted, subject to the changes set forth below:

PARAGRAPH 1. Section 47.4301–1 is amended by revising paragraph (b)(1)(ii).

PAR. 2. Section 47.4301–2 is amended by revising paragraph (a)(12).

PAR. 3. Section 47.4302–1 is amended by revising paragraphs (b) and (c).

PAR. 4. Section 47.4311–2 is amended by adding to paragraph (b) a subparagraph (10).

PAR. 5. Section 47.4323–1 is amended by revising paragraph (b).

PAR. 6. Section 47.4341–1 is amended by revising paragraph (a).

PAR. 7. Section 47.4352–1 is amended by revising paragraph (b).

PAR. 8. Section 47.6802–1 is amended by changing the heading of the section, deleting paragraph (b), and redesignating paragraph (c) as (b).

PAR. 9. Section 47.6804–2 is amended.

[SEAL] MORTIMER M. CAPLIN,
Commissioner of Internal Revenue.

Approved: January 31, 1962.

STANLEY S. SURREY,
Assistant Secretary of the Treasury.

The following regulations, relating to documentary stamp taxes, are hereby prescribed under chapter 34 of the Internal Revenue Code of 1954, as amended, and under those administrative provisions of subtitle F of the Code which have special application to the taxes imposed by such chapter 34. The regulations, except where otherwise specifically provided, are applicable in respect of transactions occurring on or after January 1, 1959, and supersede § 148.1–1 of the Regulations on Certain Excise Tax Matters under Excise Tax Technical Changes Act of 1958 (26 CFR 148.1–1).

AUTHORITY: §§ 47.0–1 to 47.7805–1 issued under sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805.

Subpart A—Introductory Provisions

§ 47.0–1 Introduction.

(a) *In general.* The regulations in this part (Part 47, Subchapter D, Chapter I, Title 26 (1954) Code of Federal Regulations) are designated "Documentary Stamp Tax Regulations". The regulations relate to the taxes imposed by chapter 34 of the Internal Revenue Code of 1954, as amended, and to certain related administrative provisions of subtitle F of such Code. Chapter 34 of the Code imposes a tax on the issuance and on the sale or transfer of shares or certificates of stock or certificates of indebtedness, on conveyances of realty, and on policies issued by foreign insurers. References in these regulations to the "Internal Revenue Code" or the "Code" are references to the Internal Revenue Code of 1954, as amended, unless otherwise indicated. References to a section or other provision of law are references to a section or other provision of the Internal Revenue Code, as amended, unless otherwise indicated.

(b) *Division of regulations.* The regulations in this part are divided into 10 subparts. Subpart A contains provisions relating to the arrangement and numbering of the sections of the regulations in this part, general definitions and use of terms, scope of regulations, and the extent to which the regulations in this part supersede prior regulations relating to the excise taxes imposed by chapter 34 of the Internal Revenue Code. The other subparts of the regulations in this part and the subject matter to which they relate are as follows:

Subpart B—Tax on issuance of capital stock and similar interests
Subpart C—Tax on issuance of certificates of indebtedness
Subpart D—Tax on sales or transfers of capital stock and similar interests
Subpart E—Tax on sales or transfers of certificates of indebtedness
Subpart F—Provisions common to sales or transfers of capital stock and certificates of indebtedness
Subpart G—Tax on conveyances
Subpart H—Tax on policies issued by foreign insurers
Subpart I—Miscellaneous provisions applicable to documentary stamp taxes
Subpart J—Administrative provisions applicable to documentary stamp taxes

(c) *Arrangement and numbering.* Each section of the regulations in Subpart B through Subpart J is preceded by the section, subsection, or paragraph of the Internal Revenue Code which it interprets. The sections of the regulations can readily be distinguished from the sections of the Code since—

(1) The sections of the regulations are printed in larger type;

(2) The sections of the regulations are preceded by a section symbol and the part number, arabic numeral 47 followed by a decimal point (§ 47.); and

(3) The sections of the Code are preceded by "Sec.".

Each section of the regulations setting forth law or regulation is designated by a number composed of the part number followed by a decimal point (47.) and the number of the corresponding provision of the Internal Revenue Code. In the case of a section setting forth regulations, this designation is followed by a hyphen (-) and a number identifying such section.

§ 47.0–2 General definitions and use of terms.

(a) *In general.* As used in the regulations in this part, unless otherwise expressly indicated—

(1) The terms defined in the provisions of law contained in the regulations in this part shall have the meanings so assigned to them.

(2) The Internal Revenue Code of 1954 means the Act approved August 16, 1954 (68a Stat.), entitled "An Act to revise the internal revenue laws of the United States", as amended.

(3) District director means district director of internal revenue. The term also includes the Director of International Operations in all cases where the authority to perform the functions which may be performed by a district director has been delegated to the Director of International Operations.

(4) The terms "stamp tax" and "stamp taxes" generally mean any one or all of the stamp taxes which constitute the subject of the regulations in this part.

(5) The term "documentary stamps" means all stamps issued for use in payment of stamp taxes imposed by chapter 34 of the Internal Revenue Code, including stamps issued by authorized meter machines. See § 47.6801–1.

(6) The cross references in the regulations in this part to other portions of the regulations, when the word "see" is used, are made only for convenience and shall be given no legal effect.

(b) *Cross references.* For other definitions, see section 4381, § 47.4381–1, and section 7701 (§ 47.7701).

§ 47.0–3 Scope of regulations.

The regulations in this part relate to the documentary stamp taxes referred to in subparts B through H (see paragraph (b) of § 47.0–1) and, except where otherwise specifically provided, have application to transactions occurring on or after January 1, 1959. The provisions of the Internal Revenue Code set forth in the regulations in this part are, unless otherwise indicated, provisions of law in effect on January 1, 1959.

§ 47.0–4 Extent to which the regulations in this part supersede prior regulations.

The regulations in this part, with respect to the subject matter within the scope thereof, supersede the Documentary Stamp Tax Regulations contained in Part 43 of this chapter.

Subpart B—Tax on Issuance of Capital Stock and Similar Interests

§ 47.4301 Statutory provisions; imposition of tax.

SEC. 4301 *Imposition of tax.* There is hereby imposed, on each original issue of shares or certificates of stock issued by a corporation (whether on organization or reorganization), a tax at the rate of 10 cents on each $100 (or major fraction thereof) of the actual value of the certificates (or of the shares where no certificates are issued); except that such rate shall be 4 cents instead of 10 cents in the case of shares or certificates issued by a corporation to which subchapter M of chapter 1 applies for the taxable year during which such share or certificate is issued. The tax imposed by this section shall be computed on the basis of all certificates (or shares) so issued by the corporation on each day.

[Sec. 4301 as amended and in effect Jan. 1, 1959, and as further amended by Act of Apr. 8, 1960 (Pub. Law 86-416, 74 Stat. 36)]

§ 47.4301–1 Imposition of the tax on original issue of stock.

(a) *Scope of tax*—(1) *In general.* Section 4301 imposes a tax on each original issue of shares or certificates of stock issued by a domestic corporation. See section 4381(b) and paragraph (b) of § 47.4381–1 and section 4381(c) and paragraph (c) of § 47.4381–1, respectively, for definitions of the terms "corporation" and "shares or certificates of stock". In the case of subscriptions, stock is deemed to be issued when the subscription is accepted. The tax applies to each original issue of the shares or certificates, whether upon organization, reorganization, or otherwise, regardless of the purpose of the issue, the person to whom issued, or the time of delivery. Thus, the tax applies to shares or certificates issued in a recapitalization where the recapitalization results in the dedication of an amount as capital for the first time (see § 47.4302–1).

(2) *Original issue.* An original issue of stock means any issue of shares or certificates of stock which reflects in whole or in part the addition of an amount to the capital stock account.

(b) *Rate and computation of tax*—(1) *Rate of tax*—(i) *In general.* Except as otherwise provided in subdivision (ii) of this subparagraph, the rate of tax is 10 cents on each $100 (or major fraction thereof) of the actual value of the cer-

tificates (or of the shares where no certificates are issued).

(ii) *Regulated investment companies.* In the case of shares or certificates issued on or after April 9, 1960, by a corporation to which subchapter M of chapter 1 of the Code applies for the taxable year during which such shares or certificates are issued, the rate of tax is 4 cents on each $100 (or major fraction thereof) of the actual value of the certificates (or of the shares where no certificates are issued). The terms "taxable year" and "regulated investment company" as used in this subdivision, have the same meaning as when used in subchapter M of chapter 1 of the Code and the regulations thereunder. The tax is to be computed at the 4-cent rate in respect of shares or certificates issued by a company which qualified as a regulated investment company for the year immediately preceding the taxable year in which the shares or certificates are issued provided the company intends to elect to be taxed as a regulated investment company for Federal income tax purposes during the year that such shares or certificates are issued. In the case of a newly created company which has filed its notification of registration with the Securities and Exchange Commission pursuant to the provisions of the Investment Company Act of 1940, the 4-cent rate will apply if—

(*a*) The company intends to elect to be taxed as a regulated investment company for Federal income tax purposes, and

(*b*) The company qualifies to be taxed as a regulated investment company for the taxable year.

If tax is computed at the 4-cent rate in respect of shares or certificates issued by a company during a taxable year, such shares or certificates shall be subject to tax at the 10-cent rate if the company fails to qualify as a regulated investment company for such taxable year. If the tax is paid at the 10-cent rate, refund of the difference between the 10-cent and the 4-cent rate is allowable within the applicable period of limitation to the person who paid the tax with respect to shares or certificates issued by a company if it is shown that the company qualified as a regulated investment company for the taxable year during which such shares or certificates were issued. For provisions with respect to period of limitation for filing claims for refund, see section 6511 and the regulations thereunder in Part 301 of this chapter (Regulations on Procedure and Administration).

(iii) *Major fraction.* A major fraction of $100 is any amount in excess of $50 and less than $100.

(2) *Computation of tax*—(i) *In general.* A single computation of tax must be made with respect to the certificates (and shares which are not represented by certificates) issued by a corporation on each day. The amount of tax imposed under section 4301 in respect of shares or certificates issued by a corporation on a particular day is computed by ascertaining the actual value of all certificates (and shares which are not represented by certificates) issued on such day and applying to such actual value the applicable rate of tax.

(ii) *Actual value.* (*a*) In general, the actual value of stock is the fair market value of the stock. Fair market value of stock is considered to be the price agreed upon by the parties to the issuance to be paid for the stock unless the price includes property or services or the issuance transaction is not an arm's length transaction or is subject to special conditions which result in a price not reflecting the value of the stock as such value would be determined by reference to the mean selling price of the stock on the open market or to all the facts and circumstances of the case. In the absence of a price agreed upon by the parties or if the price agreed upon includes property or services, results from a transaction not at arm's length, or is affected by special conditions, the fair market value of each share of stock issued on a particular day shall be considered to be the mean between the high and low selling prices of the stock on the open market for such day. Thus, the price to be paid for stock to be issued by reason of the exercise of a stock option in a case where the option price is less than the mean selling price of the stock on the open market may not be used in ascertaining the value of the stock so issued for the reason that the transaction is subject to special conditions which result in the option price not reflecting the mean selling price of the stock. If the fair market value of the stock cannot be determined by reference to the price of the stock agreed upon by the parties or the mean between the high and low selling prices thereof on the open market, the fair market value shall be determined on the basis of all the facts and circumstances of the particular case.

(*b*) In the case of a unit offering by a corporation, as, for example, a share of stock and a certificate of indebtedness, the fair market value of the stock shall be considered to be the mean between the high and low selling prices of the stock on the open market for the day of issuance if such stock is being traded on the open market other than as a part of such a unit offering. Thus, the actual value and the face value of the certificate of indebtedness are to be disregarded for purposes of determining the value of the stock. If the fair market value of the stock cannot be determined by reference to the mean between the high and low selling prices thereof on the open market, the fair market value shall be determined on the basis of all the facts and circumstances of the particular case. The provisions of this subdivision (*b*) shall have application only to shares or certificates of stock, constituting a part of a unit offering, issued on or after the tenth day following the date of publication of the regulations in this part in the FEDERAL REGISTER.

§ 47.4301–2 Illustrations.

(a) *Issues subject to tax.* The following are examples of issues subject to the tax:

(1) Certificates or shares representing beneficial interests in any organization which is a corporation within the meaning of section 4381(b) or section 7701(a)(3).

(2) Stock issued for property, real or personal, or for the purpose of purchasing a business.

(3) Stock issued by joint-stock land banks.

(4) Stock issued as a dividend. (For limitation of tax, see § 47.4302–1.)

(5) Temporary or interim certificates.

(6) The issue of a fractional share, or a certificate for a fractional share, of stock (see, however, paragraph (b)(6) of this section).

(7) Stock issued upon exercise of a warrant or rights entitling the holder to subscribe for unissued stock (see paragraph (a) of § 47.4321–3).

(8) Stock issued in connection with a consolidation by a consolidated corporation in exchange for stock of the consolidating corporations whether issued directly to the consolidating corporations or to the stockholders of the consolidating corporations (see also paragraph (a)(9) of § 47.4321–2 relating to the imposition of the stock transfer tax where the stock is issued directly to the stockholders). For exemption from tax in respect of issuances of stock to make effective a plan of reorganization or adjustment whereby a mere change in identity, form, or place of organization is affected, see paragraph (d) of § 47.4382–1.

(9) Stock issued in connection with a merger by the continuing corporation whether issued directly to the merging corporation or to the stockholders of the merging corporation (see also paragraph (a)(9) of § 47.4321–2) and stock issued to the stockholders of the continuing corporation in a recapitalization under section 4302 which results in the dedication of an amount as capital which amount is so dedicated for the first time. For exemption from tax in respect of issuances of stock to make effective a plan of reorganization or adjustment whereby a mere change in identity, form, or place of organization is effected, see paragraph (d) of § 47.4382–1.

(10) Stock issued outside the United States by a domestic corporation.

(11) A business property investment certificate, wherein it is certified that the holder thereof is the owner of an interest in certain specified property, legal title to which has been previously conveyed to a trustee, and whereby the issuing corporation agrees to manage the property and distribute the proceeds.

(12) Stock issued where the capital stock account, although not increased at the time of such issuance, was previously increased by a dedication of an amount as capital for the first time which was not accompanied by an issuance of shares or certificates of stock and with respect to which there has been no other issuance of shares or certificates of stock. (For limitation of tax, see § 47.4302–1.)

(b) *Issues not subject to tax.* In addition to the various issues specifically exempted under sections 4382 and 4383,

the following are examples of issues not subject to the tax:

(1) The issue of warrants or rights to subscribe for unissued stock (see, however, § 47.4321–3).

(2) The issue of certificates of stock in exchange for outstanding certificates representing the same stock as, for instance, to reflect a change in the name of the issuing corporation or to secure several certificates for one certificate, or vice versa.

(3) The issue of voting-trust certificates.

(4) The issue of definitive certificates of stock in exchange for temporary or interim certificates upon the issuance of which the tax has been paid.

(5) The issue of stock in a recapitalization or reorganization where there is no dedication of additional capital, either by transfer of earned surplus or otherwise (see, however, paragraph (b) of § 47.4302–1).

(6) Stock issued on the surrender of fractional shares or certificates for fractional shares of stock (see, however, paragraph (a)(6) of this section).

(7) The issue in the United States of stock of a foreign corporation.

(8) The issue of stock to effect a mere split in outstanding shares without any increase in the issuing corporation's capital stock account. See, however, paragraph (a)(12) of this section.

(9) The issue of one type of stock for another type of stock and in which the new stock does not reflect the addition of an amount to the capital stock account.

§ 47.4302 Statutory provisions; stock issued in recapitalization.

SEC. 4302 *Recapitalization.* In the case of a recapitalization, the tax imposed by section 4301 shall be that proportion of the tax computed on the certificates (or on the shares where no certificates are issued) issued in the recapitalization that (1) the amount dedicated as capital for the first time by the recapitalization, whether by a transfer of earned surplus or otherwise, bears to (2) the total actual value of such certificates or shares issued in the recapitalization.

[Sec. 4302 as amended and in effect Jan. 1, 1959]

§ 47.4302–1 Limitation on tax in case of recapitalization.

(a) *In general.* Where stock is issued in a recapitalization, the tax payable is that proportion of the total tax imposed by section 4301 computed with respect to all the shares or certificates issued in the recapitalization that the amount dedicated as capital for the first time by the recapitalization, whether by a transfer of earned surplus or otherwise, bears to the total actual value of the shares or certificates so issued.

(b) *Dedication of capital for first time.* A tax is not payable with respect to stock issued in a recapitalization unless the recapitalization results in the dedication of an amount as capital which amount is so dedicated for the first time. Thus, where a corporation transferred an amount from the capital stock account to capital surplus in a prior recapitalization, and such corporation in a subsequent or second recapitalization transfers such amount from capital surplus to the capital stock account under such circumstances that the amount so restored to the capital stock account is clearly identifiable, a tax is not payable with respect to the amount so rededicated as capital. If the amount transferred to the capital stock account from capital surplus cannot be clearly identified as having been previously dedicated to the capital stock account, the portion of the amount so transferred which is attributable to the amount in capital surplus not previously dedicated to capital is considered to be the amount dedicated to capital for the first time, and tax will be imposed with respect thereto. The amount so transferred which is attributable to the amount in capital surplus not previously dedicated to capital is that proportion of the total amount so transferred that the amount in the capital surplus account before such transfer not previously dedicated to capital bears to the total amount in the capital surplus account before such transfer. The tax is also payable with respect to a transfer of capital surplus to the capital stock account by way of a recapitalization where the amount so transferred can be clearly identified as not having been previously dedicated as capital. Any stock dividend constitutes a recapitalization regardless of the amount of such dividend.

(c) *Examples of computation of tax in a recapitalization*—(1) *Statutory method of computing tax.* The computation of tax in a recapitalization in accordance with the formula specified in section 4302 may be illustrated by the following examples:

Example (1). Corporation A has outstanding 10,000 shares of common stock having a stated value of $50 per share and has an earned surplus of $1,500,000. Corporation A declares a stock dividend of one share for each share outstanding and issues shares pursuant thereto. As a part of the transaction, $500,000 is transferred from earned surplus to the capital stock account. The actual value of the 10,000 shares issued in the recapitalization is $2,000,000, and the tax computed on $2,000,000 would be $2,000. $\frac{\$500,000}{\$2,000,000} \times \$2,000$ or $500 is the portion of the tax computed on the shares issued in the recapitalization which is considered under section 4302 to be attributable to the amount dedicated to capital for the first time. The tax imposed on the shares issued in such recapitalization is, therefore, $500.

Example (2). Corporation B has outstanding 1,000 shares of no par common stock with a stated value of $20 per share which is shown in the capital stock account in the amount of $20,000. Corporation B also maintains an account designated "capital surplus" which consists of $100,000, of which $75,000 is attributable to paid-in-surplus and $25,000 is attributable to a reduction in the capital stock account. Corporation B issues to its shareholders for each share outstanding one additional share of no par common stock. As a part of such transaction, the capital stock account is increased to $50,000 by the transfer of $20,000 from capital surplus, and the transfer of $10,000 from earned surplus. The stated value of the no par common stock is increased from $20 per share to $25 per share. Since $75,000 of the amount in the capital surplus account has not been previously dedicated to the capital stock account, $\frac{\$75,000}{\$100,000}$ or ¾ of $20,000 ($15,000) is the portion of the amount transferred to the capital stock account from capital surplus considered to be dedicated to capital for the first time. The $10,000 transferred from earned surplus is clearly identified as having never been previously dedicated to capital. The total amount, therefore, considered to be dedicated to capital for the first time is $25,000. The 1,000 shares of stock issued have an actual value of $130,000, and the tax computed on such amount would be $130. Applying the formula provided in section 4302, $\frac{\$25,000}{\$130,000} \times \$130$ or $25 is the portion of the tax computed on all shares issued in the recapitalization which is attributable to the amount dedicated to capital for the first time. The tax imposed on the shares issued in such recapitalization is, therefore, $25.

(2) *Alternative method of computing tax.* The examples in subparagraph (1) of this paragraph illustrate the method of computing the tax in a recapitalization in accordance with the formula provided in section 4302. The taxpayer may, if he wishes, compute the tax by an alternative method under which actual value of the shares issued in a recapitalization need not be determined. The same tax result will be obtained under this alternative method except for a possible nominal variation due to the application of the major fraction rule of section 4301. Under this alternative method the tax in a recapitalization is computed by multiplying the amount dedicated as capital for the first time by the applicable tax rate. Thus, in example (1) of subparagraph (1) of this paragraph, $500,000 multiplied by .001 ($0.10 on each $100 equals the factor of .001) results in a tax of $500, and in example (2) of the same subparagraph $25,000 multiplied by .001 results in a tax of $25.

(d) *Recapitalization as part of other transaction.* Where a recapitalization is effected in connection with, or as part of, some other transaction, for example, an original or an additional issue of stock, a merger, etc., the limitation of the tax payable to the proportion specified in this section applies only to the stock issued in that part of the transaction which constitutes a recapitalization. Thus, where a corporation makes a change in its capital structure by transferring to the capital stock account a portion of its earned surplus and replacing an issue of stock with another issue of stock and at the same time disposes of part of the new stock by sale to underwriters, the tax limitation is applicable only to that portion of the new stock which is issued in exchange for the old stock retired thereby. In such case, the portion of the new stock sold to the underwriters is taxable in its entirety without any adjustment on account of the recapitalization. Similarly, where a corporation retires its preferred stock by transferring to the capital stock account a portion of its earned surplus and issuing common stock in exchange therefor, and such exchange is made in connection with a merger in which the corporation issues common stock also to the former stockholders of the merged company, the tax limitation is applicable only to the common stock

issued in exchange for the preferred stock, and the shares or certificates of common stock issued to the former stockholders of the merged company are subject to tax without any adjustment on account of the recapitalization.

§ 47.4303 Statutory provisions; exemptions.

SEC. 4303 *Exemptions*—(a) *Common trust funds.* The tax imposed by section 4301 shall not apply to the issue of shares or certificates of a common trust fund, as defined in section 584.

(b) *Pooled investment funds.* The tax imposed by section 4301 shall not apply to the issue of shares or certificates of a fund maintained by a bank exclusively for the collective investment and reinvestment of assets of qualified trusts (within the meaning of section 401, relating to qualified pension, profit-sharing, and stock bonus plans).

(c) *Installment purchases of certain shares or certificates.* The tax imposed by section 4301 shall not apply to shares or certificates issued by a corporation pursuant to an installment purchase agreement which provides that—

(1) The periodic payments by the purchaser will be applied (as received by the corporation) solely to the acquisition of shares or certificates in specified other corporations (and in specified percentages), and

(2) The corporation will transfer to the purchaser, on or before the termination of the agreement, all shares or certificates in other corporations acquired by it for the purchaser.

For the purposes of the preceding sentence, the term "purchaser" includes a successor in interest of the purchaser.

(d) *Other exemptions.* For other exemptions, see section 4382.

[Sec. 4303 as amended and in effect Jan. 1, 1959]

§ 47.4303–1 Exemptions.

(a) *Common trust funds.* For regulations under section 584, see Part 1 of this chapter (Income Tax Regulations).

(b) *Pooled investment funds.* Section 4303(b) exempts from the tax imposed by section 4301 the issue of shares or certificates of stock of a fund maintained by a bank exclusively for the collective investment and reinvestment of assets of trusts which are qualified trusts within the meaning of section 401, relating to qualified pension, profit-sharing, and stock bonus plans. The exemption applies to such issue of shares or certificates regardless of the capacity in which the bank holds those assets of the participating trusts which have been pooled for the purpose of collective investment or reinvestment. For regulations under section 401, see Part 1 of this chapter (Income Tax Regulations).

(c) *Installment purchases of certain shares or certificates.* Section 4303(c) exempts from the tax imposed by section 4301, under certain circumstances, shares or certificates of stock issued by a corporation pursuant to an installment purchase agreement. The exemption has application only if the installment purchase agreement provides that:

(1) The periodic payments required to be made by the purchaser under the installment purchase agreement will be applied, as received by the corporation, solely to the acquisition of shares or certificates of stock in other corporations which are designated in the agreement and that the periodic payments will be so applied in accordance with the specified percentages set forth in the agreement, and

(2) The corporation, on or before the termination of the installment purchase agreement, will transfer to the purchaser all shares or certificates of stock in the designated corporations which were acquired by it for such purchaser pursuant to such agreement.

The exemption will have application only if all of the foregoing conditions are met. The exemption will not apply, for example, if the corporation has an option, under the installment purchase agreement or otherwise, to distribute cash in lieu of the stock purchased for the purchaser. However, the exemption will apply if the purchaser has the option to receive cash in lieu of the stock purchased for him. For purposes of subparagraph (1) of this paragraph, periodic payments will be considered as being applied "solely to the acquisition of shares or certificates of stock in other corporations" notwithstanding that the agreement authorizes the corporation to apply a portion of such payments to cover loading charges or to retain amounts insufficient to purchase a full share of stock. For purposes of section 4303(c) and this paragraph, the term "purchaser" includes a successor in interest of the purchaser.

§ 47.4304 Statutory provisions; affixing of stamps.

SEC. 4304 *Affixing of stamps.* The stamps representing the tax imposed by section 4301 shall be affixed to the stock books or corresponding records of the organization and not to the certificates issued.

[Sec. 4304 as originally enacted and in effect Jan. 1, 1959]

§ 47.4304–1 Affixing of stamps.

(a) *Documentary stamps.* Only documentary stamps shall be used in payment of the tax imposed by section 4301. The requisite stamps shall be affixed to the stock books or corresponding records of the corporation, and not to the certificates issued. See §§ 47.6804–1 and 47.6804–2 for appropriate use, denominations, and cancellation of such stamps.

(b) *Purchase of documentary stamps.* Documentary stamps may be purchased, and requisition forms for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), and 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration), and § 47.6801–1.

§ 47.4305 Statutory provisions; cross references.

SEC. 4305 *Cross references.* For definitions, penalties, and other general and administrative provisions applicable to this part, see sections 4381 and 4384 and subtitle F.

Subpart C—Tax on Issuance of Certificates of Indebtedness

§ 47.4311 Statutory provisions; imposition of tax.

SEC. 4311 *Imposition of tax.* There is hereby imposed, on all certificates of indebtedness issued by a corporation, a tax at the rate of 11 cents on each $100 of face value or fraction thereof.

[Sec. 4311 as amended and in effect Jan. 1, 1959]

§ 47.4311–1 Imposition of tax on issuance of certificates of indebtedness.

(a) *Scope of tax.* Section 4311 imposes a tax on the issue within the territorial jurisdiction of the United States by any corporation of certificates of indebtedness as defined in section 4381(a) and paragraph (a) of § 47.4381–1. See section 4381(b) and paragraph (b) of § 47.4381–1 for definition of the term "corporation". Every renewal of a certificate of indebtedness is subject to tax as a new issue (see § 47.4312–1). A certificate of indebtedness is issued within the meaning of the law at the time it is delivered so as to constitute an obligation of the issuer.

(b) *Rate and computation of tax.* The rate of tax is 11 cents on each $100 or fraction thereof of the face value of each certificate of indebtedness; except that, where a certificate conditioned for the repayment or payment of money is given in a penal sum, greater than the debt secured, the tax is based upon the amount secured (see section 4313). A separate computation of tax must be made with respect to each certificate of indebtedness regardless of the number of certificates which may be issued in a single transaction. For example, the tax on the issuance of a certificate having a face value of $1,000 is $1.10. The tax on the issuance of 2 certificates having a face value of $50 each is 22 cents, that is, 11 cents on each certificate, whether the certificates are issued to the same person or to different persons.

(c) *Affixing of stamps.* (1) The requisite documentary stamps shall be affixed either to the certificates of indebtedness or to the indenture or agreement under which they are issued. If the stamps are affixed to the indenture or agreement, the certificate must bear a legend showing that the proper documentary stamps have been affixed to the indenture or agreement and duly cancelled. If the indenture provides for the issue of certificates over a period of years, the requisite stamps may be affixed at the time of each issue. Only documentary stamps shall be used in payment of the tax imposed by section 4311. See §§ 47.6804–1 and 47.6804–2 for the appropriate use, denominations, and cancellation of such stamps.

(2) Documentary stamps may be purchased, and requisitions for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), and 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration), and § 47.6801–1.

§ 47.4311–2 Illustrations.

(a) *Issues subject to tax.* The following are examples of corporate instruments taxable upon issue:

(1) A bond secured by a real estate mortgage.

(2) A bond delivered to a bank or trust company as security for the payment of an obligation.

(3) Bonds executed outside the United States by a foreign corporation and delivered in the United States.

(4) Interim certificates or temporary bonds issued in lieu of definitive bonds. However, no additional tax is due on the issuance of the corresponding permanent or definitive bonds, but each of such permanent or definitive bonds must bear notation of the fact that requisite stamps were duly affixed to the interim certificates or temporary bonds or to the indenture or agreement under which such interim certificates or temporary bonds were issued.

(5) Equipment trust certificates.

(6) Any certificate of indebtedness issued by any receiver, trustee in bankruptcy, assignee, or other person, having custody of property, or charge of the affairs, of any corporation (see section 4381(b)).

(b) *Issues not subject to tax.* In addition to the various issues specifically exempt under sections 4314(a) and 4382, the following are examples of instruments not taxable upon issue:

(1) An instrument issued by an individual or partnership.

(2) An instrument merely representing the assignment of an interest in a bond (see, however, § 47.4331–1 and paragraph (b) of § 47.4351–1).

(3) Bonds issued in exchange for outstanding bonds of different denominations but of the same kind, the same total face amount, and the same maturity date.

(4) Permanent or definitive bonds issued in exchange for interim certificates or temporary bonds representing the same obligation (see, however, paragraph (a)(4) of this section).

(5) A certificate of deposit issued by a bank, whether or not negotiable, and whether payable on demand or at some specified time; and a certificate of deposit issued by an organization operating under the Morris Plan.

(6) Indemnity, fidelity, and surety bonds.

(7) A business property investment certificate, wherein it is certified that the holder thereof is the owner of an interest in certain specified property, legal title to which has been previously conveyed to a trustee, and whereby the issuing corporation agrees to manage the property and distribute the proceeds. However, such instrument is subject to the tax imposed by section 4301 (see paragraph (a)(11) of § 47.4301–2).

(8) A bond issued by a trust company on behalf of the estate of a decedent for which it is acting as executor or administrator, provided the certificate is issued solely on the credit of the estate.

(9) A warrant granting the right to purchase unissued bonds (see § 47.4331–3).

(10) A promissory note of a corporation which does not have the characteristics of a certificate of indebtedness. (For an instrument designated a promissory note which may be subject to tax, see paragraph (a) of § 47.4381–1.)

§ 47.4312 Statutory provisions; renewal of certificates of indebtedness.

SEC. 4312 *Renewals.* Every renewal of any certificate of indebtedness shall be taxed as a new issue.

[Sec. 4312 as redesignated and in effect Jan. 1, 1959]

§ 47.4312–1 Tax on renewal of certificates of indebtedness.

Every renewal of a certificate of indebtedness is subject to the tax imposed by section 4311 as a new issue. Whenever there is such a material change in the obligation as to constitute a new obligation, as, for example, an extension of maturity date or a change in the interest rate of the outstanding certificate of indebtedness, such change constitutes a renewal subject to tax as a new issue. The time when the original certificate was issued is immaterial. Likewise, the time when the certificate is renewed, whether before or after the original date of maturity, is immaterial. A tax liability is not dependent upon use of any particular form of instrument to effect the renewal. The renewal may, for example, be evidenced by a notation on the original certificate, by a collateral agreement, or by an extension agreement.

§ 47.4313 Statutory provisions; bond as security for debt.

SEC. 4313 *Bond as security for debt.* In the case where a bond conditioned for the repayment or payment of money is given in a penal sum greater than the debt secured, the tax imposed by section 4311 shall be based upon the amount secured.

[Sec. 4313 as redesignated and in effect Jan. 1, 1959]

§ 47.4313–1 Bond as security for debt.

For the effect of section 4313 on the computation of the tax, see paragraph (b) of § 47.4311–1.

§ 47.4314 Statutory provisions; exemption for certain installment obligations.

SEC. 4314 *Exemptions*—(a) *Installment purchase of obligations.* The tax imposed by section 4311 shall not apply to any instrument under the terms of which the obligee is required to make payment therefor in installments and is not permitted to make in any year a payment of more than 20 percent of the cash amount to which entitled upon maturity of the instrument.

(b) *Other exemptions.* For other exemptions, see section 4382.

Subpart D—Tax on Sales or Transfers of Capital Stock and Similar Interests

§ 47.4321 Statutory provisions; imposition of tax.

SEC. 4321 *Imposition of tax.* There is hereby imposed on each sale or transfer of shares or certificates of stock, or of rights to subscribe for or to receive such shares or certificates, issued by a corporation, a tax at the rate of 4 cents on each $100 (or major fraction thereof) of the actual value of the certificates, of the shares where no certificates are sold or transferred, or of the rights, as the case may be. In no case shall the tax so imposed on any such sale or transfer be—

(1) More than 8 cents on each share, or

(2) Less than 4 cents on the sale or transfer.

[Sec. 4321 as amended and in effect Jan. 1, 1959, and as further amended by sec. 5(a), Act of Sept. 21, 1959 (Pub. Law 86–344, 73 Stat. 619)]

§ 47.4321–1 Imposition of tax.

(a) *Scope of tax.* Section 4321 imposes a tax on each sale or transfer (as defined in section 4351(b)), within the territorial jurisdiction of the United States of shares or certificates of stock, or of rights to subscribe for or to receive such shares or certificates, issued by a corporation. As to sales or transfers of warrants to subscribe for or to purchase stock, see § 47.4321–3. The tax applies to the specified dealings or transactions in stock, whether occurring before, after, or without the issuance of a certificate. The tax attaches at the time of making the sale or transfer, regardless of the time or manner of delivery of the certificate, agreement, or memorandum of sale. For requirements as to the making and keeping of records of such sales or transfers, see §§ 47.4352–1 and 47.6001–1. See section 4381 and § 47.4381–1 for definitions of the terms "corporation" and "shares or certificates of stock". For purposes of the tax imposed by section 4321, the term "stock", as used in the regulations in this part, includes shares or certificates of stock and rights to subscribe for or to receive such shares or certificates.

(b) *Rate and computation of tax*—(1) *Computation.* Where, by sale or transfer, stock of the same class issued by one corporation is transferred from

a single transferor to a single transferee, the tax is computed on the basis of the aggregate actual value of all the shares transferred. Where there are two or more transferors or two or more transferees, or where in a single transaction transfer is made of the stock of two or more corporations or of two or more classes issued by a single corporation, a separate tax computation must be made with respect to each transferor and each transferee and with respect to the stock of each corporation and the stock of each class issued by a single corporation. The foregoing rule may be illustrated by the following examples:

Example (1). A, owning 25 shares of common stock and 25 shares of preferred stock of the X Corporation, and 50 shares of the common stock of the Y Corporation, transfers all the stock by delivering the certificates to B. In this situation, there are three distinct transactions, namely, a transfer of 25 shares of common stock of the X Corporation, a transfer of 25 shares of preferred stock of the X Corporation, and a transfer of 50 shares of common stock of the Y Corporation, and the tax is computed, in the case of each transfer, upon the actual value of the stock.

Example (2). A, owning 100 shares of stock in the X Corporation represented by one or more certificates, sells 50 shares each to B and C. To that end, A sends his certificate or certificates to the transfer agent with instructions to issue one or more certificates aggregating 50 shares to each purchaser. In this situation, there are two distinct transactions, namely, two sales of 50 shares of stock each, and the tax is computed upon the actual value of the stock transferred to each purchaser.

Example (3). A and B, each owning 50 shares of stock in the X Corporation represented in each case by one or more certificates, make a gift of their stock to C. To that end, they send their certificates to the transfer agent with instructions to issue to the donee one or more certificates for the entire 100 shares. In this situation, there are likewise two distinct transactions, namely, two gifts of 50 shares of stock each, and a separate computation must be made with respect to each gift.

(2) *Rate of tax*—(i) *In general.* The rate of tax applicable to each sale or transfer of shares or certificates of stock or of rights to subscribe for or to receive shares or certificates of stock is 4 cents on each $100 (or major fraction thereof) of the actual value of the certificates, of the shares where no certificates are sold or transferred, or of the rights. In no case, however, shall the tax imposed on any such sale or transfer be—

(*a*) More than 8 cents on each share sold or transferred or, in the case of the sale or transfer of rights to subscribe for or to receive shares or certificates of stock, more than 8 cents in respect of each share covered by such rights, or

(*b*) Less than 4 cents on any one sale or transfer.

(ii) *Exception in the case of rights sold or transferred prior to November 1, 1959.* The rate of tax applicable in respect of any sale or transfer, prior to November 1, 1959, of rights to subscribe for or to receive shares or certificates of stock is 4 cents on each $100 (or major fraction thereof) of the actual value of the stock to which the rights relate. However, the provisions of subdivision (i) (*a*) (insofar as they relate to rights) and (*b*) of this subparagraph are applicable in computing the maximum and minimum amount of tax imposed on any sale or transfer of rights to which this subdivision has application.

(iii) *Major fraction.* A major fraction of $100 is any amount in excess of $50 and less than $100.

(3) *Actual value.* The principles set forth in paragraph (b)(2)(ii) of § 47.4301–1 for determining the actual value of shares or certificates of stock issued are equally applicable for purposes of determining the actual value of shares or certificates of stock, or rights thereto, sold or transferred.

(4) *Examples of computation.* The computation of the tax imposed by section 4321 may be illustrated by the following examples:

Example (1). A sells to B 100 shares of stock of the X Corporation having an actual value of $10,000 and gives to B 10 shares of stock of the Y Corporation having an actual value of $2,560. A separate computation must be made with respect to the stock of each corporation. Applying the rate of 4 cents for each $100 of actual value (or major fraction thereof), the tax on the sale of the X Corporation stock is $4 (100×$0.04) and the tax on the gift of the Y Corporation stock is $1.04 (26, applying the major fraction rule, ×$0.04). Since the application of the 4-cent rate results in tax in excess of 8 cents per share in the case of the Y Corporation stock ($1.04÷10), the tax in respect of such stock is computed at the rate of 8 cents per share resulting in tax of $0.80. Thus, the total tax in respect of the sale and gift of the stock of X Corporation and of Y Corporation is $4.80.

Example (2). A sells to B 10 shares of stock having an actual value of $50. Since $50 does not constitute a major fraction of $100 the provision of section 4321 imposing a minimum tax of not less than 4 cents on a sale or transfer applies. Accordingly, the tax on the sale of the 10 shares is 4 cents.

(5) *Cross reference.* For provisions relating to the application of the tax imposed by section 4321 in the case of certain changes in a partnership, see section 4383 and § 47.4383–1.

§ 47.4321–2 Illustrations.

(a) *Sales and transfers subject to tax.* The following transfers of stock are illustrations of transactions which are taxable, unless exempt from tax under a specific provision of the Internal Revenue Code (see sections 4322, 4341 to 4344, inclusive, 4382, and 4383(a) with respect to such exemptions):

(1) Transfer by gift.

(2) Transfer by an administrator or executor to a distributee or legatee (see, however, section 4344(b) and paragraph (b) of § 47.4344–1).

(3) Transfer to or by trustees (see, however, section 4343(a)(8)).

(4) Transfer of an interim certificate, a voting trust certificate, or a certificate of beneficial interest in an association.

(5) Transfer from persons holding legal title as tenants in common, as joint tenants, or as tenants by the entirety, to the same persons separately to effect a partition, or from one person to two or more persons, whether or not including the transferor, as tenants in common, as joint tenants, or as tenants by the entirety (see, however, section 4343(a)(9)).

(6) Transfer from a partnership on its termination under section 708; also from a partnership to an individual member thereof upon a dissolution of his interest in the partnership. See § 47.4383–1.

(7) Transfer to a corporation of its own stock (see, however, paragraph (b)(3) of this section).

(8) Transfer upon a merger from the name of a merging corporation of stock owned by it to the name of the continuing corporation. Similarly, upon a consolidation, a transfer from any of the consolidating corporations to the consolidated corporation (see, however, paragraphs (b) (6) and (7) of this section). For exemption from tax in respect of transfers to make effective a plan of reorganization or adjustment whereby a mere change in identity, form, or place of organization is effected, see paragraph (d) of § 47.4382–1.

(9) In addition to the tax on the issuance of stock in connection with a merger or consolidation, where such stock is issued directly to the stockholders of the merging or consolidating corporations by the continuing or consolidated corporation (see paragraphs (a) (8) and (9) of § 47.4301–2), there is also a transfer tax imposed at the time of the issuance of such stock. The transfer tax is applicable to such a transaction inasmuch as there is involved the transfer to the stockholders of the merging or consolidating corporations of such corporations' right to receive the stock of the continuing or consolidated corporation. For exemption from tax in respect of transfers to make effective a plan of reorganization or adjustment whereby a mere change in identity, form, or place of organization is effected, see paragraph (d) of § 47.4382–1.

(10) Transfer of stock to another person upon order of the purchaser; transfer of the right to receive a stock dividend already declared; issuance of stock to a person other than the subscriber; all other transfers of rights to receive stock; and all transfers of rights to subscribe for stock.

(11) Transfer by a broker to a customer of stock issued as a dividend on stock purchased for the customer by the broker and held by the broker in his own name or in the name of his nominee.

(12) Transfer of stock on the books of a domestic corporation, regardless of where the sale is made or the stock certificate is delivered.

(13) Sale or transfer within the territorial jurisdiction of the United States of stock of a foreign corporation.

(14) Transfers by operation of law (see, however, § 47.4343–1).

(b) *Sales and transfers not subject to tax.* In addition to the exemptions prescribed in sections 4382 and 4383(a) which apply to documentary stamp taxes generally and to the specific exemptions provided in sections 4322 and 4341 to 4344, inclusive, and the regulations thereunder, the following are examples of transactions not subject to the tax:

(1) Transfer of stock pursuant to a sale, where the requisite stamps have been affixed to the memorandum of sale.

(2) Surrender of certificates in exchange for other certificates representing the same stock issued to the same person (see also paragraph (b)(2) of § 47.4301–2).

(3) Surrender of stock to the issuing corporation for extinguishment (see also paragraph (a)(7) of this section).

(4) Change in the registration of stock for the sole purpose of recording a change in the name of a stockholder, such as from the maiden name to the married name of a stockholder, or a change in the name of a corporation which is a stockholder.

(5) Transfer of stock to or by an insolvent bank, where such transfer is within the provisions of section 7507.

(6) In a consolidation of corporations, the surrender of stock of any of the consolidating corporations in exchange for stock of the consolidated corporation (see, however, paragraph (a)(9) of this section and paragraph (a)(8) of § 47.4301–2).

(7) In a merger of corporations, the surrender of stock of both the merging and the continuing corporations in exchange for stock of the continuing corporation (see, however, paragraph (a)(9) of this section and paragraph (a)(9) of § 47.4301–2).

(8) Deliveries of stock to or by a clearinghouse for the sole purpose of clearing or adjusting accounts of its members.

(9) Transfer of stock pursuant to a call, since a "call" is an agreement to sell stock and taxable as such. However, a person making such nontaxable transfer shall furnish and attach to the certificate a statement in substantially the following form:

It is hereby certified that the transfer of ---------- shares of the within stock to ---------- has been made pursuant to a "call", and that the requisite Federal documentary stamps for the transaction are affixed to such "call", which is in the possession of the undersigned.

Signature

(10) The mere delivery of a certificate of stock by a customer to his broker solely for the purpose of enabling such broker to sell the stock for the customer, where the broker has no legal title or other interest in the stock.

(11) The mere delivery of a certificate of stock by a purchasing broker to his customer, if the tax was paid upon the sale of the stock to such broker and such broker has no legal title or other interest in the stock.

§ 47.4321–3 Tax on warrants.

(a) *To subscribe for stock.* Transfers of warrants entitling the holder to subscribe for stock are taxable as transfers of rights to subscribe. For computation of the tax on transfers of rights to subscribe for stock, see paragraph (b) of § 47.4321–1. The issue of a warrant entitling the holder to subscribe for stock is not subject to tax, but the issue of stock upon exercise of the warrant is subject to the tax imposed by section 4301 (see paragraph (a)(7) of § 47.4301–2).

(b) *To purchase issued stock.* (1) Warrants entitling the holder to purchase issued stock are taxable upon issuance as agreements to sell stock (see definition of "sale or transfer" in section 4351(b) and paragraph (b) of § 47.4351–1). The tax imposed by section 4321 is computed on the basis of the actual value of the stock at the time the warrant is issued. The warrant price is not indicative of the actual value to be attributed to the stock for purposes of the tax.

(2) Transfers of warrants entitling the holder to purchase issued stock are not subject to the stamp tax since the statute does not impose a tax on sales or transfers of agreements to sell stock. If the transfer tax is paid upon the issuance of a warrant as an agreement to sell stock, no additional transfer tax is incurred upon the subsequent transfer of the stock pursuant to the exercise of the warrant. However, the person making such exempt transfer of stock shall furnish and attach to the certificate a statement in substantially the following form:

It is hereby certified that the transfer of the attached certificate for ----------
(Number of shares and description of stock)
---------- to ----------
(Name of transferee)
is made pursuant to the exercise of a warrant which is in the possession of the undersigned, and that the requisite stamps due upon the issuance of such warrant have been affixed thereto.

§ 47.4322 Statutory provisions; exemptions.

SEC. 4322 *Exemptions*—(a) *Exemptions for certain transfers.* The tax imposed by section 4321 shall not apply to any delivery or transfer of shares, certificates, or rights—

(1) *Brokers.* To a broker or his registered nominee for sale of such shares, certificates, or rights; by a broker or his registered nominee to a customer for whom and upon whose order the broker has purchased same; or by a purchasing broker to his registered nominee to be held by such nominee for the same purpose as if held by the broker; or

(2) *Nominees of corporations.* From a corporation to a registered nominee of such corporation, or from one such nominee to another such nominee, provided that in each instance such shares, certificates, or rights are to be held by the nominee for the same purpose as if retained by the corporation; or from such nominee to such corporation.

(b) *Certain odd-lot transactions*—(1) *Exemption.* The tax imposed by section 4321 shall not apply to any odd-lot sale by an odd-lot dealer if the shares, certificates, or rights are delivered or transferred to a broker pursuant to an order of a customer of such broker for such shares, certificates, or rights.

(2) *Definitions.* For purposes of paragraph (1)—

(A) The term "odd-lot sale" means an odd-lot transaction under the rules of the securities exchange of which the odd-lot dealer is a member.

(B) The term "odd-lot dealer" means a person who is (i) a member of a securities exchange which is registered with the Securities and Exchange Commission as a national securities exchange, and (ii) registered under the rules of such exchange as an odd-lot dealer or as a specialist.

(c) *Other exemptions.* For other exemptions, see sections 4341, 4342, 4343, 4344, and 4382.

[Sec. 4322 as amended and in effect Jan. 1, 1959]

§ 47.4322–1 Exemptions.

(a) *Transfer from customer to broker.* (1) If stock is transferred to the name of a broker, or to the name of a broker's registered nominee, solely for the purpose of enabling such broker to sell the stock for the customer, the transfer is exempt from tax provided the broker furnishes at the time of transfer or delivery an exemption certificate in substantially the form prescribed in § 47.4345–1. For provisions relating to the registration of nominees, see paragraph (a) of § 47.4351–1.

(2) A transfer to the name of a selling agent other than a broker, as, for example, a bank, whether the sale be made by the agent direct or through a broker for the agent's account, is subject to tax, since the exemption applies only to deliveries and transfers to brokers (but see paragraph (b) of § 47.4342–1). However, liability is not incurred by the mere delivery of a certificate of stock to an agent who obtains no legal title or other interest in the stock.

(b) *Transfer from broker to customer.* (1) If stock is transferred to the name of a purchasing broker or his registered nominee who holds the stock for the same purpose as if held by the broker and tax on such transfer is paid, transfer may thereafter be made to the name of the purchaser (for whom and upon whose order the broker has purchased such stock) without payment of tax. If the tax was paid upon the transfer to the name of the purchasing broker, transfer may be made to the name of his registered nominee and from such nominee to the name of the purchaser without payment of tax. However, no exemption will be allowed under this paragraph unless the broker furnishes at the time of transfer or delivery an exemption certificate in substantially the form prescribed in § 47.4345–1. For provisions relating to the registration of nominees, see paragraph (a) of § 47.4351–1.

(2) Delivery to, or transfer to the name of, the customer may not be made tax free in any case in which the stock was transferred from the seller to the broker or his registered nominee without payment of the tax, since the law requires that the tax shall be paid on the transfer or transfers between the actual seller and actual buyer. A transfer from

the name of a purchasing agent other than a broker, as, for example, a bank, whether the purchase be made directly or through a broker for the agent's account, is subject to tax, since the exemption applies only to deliveries and transfers from brokers (but see paragraph (b) of § 47.4342–1). However, liability is not incurred by the mere delivery to the principal of a certificate of stock by an agent having no legal title or other interest in the stock, or by a broker for the account of such agent.

(c) *Transfers between corporations and nominees.* The tax does not apply to the delivery or transfer of stock from a corporation to a registered nominee of such corporation, or from one such nominee to another such nominee, if in either case the shares or certificates continue to be held by such nominee for the same purpose for which they would be held if retained by such corporation; or from such nominee to such corporation. No exemption is granted unless the nominee is registered in the manner provided in paragraph (a) of § 47.4351–1. Nor shall the exemption be granted in any case unless the delivery or transfer is accompanied by an exemption certificate, executed by the person making the exempt transfer, in substantially the form prescribed in § 47.4345–1.

(d) *Certain odd-lot transactions.* The tax imposed by section 4321 shall not apply to any odd-lot sale by an odd-lot dealer if the shares, certificates, or rights are delivered or transferred to a broker pursuant to an order of a customer of such broker for such shares, certificates, or rights and the broker furnishes at the time of transfer or delivery an exemption certificate in substantially the form prescribed in § 47.4345–1. Actual physical delivery or transfer of the shares, certificates, or rights sold is not required if the effect of the transaction is a sale to a customer of the broker. Thus, if an odd-lot dealer executes odd-lot purchase and sale orders in a particular stock for a broker pursuant to orders of the broker's customers during a given day and only the net balance of such stock for that day is physically delivered or transferred to the broker, all of the odd-lot sales which contributed to such net balance are exempt. The term "odd-lot sale" means an odd-lot transaction under the rules of the securities exchange of which the odd-lot dealer making the sale is a member. The term "odd-lot dealer" means a person who is (1) a member of a securities exchange which is registered with the Securities and Exchange Commission as a national securities exchange, and (2) registered under the rules of such exchange as an odd-lot dealer or as a specialist.

§ 47.4323 Statutory provisions; affixing of stamps.

SEC. 4323 *Affixing of stamps*—(a) *Books of the corporation.* The stamps representing the tax imposed by section 4321 shall be affixed to the books of the corporation in case of a sale where the evidence of transfer is shown only by the books of the corporation.

(b) *Certification as to value by transferor or transferee.* Where shares or certificates of stock, or of rights to subscribe for or to receive such shares or certificates, are presented for transfer and the tax thereon is paid by the use of adhesive stamps, such shares, certificates, or rights shall be accompanied by a certification signed by the transferor or his agent or the transferee or his agent as to the actual value of the shares, certificates, or rights so transferred, and any corporation or transfer agent to whom such shares, certificates, or rights are presented shall be entitled to rely on such certification without further inquiry.

(c) *Other evidences of sale or transfer.* For provisions applicable to the affixing of stamps in cases of sale or transfer shown otherwise than only by the books of the corporation, see section 4352.

[Sec. 4323 as amended and in effect Jan. 1, 1959 and as further amended by sec. 5(b), Act of Sept. 21, 1959 (Pub. Law 86–344, 73 Stat. 619)]

§ 47.4323–1 Affixing of stamps.

(a) *Books of the corporation.* (1) Except as provided in section 4353 and § 47.4353–1, only documentary stamps shall be used in payment of the tax imposed by section 4321. In the case of a sale or transfer evidenced only by the books of the corporation or other organization, the requisite stamps shall be affixed to such books. In the case of a sale or transfer evidenced otherwise than only by the books of the corporation or other organization, see section 4352 and § 47.4352–1 for provisions relating to the affixing of the requisite stamps. See also §§ 47.6804–1 and 47.6804–2 for the appropriate use, denominations, and cancellation of such stamps. For provisions relating to payment, through a national securities exchange or a clearinghouse for such exchange, of tax without use of stamps, see § 47.4353–1.

(2) Documentary stamps may be purchased, and requisition forms for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), and 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration), and § 47.6801–1.

§ 47.4331–2 Illustrations.

(a) *Sales and transfers subject to tax.* The tax on sales or transfers of certificates of indebtedness imposed by section 4331 is similar in scope to the tax on stock transfers imposed by section 4321. Accordingly, the various examples set forth in paragraph (a) of § 47.4321–2 of sales and transfers of stocks subject to the stock transfer tax apply, with certain exceptions, to sales and transfers of certificates of indebtedness unless such sales and transfers of certificates of indebtedness are exempt from tax under a specific provision of the Internal Revenue Code (see sections 4332, 4341 to 4344, inclusive, 4382, and 4383(a) with respect to such exemptions). These exceptions are the examples stated in paragraphs (a) (9) and (10) of § 47.4321–2.

(b) *Sales and transfers not subject to tax.* In addition to the exemptions prescribed in sections 4382 and 4383(a) which apply to documentary stamp taxes generally and to the specific exemptions provided in sections 4332, and 4341 to 4344, inclusive, and the regulations thereunder, the examples set forth in paragraph (b) of § 47.4321–2 of sales and transfers of stocks not subject to the stock transfer tax illustrate sales and transfers of certificates of indebtedness which are not subject to the tax imposed by section 4331.

§ 47.4331–3 Tax on warrants.

(a) *To subscribe for certificates of indebtedness.* Warrants entitling the holder to subscribe for unissued certificates of indebtedness are not subject to tax under section 4331.

(b) *To purchase issued certificates of indebtedness.* Warrants entitling the holder to purchase issued certificates of indebtedness are, upon issuance, subject to tax under section 4331, as agreements to sell certificates (see definition of "sale or transfer" in section 4381(b) and paragraph (b) of § 47.4381–1). Subsequent transfers of such warrants are not subject to the transfer tax since the statute does not impose a tax upon transfers of agreements to sell certificates of indebtedness. For rate and computation of tax, see paragraph (b) of § 47.4331–1. If the transfer tax is paid upon issuance of a warrant, the subsequent transfer of the certificate pursuant to the exercise of such warrant is not subject to the transfer tax. However, the person transferring the certificate shall furnish and attach thereto a statement substantially as follows:

It is hereby certified that the transfer of the attached certificates of indebtedness,

---

(description and face value of certificates)

to ---

(name of transferee)

is made pursuant to the exercise of a warrant which is in the possession of the undersigned, and that the requisite stamps due upon the issuance of such warrant have been affixed thereto.

§ 47.4331–4 Records of sales and transfers of certificates of indebtedness.

The provisions of § 47.6001–1 relating to records of sales and transfers of stock are also applicable to sales and transfers of certificates of indebtedness, except that the records of sales of certificates of indebtedness need not show the sales prices, since the selling price is immaterial for purposes of the tax imposed by section 4331.

§ 47.4331–5 Registration of nominees.

The provisions of paragraph (a) of § 47.4351–1 relating to registration requirements in connection with transactions involving stock are also applicable to transactions involving certificates of indebtedness.

For rules applicable to securities exchanges and clearinghouses, see § 47.4353–1.

§ 47.4332 Statutory provisions; exemptions.

SEC. 4332 *Exemptions*—(a) *Brokers.* The tax imposed by section 4331 shall not apply to any delivery or transfer to a broker for sale, nor upon any delivery or transfer by a broker to a customer for whom and upon whose order he has purchased the certificates of indebtedness.

(b) *Installment purchase of obligations.* The tax imposed by section 4331 shall not apply to any instrument under the terms of which the obligee is required to make payment therefor in installments and is not permitted to make in any year a payment of more than 20 percent of the cash amount to which entitled upon maturity of the instrument.

(c) *Other exemptions.* For other exemptions, see sections 4341, 4342, 4343, 4344, and 4382.

[Sec. 4332 as amended and in effect Jan. 1, 1959]

§ 47.4332–1 Exemptions.

(a) *Transfer to or from brokers.* The rules stated in paragraphs (a) and (b) of § 47.4322–1 with respect to the exemption of transfers to or by brokers from the tax imposed by section 4321 also apply with respect to the tax imposed by section 4331.

(b) *Other exemptions.* For other exemptions with respect to the tax imposed on sales or transfers of certificates of indebtedness, see sections 4341, 4342, 4343, 4344, and 4382 and the regulations thereunder.

Subpart E—Tax on Sales or Transfers of Certificates of Indebtedness

§ 47.4331 Statutory provisions; imposition of tax.

SEC. 4331 *Imposition of tax.* There is hereby imposed, on each sale or transfer of any certificates of indebtedness issued by a corporation, a tax at the rate of 5 cents on each $100 or fraction thereof of the face value.

[Sec. 4331 as amended and in effect Jan. 1, 1959]

§ 47.4331–1 Imposition of tax.

(a) *Scope of tax.* Section 4331 imposes a tax on each sale or transfer (as defined in section 4351(b)) within the territorial jurisdiction of the United States of certificates of indebtedness issued by a corporation. See section 4381 and § 47.4381–1 for definitions of the terms "certificates of indebtedness" and "corporation". The tax attaches at the time of making the sale or transfer, regardless of the time or manner of delivery of the certificate or agreement or memorandum of sale. As to sales or transfers of warrants to subscribe for or purchase certificates of indebtedness, see § 47.4331–3. For requirements in respect of records and memoranda of such sales or transfers, see §§ 47.4331–4 and 47.4352–1. For provisions relating to the application of the tax imposed by section 4331 in the case of certain changes in a partnership, see section 4383 and § 47.4383–1.

(b) *Rate and computation of tax.* (1) Where by sale or otherwise certificates of indebtedness of the same issue of a single corporation are transferred by a single transferor to a single transferee, the tax is 5 cents on each $100 or face value, or fraction thereof, of the aggregate face value of all the certificates. Where there are two or more transferors or two or more transferees, or where in a single transaction transfer is made of certificates of two or more corporations or of two or more classes issued by a single corporation, a separate tax computation must be made with respect to each transferor and each transferee, and with respect to the certificates of each corporation and of the certificates of each class issued by a single corporation. The foregoing rule may be illustrated by the following examples:

Example (1). M, owning 25 class A bonds of the X Corporation and 25 class B bonds of the same corporation, and 50 class A bonds of the Y Corporation, transfers all the bonds to N. In this situation there are three taxable transfers, and a separate tax computation must be made with respect to the aggregate face value of the bonds involved in each.

Example (2). M, owning 100 class A bonds of the X Corporation, sells 50 bonds to N and 50 bonds to O. In this situation, there are two sales of 50 bonds each, and the tax is measured by the aggregate face value of the bonds sold to each purchaser.

Example (3). A husband and wife, each owning $50,000 face amount of class A bonds of the X Corporation, simultaneously give their bonds to their son. In this situation, there are two gifts, and a separate computation must be made with respect to the aggregate face value of the bonds included in each gift.

(2) The separate tax computation required will result in a difference in the amount of tax only where the face value of the certificates transferred is not $100 or multiples thereof.

(c) *Affixing of stamps.* (1) Except as provided in section 4353 and § 47.4353–1, only documentary stamps shall be used in payment of the tax imposed by section 4331. For provisions relating to the affixing of the requisite stamps in case of a sale or transfer of certificates of indebtedness, see section 4352 and § 47.4352–1. See also §§ 47.6804–1 and 47.6804–2 for the appropriate use, denominations, and cancellation of such stamps. For provisions relating to payment, through a national securities exchange or a clearinghouse for such exchange, of tax without use of stamps, see § 47.4353–1.

(2) Documentary stamps may be purchased, and requisition forms for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), and 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration), and § 47.6801–1.

§ 47.4331–2 Illustrations.

(a) *Sales and transfers subject to tax.* The tax on sales or transfers of certificates of indebtedness imposed by section 4331 is similar in scope to the tax on stock transfers imposed by section 4321. Accordingly, the various examples set forth in paragraph (a) of § 47.4321–2 of sales and transfers of stocks subject to the stock transfer tax apply, with certain exceptions, to sales and transfers of certificates of indebtedness unless such sales and transfers of certificates of indebtedness are exempt from tax under a specific provision of the Internal Revenue Code (see sections 4332, 4341 to 4344, inclusive, 4382, and 4383(a) with respect to such exemptions). These exceptions are the examples stated in paragraphs (a) (9) and (10) of § 47.4321–2.

(b) *Sales and transfers not subject to tax.* In addition to the exemptions prescribed in sections 4382 and 4383(a) which apply to documentary stamp taxes generally and to the specific exemptions provided in sections 4332, and 4341 to 4344, inclusive, and the regulations thereunder, the examples set forth in paragraph (b) of § 47.4321–2 of sales and transfers of stocks not subject to the stock transfer tax illustrate sales and transfers of certificates of indebtedness which are not subject to the tax imposed by section 4331.

§ 47.4331–3 Tax on warrants.

(a) *To subscribe for certificates of indebtedness.* Warrants entitling the holder to subscribe for unissued certificates of indebtedness are not subject to tax under section 4331.

(b) *To purchase issued certificates of indebtedness.* Warrants entitling the holder to purchase issued certificates of indebtedness are, upon issuance, subject to tax under section 4331, as agreements to sell certificates (see definition of "sale or transfer" in section 4381(b) and paragraph (b) of § 47.4381–1). Subsequent transfers of such warrants are not subject to the transfer tax since the statute does not impose a tax upon transfers of agreements to sell certificates of indebtedness. For rate and computation of tax, see paragraph (b) of § 47.4331–1. If the transfer tax is paid upon issuance of a warrant, the subsequent transfer of the certificate pursuant to the exercise of such warrant is not subject to the transfer tax. However, the person transferring the certificate shall furnish and attach thereto a statement substantially as follows:

It is hereby certified that the actual value on ---

(Date of taxable transfer or sale)

of the accompanying instrument(s) is $-----, as determined by ---

(Basis of valuation—sale price, mean selling price on market, etc.)

Signature of transferor, transferee, or agent of either

§ 47.4331–4 Records of sales and transfers of certificates of indebtedness.

The provisions of § 47.6001–1 relating to records of sales and transfers of stock are also applicable to sales and transfers of certificates of indebtedness, except that the records of sales of certificates of indebtedness need not show the sales prices, since the selling price is immaterial for purposes of the tax imposed by section 4331.

§ 47.4331–5 Registration of nominees.

The provisions of paragraph (a) of § 47.4351–1 relating to registration requirements in connection with transactions involving stock are also applicable to transactions involving certificates of indebtedness.

SEC. 4332 *Exemptions*—(a) *Brokers.* The tax imposed by section 4331 shall not apply to any delivery or transfer to a broker for sale, nor upon any delivery or transfer by a broker to a customer for whom and upon whose order he has purchased the certificates of indebtedness.

(b) *Installment purchase of obligations.* The tax imposed by section 4331 shall not apply to any instrument under the terms of which the obligee is required to make payment therefor in installments and is not permitted to make in any year a payment of more than 20 percent of the cash amount to which entitled upon maturity of the instrument.

(c) *Other exemptions.* For other exemptions, see sections 4341, 4342, 4343, 4344, and 4382.

[Sec. 4332 as amended and in effect Jan. 1, 1959]

§ 47.4332–1 Exemptions.

(a) *Transfer to or from brokers.* The rules stated in paragraphs (a) and (b) of § 47.4322–1 with respect to the exemption of transfers to or by brokers from the tax imposed by section 4321 also apply with respect to the tax imposed by section 4331.

(b) *Other exemptions.* For other exemptions with respect to the tax imposed on sales or transfers of certificates of indebtedness, see sections 4341, 4342, 4343, 4344, and 4382 and the regulations thereunder.

Subpart F—Provisions Common to Sales or Transfers of Capital Stock and Certificates of Indebtedness

EXEMPTIONS

§ 47.4341 Statutory provisions; transfers as security.

SEC. 4341 *Transfers as security.* The taxes imposed by sections 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections—

(1) *Collateral security.* To a lender as collateral security for money loaned thereon, if such collateral security is not actually sold, or by such lender as a return of such collateral security.

(2) *Security for performance.* To a trustee or public officer made pursuant to Federal or State law as security for the performance of an obligation, or by such trustee or public officer as a return of such security.

[Sec. 4341 as amended and in effect Jan. 1, 1959]

§ 47.4341–1 Transfers as security.

(a) *Stock or certificates of indebtedness deposited as collateral security.* The tax imposed by section 4321 or 4331 does not apply to an agreement evidencing a deposit of certificates of stock or certificates of indebtedness as collateral security for money loaned thereon, which certificates are not actually sold, nor upon the delivery or transfer for such purpose of the certificates so deposited. The exemption applies also to transfers of stock or certificates of indebtedness to a nominee of the lender and from such nominee back to the lender, if the stock or certificates of indebtedness are at all times held as collateral security for the loan; and to the return of the stock or certificates of indebtedness to the borrower by the lender or his nominee upon payment of the loan. The exemption does not apply, however, to deposits of stock or certificates of indebtedness as collateral security made otherwise than in connection with money loaned on such stock or certificates. The person making an exempt transfer under this paragraph shall, at the time of transfer or delivery, furnish an exemption certificate in substantially the form prescribed in § 47.4345–1. If the delivery or transfer will be required to pay the tax imposed by section 4321 or 4331. However, if an exemption certificate is furnished after the transfer or delivery, such person will be entitled to a refund of the tax paid upon filing a timely claim for refund. For provisions with respect to timely filing of claims, see section 6511 and the regulations thereunder in Part 301 of this chapter (Regulations on Procedure and Administration).

(b) *Transfer of stock or certificates of indebtedness made pursuant to Federal or State law to secure the performance of obligations.* The tax imposed by section 4321 or section 4331 does not apply to any delivery or transfer of stock or certificates of indebtedness to a trustee or public officer, which is made pursuant to Federal or State law to secure the performance of an obligation, or to a redelivery or retransfer of such stock or certificates of indebtedness to the transferor. The exemption provided under this paragraph shall be granted only if the delivery or transfer is accompanied by an exemption certificate in substantially the form prescribed in § 47.4345–1.

§ 47.4342 Statutory provisions; fiduciaries and custodians.

SEC. 4342 *Fiduciaries and custodians.* The taxes imposed by section[s] 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections—

(1) *Fiduciaries.* From a fiduciary to his nominee, or from one nominee of the fiduciary to another nominee, provided that in each instance such instruments are to be held by the nominee for the same purpose as if retained by the fiduciary; or from the nominee to such fiduciary; or

(2) *Custodians.* (A) From the owner to a custodian if under a written agreement between the parties such instruments are to be held or disposed of by such custodian for, and subject at all times to the instructions of, the owner; or from such custodian to such owner; or

(B) From a custodian as specified in subparagraph (A) to a registered nominee of such custodian, or from one such nominee to another such nominee, provided that in each instance such instruments are to be held by the nominee for the same purpose as if retained by the custodian; or from such nominee to such custodian.

[Sec. 4342 as amended and in effect Jan. 1, 1959]

§ 47.4342–1 Transfers to or by fiduciaries or custodians.

(a) *Transfers between fiduciaries and their nominees.* The tax imposed by section 4321 or 4331 does not apply to deliveries or transfers of stock or certificates of indebtedness from a fiduciary to a nominee of such fiduciary, or from one nominee of such fiduciary to another, if the stock or certificates of indebtedness are to be held by such nominee for the same purpose as they would be held if retained by such fiduciary. Nor does the tax apply to deliveries or transfers from a nominee of a fiduciary to such fiduciary. The exemption provided under this paragraph shall be granted only if the delivery or transfer is accompanied by an exemption certificate in substantially the form prescribed in § 47.4345–1.

(b) *Transfers to or by a custodian.* (1) The tax imposed by section 4321 or 4331 does not apply to the delivery or transfer of stock or certificates of indebtedness from the owner thereof to a custodian if, under a written agreement between the owner and the custodian, the instruments so delivered or transferred are to be held or disposed of by such custodian for, and subject at all times to the instructions of, the owner; or the delivery or transfer of stock or certificates of indebtedness from such custodian to such owner.

(2) The tax also does not apply to the delivery or transfer of stock or certificates of indebtedness from a custodian specified in subparagraph (1) of this paragraph to a registered nominee of such custodian, or from the owner direct to such registered nominee, or from one such nominee to another such nominee, if the stock or certificates of indebtedness are to be held by the nominee for the same purpose as they would be held if retained by such custodian. Nor does the tax apply to deliveries or transfers from a nominee of a custodian to such custodian or to the owner. No exemption is granted unless the nominee is registered in the manner provided in paragraph (a) of § 47.4351–1.

(3) Moreover, the tax does not apply to the delivery or transfer of stock or certificates of indebtedness from a custodian of the owner to another custodian of the owner or from a registered nominee of the first custodian to the second custodian or to the registered nominee of the latter, if the transfer would have been exempt under subparagraph (1) or (2) of this paragraph if made by the owner direct to the second custodian or to the registered nominee of the latter.

(4) For purposes of this paragraph, a custodian is a person to whom stock or certificates of indebtedness are delivered or transferred to be held or disposed of by such person for, and subject at all times to the instructions of, the owner and not otherwise. The term "custodian", as used in this paragragh, does not include a trustee. A custodian is to be distinguished from a nominee who merely lends his name and usually does not retain possession of the securities registered in his name.

(5) The exemption provided under this paragraph shall be granted only if the delivery or transfer is accompanied by an exemption certificate in substantially the form prescribed in § 47.4345–1.

§ 47.4343 Statutory provisions; transfers by operation of law.

SEC. 4343 *Transfers by operation of law*—(a) *Exempt transfers.* The taxes imposed by sections 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections—

(1) *Decedents.* From a decedent to his executor or administrator.

(2) *Minors.* From a minor to his guardian, or from a guardian to his ward upon attaining majority.

(3) *Incompetents.* From an incompetent to his committee or similar legal representative, or from a committee or similar legal representative to a former incompetent upon removal of disability.

(4) *Financial institutions.* From a bank, trust company, financial institution, insurance company, or other similar entity, or nominee, custodian, or trustee therefor, to a public officer or commission, or person designated by such officer or commission or by a court, in the taking over of its assets, in whole or part, under Federal or State law regulating or supervising such institutions, nor upon redelivery or retransfer by any such transferee or successor thereto.

(5) *Bankrupts.* From a bankrupt or person in receivership due to insolvency to the trustee in bankruptcy or receiver, from such receiver to such trustee, or from such trustee to such receiver, nor upon redelivery or retransfer by any such transferee or successor thereto.

(6) *Successors.* From a transferee under paragraphs (1) to (5), inclusive, to his successor acting in the same capacity, or from one such successor to another.

(7) *Foreign governments and aliens.* From a foreign country or national thereof to the United States or any agency thereof, or to the government of any foreign country, directed pursuant to the authority vested in the President by section 5(b) of the Trading With the Enemy Act, as amended by the First War Powers Act, 1941 (50 U.S.C. App. sec. 5).

(8) *Trustees.* From trustees to surviving, substituted, succeeding, or additional trustees of the same trust.

(9) *Survivors.* Upon the death of a joint tenant or tenant by the entireties, to the survivor or survivors.

(b) *Nonexempt transfers.* No delivery or transfer shall be exempt because effected by operation of law unless an exemption is otherwise specifically provided.

[Sec. 4343 as amended and in effect Jan. 1, 1959]

§ 47.4343–1 Transfers by operation of law.

No delivery or transfer shall be exempt from the tax imposed by section 4321 or 4331 because effected by operation of law unless an exemption is otherwise specifically provided. Each of the transfers specified in section 4343(a) is exempt from tax, but only if the delivery or transfer is accompanied by an exemption certificate as provided in § 47.4345–1.

§ 47.4344 Statutory provisions; certain other transfers.

SEC. 4344 *Certain other transfers*—(a) *Loans.* The taxes imposed by sections 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections to a borrower as a loan of such instruments, or to the lender as a return of such loan.

(b) *Worthless stock and obligations.* The taxes imposed by sections 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections by an executor or administrator to a legatee, heir, or distributee, if it is shown to the satisfaction of the Secretary or his delegate that the value of such instrument is not greater than the amount of the tax which would otherwise be imposed on such delivery or transfer.

(c) *Transfers between certain revocable trusts.* The taxes imposed by sections 4321 and 4331 shall not apply to any delivery or transfer of any of the instruments referred to in such sections by one revocable trust to another revocable trust if—

(1) The grantor of both trusts is the same person, and

(2) At the time of such delivery or transfer, such grantor is treated under section 676 as the owner of both trusts.

For purposes of the preceding sentence, if 2 or more grantors are treated under section 676 as owners in the same relative proportions of both trusts, such grantors shall be treated as the same person.

[Sec. 4344 as added and in effect Jan. 1, 1959]

§ 47.4344–1 Certain other transfers.

(a) *Loan of stock or certificate of indebtedness and the return thereof.* A mere loan of stock or certificates of indebtedness or the return of stock or certificates of indebtedness loaned is exempt from the taxes imposed by sections 4321 and 4331 if the loan or return is accompanied by an exemption certificate in substantially the form prescribed in § 47.4345–1.

(b) *Transfers of worthless stock or certificates of indebtedness by executors, etc.* The taxes imposed by sections 4321 and 4331 do not apply to deliveries or transfers of stock or certificates of indebtedness by an executor or administrator to a legatee, heir, or distributee, if it is shown to the satisfaction of the district director that the value of the stock or certificates of indebtedness so delivered or transferred is not greater than the amount of tax that would otherwise be imposed on such delivery or transfer.

(c) *Transfers between certain revocable trusts.* The taxes imposed by sections 4321 and 4331 do not apply to any delivery or transfer of stock or certificates of indebtedness by one revocable trust to another revocable trust if (1) the grantor of both trusts is the same person, (2) at the time of such delivery or transfer such grantor is treated under section 676 and the regulations thereunder as the owner of the entire interest in both trusts, and (3) the delivery or transfer is accompanied by an exemption certificate in substantially the form prescribed in § 47.4345–1. If two or more grantors are treated under section 676 as owners in the same relative proportions of the entire interest in both trusts, such grantors shall be treated as the same person. For regulations under section 676, see Part 1 of this chapter (Income Tax Regulations).

§ 47.4345 Statutory provisions; exemption certificates.

SEC. 4345 *Exemption certificates.* Except as provided in regulations prescribed by the Secretary or his delegate, no exemption shall be granted under section 4222, 4232(a), 4341, 4342, 4343(a), or 4344 (a) or (c) unless the delivery or transfer is evidenced by a certificate setting forth such facts as the Secretary or his delegate may by regulations prescribe.

[Sec. 4345 as amended and redesignated and in effect Jan. 1, 1959]

§ 47.4345–1 Exemption certificates.

No exemption shall be granted under section 4322, 4332(a), 4341, 4342, 4343 (a), or 4344 (a) or (c) unless the delivery or transfer is accompanied by a certificate in substantially the following manner:

It is hereby certified that the transfer of the accompanying instrument(s) is made under such circumstances as to come within one of the exemptions specified in section 4322, 4332(a), 4341, 4342, 4343(a), or 4344 (a) or (c) of the Internal Revenue Code, and that the evidence in proof of the exemption is maintained by the undersigned and is available for inspection by internal revenue officers.

MISCELLANEOUS PROVISIONS

§ 47.4351 Statutory provisions; definitions.

SEC. 4351 *Definitions*—(a) *Registered nominee.* For purposes of this subchapter, the term "registered nominee" means any person registered in accordance with such regulations as the Secretary or his delegate shall prescribe.

(b) *Sale or transfer.* For purposes of this subchapter, the term "sale or transfer" means any sale, agreement to sell, memorandum of sale or delivery, or transfer of legal title, whether or not shown by the books of the corporation or other organization (or by any assignment in blank, or by any delivery, or by any paper or agreement or memorandum or other evidence of transfer or sale), and whether or not the holder acquires a beneficial interest in the instruments.

[Sec. 4351 as amended and in effect Jan. 1, 1959]

§ 47.4351–1 Definitions.

(a) *Registered nominee.* For purposes of the regulations in this part, the term "registered nominee" means any person appointed as nominee of a broker, custodian, or corporation if the person so appointed is registered with the district director for the district in which the principal office of the broker, custodian, or corporation is located. No special form is prescribed for use in registering a nominee. Substitution of a nominee may be effected by the registration of the successor nominee. Upon registration of any person as a nominee of a broker, custodian, or corporation, the district director shall issue to the broker, custodian, or corporation a certificate of registration signed by him and setting forth the date of issue, the name of the person registered as nominee, and the name of the broker, custodian, or corporation on whose behalf the nominee is registered. Such certificate shall be kept at the principal place of business of the broker, custodian, or corporation to whom the certificate is issued. The certificate of registration issued as provided in this paragraph shall be held available for ready inspection by internal revenue officers.

(b) *Sale or transfer.* For purposes of the regulations in this part, the term "sale or transfer" includes sales of, agreements to sell, or memoranda of sales of, stock or certificates of indebtedness; deliveries of stock or certificates of indebtedness with intent to pass title; transfer of legal title to stock or certificates of indebtedness; transfers of rights to subscribe for stock; and transfers of rights to receive stock. The taxes imposed by sections 4321 and 4331 apply to the specified dealings or transactions in stock or certificates of indebtedness, whether effected by any assignment in blank, or by any delivery, or by any paper, agreement, memorandum or other evidence of transfer or sale (and in the case of stock, whether made before, after, or without the issuance of a certificate and whether made upon or shown by the books of the corporation or other organization), and without regard to whether the holder or transferee of the stock or certificate of indebtedness (or specified right in the case of stock) is entitled to any beneficial interest therein.

(c) *Agreement to sell.* As used in the regulations in this part, unless otherwise specified or indicated by the context, the term "agreement to sell" includes contracts to sell, either written or oral, and

whether on the deferred or partial payment plan or otherwise, options, calls, offers, indemnities, and privileges.

(d) *Clearinghouse.* For definition of the term "clearinghouse", see paragraph (d) of § 47.4353–1.

§ 47.4352 Statutory provisions; affixing of stamps.

SEC. 4352 *Affixing of stamps.* The stamps representing the taxes imposed by section 4321 and section 4331 shall be affixed to—

(1) *Instrument.* The instrument where the change of ownership is by transfer of the instrument.

(2) *Bill or memorandum of sale.* The bill or memorandum of sale in cases of an agreement to sell or where the transfer is by delivery of the instrument assigned in blank. Such bill or memorandum of sale shall be made and delivered by the seller to the buyer, and shall show the date thereof, the name of the seller, the amount of the sale, and the instrument to which it refers.

[Sec. 4352 as amended and redesignated and in effect Jan. 1, 1959]

§ 47.4352–1 Affixing of stamps.

(a) *Documents to which stamps to be affixed.* (1) In all cases where the change of ownership of stock or a certificate of indebtedness is by transfer or by delivery of the stock or certificate of indebtedness under special endorsement, i.e., by insertion of the name of the transferee in the endorsement on the back of the certificate, the stamps shall be affixed to the certificate, whether or not the change of ownership results from a sale.

(2) In cases of agreements to sell stock or certificates of indebtedness and in cases of transfers of title thereto by delivery of certificates assigned in blank, the stamps shall be affixed to the memoranda of such transactions. See paragraph (b) of this section. For cases where the evidence of sale or transfer of stock is shown only by the books of the corporation or other organization, see paragraph (a) (1) of § 47.4323–1.

(b) *Requirement of memoranda of agreements to sell, etc.* Every person who makes an agreement to sell stock or certificates of indebtedness, or who, by sale or otherwise, transfers title to stock or certificates of indebtedness by delivery of certificates assigned in blank, shall, as a part of the transaction, promptly make and deliver to the buyer or transferee, a bill or memorandum of such agreement to sell, sale, or transfer, duly signed by the seller, or transferor, or his agent. Such bill or memorandum shall show the date of the transaction, the names of the parties thereto, the description and number of shares of stock or certificates of indebtedness, the tax paid on the transaction, and, where a sale of stock is involved, the sale price, or where a transfer is involved without a sale, the actual value of the stock and the basis used for determining such value. (For definition of "actual value" see paragraph (b) (2) (ii) of § 47.4301–1 and paragraph (b) (3) of § 47.4321–1.) No more than one stamped bill or memorandum shall be required in respect of a single transaction. (See § 47.4353–1 relative to rules applicable to securities exchanges and clearinghouses.)

(c) *In general.* In no event shall any corporation or transfer agent transfer any shares, certificates of stock, or certificates of indebtedness unless stamps for the transfer tax due have been properly affixed and cancelled as required by the regulations in this part or unless tax has been paid without the use of stamps as provided in § 47.4353–1.

§ 47.4353 Statutory provisions; payment of tax through national securities exchanges without use of stamps.

SEC. 4353 *Payment of tax through national securities exchanges without use of stamps*—(a) *General rule.* Under regulations prescribed by the Secretary or his delegate, if a member of a securities exchange which is registered with the Securities and Exchange Commission as a national securities exchange appoints such exchange, or the clearinghouse for such exchange, as his agent for purposes of paying the taxes imposed by sections 4321 and 4331 in respect of his transactions, the taxes imposed by such sections in respect of such transactions may be paid through such agent without the use of stamps.

(b) *Treatment as stamp tax.* For purposes of this title—

(1) Any tax which is payable as provided under subsection (a) shall be treated as tax payable by stamp, and

(2) Any amount of tax which is paid as provided under subsection (a) shall be treated as tax paid by stamp.

[Sec. 4353 as added and in effect Jan. 1, 1959]

§ 47.4353–1 Payment of tax through national securities exchanges or their clearinghouses.

(a) *Appointment of agent.* A member of a securities exchange which is registered with the Securities and Exchange Commission as a national securities exchange may appoint in writing such exchange or the clearinghouse for such exchange as his agent for the purpose of paying the tax required in respect of his transactions in stock or certificates of indebtedness.

(b) *Conditions for payment through agent.* The privilege granted by paragraph (a) of this section may be exercised only upon compliance with the following conditions:

(1) *Authorization.* The member shall authorize and require the exchange or the clearinghouse to pay the tax in respect of all transactions in stock or certificates of indebtedness, including rights to subscribe for or to receive stock, arising in the conduct of his business, irrespective of whether the stock or certificates of indebtedness are listed or unlisted, whether the transactions are clearable or not, and including transactions involving over-the-counter sales.

(2) *Daily report of member.* The member shall make a daily report to the exchange or clearinghouse for each business day showing the total amount of tax payable on all his business transactions as specified in subparagraph (1) of this paragraph. The report shall be filed with the exchange or clearinghouse on the day on which the transactions covered thereby are due for settlement (blotter date).

(3) *Daily records to be kept by member.* The member shall maintain complete and adequate daily records, such as a blotter or similar book of original entry, of all transactions in stock or certificates of indebtedness as specified in subparagraph (1) of this paragraph, whether the transaction is taxable or not. In the case of taxable transactions, the daily record shall show the amount of tax payable in respect of each transaction. In the case of nontaxable transactions, the daily record shall disclose the basis on which the exemption from the tax is claimed. Such daily records shall be kept in permanent form for a period of at least 3 years from the date any part of the tax is paid on the transaction and must be available for ready inspection by internal revenue officers.

(4) *Payment of tax.* The exchange or clearinghouse shall pay to the district director for the district in which the exchange or clearinghouse is located the total tax shown on the daily reports specified in subparagraph (2) of this paragraph. Any such payment of tax shall be made on the day on which the report specified in subparagraph (2) of this paragraph is received by the exchange or clearinghouse. Each daily payment of tax to the district director shall be accompanied by a statement, in substantially the following form:

The accompanying check No. ------ in the amount of $------ is in payment of the total documentary stamp transfer tax liability as shown to be due on the reports received by the exchange or clearinghouse for ----------.

(Date)

(Name of stock exchange or clearinghouse)

by ---------- ----------

(Name) (Title)

(5) *Records to be kept by exchange or clearinghouse.* The daily reports received from its members shall be kept in permanent form by the exchange or clearinghouse for a period of at least 3 years from the date any part of the tax is paid with respect to any transaction reported therein, and must be available for ready inspection by internal revenue officers.

(6) *Endorsement showing payment of tax.* The member shall make and deliver to the buyer the bill or memorandum required by paragraph (b) of § 47.4352–1 and shall make an endorsement on the bill or memorandum substantially in the following form:

It is hereby certified that the Federal stamp tax applicable to this transaction has been paid through the ----------

(Insert name of stock exchange or clearinghouse) ---------- on our behalf.

(Member ---------- Stock Exchange)

If so desired, the member may also make a similar endorsement on the certificates of stock or certificates of indebtedness covered by the bill or memorandum. In that event, the endorsement shall be in substantially the following form:

It is hereby certified that the Federal stamp tax applicable to the transfer of ------ shares of this certificate (or applicable to the transfer of this certificate of indebtedness) has been paid through ----------

(Insert name of stock exchange or clearinghouse) ---------- on our behalf.

------ ----------

(Date) (Member ---------- Stock Exchange)

The endorsement (including a facsimile signature of the member) may be made on the bill or memorandum and on the accompanying certificate of stock or certificates of indebtedness by a hand-stamped impression, if (i) the hand-stamp is held at all times in the custody of the person authorized to make such impression, and (ii) the records of the member contain sufficient information to establish the identity of the person so authorized.

(c) *Treatment of payment of tax without use of stamps.* For purposes of the regulations in this chapter, any tax payable under section 4353 and the regulations in this section shall be treated as tax payable by stamp, and any amount of tax paid as provided thereunder shall be treated as tax paid by stamp.

(d) *Definition of clearinghouse.* The term "clearinghouse" includes every corporation, and every association of individuals, partnerships, or corporations, wholly or partly engaged in the business of clearing, settling or adjusting transactions in the purchase, sale, receipt, or delivery of stock, certificates of indebtedness, rights, or warrants, whether or not a part or department of a securities exchange or an independent body.

Subpart G—Tax on Conveyances

§ 47.4361 Statutory provisions; imposition of tax.

SEC. 4361 *Imposition of tax.* There is hereby imposed, on each deed, instrument, or writing by which any lands, tenements, or other realty sold shall be granted, assigned, transferred, or otherwise conveyed to, or vested in, the purchaser or purchasers, or any other person or persons, by his or their direction, when the consideration or value of the interest or property conveyed (exclusive of the value of any lien or encumbrance remaining thereon at the time of sale) exceeds $100, a tax at the rate of 55 cents for each $500 or fractional part thereof.

[Sec. 4361 as amended and in effect Jan. 1, 1959]

§ 47.4361–1 Imposition of tax.

(a) *Scope of tax.* (1) Section 4361 imposes a tax upon deeds, instruments, or other writings, whereby realty sold is granted, assigned, transferred, or otherwise conveyed to, or vested in, the purchaser or, at his direction, any other person, when the consideration for, or value of, the interest or property conveyed, exclusive of the value of any lien or encumbrance remaining thereon at the time of sale, exceeds $100.

(2) The tax is limited to conveyances of realty sold and does not apply to other conveyances (see paragraph (b) of § 47.4361–2). The tax attaches at the time the deed or other instrument of conveyance is delivered, irrespective of the time when the sale is made. Deeds deposited in escrow become subject to the tax upon delivery to the grantee. A conveyance of realty subject to an equity of redemption is taxable when made, not when the time for redemption expires.

(3) For purposes of the tax imposed by section 4361, the determination of what constitutes "realty" is not controlled by the definition or scope of that term under State law. State law determines the character of the rights conveyed by an instrument, but whether such conveyance constitutes a conveyance of "realty" is to be determined under Federal law.

(4) For purposes of the regulations in this part—

(i) The term "realty" includes—

(a) Those interests in real property which endure for a period of time, the termination of which is not fixed or ascertained by a specific number of years, such as an estate in fee simple, life estate, perpetual easement, etc., and

(b) Those interests enduring for a fixed period of years but which, either by reason of the length of the term or the grant of a right to extend the term by renewal or otherwise, consist of a bundle of rights approximating those of the class of interests mentioned in (a) of this subdivision.

(ii) The term "sold" imports a transfer of an interest for a valuable consideration, which may involve money or anything of value.

(iii) The term "deed" includes any instrument or writing whereby realty is assigned, transfererd, or otherwise conveyed to, or vested in, the purchaser, or at his direction, any other person.

(b) *Rate and computation of tax.* The rate of tax is 55 cents on each $500 or fractional part thereof of the net consideration paid for, or the net value of, the realty conveyed, that is, the gross consideration or gross value less, in either case, the amount of all liens or encumbrances on the realty existing before the sale and not removed thereby. The tax is based upon the net consideration where it is definite in amount, or may be definitely determined. The tax is based upon net value where the amount of the consideration is indefinite, or is left open to be fixed by future contingencies. In determining the amount of the net consideration for, or net value of, the realty conveyed, only the amount of the liens and encumbrances on the property existing before the sale and not removed thereby may be deducted. Thus, for example, taxes or assessmnets which are liens on the property before the sale and are not paid at the time of sale are deductible. No deduction shall be made on account of any lien or encumbrance placed upon the property in connection with the sale, or by reason of deferred payments of the purchase price whether represented by notes or otherwise.

§ 47.4361–2 Illustrations.

(a) *Conveyances subject to tax.* The following are examples of conveyances subject to the tax:

(1) A conveyance of realty in exchange for other property; also the conveyance of the other property, if it is realty.

(2) A conveyance of realty in consideration of life maintenance. The tax is computed on the net value of the realty conveyed.

(3) A conveyance by a defaulting mortgagor to the mortgagee in consideration of the cancellation of the mortgage debt. The tax is computed on the amount of the unpaid mortgage debt plus unpaid accrued interest.

(4) Deeds given by masters in chancery, sheriffs, clerks of court, etc., for realty sold under foreclosure or execution. The tax is computed on the amount bid for the property plus the costs if paid by the purchaser, whether the purchaser is the mortgagee, judgment creditor, or any other person.

(5) A conveyance of realty by a judgment or decree in a condemnation proceeding under the power of eminent domain, or a conveyance of such property under threat or imminence of such proceeding.

(6) Conveyances to or by building and loan associations. However, the tax does not apply to a conveyance of realty to a building and loan association for the purpose of securing a loan thereon, nor to the reconveyance of the realty to its owner as part of the loan transaction.

(7) A conveyance of realty to a corporation in exchange for shares of its capital stock.

(8) A conveyance of realty by a corporation in liquidation or in dissolution to its shareholders subject to the debts of the corporation; however, if there are no corporate debts and the conveyance is made solely for the cancellation and retirement of the capital stock, the tax does not apply.

(9) Deeds to standing timber and to mines. (For definition of the term "deed", see paragraph (a) (4) (iii) of § 47.4361–1.)

(10) In jurisdictions where common-law dower still exists, an instrument conveying the estate acquired by a widow upon assignment of dower. However, an instrument purporting to convey the inchoate right of dower of a wife, or the consummate right of dower of a widow prior to assignment of dower, is not subject to the tax. Where by statute dower has been abolished and in lieu thereof a different interest in the husband's real property conferred upon the wife, the taxability of an instrument purporting to convey such interest prior to its assignment must be determined by the nature of the wife's interest as fixed by the statutes and decisions of the jurisdiction in which the real estate is located.

(11) A conveyance of real estate sold to or by the United States (see, however, paragraph (a) of § 47.4384–1).

(12) A conveyance of realty by a partner to the partnership as a contribution of partnership assets. See section 4383 and § 47.4383–1 for application of tax in case of a termination of a partnership owning realty.

(b) *Conveyances not subject to tax.* In addition to the various exemptions prescribed in sections 4362 and 4382 and in the Bankruptcy Act as amended, the following are examples of conveyances not subject to tax:

(1) The reconveyance of realty, conveyed to secure a debt, upon payment of such debt.

(2) Conveyances of realty without consideration and otherwise than in connection with a sale, including a deed conveying realty as a bona fide gift, although the deed may recite a consideration for the transfer, such as "natural love and affection and $1", "desire to promote public welfare and $1", or "$1 and other valuable consideration"; a gift of realty by a husband to his wife accomplished through the conveyance of the property for an ostensible consideration to a "straw man" who immediately reconveys the property to the wife; and a deed to or by a trustee not pursuant to a sale.

(3) A deed to confirm title already vested in the grantee, such as a quit claim deed to correct a flaw in title.

(4) A deed given by an executor in accordance with the terms of the will; however, if, by reason of a consideration passing between devisees, one of them takes a greater share in the realty than that to which he is entitled under the will, the deed given by the executor to convey such greater share is subject to a tax computed upon the amount of such consideration.

(5) A deed from an agent to his principal conveying real estate purchased for and with funds of the principal.

(6) An option for the purchase of real property or a contract for the sale of real property, if the contract does not vest legal title.

(7) Partition deeds, unless, for consideration, some of the parties take shares greater in value than their undivided interests, in which event a tax attaches to each deed conveying such greater share computed upon the consideration for the excess.

(8) Ordinary leases of real property for a definite term of years (see, however, paragraph (a)(4)(i) of § 47.4361–1).

(9) A deed executed by a debtor conveying property to a trustee for the benefit of his creditors; however, when the trustee conveys such property to a creditor or sells it to any other person, the deed executed by him is taxable.

(10) Conveyance to a receiver of realty included in the receivership assets, and reconveyance of such realty upon termination of the receivership.

(11) A deed conveying real estate situated in a foreign country.

(12) Transfer of real estate in a statutory merger or consolidation from a constituent corporation to the continuing or new corporation.

§ 47.4361–3 Affixing of stamps.

(a) Only documentary stamps shall be used in payment of the tax imposed by section 4361. The requisite stamps shall be affixed to the deed, instrument, or other writing by which the realty is conveyed. See §§ 47.6804–1 and 47.6804–2 for the appropriate use, denominations, and cancellation of such stamps.

(b) Documentary stamps may be purchased, and requisition forms for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), and 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration) and § 47.6801–1.

§ 47.4362 Statutory provisions; exemptions.

SEC. 4362 *Exemptions*—(a) *Security for debt.* The tax imposed by section 4361 shall not apply to any instrument or writing given to secure a debt.

(b) *State and local government conveyances.* No State or Territory, or political subdivision thereof, or the District of Columbia, shall be liable for the tax imposed by section 4361 with respect to any deed, instrument, or writing to which it is a party, and affixing of stamps thereby shall not be deemed payment for the tax, which may be collected by assessment from any other party liable therefor.

(c) *Other exemptions.* For other exemptions, see section 4382.

[Sec. 4362 as amended and in effect Jan. 1, 1959]

§ 47.4362–1 Exemptions.

(a) *Security for debt.* Section 4362 expressly exempts from the tax imposed by section 4361 any instrument or writing, such as a mortgage or a deed of trust, given to secure a debt.

(b) *Conveyance to which State is party.* No State or Territory, or political subdivision thereof, or the District of Columbia shall be liable for the tax imposed by section 4361 in respect of a conveyance to which it is a party regardless of the capacity in which it acts. However, the conveyance is not exempt from tax, and the nonexempt party to the conveyance shall be liable for the tax. The affixing of stamps to the deed or other instrument of conveyance by the exempt governmental body does not constitute payment of the tax, and the nonexempt party remains liable for the tax in such case. Where all parties to a taxable conveyance are governmental bodies exempt under section 4362, no tax shall be imposed.

(c) *Other exemptions.* For other exemptions, see section 4382 and § 47.4382–1.

(b) For penalties, see section 7271 and § 47.7271–1.

(c) For other general and administrative provisions, see section 4384, § 47.4384–1, Subpart J, and the applicable sections of subtitle F and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration).

Subpart H—Tax on Policies Issued by Foreign Insurers

§ 47.4371 Statutory provisions; imposition of tax.

SEC. 4371 *Imposition of tax.* There is hereby imposed, on each policy of insurance, indemnity bond, annuity contract, or policy of reinsurance issued by any foreign insurer or reinsurer, a tax at the following rates:

(1) *Casualty insurance and indemnity bonds.* Four cents on each dollar, or fractional part thereof, of the premium charged on the policy of casualty insurance or the indemnity bond, if issued to or for, or in the name of, an insured as defined in section 4372(d).

(2) *Life insurance, sickness, and accident policies, and annuity contracts.* One cent on each dollar, or fractional part thereof, of the premium charged on the policy of life, sickness, or accident insurance, or annuity contract, unless the insurer is subject to tax under section 819.

(3) *Reinsurance.* One cent on each dollar, or fractional part thereof, of the premium charged on the policy of reinsurance covering any of the contracts taxable under paragraph (1) or (2).

[Sec. 4371 as amended and in effect Jan. 1, 1959, and as further amended by sec. 3(f)(3) Life Insurance Income Tax Act 1959 (73 Stat. 140)]

§ 47.4371–1 Imposition of tax on policies issued by foreign insurers; scope of tax.

(a) *Certain insurance policies, and indemnity, fidelity, or surety bonds.* Section 4371(1) imposes a tax upon each policy of insurance (other than those referred to in paragraph (b) of this section), upon each indemnity, fidelity, or surety bond, or upon each certificate, binder, covering note, receipt, memorandum, cablegram, letter, or other instrument by whatever name called, whereby a contract of insurance of the character involved or an obligation of the nature of an indemnity, fidelity, or surety bond is made, continued, or renewed, if issued—

(1) By a nonresident alien individual, a foreign partnership, or a foreign corporation, as insurer, and the policy or other instrument is not signed or countersigned by an officer or agent of the insurer in a State, Territory, or the District of Columbia in which the insurer is authorized to do business; and

(2) To or for, or in the name of, a domestic corporation, domestic partnership, or an individual resident of the United States, against or with respect to hazards, risks, losses, or liabilities wholly or partly within the United States; or

(3) To or for, or in the name of, a foreign corporation, foreign partnership, or nonresident individual, engaged in a trade or business within the United States, with respect to hazards, risks, or liabilities wholly within the United States.

For definition of the term "indemnity bond", see section 4372(c).

(b) *Life insurance, sickness, and accident policies and annuity contracts.* Section 4371(2) imposes a tax upon each policy of insurance or annuity contract, or certificate, binder, covering note, receipt, memorandum, cablegram, letter, or other instrument by whatever name called, whereby a contract of insurance or an annuity contract is made, continued, or renewed, if issued—

(1) By a nonresident alien individual, a foreign partnership, or a foreign corporation, as insurer, and the policy or other instrument is not signed or countersigned by an officer or agent of the insurer in a State, Territory, or the District of Columbia in which such insurer is authorized to do business, or if not so signed or countersigned, the insurer is not subject to tax under section 819; and

(2) To any person with respect to the life or hazards to the person of a citizen or resident of the United States.

(c) *Reinsurance.* Section 4371(3) imposes a tax upon each policy of reinsurance, certificate, binder, covering note, receipt, memorandum, cablegram, letter, or other instrument by whatever name called, whereby a contract of reinsurance is made, continued, or renewed, if issued—

(1) By a nonresident alien individual, a foreign partnership, or a foreign corporation, as reinsurer, and the policy or other instrument is not signed or countersigned by an officer or agent of the reinsurer in a State, Territory, or the District of Columbia in which such reinsurer is authorized to do business; and

(2) To any person against, or with respect to, any of the hazards, risks, losses, or liabilities covered by contracts described in section 4371 (1) or (2).

(d) *Exempt indemnity bonds.* The tax imposed by section 4371 does not apply to any indemnity bond described in section 4373(2).

§ 47.4371–2 Rate and computation of tax.

(a) *Rate of tax.* (1) The tax under section 4371(1) is imposed at the rate of 4 cents on each dollar, or fractional part thereof, of the premium charged.

(2) The tax under section 4371 (2) and (3) is imposed at the rate of 1 cent on each dollar, or fractional part thereof, of the premium charged.

(b) *Computation of tax.* The tax is measured strictly by the amount of the premium charged. The time and method of payment of the premium are immaterial; the tax liability attaches if the insurance becomes effective, even though the premium is never paid. The full rate of tax applies to each fractional part of a dollar of the premium charged. For example, upon a premium charge of $10.10, the tax at the rate of 4 cents amounts to 44 cents, and at the rate of 1 cent amounts to 11 cents.

(c) *Meaning of premium.* For purposes of the regulations in this part, the term "premium" means the agreed price or consideration for assuming and carrying the risk or obligation, and includes any additional assessment or charge which may be assessed or charged under the contract, whether payable in one sum or installments.

§ 47.4372 Statutory provisions; definitions.

SEC. 4372 *Definitions*—(a) *Foreign insurer or reinsurer.* For purposes of this subchapter, the term "foreign insurer or reinsurer" means an insurer or reinsurer who is a nonresident alien individual, foreign partnership, or a foreign corporation. The term includes a nonresident alien individual, foreign partnership, or foreign corporation which shall become bound by an obligation of the nature of an indemnity bond.

(b) *Policy of casualty insurance.* For purposes of section 4371(1), the term "policy of casualty insurance" means any policy (other than life) or other instrument by whatever name called whereby a contract of insurance is made, continued, or renewed.

(c) *Indemnity bond.* For purposes of this subchapter, the term "indemnity bond" means any instrument by whatever name called whereby an obligation of the nature of an indemnity, fidelity, or surety bond is made, continued, or renewed. The term includes any bond for indemnifying any person who shall have become bound or engaged as surety, and any bond for the due execution or performance of any contract, obligation, or requirement, or the duties of any office or position, and to account for money received by virtue thereof, where a premium is charged for the execution of such bond.

(d) *Insured.* For purposes of section 4371(1), the term "insured" means—

(1) A domestic corporation or partnership, or an individual resident of the United States, against, or with respect to, hazards, risks, losses, or liabilities wholly or partly within the United States, or

(2) A foreign corporation, foreign partnership, or nonresident individual, engaged in a trade or business within the United States, against, or with respect to, hazards, risks, losses, or liabilities within the United States.

(e) *Policy of life, sickness, or accident insurance, or annuity contract.* For purposes of section 4371(2), the term "policy of life, sickness, or accident insurance, or annuity contract" means any policy or other instrument by whatever name called whereby a contract of insurance or an annuity contract is made, continued, or renewed with respect to the life or hazards to the person of a citizen or resident of the United States.

(f) *Policy of reinsurance.* For purposes of section 4371(3), the term "policy of reinsurance" means any policy or other instrument by whatever name called whereby a contract of reinsurance is made, continued, or renewed against, or with respect to, any of the hazards, risks, losses, or liabilities covered by contracts taxable under paragraph (1) or (2) of section 4371.

[Sec. 4372 as amended and in effect Jan. 1, 1959]

§ 47.4373 Statutory provisions; exemptions.

SEC. 4373 *Exemptions.* The tax imposed by section 4371 shall not apply to—

(1) *Domestic agent.* Any policy, indemnity bond, or annuity contract signed or countersigned by an officer or agent of the insurer in a State, Territory, or District of the United States within which such insurer is authorized to do business.

(2) *Indemnity bond.* Any indemnity bond required to be filed by any person to secure payment of any pension, allowance, allotment, relief, or insurance by the United States, or to secure a duplicate for, or the payment of, any bond, note, certificate of indebtedness, war-saving certificate, warrant, or check, issued by the United States.

[Sec. 4373 as amended and in effect Jan. 1, 1959]

§ 47.4374 Statutory provisions; affixing of stamps.

SEC. 4374 *Affixing of stamps.* Any person to or for whom or in whose name any policy, indemnity bond, or annuity contract referred to in section 4371 is issued, or any solicitor or broker acting for or on behalf of such person in the procurement of any such instrument shall affix the proper stamps to such instrument.

[Sec. 4374 as originally enacted and in effect Jan. 1, 1959]

§ 47.4374–1 Affixing of stamps.

(a) *General.* (1) Documentary stamps shall be used in payment of the tax. Requisite stamps must be affixed to the first instrument whereby the taxable contractual relationship is created, continued, or renewed, whether it be a letter of acceptance, a cablegram, or other instrument by whatever name called. Where the instrument which creates or evidences the contractual relationship is confirmed by a subsequent instrument, the latter shall bear a notation designating such prior instrument (referred to in this section as the original instrument) and showing that the requisite stamps have been affixed thereto and canceled.

(2) In any case where the amount of the premium is not definitely determined at the time of entering into the taxable contractual relationship, the stamps may be affixed to the receipts for monthly or other payments if proper notation be made upon such receipts identifying the original instruments to which they apply.

(3) The stamps shall be affixed by any person who is a party to the taxable contractual relationship, including any solicitor or broker acting for or on behalf of such person.

(b) *Subsequent instruments.* In case a subsequent instrument provides for the payment of a premium greater than that provided for in the original instrument, the subsequent instrument must have affixed thereto stamps equal to the tax imposed upon the additional premium charged and must bear a notation of the stamps affixed to the original instrument.

(c) *Affixing of stamps.* (1) Only documentary stamps shall be used in payment of the tax imposed by section 4371. See also §§ 47.6804–1 and 47.6804–2 for the appropriate use, denominations, and cancellation of such stamps.

(2) Documentary stamps may be purchased, and requisition forms for the purchase of such stamps may be obtained, from the sources and in the manner provided in § 47.6802–1. For provisions relating to distribution, supply, and redemption of stamps, see sections 6801 (§ 47.6801), 6802 (§ 47.6802), 6805 (§ 47.6805), and the regulations thereunder contained in Part 301 of this chapter (Regulations on Procedure and Administration), and § 47.6801–1.

(d) *Instruments without stamps or notation of stamping.* For provisions

relating to the penalty for failure to comply with the requirements of section 4374, see § 47.7270.

(e) *Record requirements.* For provisions relating to the requirements concerning records and the retention of policies for a period of 3 years, see § 47.6001–2.

Subpart I—Miscellaneous Provisions Applicable to Documentary Stamp Taxes

§ 47.4381 Statutory provisions; definitions.

SEC. 4381 *Definitions*—(a) *Certificates of indebtedness.* For purposes of the taxes imposed by sections 4311 and 4331, the term "certificates of indebtedness" means bonds, debentures, or certificates of indebtedness; and includes all instruments, however termed, issued by a corporation with interest coupons or in registered form, known generally as corporate securities.

(b) *Corporation.* For purposes of the taxes imposed by this chapter, the term "corporation" includes any investment trust or similar organization (or any person acting in behalf of such investment trust or similar organization) issuing, holding or dealing in shares or certificates of stock, or in certificates of indebtedness. For purposes of the tax imposed by section 4311, the term "corporation" also includes any receiver, trustee in bankruptcy, assignee, or other person having custody of property of, or charge of the affairs of, the corporation. Nothing contained in this subsection shall be construed to limit the effect of the definition of the term "corporation" provided in section 7701(a)(3).

(c) *Shares or certificates of stock.* For purposes of the regulations in this part, the term "stock" includes shares or certificates of stock. The term "stock" also includes shares or certificates of all corporations, joint-stock company, or insurance company (see § 47.7701). For purposes of the tax imposed by section 4321, the term "stock" also includes rights to subscribe for or to receive shares or certificates of stock (see paragraph (a) of § 47.4321–1). For purposes of the taxes imposed by sections 4301 and 4321, the term "shares or certificates of stock" includes shares or certificates of profits or of interest in property or accumulations.

(d) *Cross references.* For other definitions of general application, see §§ 47.0–2 and 47.7701.

[Sec. 4381 as amended and in effect Jan. 1, 1959]

§ 47.4381–1 Definitions.

(a) *Certificates of indebtedness.* The term "certificates of indebtedness" includes bonds, debentures, and certificates of indebtedness. Such term also includes all instruments, however termed, issued by a corporation with interest coupons or in registered form and known generally as corporate securities. The essence of a corporate security is marketability. An instrument is ordinarily considered to be marketable if it is issued in series, under a trust indenture, and in registered form or with interest coupons attached. For example, an instrument containing the essential features of a promissory note is included within the meaning of the term "certificates of indebtedness" if it has, in addition, the general characteristics of a corporate security. Whether or not an instrument is a certificate of indebtedness within the meaning of section 4381(a) is not determined by its name alone, but depends upon all the facts which can be derived from the face of the instrument, such as the form and terms of the instrument. The nature of the transaction or any act appearing outside of the instrument itself is immaterial for purposes of making such determination.

(b) *Corporation.* For purposes of the taxes imposed by sections 4301, 4311, 4321, 4331, 4361, and 4371, the term "corporation" includes associations, joint-stock companies, and insurance companies (see § 47.7701), as well as any investment trust or similar organization (or any person acting in behalf of such investment trust or similar organization) issuing, holding or dealing in shares or certificates of stock, or in certificates of indebtedness. In addition, for purposes of the tax imposed by section 4311, the term "corporation" also includes any receiver, trustee in bankruptcy, assignee, or other person having custody of property, or charge of the affairs, of the corporation.

(c) *Shares or certificates of stock.* For purposes of the regulations in this part, the term "stock" includes shares or certificates of stock. The term "stock" also includes shares or certificates of all corporations, joint-stock company, or insurance company (see § 47.7701). For purposes of the tax imposed by section 4321, the term "stock" also includes rights to subscribe for or to receive shares or certificates of stock (see paragraph (a) of § 47.4321–1). For purposes of the taxes imposed by sections 4301 and 4321, the term "shares or certificates of stock" includes shares or certificates of profits or of interest in property or accumulations.

(d) *Cross references.* For other definitions of general application, see §§ 47.0–2 and 47.7701.

§ 47.4382 Statutory provisions; exemptions.

SEC. 4382 *Exemptions*—(a) *Governments; certain associations.* The taxes imposed by this chapter shall not apply to—

(1) *Government and State obligations.* Any certificate of indebtedness, note, or other instrument, issued by the United States, or by any foreign government, or by any State, Territory, or the District of Columbia, or local subdivision thereof, or municipal or other corporation exercising the taxing power.

(2) *Domestic building and loan associations and mutual ditch or irrigation companies.* Shares or certificates of stock and certificates of indebtedness issued by domestic building and loan associations, savings and loan associations, cooperative banks, and homestead associations substantially all the business of which is confined to making loans to members, or by mutual ditch or irrigation companies.

(3) *Farmers', fruit growers', or cooperative associations.* Shares or certificates of stock and certificates of indebtedness issued by any farmers' or fruit growers' or like associations organized and operated on a cooperative basis for the purposes, and subject to the conditions, prescribed in section 521.

(b) *Certain reorganizations, etc.* The taxes imposed by sections 4301, 4311, 4321, 4331, and 4361 shall not apply to—

(1) *Corporate and railroad reorganization.* The issuance, transfer, or exchange of securities, or the making, delivery, or filing of conveyances, to make effective any plan of reorganization or adjustment—

(A) Confirmed under the Bankruptcy Act, as amended (11 U.S.C.),

(B) Approved in an equity receivership proceeding in a court involving a railroad corporation, as defined in section 77(m) of the Bankruptcy Act, as amended (11 U.S.C. 205(m)),

(C) Approved in an equity receivership proceeding in a court involving a corporation, as defined in section 106(8) of the Bankruptcy Act, as amended (11 U.S.C. 506), or

(D) Whereby a mere change in identity, form, or place of organization is effected, but only if the issuance, transfer, or exchange of securities, or the making, delivery, or filing of instruments of transfer or conveyances, occurs within 5 years from the date of such confirmation, approval, or change.

(2) *Orders of the Securities and Exchange Commission.* The issuance, transfer, or exchange of securities, or making or delivery of conveyances, to make effective any order of the Securities and Exchange Commission as defined in section 1083(a); but only if—

(A) The order of the Securities and Exchange Commission in obedience to which such issuance, transfer, exchange, or conveyance is made recites that such issuance, transfer, exchange, or conveyance is necessary or appropriate to effectuate the provisions of section 11(b) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79k(b)),

(B) Such order specifies and itemizes the securities and other property which are ordered to be issued, transferred, exchanged, or conveyed, and

(C) Such issuance, transfer, exchange, or conveyance is made in obedience to such order.

[Sec. 4382 as amended and in effect Jan. 1, 1959]

§ 47.4382–1 Exemptions.

(a) *Government and State obligations.* Section 4382(a)(1) exempts from the tax imposed by section 4311 or 4331 any certificate of indebtedness issued by the United States, or by any foreign government, or by any State, Territory, or the District of Columbia, or local subdivision thereof, or municipal or other corporation exercising the taxing power.

(b) *Stocks and certificates of indebtedness of domestic building and loan associations, etc.* Section 4382(a)(2) exempts from the tax imposed by section 4301, 4311, 4321, or 4331 any stock or certificate of indebtedness issued by a (1) domestic building and loan association, savings and loan association, cooperative bank, or homestead association, substantially all the business of which is confined to making loans to members, or (2) mutual ditch or irrigation company. For definition of the term "domestic building and loan association", see § 47.7701.

(c) *Stocks and certificates of indebtedness of farmers', fruit growers', or cooperative associations.* Section 4382(a)(3), exempts from the tax imposed by [illegible]

associations organized and operated on a cooperative basis for the purposes, and subject to the conditions, prescribed in section 521. For regulations under section 521, see Part 1 of this chapter (Income Tax Regulations).

(d) *Corporate and railroad reorganizations.* (1) Section 4382(b)(1) exempts from the taxes imposed by sections 4301, 4311, 4321, 4331, and 4361 the issuance, transfer, or exchange of securities, or the making, delivery, or filing of conveyances, to make effective any plan of reorganization or adjustment—

(i) Confirmed under the Bankruptcy Act, as amended (11 U.S.C.);

(ii) Approved in an equity receivership proceeding in a court involving a railroad corporation, as defined in section 77(m) of the Bankruptcy Act, as amended (11 U.S.C. 205(m));

(iii) Approved in an equity receivership proceeding in a court involving a corporation, as defined in section 106(3) of the Bankruptcy Act, as amended (11 U.S.C. 506); or

(iv) Whereby a mere change in identity, form, or place of organization is effected,

if the issuance, transfer, or exchange of securities, or the making, delivery, or filing of instruments of transfer or conveyance, occurs within 5 years from the date of such confirmation, approval, or change.

(2) Section 267 of the Bankruptcy Act (11 U.S.C. 667) also exempts from stamp tax the issuance, transfer, or exchange of securities, or the making or delivery of instruments of transfer under any plan of reorganization confirmed under chapter X of the Bankruptcy Act, as amended. However, by reason of the provisions of section 4382(b)(1) the exemption conferred by section 267 has no application to the issuance, transfer, or exchange of securities, or the making, delivery, or filing of conveyances, which occurs after 5 years from the date of confirmation or approval of the plan of reorganization.

(e) *Orders of the Securities and Exchange Commission.* Section 4382(b)(2) exempts from the taxes imposed by sections 4301, 4311, 4321, 4331, and 4361 the issuance, transfer, or exchange of securities, or the making or delivery of conveyances, to make effective any order of the Securities and Exchange Commission as defined in section 1083(a), if (1) the order of the Securities and Exchange Commission in obedience to which such issuance, transfer, or exchange of securities or conveyance is made recites that such issuance, transfer, or exchange of securities or conveyance is necessary or appropriate to effectuate the provisions of section 11(b) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79k(b)); (2) such order specifies and itemizes the securities and other property which are ordered to be issued, transferred, exchanged, or conveyed; and (3) such issuance, transfer, exchange, or conveyance is made in obedience to such order.

(f) *Alteration and modification of securities under the Interstate Commerce Act.* Section 20b of the Interstate Commerce Act (49 U.S.C. 20b) provides for alteration or modification of securities of a carrier as defined in section 20a(1). Paragraph (12) of such section 20b (by application of section 7852) makes sections 4301, 4311, 4321, 4331, and 4361, and any amendments thereto, unless specifically provided to the contrary, inapplicable to the issuance, transfer, or exchange of securities or the making or delivery of conveyances to make effective any alteration or modification effected pursuant to section 20b.

§ 47.4383 Statutory provisions; certain changes in partnerships.

SEC. 4383 *Certain changes in partnerships*—(a) *Continuing partnerships.* In the case of any share, certificate, right, or realty held by a partnership, no tax shall be imposed under section 4321, 4331, or 4361 by reason of any transfer of an interest in a partnership or otherwise, if—

(1) Such partnership (or another partnership) is considered as a continuing partnership (within the meaning of section 708), and

(2) Such continuing partnership continues to hold the share, certificate, right, or realty concerned.

(b) *Terminated partnerships.* If there is a termination of any partnership (within the meaning of section 708)—

(1) For purposes of this chapter, such partnership shall be treated—

(A) As having transferred all shares, certificates, and rights held by such partnership at the time of such termination; and

(B) As having executed an instrument whereby there was conveyed, for fair market value (exclusive of the value of any lien or encumbrance remaining thereon), all realty held by such partnership at the time of such termination; but

(2) Not more than one tax shall be imposed under section 4321, 4331, or 4361, as the case may be, by reason of such termination (and any transfer pursuant thereto) with respect to the shares, certificates, rights, or realty held by such partnership at the time of such termination.

[Sec. 4383 as added and in effect Jan. 1, 1959]

§ 47.4383–1 Certain changes in partnerships.

(a) *Continuing partnerships.* No tax shall be imposed under section 4321, 4331, or 4361 by reason of any transfer of an interest in a partnership holding shares, certificates, rights, or realty if such partnership (or another partnership) is considered to be a continuing partnership within the meaning of section 708 and if such shares, certificates, rights, or realty continue to be held, regardless of the name in which held, by the continuing partnership (or the continuing partnerships if more than one). For rules relating to continuations of partnerships, see section 708 and the regulations thereunder in Part 1 of this chapter (Income Tax Regulations). To the extent that the shares, certificates, rights, or realty do not continue to be so held, the taxes imposed by sections 4321, 4331, and 4361 will apply. For example, if a partner withdraws from a partnership under such circumstances that the withdrawal does not constitute a termination of the partnership under the provisions of section 708 and the regulations thereunder, and if the partnership transfers to him, in consideration for his withdrawal, stock owned by the partnership, the stock so transferred will be subject to tax. However, if the partner receives cash in consideration for his withdrawal, and the partnership retains the stock, no tax is imposed since the stock is held by a continuing partnership.

(b) *Termination of partnerships.* If there is a termination, within the meaning of section 708, of a partnership holding shares, certificates, rights, or realty, the partnership is considered, for purposes of the taxes imposed by sections 4321, 4331, and 4361, as having transferred at the time of such termination all of such shares, certificates, and rights, and as having executed at the time of such termination an instrument conveying, for fair market value (exclusive of the value of any lien or encumbrance remaining thereon), all realty. However, not more than one tax shall be imposed under each section with respect to such shares, certificates, rights, or realty by reason of a termination and any transfer pursuant thereto. Tax should be computed with respect to the transfer or conveyance deemed to occur under this paragraph. Any other deemed or actual transfer or conveyance which occurs by reason of the transaction resulting in the termination is not subject to tax. The operation of this paragraph may be illustrated by the following examples:

Example (1). Partnership AB owns 150 shares of X Corporation stock having a total actual value of $13,000 and real estate having a fair market value (exclusive of the value of any lien or encumbrance thereon) of $10,000. Partner B retires and receives 100 shares of X Corporation stock in liquidation of his entire partnership interest. Partner A receives the remainder of the partnership properties in liquidation of his entire partnership interest, and he continues to run the business as a sole proprietor. Partnership AB is terminated within the meaning of section 708 since the partnership business is no longer carried on by a partnership. Partnership AB is, therefore, considered to have executed an instrument conveying the real estate for $10,000 and to have transferred the X Corporation stock having a total actual value of $13,000. The transaction is subject to the taxes imposed by sections 4321 and 4361. No tax is imposed on the actual transfer of 100 shares of X Corporation stock to partner B or on the actual transfer and conveyance of the remaining stock and realty to partner A since such conveyance and transfers are made by reason of the transaction resulting in the termination.

Example (2). Partnership ABCD owns 1,000 shares of Y Corporation stock having a total actual value of $60,000. Partner A owns a 40 percent interest in the capital and profits of the partnership and partners B, C, and D each have a 20 percent interest. In January, 1960, partner A sells his partnership interest to E, and in September, 1960, partner B sells his partnership interest to F thereby causing a termination of the partnership within the meaning of section 708. The partnership is, therefore, considered to have transferred in September, 1960, the 1,000 shares of Y Corporation stock, and there is a tax under section 4321 with respect to such shares. No further tax is imposed with respect to the transaction. Inasmuch as A is not a partner in the partnership at the time of its termination, he incurs no liability for the tax imposed with respect to the 1,000 shares of stock.

Example (3). Partnership ABCDE terminates within the meaning of section 708 by reason of the sale by E of his partnership interest to F. Pursuant to the termination transaction, partners A and B withdraw from the partnership, receiving stock owned by the partnership in consideration for their withdrawal, under such circumstances that the withdrawal constitutes a liquidation under section 708 and the regulations thereunder. All of the stock owned by the partnership is considered to be transferred on termination and tax is imposed with respect to such stock, but no additional tax is imposed with respect to the stock actually distributed to partners A and B in liquidation of their partnership interest. Furthermore, no tax will be imposed on the transfer by partners A and B of the stock distributed to them to a new partnership AB if such transfer is made pursuant to an agreement entered into concurrently with and as a result of the transaction in which partnership ABCDE is terminated.

(c) *Application of section.* Only those partnership changes occurring on or after January 1, 1959, shall be considered in determining whether a partnership is a continuing or terminated partnership under section 708.

§ 47.4384 Statutory provisions; liability for tax.

SEC. 4384 *Liability for tax.* The taxes imposed by this chapter shall be paid by any person who makes, signs, issues, or sells any of the documents and instruments subject to the taxes imposed by this chapter, or for whose use or benefit the same are made, signed, issued, or sold. The United States or any agency or instrumentality thereof shall not be liable for the tax with respect to an instrument to which it is a party, and affixing of stamps thereby shall not be deemed payment for the tax, which may be collected by assessment from any other party liable therefor.

[Sec. 4384 as amended and redesignated and in effect Jan. 1, 1959]

§ 47.4384–1 Liability for tax.

(a) *In general.* Except as otherwise provided in paragraphs (c) and (d) of this section, the tax is payable by any of the parties to a taxable transaction. For example, in the case of the transfer of stock, the liability therefor is imposed upon the transferor, the transferee, and the corporation whose stock is transferred (if there is a transfer of record). The parties to the transaction may agree among themselves as to which shall pay the tax, but such agreement does not relieve the others from their liability in the event it is not carried out. No provisions, by-laws, or rules, of any exchange, and no custom, shall exempt any person from payment of the tax imposed.

(b) *Liability of subscriber for tax on issuance of stock.* The liability of a subscriber for the tax imposed by section 4301 on an issuance of stock to him by a corporation extends only to that portion of the total tax on all issuances of stock by such corporation for the day that the total actual value of the shares or certificates of stock issued to him in that day bears to the total actual value of all shares or certificates issued by the corporation in such day. For example, if a total of 100 shares of stock having a total actual value of $1,800 are issued in one day by a corporation, the tax would be $1.80. If A were issued in that day 10 shares of such stock having a total value of $180, his liability for tax would be 18 cents.

(c) *United States as party to transaction.* The United States or any agency or instrumentality thereof shall not be liable for tax in respect of an instrument to which it is a party regardless of the capacity in which it acts. However, the transaction is not exempt from tax, and the nonexempt party to the transaction shall be liable for the tax. The affixing of stamps to the instrument by the United States or any agency or instrumentality thereof does not constitute payment of the tax, and the nonexempt party remains liable for the tax in such case.

(d) *State as party to transaction.* Except with respect to the tax imposed by section 4361, where a State or a political subdivision thereof, acting in its governmental capacity, is a party to a taxable transaction, under chapter 34 of the Code, the transaction will not be exempt from the documentary stamp tax merely by reason of the governmental character of one of the parties. The legal incidence of the tax in such a case rests upon the other party to the transaction. However, if in a taxable transaction with a private party, a State or political subdivision thereof is acting in its proprietary function, both parties will be liable for the tax. Where all parties to a transaction are States or political subdivisions thereof, acting in their governmental capacity, no tax shall be imposed. See section 4383(b) and paragraph (b) of § 47.4362–1 for the exemption of any State, Territory, political subdivision thereof, or the District of Columbia from the tax imposed by section 4361 on conveyances of realty to which it is a party, regardless of the capacity in which it acts.

Subpart J—Administrative Provisions Applicable to Documentary Stamp Taxes

§ 47.6001 Statutory provisions; notice or regulations requiring records, statements, and special returns.

SEC. 6001 *Notice or regulations requiring records, statements, and special returns.* Every person liable for any tax imposed by this title, or for the collection thereof, shall keep such records, render such statements, make such returns, and comply with such rules and regulations as the Secretary or his delegate may from time to time prescribe. Whenever in the judgment of the Secretary or his delegate it is necessary, he may require any person, by notice served upon such person or by regulations, to make such returns, render such statements, or keep such records, as the Secretary or his delegate deems sufficient to show whether or not such person is liable for tax under this title.

[Sec. 6001 as originally enacted and in effect Jan. 1, 1959]

§ 47.6001–1 Records of sales and transfers of stock.

(a) *Brokers, dealers, etc.* All persons who are wholly or partly engaged in the business of buying, selling, or transferring stock, either at public or private sale, whether or not they are members of an exchange, including persons engaged in transactions known as "matched", "on-order", "pass-outs", or "give-ups", or transactions which are settled directly between the seller and buyer or which are cleared or adjusted through a clearinghouse or otherwise, or persons (other than those described in paragraph (b) of this section) engaged in accepting and procuring the transmission of orders for purchase or sale of shares of stock shall keep a record as to each transaction showing:

(1) Date of transaction.
(2) Name of customer for whom sold or loaned, or for whom bought or borrowed.
(3) Name of party to whom sold or loaned, or from whom bought or borrowed.
(4) Name of correspondent broker, if any.
(5) Number of shares involved.
(6) Name and description of stock.
(7) Selling price of stock, per share.
(8) Amount of tax paid.

(b) *Correspondent brokers.* Persons engaged in accepting and procuring the transmission of orders for the purchase or sale of stock, to be executed at a brokerage office or at an exchange, board of trade, or similar place, shall keep a record as to each transaction showing:

(1) Date of acceptance and transmission of order.
(2) Name of person from whom accepted.
(3) Name and address of person to whom transmitted.
(4) Name and description of stock.
(5) Number of shares involved.
(6) Whether purchase or sale.
(7) Selling price of stock, per share.
(8) Date of execution of order.

(c) *Floor brokers, etc.* Brokers known as strictly "floor brokers", "two-dollar men", or "room traders", whether their transactions are settled directly between seller and buyer, by "matched", "on-order", "pass-out", "scratch sale", or "give-up", or by any other kind of sale or purchase, or whether their transactions are cleared through a clearinghouse or otherwise, shall, in lieu of the record prescribed in paragraph (a) of this section, keep a record as to each transaction showing:

(1) Date of transaction.
(2) Name of seller.
(3) Name of purchaser.
(4) Name and description of stock.
(5) Number of shares involved.
(6) Selling price of stock, per share.
(7) Whether the transaction is "matched", "on-order", "pass-out", "scratch sale", or "give-up".
(8) Name of person to whom "given-up".

(d) *General.* Persons keeping records as prescribed in this section may incorporate therein additional information for their own use, which should be entered, however, so as not to interfere with the recording of the information required by this section. These records must be kept in permanent form for a period of at least three years from the date any part of the tax is paid on the transaction and must be available for ready inspection by internal revenue officers.

§ 47.6001–2 Records with respect to foreign insurance policies.

(a) *Records to be kept by solicitors, brokers, etc.* No return or statement showing a list of policies or other instruments subject to the tax imposed by section 4371 is required from any person to or for whom, or in whose name, such policy or other instrument is issued, or from the solicitor or broker acting directly or indirectly for or on behalf of such person. However, each person, solicitor, or broker, accepting, placing, soliciting, or making, directly or indirectly, or paying or receiving compensation with respect to, a policy or other instrument subject to the tax imposed by section 4371 shall keep a record of such policy or other instrument for a period of at least three years from the date any part of the tax was paid with respect to the issuance thereof and shall be prepared to furnish full information to the district director at any time upon demand.

(b) *Records to be kept by policy holder.* The person having control or possession of a policy of insurance, or reinsurance, or other instrument to which documentary stamps must be affixed shall retain such instrument for at least 3 years from the date any part of the tax was paid with respect to the issuance thereof to enable internal revenue officers to ascertain whether the requisite stamps have been affixed and cancelled.

§ 47.6801 Statutory provisions; authority for establishment, alteration, and distribution.

SEC. 6801 *Authority for establishment, alteration, and distribution.*—(a) *Establishment and alteration.* The Secretary or his delegate may establish, and from time to time alter, renew, replace, or change the form, style, character, material, and device of any stamp, mark, or label under any provision of the laws relating to internal revenue.

(b) *Preparation and distribution of regulations, forms, stamps and dies.* The Secretary or his delegate shall prepare and distribute all the instructions, regulations, directions, forms, blanks, and stamps; and shall provide proper and sufficient adhesive stamps and other stamps or dies for expressing and denoting the several stamp taxes.

[Sec. 6801 as originally enacted and in effect Jan. 1, 1959]

§ 47.6801–1 Establishment of meter machines and stamps.

The Commissioner of Internal Revenue or his delegate shall have the authority to set the standards for and to approve meter machines for use in the sale of documentary stamps and to prescribe instructions and requirements governing the circumstances and conditions under which such machines may be used. In addition to the documentary stamps customarily sold and used for the payment of taxes imposed under chapter 34 of the Code, stamps produced by authorized documentary stamp meter machines shall be proper for such use. See paragraph (a)(5) of § 47.0–2 for the definition of the term "documentary stamps".

§ 47.6802 Statutory provisions; supply and distribution.

SEC. 6802 *Supply and distribution.* The Secretary or his delegate shall furnish, without prepayment, to—

(1) *Postmaster General.* The Postmaster General a suitable quantity of adhesive stamps (other than the stamps on playing cards), coupons, tickets, or such other devices as may be prescribed by the Secretary or his delegate pursuant to section 6302(b) or this chapter, to be distributed to, and kept on sale by, the various postmasters in the United States in all post offices of the first and second classes, and such post offices of the third and fourth classes as—

(A) Are located in county seats, or

(B) Are certified by the Secretary to the Postmaster General as necessary;

(2) *Designated depositary of the United States.* Any designated depositary of the United States a suitable quantity of adhesive stamps to be kept on sale by such designated depositary;

(3) *State agents.* Any person who is—

(A) Duly appointed and acting as agent of any State for the sale of stock transfer stamps of such State, and

(B) Designated by the Secretary or his delegate for the purpose,

a suitable quantity of such adhesive stamps as are required by section 4301, to be kept on sale by such person.

[Sec. 6802 as originally enacted and in effect Jan. 1, 1959]

§ 47.6802–1 Where stamps may be purchased and when unused documentary stamps may be used or resold.

(a) *Where stamps may be purchased.* Documentary stamps may be purchased from (1) district directors and other duly authorized officials; (2) postmasters in all post offices of the first and second classes and such post offices of the third and fourth class as are located in county seats; (3) designated depositaries of the United States (see section 6802(2) (§ 47.6802)); and (4) State agents designated under paragraph (3) of section 6802 (§ 47.6802).

(b) *Use or resale of unused documentary stamps.* Unused documentary stamps may be used at any time in payment of any tax imposed by section 4301, 4311, 4321, 4331, 4361, or 4371, or may be resold by the owner at any time. For redemption of stamps see section 6805 (§ 47.6805).

§ 47.6804 Statutory provisions; attachment and cancellation.

SEC. 6804 *Attachment and cancellation.* Except as otherwise expressly provided in this title, the stamps referred to in section 6801 shall be attached, protected, removed, canceled, obliterated, and destroyed, in such manner and by such instruments or other means as the Secretary or his delegate may prescribe by rules or regulations.

[Sec. 6804 as originally enacted and in effect Jan. 1, 1959]

§ 47.6804–1 Stamps to be used and denominations thereof.

(a) *Documentary stamps only to be used.* Except as provided in section 4353 and § 47.4353–1, documentary stamps only shall be used in payment of the stamp taxes imposed by sections 4301, 4311, 4321, 4331, 4361, and 4371. Ordinary postage stamps shall not be used in payment of documentary stamp taxes.

(b) *Use of stamps.* Wherever feasible, a stamp tax shall be paid by the use of a single stamp. If a stamp of a denomination equal to the tax is not readily available, the smallest practical number of stamps shall be used. A stamp affixed to an instrument and canceled cannot lawfully be removed therefrom and affixed to another instrument requiring a stamp (see section 7208 (§ 47.7208), relating to penalties).

(c) *Denominations of documentary stamps.* Documentary stamps (other than stamps issued by authorized meter machines) are issued in the following denominations: 1 cent, 2 cents, 3 cents, 4 cents, 5 cents, 8 cents, 10 cents, 20 cents, 25 cents, 40 cents, 50 cents, 55 cents, 80 cents, $1, $1.10, $1.65, $2, $2.20, $2.75, $3, $3.30, $4, $5, $10, $20, $30, $50, $60, $100, $500, $1,000, $5,000, $6,000, and $10,000.

§ 47.6804–3 Cancellation of stamps.

(a) *Stamps affixed by adhesion.* Except as provided by paragraph (b) of this section, a person using or affixing a stamp shall cancel it and so deface it as to render it unfit for reuse by marking it with his initials and the day, month, and year when the affixing occurs. (See section 7271(1) (§ 47.7271), relating to penalties.) Such marking shall be made by writing or stamping in indelible ink or by perforating with a machine or punch. However, the stamp shall not be so defaced as to prevent ready determination of its denomination and genuineness. (See paragraph (b) of § 47.6804–1 relating to the prohibition against reuse of used stamps.)

(b) *Stamps printed directly on documents.* A stamp printed directly on a document by an authorized meter machine is considered cancelled provided the printing on such stamp contains the date of such printing and a number which identifies the machine which printed the stamp.

§ 47.6805 Statutory provisions; redemption of stamps.

SEC. 6805 *Redemption of stamps*—(a) *Authorization.* The Secretary or his delegate, subject to regulations prescribed by him, may, upon receipt of satisfactory evidence of the facts, make allowance for or redeem such of the stamps, issued under authority of any internal revenue law, as may have been spoiled, destroyed, or rendered useless or unfit for the purpose intended, or for which the owner may have no use.

(b) *Method and conditions of allowance.* Such allowance or redemption may be made, either by giving other stamps in lieu of the stamps so allowed for or redeemed, or by refunding the amount or value to the owner thereof, deducting therefrom, in case of repayment, the percentage, if any, allowed to the purchaser thereof; but no allowance or redemption shall be made in any case until the stamps so spoiled or rendered useless shall have been returned to the Secretary or his delegate, or until satisfactory proof has been made showing the reason why the same cannot be returned; or, if so required by the Secretary or his delegate, when the person presenting the same cannot satisfactorily trace the history of said stamps from their issuance to the presentation of his claim as aforesaid.

(c) *Time for filing claims.* No claim for the redemption of, or allowance for, stamps shall be allowed under this section unless

§ 47.7271 Statutory provisions; penalties for offenses relating to stamps.

Sec. 7271 *Penalties for offenses relating to stamps.* Any person who with respect to any tax payable by stamps—

(1) *Failure to attach or cancel stamps, etc.* Fails to comply with rules or regulations prescribed pursuant to section 6804 (relating to attachment, cancellation, etc., of stamps), unless such failure is shown to be due to reasonable cause and not willful neglect; or

* * * * *

(3) *Instruments.* Makes, signs, issues, or accepts, or causes to be made, signed, issued, or accepted, any instrument, document, or paper of any kind or description whatsoever without the full amount of tax thereon being duly paid; or

* * * * *

shall be liable for each such offense to a penalty of $50.

[Sec. 7271 as originally enacted and in effect Jan. 1, 1959]

§ 47.7271–1 Cross references.

For other provisions relating to penalties, see the applicable sections of the regulations in Part 301 of this chapter (Regulations on Procedure and Administration).

§ 47.7701 Statutory provisions; definitions.

Title 12—BANKS AND BANKING

Chapter V—Federal Home Loan Bank Board

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[No. FSLIC-1,281]

PART 563—OPERATIONS

Loans and Investments

JANUARY 26, 1962.

Resolved that, notice and public procedure having been duly afforded (26 F.R. 9557, 10239), and all relevant matter presented or available having been considered by it, the Federal Home Loan Bank Board, upon the basis of such consideration and of determination by it of the advisability of amendment of section 563.9 of the Rules and Regulations for Insurance of Accounts (12 CFR 563.9) as hereinafter set forth, and for the purpose of effecting such amendment, hereby amends said section 563.9 to read as follows, effective February 10, 1962:

§ 563.9 Loans and investments.

(a) *General provisions.* Insured institutions may lend and otherwise invest their funds to the extent and in the manner authorized by law: *Provided*, That, except as hereinafter provided, no insured institution may make, or invest its funds in, loans on the security of real estate located more than 50 miles from its principal office and outside the territory within which the institution was operating on June 27, 1934, without the prior approval of the Corporation: *Provided further*, That

(1) Any insured institution may, to the extent that it has legal power to do so and without further approval of the Corporation, make, or invest its funds in, loans in an aggregate amount not exceeding 20 percent of such institution's assets on the security of real estate located more than 50 miles but not more than 100 miles from such institution's principal office and outside such territory;

(2) Any insured institution may, to the extent it has legal power to do so, without regard to said 20-percent-of-assets limitation and without further approval of the Corporation, make, or invest its funds in, any loan at least 20 percent of which is guaranteed or as to which a commitment to guarantee has been made under the provisions of the Servicemen's Readjustment Act of 1944 or chapter 37 of title 38, United States Code, as now or hereafter amended; and

(3) Any insured institution may, to the extent it has legal power to do so, without regard to said 20-percent-of-assets limitation and without further approval of the Corporation, purchase any loan secured by a first lien on a home or a combination home and business property which is used in part for business purposes and in part for bona fide residential purposes for not more than four families, located in other territory more than 50 miles from its principal office: *Provided*, That as to each loan, such insured institution will be protected by insurance as provided in the National Housing Act or the Servicemen's Readjustment Act of 1944 or chapter 37 of title 38, United States Code, as now or hereafter amended.

(b) *Applications and approvals.* Each application by an insured institution to the Corporation for approval to make, or invest its funds in, loans beyond any limitation of this section shall be supported by a map showing the area in which the institution desires to lend and invest its funds; shall state the type and character of loans to be made, including the maximum percentages of loans to appraisals; shall show the need in such territory for such loans by such institution; and shall establish that such operation is consistent with sound and economical home financing, and that the applicant is equipped to service the loans adequately. Every loan made pursuant to any approval by the Corporation of any such application shall comply with the terms and conditions of such approval.

(Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

Resolved further that the Board hereby finds that, as the foregoing amendment relieves restriction, deferment of the effective date thereof for the period set forth in section 4(c) of the Administrative Procedure Act is not required under said section 4(c).

By the Federal Home Loan Bank Board.

HARRY W. CAULSEN,
Secretary.

Title 14—AERONAUTICS AND SPACE

Chapter III—Federal Aviation Agency

SUBCHAPTER A—PROCEDURAL REGULATIONS

[Reg. Docket No. 1060]

PART 408—ENFORCEMENT PROCEDURES

Revision

The primary purpose of this amendment is to enlarge the scope of § 408.25 (a) so as to provide a certificate holder with an opportunity to have a full hearing before a Hearing Officer of the Agency in certificate actions taken by the Administrator pursuant to section 609 of the Act; the provision of a new Subpart D—Rules of Practice for Hearings in FAA Certificate Actions; and other amendments of Subparts A, B, and C to reflect new enforcement procedures and the decentralization of responsibility.

The safety enforcement processes of the Federal Aviation Agency presently afforded a certificate holder against whom action is proposed an opportunity to confer with Agency counsel and be informally heard with respect to his position in the matter. It has been decided that in addition to this procedure the certificate holder should be afforded an opportunity for a full evidentiary hearing. Accordingly, a panel of Hearing Officers has been established in the Office of the Administrator. They are authorized to act for him and to decide matters on his behalf. They will, upon request, hold a hearing at a time and place convenient to the parties in which the Agency counsel will bear the burden of proof with respect to the charges, witnesses will be called and subjected to examination and cross-examination, and a full record will be made of all of the testimony and evidence. Upon this record the Hearing Officer will decide the issues and determine whether the proposed certificate action should be carried out or whether it should be modified or terminated.

At the present time certificate holders whose certificate is suspended or revoked by Order issued on behalf of the Administrator may appeal to the Civil Aeronautics Board. The provision of a hearing before an Agency Hearing Officer will in no way affect the certificate holder's continued right to make such an appeal. However, if he elects to appeal, he may also elect to have the appeal considered on the basis of the record of testimony and evidence taken before the FAA Hearing Officer, and thus avoid the necessity of duplication in this phase of the hearing process. It is the expectation of the Agency that hearings will be so fairly conducted by the assigned FAA Hearing Officer and the facts and other relevant evidence so fully developed in the course of the hearing before him that in most cases this record will be satisfactory to the certificate holder, as well as to the Agency, and that appeals will thus be taken on the record without the necessity of completely new hearing before the Civil Aeronautics Board. Where requested, however, the certificate holder will be entitled to obtain a Board hearing on the issues in dispute.

The rules of practice which will guide the Hearing Officer and the parties where such a hearing has been requested closely parallel those which presently govern safety enforcement proceedings before the Civil Aeronautics Board. They should therefore provide a familiar pattern to attorneys and other interested persons who heretofore have been involved in the hearing process as conducted by designated Examiners of the Civil Aeronautics Board.

This revision also serves to prescribe enforcement procedures which conform to those now being utilized by the Agency, particularly those modifications required by the recent decentralization of responsibility to handle cases involving

scheduled and supplemental carriers and their personnel, air taxi operations, commercial operations and certificated repair stations. The previous division of authority, which reserved unto the General Counsel the authority for handling cases involving such certificate holders, has now been modified to permit the handling of such cases by the General Counsel and the Regional Counsels.

Since this amendment is not a substantive rule and one of Agency procedure, notice of public procedure hereon is unnecessary and the amendment may be made effective upon less than 30 days' notice.

In consideration of the foregoing, the Federal Aviation Agency hereby promulgates a revised Part 408 of the regulations of the Administrator of the Federal Aviation Agency (14 CFR Part 408), effective February 7, 1962:

Subpart A—Introduction

§ 408.1 Definition of terms.

As used in this part:

(a) "Act" means the Federal Aviation Act of 1958.

(b) "Administrator" means the Administrator of Federal Aviation Agency, or his designee.

(c) "Agency" means the Federal Aviation Agency.

(d) "Agency counsel" means the representative of the Federal Aviation Agency Office of General Counsel or Office of Regional Counsel, who represents the Administrator in an enforcement proceeding.

(e) "Answer" means the pleading which is filed by the holder of certificate in response to a Notice of Proposed Certificate Action, replying to the charges contained in the notice, when a hearing has been requested before an Agency Hearing Officer.

(f) "Board" means the Civil Aeronautics Board.

(g) "Certificate" means a type certificate, production certificate, airworthiness certificate, airman certificate (including medical certificate), air carrier operating certificate, air navigation facilities certificate, or air agency certificate, issued by the Civil Aeronautics Administration or the Federal Aviation Agency.

(h) "Hearing Officer" means a Federal Aviation Agency officer assigned to hear Agency proceedings for the amendment, modification, suspension or revocation of a certificate, conducted under the rules contained in this part.

(i) "Notice of Proposed Certificate Action" means a notice issued by Agency counsel to a certificate holder, under section 609 of the Federal Aviation Act proposing to amend, modify, suspend or revoke his certificate, and specifying the charges or grounds upon which the proposed action is based.

(j) "Parties" means the Agency counsel, certificate holder, and intervenors who appear before a Hearing Officer in an Agency enforcement proceeding.

(k) "Request for a Hearing" means a written statement, given by a certificate holder to Agency counsel, in response to a Notice of Proposed Certificate Action, requesting a formal hearing before an Agency Hearing Officer.

(l) "Respondent" means the holder of a certificate who has requested a formal hearing before an Agency Hearing Officer, in defense against a Notice of Proposed Certificate Action.

Subpart B—Processes Used in Enforcement

§ 408.11 Report channels.

Violations of the Act or any rule, regulation, or order issued thereunder, may be reported by any person having knowledge of such violations, to the appropriate personnel of the Agency assigned to one of the Agency's regional or district offices. Such a report will be investigated by personnel of the Agency and the results of such investigation will constitute the basis for determining the enforcement action to be taken by the Agency.

§ 408.12 Investigations.

(a) Under section 313 of the Act, the Administrator may conduct public hearings or investigations and is authorized to take evidence, issue subpoenas, take depositions, and compel testimony in the manner provided in section 1004 of the Act.

(b) For the purpose of investigating alleged violations of the Act, or of any rule, regulation or order issued thereunder, the Administrator's authority under sections 313 and 1004 has been delegated to the General Counsel, Deputy General Counsel, and to all Associate General Counsel and Regional Counsel.

Subpart C—Actions Taken in Enforcement

§ 408.21 Filed for Record and Letter of Correction.

A report of a violation may be filed for record by the reporting inspector or may be terminated by a Letter of Correction, if it appears, after investigation, that the violation was so minor and unintentional as not to require disciplinary or remedial action, and the standards prescribed by Manual of Procedure 22 are satisfied. Such actions will be subject to review by Regional Flight Standards and Regional Counsels' Offices.

§ 408.22 Reprimands.

A letter may be sent to the violator by the General Counsel or Regional Counsel, reprimanding him for a minor violation. A Letter of Reprimand will terminate the action, but the violation will be taken into consideration in determining the action to be taken with respect to any future violations committed by the same person.

§ 408.23 Civil penalties.

Under section 901 of the Act, any person who violates any provision of Titles III, V, VI, or XII of the Act, or any rule, regulation, or order issued thereunder, shall be subject to a civil penalty not to exceed $1,000 for each such violation.[1] Such civil penalty may be compromised by the Administrator. In the event imposition of a civil penalty is contemplated, and it is considered advisable to compromise such penalty, a Regional Counsel or the General Counsel will send a letter to the violator advising as to the charges against him, stating what laws, rules, regulations, or orders have been violated, and affording an opportunity to compromise the civil penalty. The violator may submit to the official signing the letter, either orally or in writing, any material or information in answer to the charges, explaining, mitigating or denying the occurrence of the violation, or showing extenuating circumstances. Any material or information thus submitted will be considered in making the final determination as to probable existence of liability for a civil penalty, or the amount for which it will be compromised. If an offer is tendered to compromise the penalty for a specific amount, a certified check or money order in that amount, made payable to the Federal Aviation Agency, should be attached. The General Counsel, or the Regional Counsel handling the case, will accept or refuse the offer of compromise. If the offer of compromise is accepted, the violator will be notified by letter of its acceptance and that such acceptance constitutes full settlement of any civil penalties incurred by the violator. If a compromise settlement of the civil penalty cannot be effected, the Agency will, in an appropriate case, instigate proceedings in the United States District

[1] The same is true for violations of Title VII, but the Civil Aeronautics Board has cognizance of those violations.

Court, pursuant to section 903 of the Act, for the purpose of collecting the civil penalty due.

§ 408.24 Seizure of aircraft.

(a) *Authority to seize aircraft.* Under section 903 of the Act, when an aircraft is involved in a violation for which a civil penalty may be imposed upon its owner or operator, such aircraft may be summarily seized by any State or Federal law enforcement officer or Federal Aviation Agency safety inspector authorized in an order of seizure issued by the Assistant Administrator of the region in which the aircraft is located.

(b) *Custody of seized aircraft.* When an aircraft has been seized pursuant to this section, it will be placed in the nearest available adequate public storage facility in the judicial district in which the seizure is made.

(c) *Notice of seizure.* When an aircraft has been seized pursuant to this section, a written notice and a copy of this section will be sent without delay by the Assistant Administrator to the registered owner of, and to other persons having a recorded interest in, the aircraft according to the records of the Federal Aviation Agency. The written notice will state:

(1) The time, date, and place of seizure;

(2) The name and address of the custodian of the aircraft;

(3) The reasons for the seizure, including the violations believed, or judicially determined, to have been committed; and

(4) The amount which may be tendered;

(i) As an offer in compromise of any civil penalties which might have been incurred as a result of the alleged violation, or

(ii) As payment of civil penalties which have been imposed by a Federal Court as a result of the established violations.

(d) *Report of seizure.* When an aircraft has been seized pursuant to this section, a report will be transmitted immediately by the Regional Counsel to the United States Attorney for the judicial district in which the seizure is made, requesting the United States Attorney to institute proceedings for the enforcement of the lien.

(e) *Release of seized aircraft.* When an aircraft has been seized pursuant to this section, it will be released by direction of the Assistant Administrator under any one of the following conditions:

(1) Upon payment of the civil penalty or the amount agreed upon in compromise, and the costs incurred in connection with the seizure, storage, and maintenance of the aircraft;

(2) Upon seizure of the aircraft pursuant to process of a Federal court in proceedings in rem for enforcement of a lien against the aircraft, or notification by the United States Attorney of refusal to institute such proceedings; or

(3) Upon deposit of a bond in such amount and with such sureties as the Assistant Administrator may prescribe, conditioned upon payment of the penalty or the amount agreed upon in compromise, and the costs incurred in connection with the seizure, storage, and maintenance of the aircraft.

§ 408.25 Certificate action.

(a) Under section 609 of the Act, the Administrator, or his authorized agents, may reinspect any civil aircraft, aircraft engine, propeller, appliance, air navigation facility, or air agency, or may reexamine any civil airman. If, as a result of any such reinspection, reexamination, or any other investigation, it is determined that safety in air commerce or air transportation and the public interest requires such action, the Administrator, or his authorized agents, may issue an order amending, modifying, suspending, or revoking, in whole or in part, any type certificate, production certificate, airworthiness certificate, airman certificate, air carrier operating certificate, air navigation facilities certificate, or air agency certificate. Prior to issuing such an order, the Agency's General Counsel or Regional Counsel will advise the certificate holder as to the charges or other reasons relied upon by the Administrator for the proposed action and, except in case of emergency, provide him an opportunity to answer any charges and to be heard as to why such certificate should not be amended, modified, suspended or revoked. At his option, the holder may (1) admit the charges and surrender his certificate, (2) answer the charges in writing, (3) request an opportunity to be heard in an informal conference with the Agency counsel, or (4) request and receive a formal hearing, either in lieu of or in addition to the informal conference, before a Hearing Officer appointed by and representing the Administrator. If the holder admits the charges, submits an answer in writing only, or seeks a conference, the General Counsel or Regional Counsel, after due consideration of the answer and information submitted by the certificate holder, shall issue the Order of the Administrator. If a full hearing is requested, the Order of the Administrator will be issued by the Hearing Officer following a hearing conducted in accordance with Subpart D of this part. The Hearing Officer may issue his order orally or in writing.

(b) Any person whose certificate is affected by an order issued under this section may appeal to the Civil Aeronautics Board. The filing of an appeal with the Board stays the effectiveness of the Administrator's Order unless the Administrator advises the Board that an emergency exists and safety in air commerce or air transportation requires the immediate effectiveness of his Order, in which event the Order shall remain effective and the Board shall finally dispose of the appeal within 60 days after being so advised by the Administrator.

§ 408.26 Military aircraft.

When a report reveals that violations have been committed by members of the Armed Forces of the United States or those civilian employees of the Department of Defense who are subject to the provisions of the Uniform Code of Military Justice, while engaged in the performance of their official duties, copies of the report will be forwarded by the General Counsel or Regional Counsel to the appropriate military authorities in order that they may take such disciplinary actions as they consider appropriate and report back to the Administrator thereon.

§ 408.27 Criminal violations.

Sections 902 and 1203 of the Act provide criminal penalties for persons who knowingly and willfully violate specified provisions of the Act, or any order, rule or regulation issued thereunder. If a possible violation of any of the criminal provisions of the Act comes to the attention of the inspector or other employee of the Agency, a report shall be made to the Office of General Counsel who will, in an appropriate case, refer the report to the United States Department of Justice for criminal prosecution of the person who committed the offense. Violations of other federal statutes within the investigatory jurisdiction of another agency which come to the attention of an inspector or other employee shall be immediately reported to such agency in a manner provided by Manual of Procedure 22.

Subpart D—Rules of Practice for Hearings in FAA Certificate Proceedings

§ 408.31 Applicability of rules.

The provisions of this subpart shall govern all proceedings before Hearing Officers of the Federal Aviation Agency where a hearing has been requested by a certificate holder in response to a Notice of Proposed Certificate Action, proposing the amendment, modification, suspension, or revocation of an airman certificate.

§ 408.32 Appearances.

Any party to a proceeding may appear and be heard in person or by attorney.

§ 408.33 Request for hearing.

If, following the issuance of a Notice of Proposed Certificate Action, the certificate holder elects to have a formal hearing, he shall so request by checking the appropriate box on the form which is forwarded to him with the Notice of Proposed Certificate Action. He shall return this to Agency counsel within fifteen (15) days, together with an answer to the allegations contained in the Notice of Proposed Certificate Action. If an informal conference with Agency counsel is requested and held, then the certificate holder shall have ten (10) days thereafter within which to request a formal hearing. Agency counsel will forthwith forward the Request and Answer to the Hearing Officer with a copy of the Notice of Proposed Certificate Action. The Hearing Officer will docket the Notice, Request and Answer as of the time received by him.

§ 408.34 Hearing Officers' powers.

Hearing Officers shall have the following powers:

(a) To give notice concerning, and hold, prehearing conferences and hearings;

(b) To administer oaths and affirmations;

(c) To examine witnesses;

(d) To issue subpoenas and to take or cause depositions to be taken;

(e) To rule upon offers of proof and receive evidence;

(f) To regulate the course of the hearing;

(g) To hold conferences, before or during the hearing, for the settlement or simplification of issues by consent of the parties;

(h) To dispose of procedural requests or similar matters; and

(i) To issue an Order.

§ 408.35 Disqualification of Hearing Officer.

The Hearing Officer shall withdraw from a case if at any time he deems himself disqualified.

§ 408.36 Pleadings.

(a) *Notice of Proposed Certificate Action.* In cases transmitted to the Hearing Officer, the Notice of Proposed Certificate Action shall constitute the statement of the facts upon which the action is proposed.

(b) *Answer.* The certificate holder, concurrently with his Request for a Hearing, shall submit an Answer to the Notice. The Answer shall be responsive to the allegations set forth in the Notice and any allegation not denied shall be deemed admitted.

(c) *Averments.* Averments in an answer, or other pleading, to which no responsive pleading is required, will be taken as denied.

§ 408.37 Time limitations.

(a) *Request for Hearing and Answer.* The Request for a Hearing and Answer to the Notice shall be served on Agency counsel within fifteen (15) days from the time of service of the Notice of Proposed Certificate Action.

(b) *Request served after expiration of period.* If a Request for a Hearing is submitted subsequent to the fifteen-day period specified in paragraph (a) but prior to issuance of an order, it shall be submitted by Agency counsel to the Hearing Officer, and when, in the opinion of the Hearing Officer, good cause is shown for failure to request a hearing within the time prescribed, he may, in his discretion, order a hearing.

§ 408.38 Service and filing.

The Request for Hearing and Answer to the Notice shall be mailed to the Agency counsel who originated the notice, and shall be deemed timely filed if postmarked before the end of the time limitation therefor. All other pleadings, motions or documents shall, at the time of filing, be served upon all other parties. Service shall be made by delivering a copy to the person to be served or by mailing a copy to him at the last address filed with the Agency by the certificate holder as required by the Civil Air Regulations. When a party is represented by an attorney, service shall be made upon the attorney.

§ 408.39 Amendment of Notice and Answer.

At any time more than ten (10) days prior to the date of hearing, either party may amend his Notice, or Answer, or other pleading, by filing the same with the Hearing Officer and by serving a copy thereof on all other parties. After that time, amendment shall be allowed only at the discretion of the Hearing Officer. Where amendment to an initial pleading has been permitted, the Hearing Officer shall allow the other parties a reasonable opportunity to answer. A pleading may be amended at any time to conform to the evidence.

§ 408.40 Withdrawal of Notice or Request for Hearing.

The Agency counsel may withdraw his Notice and the certificate holder may withdraw his Request for Hearing, at any time prior to hearing.

§ 408.41 Motions.

(a) *Motion to dismiss.* A respondent, in lieu of his Answer, may file a motion to dismiss, for failure of the allegations of the Notice to state a violation of the Civil Air Regulations, or lack of qualification of the Respondent. If the motion is denied, the Respondent shall file his Answer within ten (10) days.

(b) *Motion for judgment on the pleadings.* After the pleadings are closed, either party may move for judgment on the pleadings.

(c) *Motion to strike.* Upon motion of either party, the Hearing Officer may order stricken from any pleading an insufficient allegation or defense, or any immaterial, impertinent or scandalous matter.

(d) *Motion for more definite statement.* The certificate holder may file, in lieu of his Answer, a motion that the allegations set forth in the Notice be made more definite and certain. If the motion is granted, the Agency counsel shall comply within ten (10) days. If the motion is denied, the certificate holder shall then file his Answer within ten (10) days thereafter.

(e) *Motion for production of documents.* Upon motion of any party showing good cause therefor, the Hearing Officer may order any party to produce any designated documents, papers, books, accounts, letters, photographs, objects, or tangible things, not privileged, which constitute or contain evidence relevant to the subject matter of the hearing, and which are in the party's possession, custody or control, in the manner provided by Rule 34, Federal Rules of Civil Procedure.

(f) *Consolidation of motions.* A party who makes a motion under this section shall join with it all other motions then available to him. Any objections not so raised will be deemed to be waived.

§ 408.42 Intervention.

Any person may move for leave to intervene in a proceeding and may become a party thereof, if the Hearing Officer, following transmittal of the case for hearing, finds that such person may be bound by the order to be rendered in the proceeding or has a property or financial interest which may not be adequately represented by existing parties: *Provided*, That such intervention would not unduly broaden the issues or delay the proceeding. Except for good cause shown, no motion for leave to intervene will be entertained if filed less than ten (10) days prior to hearing.

§ 408.43 Depositions.

After a Request for Hearing and the Answer have been filed, testimony may be taken by deposition at the instance of any party to the proceeding in accordance with the provisions of section 1004 of the Act or Rule 26 of the Federal Rules of Civil Procedure.

§ 408.44 Notice of hearing.

The Hearing Officer to whom the case is assigned shall give the parties adequate notice of the date and place where the hearing will be held. The Hearing Officer may hold the hearing at the city in which there is located the Regional Headquarters, the originating Federal Aviation Agency office, or the Flight Standards District Office nearest to the residence of the certificate holder, or at such other location or locations as the Hearing Officer may direct.

§ 408.45 Subpoenas and witness fees.

(a) Subpoenas requiring the attendance of witnesses or the production of documentary or tangible evidence for the purpose of taking depositions or at a hearing may be issued by the Hearing Officer to whom the case is assigned upon application by any party to a proceeding; the application for production of documentary or tangible evidence shall show the general relevance and reasonable scope of the evidence sought.

(b) Witnesses shall be entitled to the same fees and mileage as are paid to witnesses in the courts of the United States. The fees shall be paid by the party at whose instance the witness is subpoenaed or appears.

(c) The provisions of paragraph (a) of this section are not applicable to the attendance of Federal Aviation Agency officers or employees or the production of documentary evidence in the custody of such persons at a hearing. Applications for documents shall be processed as motions under § 408.41(e) and applications for the attendance of officers and employees of the Agency shall be addressed to the Hearing Officer, in writing, and shall set forth the need of the party for such attendance.

§ 408.46 Evidence.

(a) *Right to full and true disclosure of the facts.* Every party shall have the right to present his case or defense by oral or documentary evidence, to submit evidence in rebuttal and to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(b) *Burden of proof.* The burden of proof shall be upon the Agency counsel, except with respect to affirmative defenses.

§ 408.47 Argument and submittals.

At the hearing, the Hearing Officer shall give the parties adequate opportunity for the presentation of arguments in support of motions, objections and final Order. The Hearing Officer may determine whether argument shall be oral or in writing. At the conclusion of a hearing, either party shall be afforded

an opportunity to submit, in writing, proposed findings and conclusions and supporting reasons therefor.

§ 406.48 Record.

The testimony and exhibits together with all papers, requests and rulings filed in the proceedings shall constitute the exclusive basis for the issuance of an order. A transcript may be obtained by any party from the official reporter upon payment of the fees fixed therefor.

§ 406.49 Federal Rules of Civil Procedure.

In any situation not provided for or controlled by the foregoing rules of practice, the Federal Rules of Civil Procedure, where applicable, shall govern.

§ 406.50 Order of Hearing Officer.

(a) The Hearing Officer may issue an order orally or in writing.

(b) The order, oral or written, shall include a statement of findings and conclusions upon all material issues of fact and law presented in the record and the appropriate sanction or denial thereof.

(c) If the order is rendered in writing, it shall be served upon the parties.

(d) The order of the Hearing Officer may amend, modify, suspend, or revoke the Respondent's certificate as proposed, or in a lesser degree, may rescind the Notice of Proposed Certificate Action, or may, if the Hearing Officer deems such to be equitable and in the public interest, terminate the action upon agreement by the parties for disposition of the matter by the payment of a civil penalty in the agreed amount.

(e) If the order amends, modifies, suspends or revokes the Respondent's certificate, it shall advise the respondent of his right of appeal to the Civil Aeronautics Board.

Issued in Washington, D.C., on January 30, 1962.

N. E. HALABY,
Administrator.

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 61-NY-111]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration of Federal Airways, Associated Control Areas, and Control Area Extension

The purpose of these amendments to §§ 600.6091, 600.6487, 601.6487 and 601.1100 is to:

1. Alter low altitude VOR Federal airway No. 91 by deleting the Benson, Vt., VOR from the route description and substituting therefor, the intersection of the Glens Falls, N.Y., VORTAC 032° and the Burlington, Vt., VOR 187° radials.

2. Alter low altitude VOR Federal airway No. 487 by deleting the Benson VOR from the route description and substituting therefor, the intersection of the Cambridge, N.Y., VOR 002° and the Glens Falls VORTAC 032° radials.

3. Alter the Rutland, Vt., control area extension by deleting the Benson VORTAC from the description and substituting coordinates based on the geographical site of the Benson VORTAC.

The above actions are required due to fire damage to the Benson VOR. Since these amendments are minor in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, these amendments will become effective more than 30 days after publication.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582), the following actions are taken:

§ 600.6091 [Amendment]

1. In the text of § 600.6091 (14 CFR 600.6091) "Benson, Vt., VOR; Burlington, Vt., VOR;" is deleted and "INT of the Glens Falls VORTAC 032° and the Burlington, Vt., VOR 187° radials; Burlington VOR;" is substituted therefor.

2. Section 600.6487 (14 CFR 600.6487, 26 F.R. 3463) is amended to read:

§ 600.6487 VOR Federal airway No. 487 (Poughkeepsie, N.Y., to Cambridge, N.Y.).

From the Poughkeepsie, N.Y., VOR via the Cambridge, N.Y., VOR; to the INT of the Cambridge VOR 002° and the Glens Falls, N.Y., VORTAC 032° radials.

3. The heading of § 601.6487 (14 CFR 600.6487, 26 F.R. 3463) is amended to read:

§ 601.6487 VOR Federal airway No. 487 control areas (Poughkeepsie, N.Y., to Cambridge, N.Y.).

4. Section 601.1100 (14 CFR 601.1100, 26 F.R. 12516) is amended to read:

§ 601.1100 Control area extension (Rutland, Vt.).

That airspace N of Rutland, Vt., bounded on the NW by VOR Federal airway No. 91, on the NE by VOR Federal airway No. 141 and on the S by the Lebanon, N.H., VOR 272° radial; and the airspace S of Rutland, bounded on the N by the Lebanon VOR 272° radial, on the E by a line 24 miles E of and parallel to the Cambridge, N.Y., VOR 002° radial, on the S by a line 5 miles N of and parallel to the Glens Falls, N.Y., VORTAC 090° radial and on the W by VOR Federal airway No. 91.

These amendments shall become effective 0001 e.s.t. April 5, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on January 31, 1961.

[Airspace Docket No. 60-NY-88]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

PART 608—SPECIAL USE AIRSPACE

Alteration of Federal Airway and Associated Control Areas, Continental Control Area, and Restricted Area

On March 21, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 2375) stating that the Federal Aviation Agency proposed to extend low altitude VOR Federal airway No. 435 from the Attica, Ohio, VOR direct to the Carleton, Mich., VOR and that the control areas associated with this segment of Victor 435 would extend upward from 1,200 feet above the surface, or if appropriate, 500 feet below the minimum IFR en route altitude when established. In addition, it was proposed that the portion of the airway within R-5502 would be used only after obtaining prior approval from the appropriate authority.

On November 4, 1961, a supplemental notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 10451) stating that the control areas associated with this segment of Victor 435 would extend upward from 700 feet above the surface to the base of the continental control area until such time as all of the control areas in the vicinity of Attica and Carleton can be altered by applying Amendment 60-21 to Part 60 of the Civil Air Regulations. In addition, it was proposed to alter the continental control area to include R-5502 and to designate the Federal Aviation Agency, Cleveland ARTC Center as the controlling agency of R-5502.

The Air Transport Association of America concurred with the amendments as proposed in the notice and supplemental notice. The Department of the Air Force offered no objection to the amendments proposed in the notice. The Department of the Navy offered no objections to the amendments proposed in the notice and supplemental notice provided that the restricted area requirements for NAS Grosse Ile are not abrogated. As stated in the supplemental notice, the amendments proposed herein would promote more efficient and expeditious movement of air traffic by permitting unrestricted use of Victor 435 and the airspace above 14,500 feet MSL within R-5502 when the restricted area is not being used for its designated purpose.

Airspace Docket No. 61-NY-87 as published in the FEDERAL REGISTER on December 16, 1961 (26 F.R. 12071) amended the regulations of the Administrator by altering the dimensions of the Cleveland, Ohio, control area extension (§ 601.1100) and by excluding the portion which would coincide with R-5502. Action taken herein designates the FAA as controlling agency of R-5502 and provides for joint use of a portion of the restricted area for en route traffic. Therefore, it appears to be in the public interest to also permit joint use of a portion of R-5502 for terminal operations associated with the Cleveland terminal area when the restricted area is not being used for its designated purpose. Accordingly, action is taken herein to alter the Cleveland control area extension to permit use of the portion within R-5502 after prior approval has been obtained from the appropriate authority.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated herein and in the notice and supplemental notice, the following actions are taken:

1. Section 600.6435 (14 CFR 600.6435) is amended to read:

§ 600.6435 VOR Federal airway No. 435 (Rosewood, Ohio, to Carleton, Mich.).

From the Rosewood, Ohio, VORTAC via the Attica, Ohio, VORTAC; to the Carleton, Mich., VORTAC. That airspace within R-5502 shall be used only after obtaining prior approval from the appropriate authority.

2. Section 601.6435 (14 CFR 601.6435) is amended to read:

§ 601.6435 VOR Federal airway No. 435 control areas (Rosewood, Ohio, to Carleton, Mich.).

All of VOR Federal airway No. 435.

§ 601.1158 [Amendment]

3. In the text of § 601.1158 (26 F.R. 12071) "excluding the portion which coincides with R-5502; and the area extending from the 50-mile radius area bounded on the SE by VOR Federal airway No. 43 and on the NW by VOR Federal airway No. 443 E alternate." is deleted and "and the area extending from the 50-mile radius area bounded on the SE by VOR Federal airway No. 43 and on the NW by VOR Federal airway No. 443 E alternate. The airspace within R-5502 shall be used only after obtaining prior approval from the appropriate authority." is substituted therefor.

§ 601.7101 [Amendment]

4. In the text of § 601.7101 (26 F.R. 1289), "R-5502, La Carne, Ohio." is added.

§ 608.55 [Amendment]

5. In the text of § 608.55, R-5502 La Carne, Ohio (26 F.R. 7200) "Controlling agency. Federal Aviation Agency, Cleveland ARTC Center." is added.

These amendments shall become effective 0001 e.s.t. April 5, 1962.

Issued in Washington, D.C., on January 31, 1962.

Title 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 8235 c.o.]

PART 13—PROHIBITED TRADE PRACTICES

Master Mechanic Mfg. Co. et al.

Subpart—Advertising falsely or misleadingly: § 13.170 *Qualities or properties of product or service:* § 13.170-43 *Heating;*[1] § 13.195 *Safety:* § 13.195-60 *Product.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Master Mechanic Mfg. Co. et al., Burlington, Wis., Docket 8235, Oct. 16, 1961]

In the Matter of Master Mechanic Mfg. Co., a Corporation, and Harry J. Allen, A. E. McFarland, and Margaret Allen, Individually and as Officers of Said Corporation

Consent order requiring manufacturers in Burlington, Wis., of their immersion electrode-type "Zip Instant Water Heater", to cease representing falsely in advertisements in newspapers and magazines, and by circulars and catalogs, that the device would heat any amount of water instantly and that under ordinary conditions of use it was harmless; and to attach to the device a "warning" and statement that for safe use the directions attached or enclosed should be followed.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Master Mechanic Mfg. Co., a corporation, and its officers, and Harry J. Allen, A. E. McFarland and Margaret Allen, individually and as officers of said corporation, and respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of respondents' electric water heating device "Zip Instant Water Heater", or any substantially similar device, whether sold under the same name or any other name, do forthwith cease and desist from:

1. Representing in any manner that other than a small amount of water can be heated instantly with said device;

2. Representing in any manner that said device is shockproof;

3. Representing in any manner that said device is harmless without adding the qualification that the said device must be used according to directions.

4. Distributing or selling said device unless there is attached thereto the word "caution" or "warning" together with a statement that for safe use of said device the directions for use thereof should be followed, which directions shall be attached to or enclosed with said device.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 16, 1961.

By the Commission.

PART 13—PROHIBITED TRADE PRACTICES

Star Fruit Co. et al

Subpart—Discriminating in price under section 2, Clayton Act—payment or acceptance of commission, brokerage or other compensation under 2(c): § 13.820 *Direct buyers.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 2, 49 Stat. 1527; 15 U.S.C. 13) [Cease and desist order, Star Fruit Co. et al., Lake Alfred, Fla., Docket 8406, Oct. 17, 1961]

In the Matter of Star Fruit Company, a Corporation, and Norman V. Huff, Robert V. Huff, and Mary H. Grantham, Individually and as Officers of Said Corporation

Consent order requiring packer-distributors of citrus fruit in Lake Alfred, Fla., to cease violating section 2(c) of the Clayton Act by paying commissions or brokerage to some of their brokers and direct buyers purchasing for their own accounts for resale.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Star Fruit Company, a corporation, and its officers, and Norman V. Huff, Robert V. Huff, and Mary H. Grantham, individually and as officers of Star Fruit Company, and respondents' agents, representatives and employees, directly or through any corporate, partnership, sole proprietorship, or other device in connection with the sale of citrus fruit or fruit products in commerce, as "commerce" is defined in the Clayton Act, do forthwith cease and desist from: Paying, granting or allowing, directly or indirectly, to any buyer or to anyone acting for or in behalf of, or who is sub-

Title 31—MONEY AND FINANCE: TREASURY

Chapter V—Foreign Assets Control, Department of the Treasury

PART 500—FOREIGN ASSETS CONTROL REGULATIONS

Relation of This Chapter to Other Laws and Regulations

The Foreign Assets Control Regulations, 31 CFR 500.101–500.808 are being amended as follows:

Section 500.101(b) is being amended to make clear that licenses issued under Part 515 of this chapter authorize transactions prohibited under section 620(a) of the Foreign Assistance Act of 1961 (Public Law 87–195).

Section 500.101(b) is hereby amended to read as follows:

(b) No license or authorization contained in or issued pursuant to this chapter shall be deemed to authorize any transaction to the extent that it is prohibited by reason of the provisions of any law or statute other than Section 5(b) of the Trading with the Enemy Act, as amended, or any proclamation, order or regulation other than those contained in or issued pursuant to this chapter or pursuant to section 620(a) of the Foreign Assistance Act of 1961.

(Sec. 5, 40 Stat. 415, as amended; 50 U.S.C., App. 5. E.O. 9193, July 6, 1942, 7 F.R. 5205; 3 CFR 1943 Cum. Supp., E.O. 9980, August 20, 1948, 13 F.R. 4891; 3 CFR 1948 Supp.)

Effective date. This amendment shall become effective 12:01 a.m., e.s.t., February 7, 1962.

AUTHORITY: §§ 515.201 to 515.801 issued under sec. 620(a), Public Law 87–195 and Proclamation 3447, 27 F.R. 1085.

§ 515.201 Prohibitions.

(a) The importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba is prohibited except as authorized by the Secretary of the Treasury (Proclamation 3447).

(b) The effective date of this prohibition is 12:01 a.m., e.s.t., February 7, 1962 (Proclamation 3447).

§ 515.202 Promulgation of regulations.

Pursuant to Proclamation 3447, the Secretary of the Treasury hereby promulgates the following regulations.

§ 515.301 Definitions of licenses.

(a) The definitions of license, general license, and specific license contained in §§ 500.316, 500.317 and 500.318 of this chapter shall apply to this part.

(b) No regulation, ruling, instruction, or license authorizes an importation prohibited under § 515.201 unless the regulation, ruling, instruction, or license is issued by the Treasury Department and specifically refers to this part. No regulation, ruling, instruction or license referring to this part shall be deemed to authorize any transaction prohibited by § 500.201 of this chapter unless the regulation, ruling, instruction or license specifically refers to § 500.201.

§ 515.401 Reference to amended sections.

The provisions of § 500.401 of this chapter shall apply to this part.

§ 515.402 Effect of amendment of sections of this chapter or of other orders, etc.

Any amendment, modification, or revocation of any section of this chapter or of any order, regulation, ruling, instruction, or license issued thereunder shall not unless otherwise specifically provided be deemed to affect any act done or omitted to be done, or any suit or proceeding had or commenced in any civil or criminal case, prior to such amendment, modification, or revocation, and all penalties, forfeitures, and liabilities under any such section, order, regulation, ruling, instruction or license shall continue and may be enforced as if such amendment, modification, or revocation had not been made.

§ 515.501 Effect of subsequent license or authorization.

No license or other authorization contained in this chapter or otherwise issued thereunder shall be deemed to authorize or validate any transaction effected prior to the issuance thereof, unless such license or other authorization specifically so provides.

§ 515.502 Exclusion from licenses and authorizations.

The provisions of § 500.503 shall apply to this part.

§ 515.503 Passengers baggage general license.

The importation of goods otherwise prohibited under this part which are brought into the United States as baggage by any person arriving in the United States is hereby licensed, provided that such goods are not in commercial quantities and are not imported for resale.

§ 515.601 Records and reports.

The provisions of §§ 500.601 and 500.602 of this chapter shall apply to this part.

§ 515.701 Penalties.

Persons violating this part may be subject to the penalties of (a) section 592, 594 and 595a of the Tariff Act of 1930, as amended (19 U.S.C. 1592, 1594 and 1595a); (b) section 545 of the Criminal code (18 U.S.C. 545) and (c) section 1001 of the Criminal Code (18 U.S.C. 1001) and the penalties of any other applicable laws and regulations.

§ 515.801 Procedures.

(a) General licenses: General licenses are issued authorizing under appropriate terms and conditions certain types of transactions which are subject to the prohibitions set forth in § 515.201. It is the policy of Foreign Assets Control not to grant applications for specific licenses authorizing transactions to which the provisions of an outstanding general license are applicable. Persons availing themselves of general licenses are required to file reports and statements in the form and in accordance with the instructions specified in the licenses, when the licenses so provide.

(b) Specific licenses—general course of procedure: Transactions subject to the prohibitions set forth in § 515.201 which are not authorized by general license may be effected only under specific license. The specific licensing activities of Foreign Assets Control are performed by the Foreign Assets Control Division of the Treasury Department, Washington, D.C., and the Federal Reserve Bank of New York. When an unusual problem is presented, the proposed action is cleared with the Director of Foreign Assets Control or such person as he may designate.

(c) The provisions of § 500.801 (b) (2), (3), (4), (5), and (6) of this chapter and §§ 500.803, 500.804, 500.805, and 500.806 of this chapter shall apply to this part, except that Form TFAC–5 shall be used in lieu of Form TFAC–1 when making applications for specific licenses.

(d) Any action which the Secretary of the Treasury is authorized to take pursuant to Proclamation 3447 may be taken by the Director, Foreign Assets Control or by any other person to whom the Secretary of the Treasury has delegated authority so to act.

SUBCHAPTER B—CARRIERS BY MOTOR VEHICLES

PART 205—REPORTS OF MOTOR CARRIERS

Motor Carrier Annual Report Form D (Class I Motor Carriers of Passengers)

At a Session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 25th day of January A.D., 1962.

The matter of annual reports of Class I motor carriers of passengers being under further consideration, and the changes to be made by this order being minor changes in the data to be furnished, rule-making procedures under section 4(a) of the Administrative Procedure Act, 5 U.S.C. 1003, being deemed unnecessary:

It is ordered, That § 205.3a of the order of December 8, 1960, in the matter of Motor Carrier Annual Report Form D (Class I Motor Carriers of Passengers), be, and it is hereby, modified and amended, with respect to annual reports for the year ended December 31, 1961, and subsequent years, to read as shown below.

It is further ordered, That § 205.3a be modified and amended to read as follows:

§ 205.3a Annual reports of Class I carriers of passengers.

Commencing with reports for the year ended December 31, 1961, and thereafter, until further order, all Class I motor carriers of passengers, as defined in § 181.02–1, viz. of this chapter, carriers with average annual gross operating revenues (including interstate and intrastate) of $200,000 or more, from passenger motor carrier operations, are required to file annual reports in accordance with Motor Carrier Annual Report From D (Passenger) which is attached to and made a part of this section.[1] Such annual report shall be filed in duplicate in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D.C., on or before March 31 of the year following the year to which it relates.

(Sec. 204, 49 Stat. 546, as amended; 49 U.S.C. 304. Interpret or apply sec. 220, 49 Stat. 563, as amended; 49 U.S.C. 320)

And it is further ordered, That a copy of this order and of Motor Carrier Annual Report Form D (Passenger) shall be served on all Class I motor carriers of passengers subject to its provisions, and upon every trustee, receiver, executor, administrator, or assignee of any such motor carrier, and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary of the Commission in Washington, D.C., and by filing it with the Director, Office of the Federal Register.

Proposed Rule Making

FEDERAL AVIATION AGENCY

[14 CFR Part 601]

[Airspace Docket No. 61-FW-20]

CONTROLLED AIRSPACE

Proposed Alteration; Supplemental Notice

In a notice of proposed rule making published in the FEDERAL REGISTER as Airspace Docket No. 61-FW-20, on September 14, 1961 (26 F.R. 8600), it was stated that the Federal Aviation Agency proposed to designate a control area extension within 5 miles either side of the 132° True bearing from the Key West, Fla., radio range extending from the radio range to the Marathon, Fla., control area extension (§601.1234) excluding the portion below 2,000 feet MSL.

Subsequent to publication of the notice, the controlled airspace requirements in the Key West terminal area have been reviewed attendant to the provisions of new holding pattern procedures effective January 11, 1962. These procedures were developed to accommodate the increasing variety of aircraft speeds and operating altitudes and flight levels in the IFR environment. In addition, the procedures provide for the containment of aircraft holding maneuvers within the holding pattern areas designed for such operation. However, it is recognized that a number of these holding pattern areas require the designation of additional controlled airspace to encompass the increased dimensions of such areas. Thus, with the designation of additional controlled airspace, the pilot need only adhere to the standardized operating procedures and limitation for his type aircraft to remain within controlled airspace.

To fulfill additional controlled airspace requirements, for the implementation of these procedures in the Miami, Fla., Air Route Traffic Control Center area, the Federal Aviation Agency is considering the redesignation of the Key West control area extension 1233 (§ 601.1233) as that airspace bounded on the north by the Key West control area extension (§ 601.1319) and low altitude VOR Federal airway No. 35, on the east by a line 5 miles east of and parallel to the 186° True bearing from the Marathon radio beacon, on the south by latitude 24°-00'00" N., and on the west by a line 5 miles west of and parallel to the southwest course of the Key West radio range, excluding the portion below 2,000 feet MSL and excluding the portion which would coincide with the Key West Warning Area (W-465). This would provide additional controlled airspace for the protection of aircraft in holding patterns at Dorado, Fla., intersection (intersection of a 132° True bearing from the Key West radio range and a 232° True bearing from the Marathon RBN) and Casa, Fla., intersection (intersection of a 312° True bearing to the Key West radio range and an 035° True bearing to the Marathon RBN).

The above control area extension § 601.1233 would include that airspace now encompassed by the Marathon, Fla., and Sombrero Key, Fla., control area extensions (§§ 601.1234 and 601.1475), thereby permitting the revocation of these areas, and would encompass the airspace under consideration in the original proposal which is needed for the protection of aircraft arriving and departing the Key West Terminal area via the Dorado and Casa intersections.

In order to provide interested persons time to adequately evaluate this proposal, as modified herein, and an opportunity to submit additional written data, views or arguments, the date for filing such material will be extended to March 15, 1962.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), I hereby give notice that the time within which comments will be received for consideration on Airspace Docket No. 61-FW-20 is extended to March 15, 1962. Communications should be submitted in triplicate to the Assistant Administrator, Southern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 52 Fairlie Street, Atlanta 3, Ga.

This amendment is proposed under section 307(a), and 1110, 72 Stat. 749 and 800; 49 U.S.C. 1348 and 1510, and Executive Order 10854, 24 F.R. 9565.

Issued in Washington, D.C., on February 1, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

[7 CFR Part 926]

HANDLING OF TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIF.

Notice of Proposed Rule Making

Consideration is being given to the following proposals submitted by the Industry Committee, established under the amended marketing agreement and Order No. 926, as amended (7 CFR Part 926), regulating the handling of Tokay grapes grown in San Joaquin County, California, as the agency to administer the terms and provisions thereof. This is a regulatory marketing program effective under the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674):

(a) That an operating reserve be established in the maximum amount of $20,000 which approximates one-half the average expenses of the Industry Committee for one season.

(b) That the Industry Committee, at the end of each season, carryover in said operating reserve any excess assessment funds collected during such season up to, but not exceeding, 10 percent of the season's annual budget: *Provided*, That the total funds in such operating reserve do not exceed the aforesaid amount specified in paragraph (a).

(c) That funds in said operating reserve be used by the Industry Committee to cover (1) any authorized expenses incurred by such committee during any season when assessment income is less than such expenses, and (2) necessary expenses of liquidation in the event of termination of the amended marketing agreement and order.

(d) That, upon such termination, any funds not required to defray the necessary expenses of liquidation be disposed of in such manner as the Secretary may determine to be appropriate: *Provided*, That, to the extent practical, such funds be returned pro rata to the shippers from whom such funds were collected.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Room 2077, South Building, Washington 25, D.C., not later than the 20th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

[Docket No. AO-294-A1]

IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN NORTH DAKOTA AND MINNESOTA

Determination on Basis of Results of Referendum on Proposed Amendments to Order

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674), and the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Grand Forks, North Dakota, on June 28, 1961, pursuant to notice thereof which was published June 26, 1961, in the FEDERAL REGISTER (26 F.R. 5577), upon proposed amendments to Marketing Agreement No. 135 and Order No. 949 regulating the handling of Irish potatoes grown in certain designated counties in North Dakota and Minnesota. The recommended decision (26 F.R. 8947) and decision (26 F.R. 10058) of the Assistant Secretary of Agriculture setting forth the proposed amendments to the marketing agreement and order were published in the FEDERAL REGISTER on September 22, 1961, and October 26, 1961, respectively. The Assistant Secretary also issued an order (26 F.R. 10058) directing that a referendum be conducted among producers of potatoes grown in certain designated counties of North Dakota and Minnesota to determine whether the requisite majority of such producers favor or approve issuance of the proposed amendments to Order No. 949.

It is hereby determined, on the basis of the results of the referendum conducted pursuant to the aforesaid referendum order, that the issuance of the proposed amendments to Order No. 949 regulating the handling of Irish potatoes grown in certain designated counties of North Dakota and Minnesota, is not approved or favored (a) by at least two-thirds of the producers of potatoes who participated in such referendum and who, during the determined representative period (July 1, 1960, to July 1, 1961) were engaged within the counties of Pembina, Walsh, Cavalier, Towner, Grand Forks, Nelson, Steele, Traill, Cass, Richland, and Ramsey of the State of North Dakota and Kittson, Marshall, Red Lake, Pennington, Polk, Norman, Mahnomen, Wilken, Otter Tail, Becker, and Clay of the State of Minnesota in the production of potatoes for market grown in such production area, or (b) by producers of potatoes who participated in the aforesaid referendum and who, during the aforesaid representative period of July 1, 1960, to July 1, 1961, produced for market at least two-thirds of the volume of potatoes produced for market within the aforesaid production area within such period.

It is hereby further determined that the proposed amendments set forth in the Assistant Secretary's decision of October 23, 1961 (26 F.R. 10058), will not be made effective.

Dated: February 1, 1962.

JAMES T. RALPH,
Assistant Secretary.

ONIONS GROWN IN SOUTH TEXAS

Notice of Proposed Expenses and Rate of Assessment

Notice is hereby given that the Secretary of Agriculture is considering the approval of the expenses and rate of assessment hereinafter set forth, which were recommended by the South Texas Onion Committee, established pursuant to Marketing Agreement No. 143 and Marketing Order No. 959 (7 CFR Part 959).

This marketing agreement and order program regulates the handling of onions grown in designated counties in South Texas, and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

Consideration will be given to any data, views, or arguments pertaining thereto which are filed with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D.C., not later than 10 days following publication of this notice in the FEDERAL REGISTER.

§ 959.202 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred by the South Texas Onion Committee, established pursuant to Marketing Agreement No. 143 and this part, to enable such committee to perform its functions pursuant to the provisions of the aforesaid marketing agreement and order during the fiscal period February 1, 1962, through January 31, 1963, will amount to $50,000.

(b) The rate of assessment to be paid by each handler pursuant to Marketing Agreement No. 143 and this part shall be one cent ($0.01) per 50-pound sack of onions, or the equivalent quantity thereof, handled by him as the first handler thereof during said fiscal period.

(c) Terms used in this section shall have the same meaning as when used in the said marketing agreement and this part.

[26 CFR Part 1]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Notice of Proposed Rule Making

Income tax regulations amended to conform to section 8 of Public Law 86-779 which amended section 162 by redesignating subsection (d) as subsection (e) and by adding a new subsection (d), and amended section 1054 by redesignating section 1054 as section 1055 and by adding a new section 1054.

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T: P, Washington 25, D.C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner within the 30-day period. In such a case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] MORTIMER M. CAPLIN,
Commissioner of Internal Revenue.

In order to conform the INCOME TAX Regulations (26 CFR Part 1) to section 8 of the Act of September 14, 1960 (Public Law 86-779, 74 Stat. 1003), such regulations are amended as follows:

PARAGRAPH 1. Section 1.162 is amended by redesignating subsection (d) as subsection (e), adding a new subsection (d), and amending the historical note at the end thereof. These amended provisions read as follows:

§ 1.162 Statutory provisions; trade or business expenses.

SEC. 162. *Trade or business expenses*— • • •

(d) *Capital contributions to Federal National Mortgage Association.* For purposes of this subtitle, whenever the amount of capital contributions evidenced by a share of stock issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., sec. 1718) exceeds the fair market value of the stock as of the issue date of such stock, the initial holder of the stock shall treat the excess as ordinary and necessary expenses paid or incurred during the taxable year in carrying on a trade or business.

(e) *Cross reference.* For special rule relating to expenses in connection with subdividing real property for sale, see section 1237.

[Sec. 162 as amended by sec. 5, Technical Amendments Act 1958 (72 Stat. 1608); sec. 8, Act of Sept. 14, 1960 (Pub. Law 86-779, 74 Stat. 1003)]

PAR. 2. Paragraph (a) of § 1.162-1 is amended to read as follows:

§ 1.162-1 Business expenses.

(a) *In general.* Business expenses deductible from gross income include the ordinary and necessary expenditures directly connected with or pertaining to the taxpayer's trade or business, except items which are used as the basis for a deduction or a credit under provisions of law other than section 162. The cost of goods purchased for resale, with proper adjustment for opening and closing inventories, is deducted from gross sales in computing gross income. See

paragraph (a) of § 1.61–3. Among the items included in business expenses are management expenses, commissions (but see section 263 and the regulations thereunder), labor, supplies, incidental repairs, operating expenses of automobiles used in the trade or business, traveling expenses while away from home solely in the pursuit of a trade or business (see § 1.162–2), advertising and other selling expenses, together with insurance premiums against fire, storm, theft, accident, or other similar losses in the case of a business, and rental for the use of business property. No such item shall be included in business expenses, however, to the extent that it is used by the taxpayer in computing the cost of property included in its inventory or used in determining the gain or loss basis of its plant, equipment, or other property. See section 1054 and the regulations thereunder. Penalty payments with respect to Federal taxes, whether on account of negligence, delinquency, or fraud, are not deductible from gross income. The full amount of the allowable deduction for ordinary and necessary expenses in carrying on a business is nevertheless deductible, even though such expenses exceed the gross income derived during the taxable year from such business. In the case of any sports program to which section 114 (relating to sports programs conducted for the American National Red Cross) applies, expenses described in section 114(a)(2) shall be allowable as deductions under section 162(a) only to the extent that such expenses exceed the amount excluded from gross income under section 114(a).

PAR. 3. The following section is inserted immediately after § 1.162–18.

§ 1.162–19 Capital contributions to Federal National Mortgage Association.

(a) *In general.* The initial holder of stock of the Federal National Mortgage Association (FNMA) which is issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., sec. 1718) in a taxable year beginning after December 31, 1959, shall treat the excess, if any, of the issuance price (the amount of capital contributions evidenced by a share of stock) over the fair market value of the stock as of the issue date of such stock as an ordinary and necessary business expense paid or incurred during the year in which occurs the date of issuance of the stock. The date of issuance of the stock is the date which appears on the stock certificates of the initial holder as the date of issue. The initial holder is the original purchaser who is issued stock of the Federal National Mortgage Association pursuant to section 303(c) of the Act, and who appears on the books of FNMA as the initial holder. In determining the period for which the initial holder has held such stock, such period shall begin with the date of issuance.

(b) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). A, a banking institution which reports its income on the calendar year basis, sold $12,500 of mortgage paper to FNMA on October 17, 1960. Pursuant to the Federal National Mortgage Association Charter Act, A was required to make certain capital contributions to FNMA. In accordance with this requirement on October 17, 1960, FNMA deducted $250 from the amount it paid A for the mortgage paper and credited A's account with this amount. A stock certificate evidencing two shares of common stock of $100 par value was mailed to A and FNMA deducted $200 from A's account leaving a net balance of $50 in A's account. The stock certificate was received by A on November 7, 1960, bearing an issue date of November 1, 1960. The fair market value of a share of FNMA stock on October 17, 1960, was $65, on November 1, 1960, was $67, and on November 7, 1960, was $68. A may deduct $66, the difference between the issuance price ($200) and fair market value ($134) of the two shares of the stock on the date of issuance, as a business expense for the taxable year 1960. The basis of each share of stock issued as of November 1, 1960, will be $67 per share. See section 1054 and § 1.1054–1.

Example (2). Assuming the same facts as in example (1), A sold an additional $12,500 of mortgage paper to FNMA on December 15, 1960. FNMA deducted $250 from the amount it paid A for the mortgage paper, and credited A's account with this amount. A now has a total credit of $300 to his account, the $50 balance from the previous transaction described in Example (1) and $250 from this transaction. On January 9, 1961, A received a stock certificate evidencing 3 shares of FNMA stock bearing an issue date of January 1, 1961. The fair market value of a share of FNMA stock on December 15, 1960, was $70 and on January 1, 1961, was $69. A may deduct $93, the difference between the issuance price ($300) and the fair market value ($207) of the three shares of stock on the date of issuance, as a business expense for the taxable year 1961.

PAR. 4. Section 1.1054 is redesignated § 1.1055 and as so redesignated is amended by redesignating section 1054 as section 1055 and by adding a historical note. The amended provisions read as follows:

§ 1.1055 Statutory provisions; cross references.

SEC. 1055. *Cross references.* • • •

[Sec. 1055 as renumbered by sec. 8, Act of Sept. 14, 1960 (Pub. Law 86–779, 74 Stat. 1003)]

PAR. 5. Immediately after § 1.1053–1 there are inserted the following new sections:

§ 1.1054 Statutory provisions; certain stock of Federal National Mortgage Association.

SEC. 1054. *Certain stock of Federal National Mortgage Association.* In the case of a share of stock issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., sec. 1718), the basis of such share in the hands of the initial holder shall be an amount equal to the capital contributions evidenced by such share reduced by the amount (if any) required by section 162(d) to be treated (with respect to such share) as ordinary and necessary expenses paid or incurred in carrying on a trade or business.

[Sec. 1054 as added by sec. 8, Act of Sept. 14, 1960 (Pub. Law 86–779, 74 Stat. 1003)]

§ 1.1054–1 Certain stock of Federal National Mortgage Association.

(a) *In general.* The basis in the hands of the initial holder of a share of stock which is issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., sec. 1718) in a taxable year beginning after December 31, 1959, shall be an amount equal to the issuance price of the stock reduced by the amount, if any, required by section 162(d) to be treated (with respect to such share) as an ordinary and necessary business expense. See section 162(d) and § 1.162–19. For purposes of this section the initial holder is the original purchaser who is issued stock of the Federal National Mortgage Association (FNMA) pursuant to section 303(c) of the Act and who appears on the books of FNMA as the initial holder. See § 1.162–19.

(b) *Example.* The provisions of this section may be illustrated by the following example:

Example. Pursuant to section 303(c) of the Federal National Mortgage Association Charter Act a certificate of FNMA stock is issued to A as of January 1, 1961. The issuance price of the stock was $100 and the fair market value of the stock on the date of issue was $69. A was required by section 162(d) to treat $31 as a business expense for the year 1961. The basis of the share of stock in the hands of A, the initial holder, shall be $69, the amount paid for the stock ($100) reduced by $31.

[Docket No. 13860 (RM–199) (RM–226) (RM–243)]

TABLE OF ASSIGNMENTS; TELEVISION BROADCAST STATIONS; (SUPERIOR, KEARNEY, ALBION AND TERRYTOWN, NEBRASKA AND OTHERS)

Order Extending Time for Filing Reply Comments

1. The Commission has before it for consideration the request of the Nebraska Council for Educational Television (NCET) that the time for filing reply comments in this proceeding be extended to February 28, 1962. Reply comments are due on February 1, 1962, but NCET states that it needs additional time to pursue studies looking toward a "plan of financing for the proposed Nebraska Educational Television Network." NCET avers that the delay will not prejudice the rights of any interested parties or result in undue delay in the resolution of this proceeding. Counsel for NCET also states that all parties who filed comments in response to the Third Notice of Proposed Rule Making have consented to the grant of this delay with the exception of the Bi-States Company.

2. The Commission is disposed to grant the requested extension in order to give NCET the opportunity to present what they consider to be relevant material to reply to the contentions of opposed parties.[1] We would like to emphasize our concern, however, for the inordinate length of time which has passed since the commencement of this proceeding. While complex rule makings are often difficult to resolve with dispatch, NCET has had over one year to prepare the material in question. Moreover, the date which it now asks us to extend was originally set by them and the Kansas Legislative Council in another request for an extension of time which was granted by the Commission on November 29, 1961. In these circumstances, the grant of this extension represents a more than generous use of our discretionary powers.

3. *Accordingly, it is ordered,* This 29th day of January 1962, that the time for filing reply comments to the third notice of proposed rule making is extended from February 1, 1962, to February 28, 1962.

4. This action is taken pursuant to authority found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and section 0.241(d)(8) of the Commission's rules.

Released: January 31, 1962.

[Docket No. 50-196]

WESTINGHOUSE ELECTRIC INTERNATIONAL CO.

Notice of Proposed Issuance of Facility Export License

Please take notice that, unless within fifteen days after the publication of this notice in the FEDERAL REGISTER a request for a formal hearing is filed with the United States Atomic Energy Commission by the licensee or an intervener as provided by the Commission's rules of practice (Title 10, CFR, Chapter I, Part 2), the Commission proposes to issue to Westinghouse Electric International Company the facility export license below.

Pursuant to section 104 of the Atomic Energy Act of 1954 and Title 10, CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities", and upon a finding by the Commission that (a) the reactor proposed to be exported is a utilization facility as defined in said Act and regulations, and (b) the issuance of a license for the export thereof is within the scope of and is consistent with the terms of an Agreement for Cooperation between the United States of America and Italy, the Commission will issue a license authorizing export of a 165 megawatt (electrical) pressurized light water nuclear power reactor to Societa Elettronucleare Italiana (SELNI), having offices at Foro Bonaparte 31, Milan, Italy. This reactor is to be erected at Trino, Italy.

In its review of applications solely to authorize the export of production or utilization facilities, the Commission does not evaluate the health and safety characteristics of the subject reactor.

A copy of the application is on file in the AEC Public Document Room located at 1717 H Street NW., Washington, D.C.

Dated at Germantown, Md., this 5th day of February 1962.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 14336 etc., FCC 62M-148]

ANTENNAVISION SERVICE CO., INC.

Order Severing Proceedings

In re applications of Antennavision Service Company, Inc., Docket No. 14336, File No. 657-C1-R-61, for renewal of the license for Station KPH82, a facility in the domestic Public Point-to-Point Microwave Radio Service at Wildcat Peak, Arizona; Docket No. 14337, File No. 658-C1-R-61, for renewal of the license for Station KPH83, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Jack's Peak, Arizona; Docket No. 14338, File No. 2326-C1-R-61, for renewal of the license for Station KOU61, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14339, File No. 2525-C1-ML-61, for a modification of license to cover a construction permit for additional facilities for Station KOU61 in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14340, File No. 3699-C1-P-61, for a construction permit to increase power and change antenna at existing licensed Station KOU61 in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14348, File Nos. 4083, 4084, 4085, 4086, C1-P-61, for construction permits to establish stations in the Point-to-Point Microwave Radio Service located respectively at Toro Peak, El Centro, 14 miles ESE of Holtville, and 8 miles SE of Ogilby, California.

The Hearing Examiner having under consideration a Petition, filed on January 31, 1962, by Antennavision Service Company, Inc. (Antennavision), wherein, among other things, it is requested that the proceedings in Docket No. 14348 be severed from the consolidated proceeding with those applications set for hearing in Docket Nos. 14336-14340;

It appearing, that, by order released by the Commission on October 30, 1961, certain applications filed by Antennavision, namely those designated in Docket Nos. 14336-14340, were set for hearing on specified issues;

It further appearing that on the same date other applications by Antennavision were set for hearing in Docket No. 14348 and that the hearing on the issues specified in such proceeding were ordered consolidated with the hearing in the aforementioned Docket Nos. 14336-14340;

It further appearing that the applications involved in Docket No. 14348 contemplate separate and distinct facilities from those involved in Docket Nos. 14336-14340;

It further appearing that at a further prehearing conference held on January 29, 1962, it was alleged that Antennavision was proposing modification of the facilities involved in the proceedings in Docket No. 14348 which might have the effect of obviating the need for formal procedures therein and, that the Examiner therefore indicated he would entertain a motion for continuance of the proceedings on such applications until the Commission has had the opportunity to consider a petition for reconsideration and grant;

It further appearing, that, at the aforementioned further prehearing conference the hearings on the applications involved in Docket Nos. 14336-14340 were scheduled for April 2, 1962, since they are not encompassed within the aforementioned petition for reconsideration and grant;

It further appearing, that, it is alleged by Antennavision that counsel for the Common Carrier Bureau, the only other party to the proceeding, has indicated that he has no objection to the request for severance or to a waiver of the provisions of the Commission's rules (47 CFR 1.43), relating to the withholding of action for a four-day period;

It further appearing that good cause has been shown for a waiver of the aforementioned rule and grant of the Petition for Severance;

It is ordered, This 31st day of January 1962, that the Petition for Severance is granted and that the proceedings in Docket No. 14348 are severed from the proceedings in Docket Nos. 14336-14340.

Released: February 1, 1962.

In re applications of Antennavision Service Company, Inc., Docket No. 14336, File No. 657-C1-R-61, for renewal of the license for Station KPH82, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Wildcat Peak, Arizona; Docket No. 14337, File No. 658-C1-R-61, for renewal of the license for Station KPH83, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Jack's Peak, Arizona; Docket No. 14338, File No. 2326-C1-R-61, for renewal of the license for Station KOU61, a facility in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14339, File No. 2525-C1-ML-61, for a modification of license to cover a construction permit for additional facilities for Station KOU61 in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14340, File No. 3699-C1-P-61, for a construction permit to increase power and change antenna at existing licensed Station KOU61 in the Domestic Public Point-to-Point Microwave Radio Service at Hutch Mountain, Arizona; Docket No. 14348, File Nos. 4083, 4084, 4085, 4086, C1-P-61, for construction permits to establish stations in the Point-to-Point Microwave Radio Service located respectively at Toro Peak, El Centro, 14 miles ESE of Holtville, and 8 miles SE of Ogilby, California.

The Hearing Examiner having under consideration the proceedings at the further prehearing conference in the above-entitled matter held on January 29, 1962;

It appearing that counsel for Antennavision Service Company, Inc. (Antennavision), desires to present the case for his client partly in the form of written sworn exhibits and partly through the oral testimony of witnesses; and

It further appearing that counsel for the Common Carrier Bureau has not at this stage determined whether any direct case will be presented on behalf of the Bureau either through the calling of officials of Antennavision as adverse witnesses or otherwise;

It is ordered, This 29th day of January 1962, that:

(1) The direct case of Antennavision insofar as it is to be presented in the form of sworn written exhibits shall be furnished to the other parties and to the Examiner no later than March 12, 1962;

(2) Insofar as the direct case of Antennavision is to be presented through oral testimony of witnesses, counsel for

Antennavision shall, no later than March 12, 1962, advise the other parties and the Examiner of the names of such witnesses and the issues with respect to which each of them will offer oral testimony;

(3) Insofar as counsel for the Common Carrier Bureau proposes to present the direct case through written sworn exhibits or through the oral testimony of witnesses, other than officials of Antennavision, he shall furnish the other parties and the Examiner with copies of such sworn written exhibits or with the names of witnesses who are to give oral testimony, specifying the issues with respect to which each of them will testify, no later than March 12, 1962;

(4) If any of the parties desire to make any motion with respect to the sworn written exhibits of any of the other parties they shall advise all such parties and the Examiner, in writing, no later than March 26, 1962, specifying the exhibit involved and the nature of the motion they propose to make;

(5) Each of the parties shall no later than March 26, 1962, notify the others in writing of the names of the witnesses who have prepared sworn written exhibits whom they desire to cross-examine, with copies of such notification to the Examiner, and the parties so notified shall make such witnesses available for cross-examination at the hearing; and

(6) Should counsel for the Common Carrier Bureau desire to call any official of Antennavision as a witness he shall, no later than March 26, 1962, notify counsel for Antennavision of the names of such persons and the issues with respect to which he proposes to examine such persons, with a copy of such notification to the Examiner; unless counsel for Antennavision shall advise counsel for the Common Carrier Bureau to the contrary, within three days of the receipt of the aforementioned notification, Antennavision shall conclusively be presumed to have agreed to supply such persons as witnesses without the need for subpoena;

It is further ordered, That the hearing herein, heretofore postponed until further order of the Examiner, is hereby rescheduled to commence on April 2, 1962, at 10:00 a.m., at the Offices of the Commission in Washington, D.C.; and

It is further ordered, That the agreements and understandings entered into between the parties concerning the future conduct of the hearing are approved as set forth in the transcript of the further prehearing conference which to this extent is incorporated by reference herein.

CERACCHE & CO., INC.

Order Following Further Prehearing Conference

In re application of Ceracche & Company, Incorporated, Connecticut Ave-

New York, Docket No. 14320, file No. 1670-C1-R-61; for renewal of the license for Station KEG51, a facility in the Domestic Public Point-to-Point Microwave Radio Service.

The Hearing Examiner having under consideration the proceedings at the further prehearing conference in the above-entitled matter held on January 29, 1962;

It appearing, that counsel for Ceracche & Company, Incorporated (Ceracche), desires to present the case for his client partly in the form of written sworn exhibits and partly through the oral testimony of witnesses; and

It further appearing, that counsel for the Common Carrier Bureau has not at this stage determined whether any direct case will be presented on behalf of the Bureau either through the calling of officials of Ceracche as adverse witnesses or otherwise;

It is ordered, This 29th day of January 1962, that:

(1) The direct case of Ceracche insofar as it is to be presented in the form of sworn written exhibits shall be furnished to the other parties and to the Examiner no later than March 12, 1962;

(2) Insofar as the direct case of Ceracche is to be presented through oral testimony of witnesses, counsel for Ceracche shall, no later than March 12, 1962, advise the other parties and the Examiner of the names of such witnesses and the issues with respect to which each of them will offer oral testimony;

(3) Insofar as counsel for the Common Carrier Bureau proposes to present the direct case through written sworn exhibits or through the oral testimony of witnesses, other than officials of Ceracche, he shall furnish the other parties and the Examiner with copies of such sworn written exhibits or with the names of witnesses who are to give oral testimony, specifying the issues with respect to which each of them will testify, no later than March 12, 1962;

(4) If any of the parties desire to make any motion with respect to the sworn written exhibits of any of the other parties they shall advise all such parties and the Examiner, in writing, no later than March 26, 1962, specifying the exhibit involved and the nature of the motion they propose to make;

(5) Each of the parties shall no later than March 26, 1962, notify the others in writing of the names of the witnesses who have prepared sworn written exhibits whom they desire to cross-examine, with copies of such notification to the Examiner, and the parties so notified shall make such witnesses available for cross-examination at the hearing; and

(6) Should counsel for the Common Carrier Bureau desire to call any official of Ceracche as a witness he shall, no later than March 26, 1962, notify counsel for Ceracche of the names of such persons and the issues with respect to which he proposes to examine such persons, with a copy of such notification to the Examiner; unless counsel for Ceracche shall advise counsel for the Common Carrier Bureau to the contrary, within three days of the receipt of the aforementioned notification, Ceracche shall conclusively be presumed to have agreed to supply such persons as witnesses without the need for subpoena;

It is further ordered, That the hearing herein, heretofore postponed until further order of the Examiner, is hereby rescheduled to commence on April 5, 1962, at 10:00 a.m., at the Offices of the Commission in Washington, D.C.; and

It is further ordered, That the agreements and understandings entered into between the parties concerning the future conduct of the hearing are approved as set forth in the transcript of the further prehearing conference which to this extent is incorporated by reference herein.

FEDERAL POWER COMMISSION

[Docket No. CP61-337]

CITY OF SLATER, MISSOURI

Notice of Application and Date of Hearing

JANUARY 31, 1962.

Take notice that on June 26, 1961, the City of Slater, Missouri (Applicant), a municipal corporation, filed an application, pursuant to section 7(a) of the Natural Gas Act, for an order directing Cities Service Gas Company (Cities Service) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver to Applicant its natural gas requirements for resale and distribution in the City of Slater, all as more fully represented in the application, which is on file with the Commission and open for public inspection.

Applicant proposes to construct and operate 10 miles of 6-inch lateral transmission pipeline extending from a connection with the facilities of Cities Service near Marshall, Missouri, to the City of Slater, and a municipal gas distribution system to serve said city.

Applicant estimates its natural gas requirements as follows:

Year	Requirements in Mcf	
	Peak day	Annual
1	917	113,568
2	1,232	144,539
3	1,462	165,424

The gas will be used for domestic, commercial and industrial purposes.

Applicant estimates that the cost of its proposed facilities will be $489,500, which will be financed by the issuance and sale of 5½ percent 20 year gas revenue bonds.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 20, 1962, at 10:00 a.m. e.s.t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such application.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before March 7, 1962.

[Docket No. CP62-130]

MICHIGAN WISCONSIN PIPE LINE CO.

Notice of Application and Date of Hearing

JANUARY 31, 1962.

Take notice that on November 24, 1961, as supplemented on December 13, 1961, Michigan Wisconsin Pipe Line Company (Applicant), 645 Griswold Street, Detroit 26, Mich., filed in Docket No. CP62-130 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a meter station and appurtenant facilities necessary to the establishment of a new delivery point for Wisconsin Power and Light Company (Wisconsin Power), an existing customer of Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The estimated total cost of the facilities proposed under this application is $20,000 which will be financed from funds on hand.

The purpose of this proposal is to enable Wisconsin Power to render natural gas service to the Village of McFarland, Dunn Township, Dane County, Wisconsin. Applicant states that no allocation of additional gas will be required.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing shall be held on May 8, 1962, at 9:30 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such application: *Provided, however*, That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with rules of practice and procedure (18 CFR 1.8 or 1.10) on or before February 26, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Project No. 2106]

PACIFIC GAS AND ELECTRIC CO.

Order Fixing Time and Place for Hearing and Prescribing Procedure

JANUARY 30, 1962.

By order issued October 19, 1961, the Commission fixed a public hearing in Project No. 2106, respecting certain matters and issues raised by the State of California, acting by and through its Department of Fish and Game (Intervenor), which are referred to in the application for rehearing filed September 18, 1961, and Article 45 of the license, the hearing to be held at a time and place to be specified by further order of the Commission.

The procedures hereinafter prescribed are intended to eliminate any cause which might otherwise exist for a protracted hearing: by requiring that the respective parties submit in advance of the hearing relevant facts in support of their respective positions; and by providing for motions to strike improperly prepared testimony, including conclusions and opinions presented without having set forth a proper foundation therefor.

The Commission finds: It is appropriate and in the public interest to hold the public hearing fixed by Commission order issued October 19, 1961, as hereinafter provided.

The Commission orders:

(A) Pursuant to the authority conferred in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly section 308 thereof, and the Commission's rules of practice and procedure, a public hearing shall be held on May 28, 1962, at 10 a.m., at the Commission's Regional Office, 555 Battery Street, San Francisco, Calif., respecting the matters involved and issues referred to in the aforesaid order issued October 19, 1961.

(B) The following procedure is prescribed for the public hearing herein ordered:

(1) The Department of Fish and Game of the State of California shall by April 30, 1962, file with the Commission's Secretary an original and ten copies of all of its direct testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Licensee.

(2) The Licensee shall by May 14, 1962, file with the Commission's Secretary, an original and ten copies of all of its testimony (including qualifications of witnesses and exhibits) and at that time serve three copies thereof on the Department of Fish and Game.

(3) All of the testimony except exhibits, shall be in question and answer form.

(4) No exhibits (except those of which official notice may properly be taken) shall contain narrative material other than brief explanatory notes.

(5) All exhibits (except those of which official notice may properly be taken) shall contain brief and appropriate titles, and the exhibits shall be fully explained in the prepared testimony by the witness or witnesses sponsoring them.

(6) Each witness shall execute an affidavit adopting the testimony for which he assumes responsibility and an original and two conformed copies of such affidavits shall be filed with his prepared testimony.

(7) Any party submitting more than one exhibit shall enclose a cover sheet listing the title of each exhibit in the sequence they wish them to be marked for identification.

(8) Any motions to strike any part of the prepared testimony and exhibits (prior to cross-examination), shall be filed with the Presiding Examiner or Chief Examiner by May 18, 1962; answers thereto shall be filed by May 24, 1962; and rulings on such motions will be made by the Examiner at the time such testimony or exhibits are offered in accordance with subparagraph (9).

(9) Upon the commencement of the hearing and after appearances, opening statements, and other preliminary matters, the exhibits previously filed, as provided above, will be marked for identification in the sequence directed by the Presiding Examiner; and thereafter the Examiner will require that the affidavits of the respective witnesses and their prepared testimony (together with the qualifications of the respective witnesses) previously filed, as provided above, be copied into the record as though read, excepting any part or parts of the prepared testimony with respect to which he may have granted motion to strike.

(10) The Presiding Examiner will specify the order of cross-examination for the information of the parties in making their respective witnesses available for cross-examination.

(C) Requests for extension of time concerning the time for any filings specified herein shall be made in writing, served on all parties and filed with the Presiding Examiner or the Chief Examiner (together with a certificate of service) at least ten days in advance of the dates specified herein (or as may have been extended), and any answers thereto shall be filed with the Presiding Examiner or Chief Examiner within three days after the request for extension.

(D) The Commission's rules of practice and procedure shall apply in this proceeding except to the extent that they are modified or supplemented herein or to the extent that they are further modified or supplemented by the Examiner with the consent of the parties.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
Secretary.

[Docket No. CP62-59]

PACIFIC GAS TRANSMISSION CO.

Notice of Application and Date of Hearing

JANUARY 31, 1962.

Take notice that on September 11, 1961, as supplemented on September 28, 1961, and October 20, 1961, Pacific Gas Transmission Company (Applicant), 245 Market Street, San Francisco 6, Calif., filed an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation, as necessary, of taps and metering facilities at unspecified points along Applicant's 36-inch transmission line in Idaho, Washington and Oregon, in order to deliver to El Paso Natural Gas Company (El Paso), at such points, part of the gas Applicant has previously been authorized to transport for El Paso from Canada. Such facilities would be built only at locations where El Paso is or will be authorized by the Commission to sell gas to distributors for resale.

Applicant's proposals are more fully set forth in the application, as supplemented, on file with the Commission and open to public inspection.

In its order of August 5, 1960, issued in Docket Nos. G-17350, et al., the Commission authorized Applicant to construct and operate a 36-inch transmission line extending from the Canadian boundary at a point in Idaho to the Oregon-California border southeast of Klamath Falls, Oreg. That order also authorized Applicant to transport for El Paso a portion of the latter's Canadian gas from Canada to points along the 36-inch line in Idaho, Washington, and Oregon.

Applicant states that in Docket No. CP60-15 El Paso has pending an application for authority to build facilities to receive gas from Applicant's 36-inch line for sale to two distributors for resale in Klamath Falls and Bend, Oreg. The estimated cost of Applicant's proposed facilities at Klamath and Bend is $14,000 and $12,500, respectively. Applicant states that the estimated cost of similar facilities at any other point on its 36-inch line for delivery of gas to El Paso will not be more than $12,500 for each delivery point.

The application shows that the cost of each tap will be borne by El Paso in accordance with Applicant's FPC Gas Tariff.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on March 5, 1962, at 9:30 a.m. e.s.t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D.C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30(c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D.C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before February 23, 1962. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

GORDON M. GRANT,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 24D-2534]

ALLIED METALS CO.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

FEBRUARY 1, 1962.

I. Allied Metals Company (issuer), a New Mexico corporation located at 3250 Broadway SE., Albuquerque, New Mexico, filed with this Commission on September 11, 1961, a notification on Form 1-A and an offering circular relating to an offering of 100,000 shares of its $1 par value non-assessable Class A common stock at an offering price of $1 per share, which was amended down to 50,000 shares for an aggregate of $50,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof, and Regulation A promulgated thereunder; and

II. The Commission has reasonable cause to believe that:

A. The terms and conditions of Regulation A have not been complied with in that:

1. The notification fails to disclose the affiliates and predecessors of the issuer as required by Item 2 of Form 1-A.

2. The issuer falsely stated in its notification, in responding to Item 6 of Form 1-A, that none of its directors, officers or others were subject to any order, judgment, or decree specified in subparagraph 2, paragraph (d) of Rule 252;

B. The Regulation A exemption is not available to the issuer in that Clifford G. Taylor, an officer and director of the issuer, is subject to a decree of permanent injunction of the character specified in subparagraph (2) of paragraph (d) of Rule 252.

C. The offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly with respect to:

1. The failure to disclose accurately and adequately the speculative and adverse features of the offering and risks attendant to the proposed business enterprise.

2. The failure to disclose whether there has been adequately controlled laboratory testing of the product Ber-Al and the process by which it is formed to determine the practicalities of the product's uses, the failure to disclose accurately and adequately the stage of research and development, and the failure to define the principal market for the product.

3. The failure to disclose whether the process of metallurgy proposed to be exploited has been subject to patent search.

4. The failure to disclose accurately and adequately the proposed use of proceeds, particularly in connection with the remuneration of officers and directors.

5. The failure to disclose that the shareholders' right to transfer stock of the corporation is subject to the corporation's option to purchase at par value such stock from the record owner within 30 days after written notice of transfer is filed with the company.

6. The failure to disclose accurately and adequately the background of officers and directors.

7. The failure to disclose the percentage of outstanding securities of the issuer to be held by directors, officers and promoters as a group and the percentage of such securities which will be held by the public if all securities to be offered are sold and the respective amounts of cash paid therefor by such group and by the public.

8. The failure to file appropriate financial statements.

D. The offering if made would be in violation of section 17(a) of the Securities Act of 1933, as amended.

III. *It is ordered,* Pursuant to Rule 261(a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing within thirty days after the entry of this order; that within twenty days after receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; that if no hearing is requested and none is ordered by the Commission, this order shall become permanent on the thirtieth day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission; and that notice of the time and place for any hearing will be promptly given by the Commission.

By the Commission.

[File No. 811-634]

DETROIT AND CLEVELAND NAVIGATION CO.

Notice of Filing of Application for Order Declaring That Company Has Ceased To Be an Investment Company

JANUARY 31, 1962.

Notice is hereby given that Detroit and Cleveland Navigation Company ("Applicant"), 1201 Griswold Building, Detroit 26, Mich., a Michigan corporation and a closed-end, non-diversified investment company registered under the Investment Company Act of 1940 ("Act") has filed an application pursuant to section 8(f) of the Act for an order declaring that Applicant has ceased to be an investment company.

Applicant represents that it was formally dissolved by the filing on October 5, 1960, with the Michigan Corporation and Securities Commission of an Agreement of Merger ("Agreement") between Applicant and Denver Chicago Trucking Company, Inc. ("Denver"), a Nebraska Corporation, whereby Applicant was merged into Denver. Said Agreement was submitted to shareholders and approved by a two-thirds vote of all of Applicant's outstanding common stock at a special meeting held on August 16, 1960.

The Agreement provided that Applicant was to turn over to the Secretary of Denver, 135,643 shares of its common stock, $5 par value, being all the outstanding stock of Applicant, and Denver, the surviving Corporation, thereupon agreed to deliver to the stockholders of Applicant shares of Denver at the rate of one and two-fifths shares of stock of Denver for each share of the common stock of Applicant surrendered, with the additional payment at the rate of $20.00 per full share in lieu of fractional shares of Denver to which Applicant's shareholders were entitled. All of Applicant's shares have been surrendered except 162 shares held by eight individuals. The First National Bank of Denver has 746⅝ shares of Denver common stock and $438.59 in cash in lieu of fractional interests for the satisfaction of Applicant's unsurrendered shares.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission upon application finds that a registered investment company has ceased to be an investment company it shall so declare by order and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than February 16, 1962, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D.C. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) should be filed contemporaneously with the request. At any time after said date, as provided by Rule O-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the showing contained in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

By the Commission.

GILCHRIST CO.

Notice of Application to Withdraw From Listing and Registration and of Opportunity for Hearing

FEBRUARY 1, 1962.

In the matter of Gilchrist Company, common stock; File No. 1-1723.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-1(b) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration include the following: The continued listing and registration on the Exchange would result in unnecessary expense to Applicant, including fees for listing additional shares and expenses incident to the filing of various reports and other documents. In the past eight years Applicant has paid a total of $752.50 in listing fees alone and volumes averaged less than 150 shares per annum. The stock remains listed on the American Stock Exchange.

Upon receipt of a request, on or before February 16, 1962, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms. In addition, any interested person may submit his views or any additional facts bearing on his application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D.C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

NOTICE OF FILING OF PETITIONS

No. MC 30319 (Sub-No. 23) (PETITION FOR REOPENING AND RECONSIDERATION FOR THE PURPOSE OF MODIFYING RESTRICTIONS AT RUNGE, NORDEIM AND YORKTOWN, TEXAS), filed January 12, 1962. Petitioner: SOUTHERN PACIFIC TRANSPORT COMPANY, Houston, Tex. Petitioner's attorney: Edwin N. Bell, 1000 Esperson Building, Houston 2, Tex. By petition filed January 12, 1962, petitioner advises that the route involved in the subject petition runs between Kenedy and Cuero, Tex., over Texas Highway 72 to its junction with U.S. Highway 87, and that this petition concerns the intermediate points of Runge, Nordheim, and Yorktown, Tex. The Certificate MC 30319 (Sub-No. 23), is subject to several restrictions, including the following: "1. The service to be performed shall be limited to that which is auxiliary to or supplemental of rail service of the Texas and New Orleans Railroad Company, hereinafter called the Railroad. "2. The carriers shall not render any service to or from any point not a station of the line of the railroad." The instant petition seeks the removal of the above restrictions, and the substitution therefor of restrictions reading as follows: "1. The service to be performed shall be limited to that which is auxiliary to or supplemental of rail service of Southern Pacific Company in Texas and Louisiana, hereinafter called the Railroad, except at Sublime, Hallettsville, Chapell Hill, Runge, Nordheim, and Yorktown, Tex. "2. The carrier shall not render any service to or from any point not a station on the line of the railroad except Cold Spring, Tex., and except the site of the Southern Production Company near Pledger, Tex., and the site of the Freeport Sulphur Plant near Damon, Tex., and except Sublime, Hallettsville, Chapell Hill, Runge, Nordheim, and Yorktown." Any person or persons desiring to oppose petitioner's proposal, may, within 30 days from the date of this publication in the FEDERAL REGISTER, file an appropriate pleading.

PART 319—FOREIGN QUARANTINE NOTICES

Subpart—Fruits and Vegetables

ADMINISTRATIVE INSTRUCTIONS PRESCRIBING METHOD OF TREATMENT OF OKRA FROM CERTAIN PARTS OF THE WEST INDIES AND RELATED INTERPRETATION

Pursuant to the authority conferred by § 319.56–2 of the regulations (7 CFR 319.56–2) supplemental to the Fruit and Vegetable Quarantine (Notice of Quarantine No. 56, 7 CFR 319.56), under sections 5 and 9 of the Plant Quarantine Act of 1912 (7 U.S.C. 159, 162), and other delegation of authority (22 F.R. 2679, as amended), administrative instructions and an interpretation to be designated as 7 CFR 319.56–2o are hereby issued to read as follows:

§ 319.56–2o Okra from West Indies.

(a) *Administrative instructions prescribing method of treatment of okra from certain parts of the West Indies.* Fumigation with methyl bromide at normal atmospheric pressure, in accordance with the following procedure is hereby prescribed as an alternate condition of importation under permit under § 319.56–2 for all shipments of okra from the West Indies, except okra produced in Andros Island of the Bahamas, and okra produced in the West Indies for importation into the American Virgin Islands.

(1) *West Indies.* As used in this section, the term "West Indies" means the foreign islands lying between North and South America, the Caribbean Sea, and the Atlantic Ocean, including among others, Cuba, Jamaica, Hispaniola, and the Bahama, Leeward and Windward Islands, but excluding the chain of islands adjacent and parallel to the north coast of South America (the largest of which are Aruba, Curaçao, Bonaire, Tortuga, Margarita, Trinidad, and Tobago).

(2) *Ports of entry.* Entry of okra is authorized only at New York, New Orleans, Miami, and such other ports as may be named in the permit.

(3) *Approval of fumigation chamber.* The treatment shall consist of fumigation with methyl bromide at normal atmospheric pressure, in a fumigation chamber which has been approved for that purpose by the Plant Quarantine Division. The Plant Quarantine Division will approve only those fumigation chambers that are properly constructed and adequately equipped to handle and treat okra, and are located within the practicable supervisory range of inspectors stationed at the authorized ports of entry and where the required supervision can be accomplished without encroaching upon normal port inspection assignments.

(4) *Fumigation schedule.* Such fumigation shall be in accordance with the following fumigation schedule:

Temperature (° F.)	Dosage (pounds of methyl bromide per 1,000 cubic feet)	Exposure period (hours)
90–96	1.0	2
80–89	1.5	2
70–79	2.0	2
60–69	2.5	2
50–59	3.0	2
40–49	3.5	2

(5) *Fumigation procedure.* Okra to be fumigated may be packed in slatted crates or other gas-permeable containers. The fumigation chamber shall not be loaded to more than two-thirds of its capacity. The containers may be stacked one on top of another, but a 3- to 4-inch space must be provided between each container throughout the load. Good air circulation above and below the load shall be provided as soon as the okra is loaded and must be continued during the full period of fumigation and until the okra has been removed to a well-ventilated location. Strong blasts of air should not be directed against the okra. Fumigation at temperatures in excess of 90° F. may result in injury to okra and should be avoided if possible. Past experience indicates that injury may also result from excess moisture, such as residual moisture from harvesting when dew-covered.

(6) *Supervision of fumigation.* (i) Inspectors of the Plant Quarantine Division will supervise the fumigation of okra and will specify such safeguards as may be necessary for the handling and transportation of the okra before and subsequent to fumigation; if, in the opinion of the inspector this is necessary to assure that there will be no pest risk associated with the importation and treatment. The final release of the okra for entry into the United States will be conditioned upon compliance with the specified safeguards.

(ii) Supervision of fumigation in approved chambers will, if practicable, be carried on as a part of normal port inspection activities and when so available will be furnished without cost to the owner of the okra or his representative.

(7) *Costs.* All costs of treatment and required safeguards and supervision, other than the services of the supervising inspector during regularly assigned hours of duty, shall be borne by the owner of the okra or his representative. Where normal inspection activities preclude the furnishing of supervision during regularly assigned hours of duty, supervision will be furnished on a reimbursable overtime basis and the owner of the okra or his representative will be charged in accordance with §§ 354.1 and 354.2 of this chapter.

(8) *Department not responsible for damage.* While the prescribed treatment is judged from experimental tests to be safe for use with okra, the Department assumes no responsibility for any damage sustained through or in the course of treatment or because of pretreatment or posttreatment safeguards. There has not been an opportunity to test these treatments under all conditions or on all okra varieties or on okra from all areas involved.

(b) *Interpretation regarding importation of okra from Andros Island of the Bahamas; and okra from the West Indies for importation into the American Virgin Islands.* Okra produced in Andros Island, Bahamas, may enter under permit and subject to inspection at the ports named in the permit. Okra produced in the West Indies may enter the American Virgin Islands under permit and subject to inspection.

(Sec. 9, 37 Stat. 318; 7 U.S.C. 162; 22 F.R. 2679, as amended. Interprets or applies sec. 5, 37 Stat. 316; 7 U.S.C. 159)

The foregoing provisions shall become effective February 8, 1962.

These instructions authorize the importation, under permit subject to approved fumigation, of okra produced in certain parts of the West Indies from which such importations have heretofore been prohibited. They also provide for the mandatory fumigation of okra from Cuba, which heretofore has been allowed entry under permit subject to inspection. This fumigation treatment provides for the entry of okra for marketing in the fresh state.

There has been an increasing interest in the production of winter vegetables, including okra, in the West Indies for shipment to the United States. The purpose of this action is to permit the importation of okra from parts of the West Indies where the pink bollworm (Pectinophora gossypiella Saund.) occurs, under the same entry conditions that have been prescribed for importations of okra from Mexico because of the presence of this pest in that country. Heretofore, okra produced in Cuba has been admissible under permit subject to inspection. The fumigation requirement is being extended to Cuban imports of okra since the pink bollworm occurs in that country as it does in other parts of the West Indies and Mexico, and under certain cultural conditions this serious pest of cotton will infest okra.

The pink bollworm is not known to occur on Andros Island in the Bahamas and okra produced on that island may be imported subject to inspection. Inasmuch as the pink bollworm occurs throughout the American Virgin Islands as well as the West Indies, no change was made in the present arrangements permitting okra produced in the West Indies to be imported under permit and

inspection into the American Virgin Islands.

These instructions should be made effective at the earliest practicable date insofar as they impose stricter requirements in order to prevent the spread of the pink bollworm by shipments of okra from Cuba and insofar as they relieve restrictions in order to be of maximum benefit to the importers of okra. Accordingly, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 1003), it is found upon good cause that notice and other public procedure on these instructions are impracticable and contrary to the public interest, and good cause is found for making these instructions effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 2d day of February 1962.

Director, Plant Quarantine Division.

AUTHORITY: §§ 1128.0 to 1128.111 issued under secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

§ 1128.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Central West Texas marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk, as determined pursuant to section 2 of the act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such amount not to exceed 4 cents per hundredweight as the Secretary may prescribe, with respect to all receipts of other source milk which is classified as Class I milk, all milk received from producers including a handler's own production, and milk received from a cooperative association in its capacity as a handler pursuant to § 1128.9(c).

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than March 1, 1962. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Assistant Secretary of Agriculture was issued November 20, 1961, and the decision containing all amendment provisions of this order, was issued January 9, 1962. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective March 1, 1962, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER. (Sec. 4(c), Administrative Procedure Act, 5 U.S.C. 1001-1011.)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Central West Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows, except that the provisions of the base plan and all references thereto, including but not necessarily limited to those set forth below, continue to be suspended as set forth in the suspension order of March 1, 1959:

1. Sections 1128.15, 1128.16, 1128.73, 1128.80, and 1128.81 in their entirety;

2. In § 1128.30(a) the following: "and for the months of March through June the aggregate quantities of base milk and excess milk";

3. In § 1128.31(a) the following: "and for the months of March through June, each producer's deliveries of base milk and excess milk";

4. In § 1128.72 the phrase, "of July through February";

5. In § 1128.90(a) the phrase, "or § 1128.73";

6. In § 1128.91 the phrase, "or the uniform price for base milk computed pursuant to § 1128.73(e)"; and

7. Section 1128.91(b) in its entirety.

DEFINITIONS

§ 1128.1 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

§ 1128.2 Secretary.

"Secretary" means the Secretary of Agriculture or such other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 1128.3 Department.

"Department" means the United States Department of Agriculture or such other Federal Agency authorized to perform the price reporting functions specified in this part.

§ 1128.4 Person.

"Person" means any individual, partnership, corporation, association, or any other business unit.

§ 1128.5 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members.

§ 1128.6 Central West Texas marketing area.

"Central West Texas marketing area," hereafter called the "marketing area," means all territory within the boundaries of the Abilene Air Force Base and within the corporate limits of the following cities and towns, all in the State of Texas:

Abilene.	Lamesa.
Albany.	Merkel.
Anson.	Midland.
Aspermont.	Mineral Wells.
Ballinger.	Munday.
Big Spring.	Odessa.
Breckenridge.	Ranger.
Brownwood.	Rochester.
Cisco.	Rotan.
Coleman.	Rule.
Colorado City.	San Angelo.
Comanche.	Snyder.
Eastland.	Stamford.
Hamlin.	Sweetwater.
Haskell.	Tye.
Knox City.	Winters.

§ 1128.7 Approved plant.

"Approved plant" means:

(a) A milk plant approved by and under the routine inspection of the health authority of any municipality in the marketing area:

(1) From which Class I milk labeled Grade A in consumer packages is disposed of in the marketing area on routes, or

(2) At which milk is received from producers as defined in § 1128.10(a) and which serves as a receiving station at which producer milk is received, weighed and commingled and from which milk or skim milk (i) is moved during the month to an approved plant(s) specified in subparagraph (1) of this paragraph or paragraph (b), or (ii) was moved to any such plant(s) in an amount equal to 60 percent or more of the total receipts of producer milk during the months of October through January immediately preceding any month of April, May or June during which no milk was moved to such plant(s); or

(b) A milk plant approved by and under the routine inspection of a health authority other than that of a municipality in the marketing area from which Class I milk labeled Grade A in consumer packages is disposed of in the marketing area on a route operated wholly or partially in the marketing area in an amount equal to 10 percent or more of the total disposition of Class I milk from such plant during the month.

§ 1128.8 Unapproved plant.

"Unapproved plant" means any milk processing or distributing plant which is not an approved plant.

§ 1128.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of an approved plant;

(b) Any person in his capacity as the operator of an unapproved plant from which Class I milk is disposed of during the month on a route in the marketing area;

(c) Any cooperative association with respect to the milk of producers which it causes to be delivered directly from the farm for its own account, in tank truck(s) owned or operated by such association, to the approved plant of another handler described in § 1128.7(a)(1) or (b): *Provided*, That such milk shall be deemed to have been received by the cooperative association at an approved plant at the location of the plant to which it is delivered; or

(d) Any cooperative association with respect to the milk of any producer which it causes to be diverted to an unapproved plant for the account of such cooperative association.

§ 1128.10 Producer.

"Producer" means any person other than a producer-handler:

(a) Who produces milk under a dairy farm permit or rating for the production of milk to be disposed of for consumption as Grade A milk issued by the health authority of any municipality in the marketing area, which milk is received at an approved plant described in § 1128.7(a); or

(b) Who produces milk under a dairy farm permit or rating for the production of milk to be disposed of for consumption as Grade A milk issued by a health authority whose certification is accepted by the appropriate health authority of a municipality in the marketing area, which milk is received at an approved plant described in § 1128.7(b).

(c) "Producer" shall include any such person whose milk is received by a cooperative association pursuant to § 1128.9(c) or is regularly received at an approved plant, but whose milk is caused to be diverted by a handler to an unapproved plant, and milk so diverted shall be deemed to have been received by the handler at the location of the approved plant at which it was received immediately prior to its being so diverted. "Producer" shall not include any person with respect to milk produced by him which is received at a plant operated by a handler who is subject to another Federal marketing order and who is partially exempt from the provisions of this part pursuant to § 1128.61.

§ 1128.11 Producer milk.

"Producer milk" means only that skim milk or butterfat contained in (a) milk received at an approved plant directly from producers, (b) milk of producers diverted from an approved plant to an unapproved plant in accordance with the conditions set forth in § 1128.10(c), or (c) milk received by a cooperative association in its capacity as a handler pursuant to § 1128.9(c).

§ 1128.12 Other source milk.

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month in the form of products designated as Class I milk pursuant to § 1128.41(a) except (1) such products received from other approved plants, including milk received from a cooperative association in its capacity as a handler pursuant to § 1128.9(c), or (2) producer milk; and

(b) Products designated as Class II milk pursuant to § 1128.41 (b)(1) or (c) from any source (including those produced in the plant), which are reprocessed or converted to another product during the month.

§ 1128.13 Producer-handler.

"Producer-handler" means any person who produces milk and operates an approved plant, but who receives no milk other than from his own production and from approved plants.

§ 1128.14 Route.

"Route" means any delivery (including any delivery by a vendor or at a plant store) of milk, skim milk, buttermilk or flavored milk drink other than in bulk to a milk processing plant.

§ 1128.15 Base milk.

"Base milk" means milk received from a producer by a handler during any of the months of March through June which is not in excess of such producer's daily average base computed pursuant to § 1128.80 multiplied by the number of days in such month for which such producer delivered milk to such handler.

§ 1128.16 Excess milk.

"Excess milk" means producer milk received by a handler during any of the months of March through June which is in excess of base milk received from such producer during such month, and it shall include all milk received from producers for whom no daily average base can be computed pursuant to § 1128.80.

MARKET ADMINISTRATOR

§ 1128.20 Designation.

The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1128.21 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1128.22 Duties.

The market administrator shall perform all duties necessary to administer the terms and provisions of this part including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of funds provided by § 1128.98 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 1128.97) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, by posting in a conspicuous place in his office and such other means as he deems appropriate, the name of any person who, within 5 days after the day upon which he is required to perform such acts, has not:

(1) Made reports pursuant to § 1128.30 to § 1128.32, inclusive; or

(2) Made payments pursuant to § 1128.90 to § 1128.99, inclusive.

(i) On or before the 12th day after the end of each month, report to each cooperative association, which so requests, the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the milk so received shall be prorated to each class in the proportion that the total receipts of milk from producers by such handler were used in each class;

(j) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate the prices determined for each month as follows:

(1) On or before the 5th day of each month the minimum price for Class I milk pursuant to § 1128.50 and the Class I butterfat differential pursuant to § 1128.52(a), both for the current month, and the minimum prices for Class II and Class II-A milk pursuant to § 1128.51 and the butterfat differential for Class II and Class II-A milk pursuant to § 1128.52(b), both for the preceding month.

(2) On or before the 12th day of each month, the uniform prices computed pursuant to § 1128.72 or § 1128.73 as applicable and the butterfat differential computed pursuant to § 1128.92, both applicable to milk delivered during the preceding month;

(k) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information; and

(l) Furnish to a cooperative association upon request the data furnished to the market administrator pursuant to § 1128.31(a) with respect to milk of its members.

REPORTS, RECORDS AND FACILITIES

§ 1128.30 Reports of receipts and utilization.

On or before the 7th day after the end of each month, each handler, except a producer-handler, shall report to the market administrator in detail and on forms prescribed by the market administrator as follows for each approved plant operated by him, or, in the case of a cooperative association, for producer milk diverted by it:

(a) The quantities of skim milk and butterfat contained in milk received from producers, and for the months of March through June, the aggregate quantities of base milk and excess milk;

(b) The quantities of skim milk and butterfat contained in (or used in the production of) receipts from other handlers;

(c) The quantities of skim milk and butterfat contained in receipts of other source milk (except Class II and II-A products disposed of in the form in which received without further processing or packaging by the handler);

(d) The quantities of skim milk and butterfat contained in or represented by all milk, skim milk, cream and products specified as Class I milk pursuant to § 1128.41(a) on hand to the beginning and the end of the month;

(e) The utilization of all skim milk and butterfat required to be reported pursuant to this section;

(f) The pounds of milk received from producers at each approved plant and the pounds of Class I milk disposed of from each such plant, if the handler operates more than one approved plant;

(g) The disposition of Class I products on routes wholly outside the marketing area; and

(h) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 1128.31 Reports of payments to producers.

On or before the 20th day of each month, each handler shall submit to the market administrator his producer payroll for deliveries of the preceding month which shall show:

(a) The total pounds and the average butterfat test of milk received from each producer and cooperative association, the number of days, if less than the entire month, for which milk was received from each such producer, and, for the months of March through June, such producer's deliveries of base milk and excess milk;

(b) The amount of payment to each producer and cooperative association; and

(c) The nature and amount of any deductions or charges involved in such payments.

§ 1128.32 Other reports.

(a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler who causes milk to be diverted to an unapproved plant shall, prior to such diversion, report to the market administrator and to the cooperative association of which such producer is a member, his intention to divert such milk, the proposed date or dates of such diversion, and the plant to which such milk is to be diverted.

§ 1128.33 Records and facilities.

Each handler shall maintain and make available to the market administrator or to his representatives during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all receipts of producer milk and other source milk;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and milk products handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and milk products on hand at the beginning and end of each month.

§ 1128.34 Retention of records.

All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c(15)(A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly, upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 1128.40 Skim milk and butterfat to be classified.

All skim milk and butter fat received within the month by a handler which is required to be reported pursuant to § 1128.30 shall be classified by the market administrator pursuant to the provisions of §§ 1128.41 to 1128.46, inclusive.

§ 1128.41 Classes of utilization.

Subject to the conditions set forth in §§ 1128.43 and 1128.44, the classes of utilization shall be as follows:

(a) Class I milk shall be: (1) All skim milk (including reconstituted skim milk) and butterfat disposed of in the form of milk, skim milk, buttermilk, flavored milk drinks, cream, sour cream and sour cream products under a Grade A label, and any mixture (except eggnog, aerated cream products and mixes for ice cream or other frozen dairy products) of cream and milk or skim milk: *Provided, however*, That when any such product is fortified with nonfat milk solids the amount of skim milk to be classified as Class I shall be only that amount equal to the weight of skim milk in an equal volume of unfortified product of the same nature and butterfat content, and (2) all skim milk and butterfat not specifically accounted for as Class II or Class II-A.

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than those specified in paragraph (a) or (c) of this section;

(2) Disposed of for livestock feed;

(3) In actual shrinkage of skim milk and butterfat, respectively, not to exceed the following;

(i) Two percent of receipts directly from producers (excluding milk diverted pursuant to § 1128.10(c)); plus

(ii) 1.5 percent of bulk receipts of milk from other handlers except that where the handler is purchasing milk from a cooperative association in its capacity as a handler pursuant to § 1128.9 (c) and files with the market administrator, prior to the first day of the month, notice that he is purchasing such milk on the basis of the butterfat tests of farm drawn samples and weights determined at the farm, the applicable percentage on such milk shall be 2 percent, less

(iii) 1.5 percent of bulk transfers of milk from an approved plant to other milk plants (in the case of a cooperative association selling milk to a handler on the basis of farm weights and tests, as provided in subdivision (ii) of this subparagraph (3) the applicable percentage shall be 2.0, plus

(iv) Shrinkage in other source milk determined pursuant to § 1128.42.

(4) In inventory of any products specified in subparagraph (a)(1) of this section on hand at the end of the month; and

(5) Skim milk contained in any fortified product designated in paragraph (a)(1) of this section in excess of the pounds of skim milk in such product classified as Class I pursuant to such subparagraph.

(c) Class II-A milk shall be all skim milk and butterfat used to produce Cheddar cheese.

§ 1128.42 Shrinkage on other source milk.

The market administrator shall determine the shrinkage in other source milk as follows:

(a) Compute the total shrinkage of skim milk and butterfat for each handler, and

(b) Assign a pro rata share of such shrinkage to other source milk on the basis of the percentage that such other source milk represents of total receipts at such plant to which shrinkage may be assigned to Class II pursuant to § 1128.41(b)(3).

§ 1128.43 Responsibility of handlers and reclassification of milk.

All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat proves to the market administrator that such skim milk or butterfat should be classified otherwise.

§ 1128.44 Transfers.

Skim milk or butterfat disposed of by a handler by either transfer or diversion from an approved plant shall be classified:

(a) At the class mutually indicated in writing to the market administrator by both handlers on or before the 7th day after the end of the month within which such transaction occurred, otherwise as Class I milk, if transferred or diverted in the form of milk, skim milk or cream, to the approved plant of another handler (except a producer-handler), subject in either event to the following conditions:

(1) The receiving handler has utilization in such class of an equivalent amount of skim milk and butterfat respectively; and

(2) Such skim milk or butterfat shall be classified so as to allocate to producer milk the greatest possible Class I utilization in the two plants.

(b) As Class I milk, if transferred to a producer-handler in the form of milk, skim milk or cream;

(c) As Class I milk, if transferred or diverted in the form of milk or skim milk to an unapproved plant more than 300 miles distant by the shortest highway distance, as determined by the market administrator;

(d) As Class I milk if transferred in the form of cream under Grade A certification to an unapproved plant located more than 300 miles distant and as Class II milk if so transferred without Grade A certification;

(e) As Class I milk if transferred or diverted in the form of bulk milk, skim milk or cream to an unapproved plant located not more than 300 miles distant by the shortest highway distance and from which fluid milk is disposed of on wholesale or retail routes, unless the conditions in subparagraph (1) and (2) of this paragraph are met:

(1) The market administrator is permitted to audit the records of such unapproved plant; and

(2) Such unapproved plant receives milk from dairy farmers who the market administrator determines constitute its regular source of supply for Class I milk.

(3) If these conditions are met, the market administrator shall classify such milk as reported by the handler, subject to verification as follows:

(i) Determine the use of all skim milk and butterfat at such unapproved plant; and

(ii) Allocate the skim milk and butterfat so transferred or diverted to the

highest use classification remaining after subtracting in series beginning with the highest use classification, the skim milk and butterfat in milk received at the unapproved plant direct from dairy farmers; and

(f) As Class II milk if transferred or diverted in the form of milk, skim milk or cream to an unapproved plant located not more than 300 miles distant by the shortest highway distance from which fluid milk is not disposed of on wholesale or retail routes, except that if diverted or transferred in the form of milk, to such unapproved plant which manufactures American Cheddar cheese such milk shall be classified as Class II–A milk: *Provided*, That if receipts of milk at such transferee plant are greater than the amount of milk used in the production of American Cheddar cheese during the month, the market administrator shall assign the Class II–A usage in the transferee plants, first to the milk received at such plant from dairy farmers and unapproved plants, and then pro rata to all milk transferred or diverted to such cheese plant from approved plants.

§ 1128.45 Computation of the skim milk and butterfat in each class.

For each month the market administrator shall correct for mathematical and for other obvious errors the monthly report submitted by each handler and shall compute the pounds of skim milk and butterfat in Class I and Class II milk for such handler: *Provided*, That if any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 1128.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1128.45, the market administrator shall determine the classification of milk received by each handler as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II the pounds of skim milk determined pursuant to § 1128.41 (b) (3) (i) through (iii);

(2) Subtract from the remaining pounds of skim milk in each class, in series beginning with the lowest class (Class II–A milk) the pounds of skim milk in other source milk received during the month in a form other than milk, skim milk, or cream;

(3) Subtract from the remaining pounds of skim milk in each class, in series beginning with the lowest class (Class II–A milk) the pounds of skim milk in other source milk received during the month in the form of Class I items;

(4) Subtract from the remaining pounds of skim milk, in series beginning with Class II, the pounds of skim milk contained in the Class I items in inventory at the beginning of the month;

(5) Add to the remaining pounds of skim milk in Class II the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph;

(6) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers in the form of milk, skim milk, or cream according to its classification as determined pursuant to § 1128.44(a); and

(7) If the remaining pounds of skim milk in all classes exceed the pounds of skim milk received from producers, subtract such excess from the remaining pounds of skim milk in series beginning with the lowest class. Any amount so subtracted shall be called "overage".

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of Class I milk, Class II milk and Class II–A milk computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 1128.50 Class I milk.

Subject to the provisions of §§ 1128.52 and 1128.53 the minimum price per hundredweight to be paid by each handler for milk received at his plant from producers and classified as Class I milk shall be the price for Class I milk established under Part 1126 of this chapter regulating the handling of milk in the North Texas marketing area, plus 25 cents.

§ 1128.51 Class II and Class II–A milk.

(a) *Class II milk.* Subject to the provisions of § 1128.52, the minimum price per hundredweight to be paid by each handler for milk received at his plant from producers and classified as Class II milk shall be the sum of the plus values computed as follows:

(1) From the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago, as reported by the Department during the month, subtract 3 cents, add 20 percent thereof and multiply by 4.0;

(2) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound of nonfat dry milk, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, multiply by 8.5 and multiply by 0.96

(b) *Class II–A milk.* Subject to the provisions of § 1128.52, the minimum price per hundredweight to be paid by each handler for milk received at his plant from producers and classified as Class II–A milk shall be computed by multiplying by 8.4 the average of the daily prices paid per pound of cheese at Wisconsin primary markets ("Cheddars" f.o.b. Wisconsin assembling points, cars or truckloads) as reported by the Department for the month involved.

§ 1128.52 Butterfat differential to handlers.

If the average butterfat content of the milk of any handler allocated to any class pursuant to § 1128.46 is more or less than 4.0 percent, there shall be added to the respective class price, computed pursuant to §§ 1128.50 and 1128.51, for each one-tenth of one percent that the average butterfat content of such milk is above 4.0 percent, or subtracted for each one-tenth of one percent that such average butterfat content is below 4.0 percent, an amount equal to the butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale selling price per pound (using the mid-point of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago, as reported by the Department during the appropriate month, by the applicable factor listed below and dividing the result by 10:

(a) *Class I milk.* Multiply such price for the preceding month by 1.25; and

(b) *Class II and Class II–A milk.* Multiply such price for the current month by 1.10 for the months of March, April, May, and June, and by 1.15 for each of the other months of the year.

§ 1128.53 Location adjustment to handlers.

For milk classified as Class I milk the price set forth in § 1128.50 shall be subject to the following adjustments:

(a) For milk received from producers at an approved plant located within 70 highway miles of the United States Post Office in Midland, Texas, such price shall be increased 15 cents;

(b) For milk received from producers at an approved plant located (1) east of the 103d principal meridian, (2) more than 180 highway miles from the United States Post Office in Midland, Texas, and also (3) at the following highway distances from the United States Post Office in Abilene, Texas, such price shall be reduced as follows:

	Cents
More than 70 miles but less than 105 miles	20
105 miles or more	35

(c) If a handler operates two or more approved plants at which different Class I prices apply, the total milk received by such handler from producers and classified as Class I milk shall be assigned to the milk received from producers at each such plant in the following sequence:

(1) The Class I milk disposed of from each such plant shall be assigned to receipts from producers at such plant to the extent of such receipts;

(2) Class I milk disposed of from any such plant in excess of receipts from producers at such plant shall be assigned to milk received from producers at other approved plants of such handler pro rata to the volumes of producer milk moved to such plant from each such other plant to the extent that milk was so moved; and

(3) Any remaining milk received from producers and classified as Class I milk shall be assigned pro rata to receipts from producers to which Class I milk is not otherwise assigned.

§ 1128.54 Use of equivalent prices.

If for any reason a price quotation required by this order for computing class prices or for any other purpose is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1128.60 Producer-handlers.

Sections 1128.40 through 1128.46, 1128.50 through 1128.53, 1128.70 through 1128.76, 1128.80, 1128.81 and 1128.90 through 1128.99 shall not apply to a producer-handler.

§ 1128.61 Plants subject to other Federal orders.

The provisions of this part shall not apply with respect to the operation of any plant specified in paragraph (a), (b), or (c) of this section except that the operator thereof shall, with respect to total receipts of skim milk and butterfat at such plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) An approved plant pursuant to § 1128.7 (a) (1) or (b) which also meets the pooling requirements of another Federal order and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in such other Federal order marketing area than was disposed of on routes in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month, it shall continue to be subject to all the provisions of this part until the third consecutive month in which a greater proportion of its Class I route disposition is made in such other marketing area unless notwithstanding the provisions of this paragraph it is regulated under such other order.

(b) An approved plant pursuant to § 1128.7 (a) (1) or (b) which also meets the pooling requirements of another Federal order on the basis of route distribution in such other marketing area and from which, the Secretary determines, a greater quantity of Class I milk is disposed of during the month on routes in this marketing area than is so disposed of in such other marketing area but which plant is fully regulated under such other Federal order.

(c) An approved plant pursuant to § 1128.7(a) (2) which (1) meets the pooling requirements of another Federal order and from which greater qualifying shipments are made during the month to plants regulated under such other order than are made to plants regulated under this part or, (2) retains automatic pooling status for the month under another Federal order by virtue of its performance in previous months.

§ 1128.62 Handlers operating unapproved plants from which Class I milk is disposed of in the marketing area.

In the case of any handler described in § 1128.9(b) who is not subject to the provisions of § 1128.61, the reporting, pricing and payment provisions of this part shall apply only as follows:

(a) The handler shall report as required pursuant to §§ 1128.30 and 1128.31, reporting receipts from and payments to dairy farmers in lieu of such information with respect to producers, and shall allow verification of such reports pursuant to § 1128.33;

(b) With respect to either all skim milk and butterfat disposed of as Class I milk during the month on routes operated wholly or partially within the marketing area or only the skim milk and butterfat disposed of as Class I milk on routes within the marketing area if the handler maintains and makes available to the market administrator the facilities and records (including the accounts of individual sales outlets) necessary to verify and establish such disposition, the handler shall pay to the market administrator on or before the 25th day after the end of the month, any plus difference between:

(1) The value of such skim milk or butterfat at the Class I price which would be applicable at an approved plant thus located; and

(2) The value of such skim milk and butterfat at the price paid dairy farmers by such handler for milk received at the unapproved plant from them during the month, adjusted by the method used in computing payments to such dairy farmers to the average butterfat test of Class I milk disposed of in the marketing area: *Provided*, That if such handler has paid more than one such price, the lowest price(s) paid for an equivalent volume of milk shall be used in this computation; and

(c) As his pro rata share of the expense of administration of this part, the handler shall pay to the market administrator, with respect to all Class I milk disposed of on routes in the marketing area, an amount per hundredweight and in the manner specified in § 1128.98.

DETERMINATION OF UNIFORM PRICE

§ 1128.70 Computation of each handler's pool obligation.

For each month, the market administrator shall compute the pool obligations of each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 1128.46 by the applicable class price and add together the resulting amounts;

(b) Add an amount computed by multiplying the pounds of any overage deducted from either class pursuant to § 1128.46(a) (7) and (b) by the applicable class price;

(c) Add the amount computed by multiplying the difference between the applicable Class II price for the preceding month and the applicable Class I price for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1128.46(a) (4) and the corresponding step of paragraph (b); and

(d) If any other source milk has been subtracted from Class I pursuant to § 1128.46(a) (2) and the corresponding step of paragraph (b), add an amount equal to its value computed at the difference between the applicable Class I and Class II price for the current month.

§ 1128.71 Computation of aggregate value used to determine price(s).

For each month the market administrator shall compute an aggregate value from which to determine the uniform price(s) per hundredweight for milk of 4.0 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1128.70 for all handlers who made the reports prescribed in § 1128.30 and who made payments due pursuant to §§ 1128.90 and 1128.94 for the preceding month;

(b) Subtract the aggregate of the values of all plus location adjustments to producers pursuant to § 1128.91, and add the aggregate of the values of all such minus adjustments;

(c) Add not less than one-half of the unobligated cash balance on hand in the producer-settlement fund; and

(d) Subtract if the average butterfat content of the milk included in these computations is greater than 4.0 percent, or add if such average butterfat content is less than 4.0 percent, an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 1128.92 and multiplying the resulting figures by the total hundredweight of such milk.

§ 1128.72 Computation of uniform price.

For each of the months of July through February the market administrator shall compute the uniform price per hundredweight for all milk of 4.0 percent butterfat content received at an approved plant as follows:

(a) Divide the aggregate value computed pursuant to § 1128.71 by the total hundredweight of milk included in such computation; and

(b) Subtract not less than 4 cents nor more than 5 cents.

§ 1128.73 Computation of uniform prices for base and excess milk.

For each of the months of March through June the market administrator shall compute the uniform prices per hundredweight for base and excess milk each of 4.0 percent butterfat content received from producers at an approved plant as follows:

(a) Compute the total value of excess milk included in these computations by (1) multiplying the total volume of Class II–A milk by the price for Class II–A milk, (2) subtracting the total quantity of Class II–A milk from the total volume of excess milk and multiplying the remainder by the Class II price, (3) adding together the values obtained in subparagraphs (1) and (2) of this paragraph,

and (4) adding the amount, if any, by which the value computed pursuant to paragraph (c) (1) of this section exceeds the value computed pursuant to paragraph (c) (2) of this section;

(b) Divide the total value of excess milk obtained in paragraph (a) of this section by the total hundredweight of such milk, and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat received from producers;

(c) The total value of base milk included in these computations shall be the lesser of:

(1) The aggregate value computed pursuant to § 1128.71 less the value computed pursuant to paragraph (a) (1) of this section, or

(2) The hundredweight of such base milk multiplied by the price for Class I milk of 4.0 percent butterfat content plus 4 cents;

(d) Divide the amount obtained in paragraph (c) of this section by the total hundredweight of base milk included in these computations;

(e) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content received from producers.

Determination of Base

§ 1128.80 Computation of daily average base for each producer.

For the months of March through June of each year the market administrator shall compute a daily average base for each producer as follows, subject to the rules set forth in § 1128.81, by dividing the total pounds of milk received by a handler(s) from such producer during the immediately preceding base-forming period of September through December, by the number of days from the first day for which such producer made deliveries during such period to the last day of such period, less the number of days for which no deliveries are made, or by 112, whichever is more.

§ 1128.81 Base rules.

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base as calculated pursuant to § 1128.80 to each person for whose account producer milk was delivered to a handler(s) during the base-forming period;

(b) An entire base shall be transferred from a person holding such base to any other person effective as of the beginning of the month next following the receipt by the market administrator of an application for such transfer, such application to be on forms approved by the market administrator and signed by the baseholder, or his heirs, or assigns and by the person to whom such base is to be transferred: *Provided*, That if a base is held jointly, the entire base shall be transferrable only upon the receipt of such application signed by all joint holders or their heirs, or assigns.

Payments

§ 1128.90 Time and method of payment.

Each handler shall make payment as follows:

(a) On or before the 15th day after the end of the month during which the milk was received, to each producer for whom payment is not made pursuant to paragraph (c) of this section, at not less than the applicable uniform price(s) for such month computed pursuant to § 1128.72 or § 1128.73, adjusted by the butterfat differential computed pursuant to § 1128.92, subject to location adjustments to producers pursuant to § 1128.91, and less the amount of the payment made pursuant to paragraph (b) of this section: *Provided*, That if by such date such handler has not received full payment pursuant to § 1128.95, he may reduce his total payments to all producers uniformly by not less than the amount of reduction in payments from the market administrator; he shall, however, complete such payments pursuant to this paragraph not later than the date for making such payments next following receipt of the balance from the market administrator.

(b) On or before the 25th day of each month, to each producer for whom payment is not made pursuant to paragraph (c) of this section for milk received during the first 15 days of such month at not less than the Class II price of the preceding month.

(c) On or before the 13th and 23d days of each month, in lieu of payments pursuant to paragraphs (a) and (b), respectively, of this section, to a cooperative association which so requests, with respect to producers for whose milk such cooperative association is authorized to collect payment, an amount equal to the sum of the individual payments otherwise payable to such producer. Such payment shall be accompanied by a statement showing for each producer the items required to be reported pursuant to § 1128.31.

§ 1128.91 Location adjustments to producers.

(a) In making payments to producers pursuant to § 1128.90 the following adjustments shall apply to the uniform price for all milk computed pursuant to § 1128.72 or to the uniform price for base milk computed pursuant to § 1128.73 (e):

(1) For milk received from producers at an approved plant located within 70 highway miles of the United States Post Office in Midland, Texas, each handler shall add 15 cents;

(2) For milk received from producers at an approved plant located (i) east of the 103d principal meridian (ii) more than 180 highway miles from the United States Post Office in Midland, Texas, and, also (iii) at the following distances from the United States Post Office in Abilene, Texas, each handler may deduct the applicable amounts set forth below:

	Cents
More than 70 miles but less than 105	20
105 miles or more	25

(b) The location adjustment applicable with respect to excess milk shall be computed as follows:

(1) Subtract from the total amount of Class I milk allocated to producer milk pursuant to § 1128.46 the total volume of base milk received by all handlers;

(2) Divide the result by the total volume of excess milk received by all handlers; and

(3) Multiply by the rate of location adjustment applicable for base milk received at the same location and round to the nearest cent.

§ 1128.92 Producer butterfat differential.

In making payments pursuant to § 1128.90(a), there shall be added to or subtracted from the uniform price for each one-tenth of one percent that the average butterfat content of the milk received from the producer is above or below 4.0 percent, an amount computed by multiplying by 1.2 the simple average, as computed by the market administrator of the daily wholesale selling prices per pound (using the mid-point of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department during the month when such milk was received, dividing the resulting sum by 10, and rounding to the nearest one-tenth of a cent.

§ 1128.93 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to §§ 1128.95 (b), 1128.94 and 1128.96, and out of which he shall make all payments to handlers pursuant to §§ 1128.95 and 1128.96.

§ 1128.94 Payments to the producer-settlement fund.

On or before the 13th day after the end of the month during which the milk was received, each handler, including a cooperative association which is a handler, shall pay to the market administrator the amount, if any, by which the pool obligation of such handler as determined pursuant to § 1128.70 is greater than the amount required to be paid producers by such handler pursuant to § 1128.90.

§ 1128.95 Payments out of the producer-settlement fund.

On or before the 14th day after the end of the month during which the milk was received, the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the value of the milk received by such handler from producers during the month as determined pursuant to § 1128.70 is less than the amount required to be paid producers by such handler pursuant to § 1128.90: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 1128.96 Adjustment of accounts.

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due;

(a) The market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amounts so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 1128.97 Marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than himself) pursuant to § 1128.90(a), shall deduct 5 cents per hundredweight or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of each month. Such moneys shall be used by the market administrator to sample, test, and check the weights of milk received and to provide producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers and on or before the 15th day after the end of each month pay such deduction to the cooperative association rendering such services, accompanied by a statement showing the quantity of milk for which such deduction was computed for each such producer.

§ 1128.98 Expenses of administration.

As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 15th day after the end of each month, 4 cents per hundredweight or such amount not exceeding 4 cents per hundredweight as the Secretary may prescribe with respect to all receipts within the month of (a) other source milk which is classified as Class I milk, (b) milk from producers, including such handler's own production, and (c) milk received from a cooperative association in its capacity as a handler pursuant to § 1128.9(c).

§ 1128.99 Termination of obligation.

The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to 8(c)(15)(A) of the act, a petition claiming such money.

Effective Time, Suspension or Termination

§ 1128.100 Effective time.

The provisons of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated, pursuant to § 1128.101.

§ 1128.101 Suspension or termination.

The Secretary may suspend or terminate this part or any provision of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the act. This part shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 1128.102 Continuing power and duty of the market administrator.

If upon the suspension or termination of any or all provisions of this part, there are any obligations thereunder, the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1128.103 Liquidation.

Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books, and records of the market administrator shall be transferred promptly to such liquidating agent. If upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

Miscellaneous Provisions

§ 1128.110 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 1128.111 Separability of provisions.

If any provision of this part or its application to any person or circumstances, is held invalid, the application of such provision and the remaining provisions of this part to other persons or circumstances, shall not be affected thereby.

Effective date. March 1, 1962.

Signed at Washington, D.C., on February 2, 1962.

JAMES T. RALPH,
Assistant Secretary.

Chapter I—Federal Trade Commission

[Docket C-1]

PART 13—PROHIBITED TRADE PRACTICES

Ru-Ex, Inc., et al.

Subpart—Advertising falsely or misleadingly: § 13.170 *Qualities or properties of product or service:* §13.170–52 *Medicinal, therapeutic, healthful, etc.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Ru-Ex, Inc., et al., St. Paul, Minn., Docket C–1, Oct. 17, 1961]

In the Matter of Ru-Ex, Inc., a Corporation, and William H. Fraser, and Reggie L. Fraser, Individually and as Officers of Said Corporation

Consent order requiring St. Paul, Minn., distributors of their "Ru-Ex Compound" to cease falsely representing in advertising the therapeutic effect of lemon juice used with the preparation in treatment of arthritis and related diseases.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Ru-Ex, Inc., a corporation, and its officers, and William H. Fraser and Reggie L. Fraser, individually and as officers of said corporation, and respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of the preparation "Ru-Ex Compound", or any other medicinal or drug preparation of substantially the same formula, whether sold under this name or any other names, do forthwith cease and desist from:

1. Disseminating or causing to be disseminated any advertisement by means of the United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement, directly or indirectly:

(a) Represents that lemon juice, however used, exerts any therapeutic effect on any kind of arthritis, rheumatism or neuritis or on the symptoms or manifestations thereof.

(b) Represents that any ingredient of, or substance to be used in conjunction with, said preparation exerts any therapeutic effect on any disease or ailment or on the symptoms or manifestations of any disease or ailment, when in fact such ingredient or substance exerts no such therapeutic effect.

(c) Represents that the therapeutic value of such preparation is other than that of temporary relief of the minor aches and pains of arthritis, rheumatism or neuritis.

2. Disseminating or causing to be disseminated, any advertisement by any means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase in commerce, as "commerce" is defined in the Federal Trade Commission Act, of any preparation, which advertisement contains any of the representations prohibited in Paragraph 1 hereof.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Title 14—AERONAUTICS AND SPACE

Chapter III—Federal Aviation Agency

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 60–FW–89]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

Alteration

On March 22, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 2414) stating that the Federal Aviation Agency was considering alteration of low altitude VOR Federal airway No. 3 west alternate from Jacksonville, Fla., to Brunswick, Ga., by extending it from Jacksonville to Savannah, Ga. It was also stated that the floor of the control area associated with Victor 3, its east alternate and its proposed west alternate between Jacksonville, Fla., and Savannah, Ga., would be designated to extend upward from 1,200 feet above the surface in accordance with the provisions of Amendment 60–21 to Part 60 of the Civil Air Regulations.

On September 20, 1961, a supplemental notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 8853) stating that the Federal Aviation Agency was amending the original notice as follows:

1. Withdraw the proposal to redesignate Victor 3 west alternate to extend from Jacksonville to Savannah, and to redesignate the floor of control areas associated with Victor 3 and its alternates between these points.

2. Realign the present Victor 3 west alternate between the Jacksonville VOR to the Brunswick VOR.

3. Designate Intermediate altitude VOR Federal airway No. 1655 from Jacksonville to Savannah.

No adverse comments were received regarding the proposed amendments. However, the Air Transport Association of America did suggest that the airspace underlying the proposed intermediate altitude airway be designated as controlled airspace to permit the routing of aircraft below 14,500 feet MSL through that area when the Townsend, Ga., Restricted Area (R–3006) is not being used for the purposes designated. A proposal to this effect will be forthcoming upon completion of the study for implementation in this area of Amendment 60–21 to Part 60 of the Civil Air Regulations.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12583) and for the reasons stated in the notice, the following actions are taken:

§ 600.6003 [Amendment]

1. In the text of § 600.6003 (14 CFR 600.6003) "including a west alternate via the INT of the Jacksonville VOR 349° and the Brunswick VOR 238° radial;" is deleted and "including a west alternate via the INT of the Jacksonville VOR 334° and the Brunswick VOR 238° radials;" is substituted therefor.

2. Part 600 (14 CFR 600) is amended by adding:

§ 600.1655 VOR Federal airway No. 1655 (Jacksonville, Fla., to Savannah, Ga.).

From the Jacksonville, Fla., VOR via the INT of the Jacksonville VOR 334° and the Savannah, Ga., VOR 216° radials; to the INT of the Alma, Ga., VOR 083° and the Savannah VOR 216° radials; thence 8 mile wide airway to the Savannah VOR.

These amendments shall become effective 0001, e.s.t., April 5, 1962.

Issued in Washington, D.C., on February 2, 1962.

[Airspace Docket No. 61–WA–190]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

Designation and Alteration

The purpose of these amendments to Part 600 and §§ 600.6810 and 600.6880 is to designate low altitude VOR Federal airway No. 856 and extend low altitude VOR Federal airway Nos. 810 and 880 from Chicago, Ill., to New York, N.Y.

The 800 series airways are designated to indicate preferred routes of flight between major terminal areas for the purpose of segregating opposite direction traffic and generally coincide with existing low altitude VOR Federal airways. They simplify flight planning for pilots and indicate the direction of normal traffic flow. It has been determined that 800 series airways are necessary to meet the above requirements between the Chicago, Ill., and New York, N.Y., terminal areas. Therefore, action is taken to designate Victor 856 and extend Victor 810 and Victor 880 between the Chicago, Ill., and the New York, N.Y., metropolitan areas.

Since this amendment imposes no additional burden on any person, nor involves the designation of additional controlled airspace, notice and public procedure hereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective more than 30 days after publication.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) the following actions are taken:

1. In Part 600 (14 CFR 600) the following is added:

§ 600.6856 VOR Federal airway No. 856 (Chicago, Ill., Metropolitan Area to New York, N.Y., Metropolitan Area); normal traffic flow eastbound.

From the Northbrook, Ill., VORTAC via the Pullman, Mich., VORTAC; Lansing, Mich., VOR; Salem, Mich., VORTAC; Windsor, Ontario, Canada, VOR; Erie, Pa., VORTAC; Bradford, Pa., VOR; Slate Run, Pa., VOR; Milton, Pa., VORTAC; INT of the Selinsgrove, Pa., VORTAC 083° and the Tower City, Pa., VOR 040° radials; Allentown, Pa., VORTAC; to the Solberg, N.J., VORTAC, excluding the portion which lies over Canada.

§ 600.6810 [Amendment]

2. In the caption of § 600.6810 (26 F.R. 21) "to the Chicago, Ill., Metropolitan Area" is deleted and "to the New York, N.Y., Metropolitan Area" is substituted therefor.

3. In the text of § 600.6810 (26 F.R. 21) "to the Northbrook, Ill., VORTAC." is deleted and "Northbrook, Ill., VORTAC; Pullman, Mich., VORTAC; Lansing, Mich., VOR; Salem, Mich., VORTAC; Windsor, Ontario, Canada, VOR; Erie, Pa., VORTAC; Bradford, Pa., VOR; Slate Run, Pa., VOR; Selinsgrove, Pa., VORTAC; Tower City, Pa., VOR; Yardley, Pa., VOR; to the Robbinsville, N.J., VOR, excluding the portion which lies over Canada" is substituted therefor.

§ 600.6880 [Amendment]

4. In the caption of § 600.6880 (26 F.R. 5868) "From the Chicago, Ill., Metropolitan Area" is deleted and "From the New York, N.Y., Metropolitan Area" is substituted therefor.

5. In the text of § 600.6880 (26 F.R. 5868) "From the Joliet, Ill., VORTAC via the Bradford, Ill., VOR; Burlington, Iowa, VOR; Kirksville, Mo., VORTAC; to the Kansas City, Mo., VORTAC." is deleted and "From the INT of the Sparta, N.J., VOR 300° and the Tannersville, Pa., VORTAC 055° radials via the Wilkes-Barre, Pa., VOR; Stonyfork, Pa., VORTAC; Bradford, Pa., VOR; Erie, Pa., VORTAC; Windsor, Ontario, Canada VOR; Salem, Mich., VORTAC; INT of the Pullman, Mich., VORTAC 091° and the Keeler, Mich., VOR 061° radials; Keeler, VOR; Naperville, Ill., VOR; Joliet, Ill., VORTAC; Bradford, Ill., VOR; Burlington, Iowa, VOR; Kirksville, Mo., VORTAC; to the Kansas City, Mo., VORTAC; excluding the portion which lies over Canada." is substituted therefor.

These amendments shall become effective 0001 e.s.t., April 5, 1962.

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Revocation of Federal Airway, Associated Control Areas, and Reporting Points

On October 10, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 9556) stating that the Federal Aviation Agency proposed to revoke low altitude Red Federal airway No. 109 and its associated control areas from Portland, Oreg., to Spokane, Wash.

Although not stated in the notice, action is taken herein to revoke § 601.4309, reporting points associated with Red 109. Since revocation of Red 109 between Portland and Spokane would include the entire airway, there would no longer be a requirement to retain § 601.4309 in Part 601 of the Regulations of the Administrator.

No adverse comments were received regarding the amendments proposed in the notice.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated herein and in the notice, the following actions are taken:

1. In Part 600 (14 CFR 600) § 600.309 Red Federal airway No. 109 (Portland, Oreg., to Spokane, Wash.), is revoked.

2. In Part 601 (14 CFR 601) § 601.309 Red Federal airway No. 109 control areas (Portland, Oreg., to Spokane, Wash.), is revoked.

3. In Part 601 (14 CFR 601) § 601.4309 Red Federal airway No. 109 (Portland, Oreg., to Spokane, Wash.), is revoked.

These amendments shall become effective 0001 e.s.t. April 5, 1962.

[Airspace Docket No. 60–LA–98]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Revocation of Federal Airway, Associated Control Areas, and Reporting Points

On June 26, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 4890) stating that the Federal Aviation Agency proposed to revoke low altitude Blue Federal airway No. 14 from Campo, Calif., to Julian, Calif., and from Riverside, Calif., to Wheeler Ridge, Calif., its associated control areas and reporting points. It was also stated that the route served by Blue 14 is adequately served by low altitude VOR Federal airways Nos. 458 and 137. In addition, it was stated that the revocation of Blue 14 would not necessarily result in the discontinuance of the low frequency navigational aids associated with this airway and that any proposals to discontinue one or more of these aids would be processed in accordance with current Agency procedures. These procedures afford interested persons an opportunity to comment on such action.

The Departments of the Navy and the Air Force offered no objection to the proposed amendments.

The National Association of State Aviation Officials opposed the proposed amendments unless the VFR pilot can be guaranteed the navigational capability provided by the low frequence navigational facilities for operation through the Cajon Pass and for avoidance of the many restricted areas and climb corridors north and east of this VFR Flyway.

The Aviation Director, San Bernardino County, Calif., in commenting on the proposals stated that there is now a proposal under consideration to abandon Victor 137 from Thermal to Palmdale and that if this is accomplished, Blue 14 must be retained. He further stated that a requirement exists for a controlled airway through Cajon Pass and underneath the approaches to George AFB and underneath the George AFB Restricted Area/Military Climb Corridor.

The Federal Aviation Agency has no plans to decommission either the Palmdale or the Riverside L/MF radio range stations in the foreseeable future. Accordingly, these facilities will be available for VFR navigation between Palmdale and Riverside. Any action to decommission these facilities would not be taken until a specific proposal to do so had been widely publicized and interested persons afforded every opportunity to comment on such action.

Blue 14 and Victor 137 both have a minimum en route altitude of 12,000 feet MSL in the vicinity of Cajon Pass and the George AFB Restricted Area/Military Climb Corridor (R–2526). The lowest floor of R–2526 where it crosses

both Blue 14 and Victor 137 is 10,900 feet MSL. Therefore, IFR operations along these route segments would not permit clearance beneath R-2526 but would require prior approval to traverse the restricted area. In addition this segment of Victor 137 is within the Victorville, Calif., transition area (§ 601.10010). If both Blue 14 and Victor 137 were revoked, IFR operations could be conducted in the vicinity of Cajon Pass and R-2526 by utilizing appropriate radials of existing VOR navigational facilities.

No adverse comments were received regarding revocation of the segment of Blue 14 between Wheeler Ridge and Palmdale and between Julian and Campo.

Interested persons have been afforded an opportunity to participate in the making of the rules herein adopted, and due consideration has been given to all relevant matter presented.

The substance of the proposed amendments having been published, therefore, pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) and for the reasons stated herein and in the notice, the following actions are taken:

1. In Part 600 (14 CFR 600) § 600.614 Blue Federal airway No. 14 (Campo, Calif., to Julian, Calif., and Riverside, Calif., to Wheeler Ridge, Calif.), is revoked.

2. In Part 601 (14 CFR 601) § 601.614 Blue Federal airway No. 14 control areas (Campo, Calif., to Julian, Calif., and Riverside, Calif., to Wheeler Ridge, Calif.), is revoked.

3. In Part 601 (14 CFR 601) § 601.4614 Blue Federal airway No. 14 (Campo, Calif., to Julian, Calif., and Riverside, Calif., to Wheeler Ridge, Calif.), is revoked.

These amendments shall become effective 0001 e.s.t. April 5, 1962.

PART 608—SPECIAL USE AIRSPACE

Modification of Amendment

On January 20, 1962, amendments to §§ 601.7101 and 608.34 of the Regulations of the Administrator were published in the FEDERAL REGISTER (27 F.R. 617) which altered the Camp Atterbury, Ind., Restricted Area R-3401 and the description of the continental control area.

Subsequent to the publication of the amendment, an error was noted in the description of the boundaries of R-3401. As stated in the preamble, the purpose of the alteration of R-3401 was to increase the designated altitudes, increase the time of designation, and assign a controlling agency. Alteration of the boundaries was not intended. Therefore, action is taken herein to correct this error.

Since 30 days will elapse from the time of publication of this action to the effective date of the rule as initially adopted, this change is made in compliance with section 4 of the Administrative Procedure Act.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582), effective immediately, Airspace Docket No. 61-KC-38 (27 F.R. 617) is modified as follows:

Item 1 is amended to read: In § 608.34 Indiana, R-3401 Camp Atterbury, Ind. (26 F.R. 7194) is amended to read:

R-3401 Camp Atterbury, Ind.

Boundaries. Beginning at Lat. 39°21'30" N., Long. 86°06'00" W.; to Lat. 39°21'30" N., Long 85°59'30" W.; to Lat. 39°13'00" N., Long. 85°59'30" W.; to Lat. 39°13'00" N., Long. 86°06'00" W.; to the point of beginning.

Designated altitudes. Surface to 40,000 feet MSL.

Time of designation. Continuous.

Controlling agency. Federal Aviation Agency, Indianapolis ARTC Center.

Using agency. Commanding Officer, Camp Atterbury, Ind.

Title 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Reg. No. 4, further amended]

PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (1950 ——)

Waiver of Recovery or Adjustment of Overpayment

Regulations No. 4, as amended, of the Social Security Administration (20 CFR 404.1 et seq.), are further amended as follows:

1. Section 404.509 is amended to read as follows:

§ 404.509 "Against equity and good conscience"; defined.

"Against equity and good conscience" means that adjustment or recovery of an overpayment will be considered inequitable if the individual (regardless of his financial circumstances) has, by reason of the overpayment relinquished a valuable right (illustrated by examples (1) and (2) below) or changed his position for the worse (illustrated by examples (3) and (4) below).

Example 1. After being awarded old-age insurance benefits, an individual resigned from employment on the assumption he would receive regular monthly benefit payments. It was discovered 3 years later that (due to Bureau error) his award was erroneous because he did not have the required insured status. Due to his age, the individual was unable to get his job back and could not get any other employment. In this situation, recovery or adjustment of the incorrect payments would be against equity and good conscience because the individual gave up a valuable right.

Example 2. An individual filed for a disability insurance benefit instead of an old-age insurance benefit because he believed himself to be age 61. He relied at the time on evidence in his possession showing him to be age 61 which he had every reason to believe was correct. He was awarded and paid disability insurance benefits. Two years later other evidence was obtained which proved beyond doubt that the individual actually was age 65 when he filed for his disability insurance benefit. Consequently, the payment of disability insurance benefits was incorrect. However, because of the award of these benefits he relinquished his right to file with greater promptitude (that is, at the time he filed for disability insurance benefits) for old-age insurance benefits. Thus, recovery or adjustment of the incorrect payment for those months for which he is not entitled to old-age insurance benefits would be against equity and good conscience.

Example 3. A widow having been awarded benefits for herself and daughter, entered her daughter in college because the monthly benefits made this possible. After the widow and her daughter received payments for almost a year, the deceased worker was found to be not insured and all payments to the widow and child were incorrect. The widow has no other funds with which to pay the daughter's college expenses. Having entered the daughter in college and thus incurred a financial obligation toward which the benefits had been applied, she was in a worse position financially than if she and her daughter had never been entitled to benefits. In this situation, the recovery of the incorrect payments would be inequitable.

Example 4. X died without leaving an estate. Z, a friend, paid the burial expenses of $150 and filed a claim for a lump-sum death payment on X's earnings record. After receiving the lump-sum death payment of $150, Z used the payment to purchase a marker for the deceased's grave. Thereafter, it was discovered that X lacked the required insured status and thus the lump sum was paid in error. Recovery of the $150 from Z is considered to be against equity and good conscience because in reliance on the payment he changed his position for the worse. Solely by reason of the lump-sum death payment, he made a purchase which he otherwise would not have made.

2. Section 404.510 is amended to read as follows:

§ 404.510 When an individual is "without fault" in a deduction-overpayment.

Except as provided in § 404.511, or elsewhere in this Subpart F, an individual will be considered "without fault" in accepting a payment which is incorrect because he failed to report an event specified in sections 203 (b) and (c) of the Act, or an event specified in section 203(d) of the Act as in effect for monthly benefits for months after December 1960, or because a deduction is required under sections 203 (b), (c), (d), or section 222(b) of the Act, or payments were not withheld as required by section 203(b) of the Act, if it is shown that such failure to report or acceptance of the overpayment was due to one of the following circumstances:

(a) Reasonable belief that only his net cash earnings ("take-home" pay) are included in determining the annual earnings limitation or the monthly earnings limitation under section 203(e) of the Act in effect prior to the effective date of the Social Security Amendments of 1960, and section 203(f) of the Act as amended in 1960.

(b) Reliance upon erroneous information from an official source within the Social Security Administration (or other governmental agency which the individual had reasonable cause to believe was connected with the administration of benefits under title II of the Act) with respect to the interpretation of a pertinent provision of the Social Security Act or regulations pertaining thereto. For example, this circumstance could occur where the individual is misinformed by such source as to the interpretation of a provision in the Act or regulations relating to deductions, or relating to the effect of residence of an alien outside the United States for more than 6 months.

(c) Amount of beneficiary's allowable earnings for deduction purposes for a taxable year beginning after 1954 is reduced below $1,200 by reason of his death in that year.

(d) Gross annual earnings in a taxable year beginning before January 1, 1961, exceed the $1,200 earnings limitation by an amount not in excess of the employee social security tax on $1,200.

(e) Reasonable belief that in determining, for deduction purposes, his earnings from employment and/or net earnings from self-employment in the taxable year in which he became entitled to benefits, earnings in such year prior to such entitlement would be excluded. However, this provision does not apply if his earnings in that taxable year, beginning with the first month of entitlement, exceeded $1,200.

(f) Unawareness that his earnings were in excess of the earnings limitation applicable to the imposition of deductions and the charging of excess earnings as applied both before and after the effective date of the Social Security Amendments of 1960, or that he should have reported such excess where these earnings were greater than anticipated because of:

(1) Retroactive increases in pay, including back-pay awards;

(2) Work at a higher pay rate than realized;

(3) Failure of the employer of an individual unable to keep accurate records to restrict the amount of earnings or the number of hours worked in accordance with a previous agreement with such individual;

(4) The occurrence of five Saturdays (or other work days, e.g. five Mondays) in a month and the earnings for the services on the fifth Saturday or other work day caused the deductions.

(g) The continued issuance of benefit checks to him after he sent notice to the Bureau of the event which caused or should have caused the deductions provided that such continued issuance of checks led him to believe in good faith that he was entitled to checks subsequently received.

(h) Lack of knowledge that bonuses, vacation pay, or similar payments, constitute earnings for purposes of the annual earnings limitation.

(i) Reasonable belief by an individual that no deductions are applicable for any month in the taxable year if after he earned $1,200 he restricts his monthly earnings to $80 or less, for months in any taxable year beginning after December 1954 or to $100 or less for months in any taxable year beginning after August 1958, and he so restricts his earnings.

(j) Reasonable belief that earnings in excess of $1,200 for the taxable year would subject him to deductions only for months beginning with the first month in which his earnings exceeded $1,200. However, this provision is applicable only if he reported timely to the Bureau during the taxable year when his earnings reached $1,200.

(k) Lack of knowledge by a wife, husband, or child entitled to wife's, husband's, or child's insurance benefits, as the case may be, that the individual entitled to old-age insurance benefits on the same earnings record has incurred or would incur deductions because of a violation of the annual earnings or 7-day foreign work test, whichever is applicable, provided the wife, husband, or child is not living with such old-age insurance beneficiary and did not know and had no reason to know that such beneficiary's earnings activity or the income derived therefrom has caused or would cause such deductions.

(l) Reasonable belief, with respect to earning activity for months after December 1954, that earnings from employment and/or net earnings from self-employment after the attainment of age 72 in the taxable year in which he attained age 72 would not cause deductions with respect to benefits payable for months in that taxable year prior to the attainment of age 72.

(m) Reasonable belief by an individual entitled to child's, wife's, husband's, widow's, widower's, mother's, or parent's insurance benefits that earnings from employment and/or net earnings from self-employment after the termination of entitlement (other than termination by reason of entitlement to an old-age insurance benefit) in the taxable year in which the termination event occurred would not cause deductions with respect to benefits payable for months in that taxable year prior to the month in which the termination event occurred.

(n) Failure to understand the deduction provisions of the Act or the occurrence of unusual or unavoidable circumstances the nature of which clearly shows that the individual was unaware of a violation of such deduction provisions. However, these provisions do not apply unless he made a bona fide attempt to restrict his annual earnings or otherwise comply with the deduction provisions of the Act.

3. Section 404.512 is amended to read as follows:

§ 404.512 When adjustment or recovery will be waived in a deduction overpayment.

(a) *Adjustment or recovery deemed "against equity and good conscience."* In the situations described in § 404.510 (a), (b), (c), and (d), adjustment or recovery will be waived since it will be deemed such adjustment or recovery is "against equity and good conscience." Adjustment or recovery will also be deemed "against equity and good conscience" in the situation described in § 404.510(e), but only as to a month in which the individual's earnings from wages do not exceed the total monthly benefits affected for that month.

(b) *Adjustment or recovery considered to "defeat the purpose of title II" or be "against equity and good conscience" under certain circumstances.* In the situation described in § 404.510(e) (except in the case of an individual whose monthly earnings from wages in employment do not exceed the total monthly benefits affected for a particular month), and in the situations described in § 404.510 (f) through (n), adjustment or recovery shall be waived only where the evidence establishes that adjustment or recovery would work a financial hardship (see § 404.508) or would otherwise be inequitable (see § 404.509).

§ 404.514 [Deletion]

4. Section 404.514 is deleted in entirety.

(Sec. 204, 53 Stat. 1368, as amended, sec. 205, 53 Stat. 1368, as amended, sec. 1102, 49 Stat. 647, as amended; 42 U.S.C. 404, 405, 1302; sec. 5 of Reorganization Plan No. 1 of 1953; 67 Stat. 18)

PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (1950 ——)

Miscellaneous Amendments

Regulations No. 4, as amended, of the Social Security Administration (20 CFR 404.1 et seq.) are further amended as follows:

1. Section 404.601 is amended to read as follows:

§ 404.601 Meaning of terms.

(a) *Claimant defined.* The term "claimant" for purposes of this subpart refers to the individual who has filed on his own behalf, or on whose behalf a proper party under § 404.603 has filed, an application for monthly benefits, a lump-sum death payment, a recomputation of a primary insurance amount, or the establishment of a period of disability.

(b) *Application defined.* Unless otherwise specified, the term "application" refers only to an application on a form prescribed in § 404.602, and includes an

application for monthly benefits, a lump-sum death payment, a recomputation of a primary insurance amount, and the establishment of a period of disability.

(c) *Filing of application on prescribed form.* Except as provided in §§ 404.611, 404.613, and 404.614, an individual has not "filed an application" for purposes of section 202, 216(i), or 223 of the act or for purposes of recomputation of a primary insurance amount until an application on a form prescribed in § 404.602 has been filed in accordance with the regulations in this subpart.

(d) *Execution of application defined.* The term "to execute an application" (or a written statement, request, or notice, see §§ 404.610 and 404.613) means the completion and signing of the application (or written statement, request, or notice). Irrespective of who may have completed the items on the application, or written statement, request, or notice, the document is considered to have been executed by or on behalf of such claimant when it is signed by the claimant (or an individual authorized to do so on his behalf under § 404.603).

2. Section 404.602 is amended to read as follows:

§ 404.602 Prescribed application forms.

Applications shall be made as provided in this Subpart G on such forms and in accordance with such instructions (provided thereon or attached thereto) as are prescribed by the Administration. (See Part 422 for list of appropriate forms.)

3. Section 404.603 is revised to read as follows:

§ 404.603 Execution of applications.

The Administration determines who is the proper party to execute an application for benefits in accordance with the following rules:

(a) If the claimant has attained the age of 18, is mentally competent, and is physically able to execute the application, the application shall be executed by him.

(b) If the claimant is between the ages of 16 and 18, is mentally competent, has no legally appointed guardian, committee, or other representative, and is not in the care of any person, such claimant may execute the application upon filing a statement on the prescribed form indicating capacity to act on his own behalf.

(c) If the claimant is mentally competent but has not attained age 18 and is in the care of a person, the application may be executed by such person.

(d) If the claimant (regardless of his age) has a legally appointed guardian, committee, or other representative, the application may be executed by such guardian, committee, or representative. For proper person to execute an application on behalf of an estate which is equitably entitled to a lump-sum death payment, see § 404.341.

(e) If the claimant (regardless of his age) is mentally incompetent or is physically unable to execute the application, it may be executed by the person who has the claimant in his care or by a legally appointed guardian, committee, or other representative.

(f) Where the claimant is in the care of an institution and is not mentally competent or physically able to execute an application, the manager or principal officer of such institution may execute the application.

(g) For good cause shown, the Administration may accept an application executed by a person other than one described in paragraph (b), (c), (d), (e), or (f) of this section.

4. Section 404.605 is amended to read as follows:

§ 404.605 Claimant must be alive when application is filed.

For an application to be effective, the claimant must be alive at the time the properly executed application (see § 404.603) is filed with the Bureau (see § 404.608). If a potential claimant dies before the application executed by him or on his behalf is filed, there can be no entitlement for that individual. (See § 404.342 where a person potentially equitably entitled to the lump-sum death payment dies before filing an application.)

5. Section 404.606 is revised to read as follows:

§ 404.606 Filing of application for monthly benefits before the first month for which individual may become entitled to such benefits.

(a) *Old-age and survivors insurance benefits.* An application for monthly benefits (other than an application for disability insurance benefits) will be accepted as an application for such benefits if it is filed not more than 3 months prior to the first month for which the claimant could become entitled to such benefits. Any such application filed within such 3-month period shall be deemed filed in the first month for which the claimant could be entitled to such benefits.

(b) *Disability insurance benefits*—(1) *Application filed prior to March 1960.* An application for disability insurance benefits filed after September 1956 and prior to March 1960 will be accepted as an application for such benefits if it was filed not more than 9 months prior to the first month for which the claimant could become entitled to such benefits and while the claimant was under a disability.

(2) *Application filed after February 1960.* An application for disability insurance benefits filed after February 1960 will be accepted as an application for such benefits for months no earlier than September 1960 if it is filed not more than 9 months prior to the month for which the claimant could become entitled to such benefits; except that, where clause (ii) of section 223(a)(1) of the act (concerning prior entitlement to disability insurance benefits and/or a prior period of disability) is applicable, an application for disability insurance benefits may not be filed more than 6 months prior to the first month for which the claimant could become entitled to such benefits. An application filed within the 9-month or 6-month period, as the case may be, shall be deemed filed in the first month for which the claimant could be entitled to such benefits, but no earlier than September 1960.

(c) *Recomputation of benefits.* See §§ 404.261 to 404.268 for application requirements for recomputation of benefits.

(d) *Specific dates.* Where any of the provisions in this Part 404 become effective on the basis of an application filed on or after a specific date, this section shall apply only if the application is filed on or after that date.

6. Section 404.607 is revised to read as follows:

§ 404.607 Filing of application for monthly benefits after first month for which individual may become entitled to such benefits.

(a) *Old-age and survivors insurance benefits.* An application for monthly benefits (except an application for disability insurance benefits) filed at any time after the first month for which the claimant could have been entitled to such benefits (see Subpart D for first month for which a person could become entitled) will be accepted as an application for purposes of entitlement to such benefits beginning with any of the following months:

(1) Six months immediately preceding the month in which the application is filed (but not before the first month for which he could become entitled) if such application is filed after December 1950 and prior to September 1960, except that it cannot be accepted as an application for any month prior to September 1950; or

(2) Twelve months immediately preceding the month in which the application is filed (but not before the first month for which he could become entitled) if such application is filed after August 1954, except that it cannot be accepted as an application for any month prior to February 1954.

For purposes of determining whether the individual has met all conditions of entitlement in such prior months, the application shall have the same effect as through it had been filed in such months.

(b) *Disability insurance benefits.* An application for disability insurance benefits filed while the claimant was under a disability and at any time after the first month for which he could have become entitled to such benefits, will be accepted as an application for such benefits beginning with 12 months immediately preceding the month in which such application is filed but not before the first month for which he could become entitled, provided he was under a disability in such first month and such disability continued until the time such application was filed. However, it may not be accepted as an application for any month prior to July 1957, the first month for which disability insurance benefits were payable. For purposes of determining whether the individual has met all conditions of entitlement in such prior months, the application shall have the same effect as though it had been filed in such months.

(c) *Recomputation of benefits.* See §§ 404.261 to 404.268 for application requirements for recomputation of benefits.

(d) *Restricting retroactivity.* Except where an application is deemed to have been filed under conditions described in § 404.607b, a claimant may limit the number of months for which his application is retroactive. He may exercise this right by an appropriate statement on the application form or on a supplement to it.

7. Section 404.607a is revised to read as follows:

§ 404.607a Filing of application for the establishment of a period of disability.

(a) *Application filed before beginning of period of disability prior to March 1960.*—(1) *Application filed after December 31, 1954, and prior to March 1960.* An application filed after December 31, 1954, and prior to March 1960 to establish a period of disability will be accepted as an application for such purpose if it was filed while the claimant was under a disability and not more than 3 months before the first day on which a period of disability may begin for the claimant.

(2) *Application filed after February 1960.* An application filed after February 1960 to establish a period of disability will be accepted as an application for such purpose if it is filed not more than 6 months before the first day on which a period of disability may begin for the claimant; except that, where clause (ii) of section 223(a)(1) of the act (concerning prior entitlement to disability insurance benefits and/or a prior period of disability) is applicable, an application for such purpose may be filed as early as 6 months before the first day on which a period of disability may begin for the claimant. An application filed within such 3-month or 6-month period, as the case may be, shall be deemed filed in the first month in which a period of disability may begin for the claimant. Where the 6-month period is applicable in connection with clause (ii) of section 223(a)(1) of the act, the period of disability may begin no earlier than September 1960.

(b) *Application filed after beginning of period of disability.* Where a claimant files an application to establish a period of disability beginning prior to the date of filing the application and has been continuously disabled from such time up to the time of filing, a period of disability may be established commencing prior to the date of filing subject to the following rules:

(1) *Application filed prior to July 1, 1962.* An application filed after December 31, 1954, and prior to July 1, 1962, may establish a period of disability commencing no earlier than October 1, 1941.

(2) *Application filed after June 30, 1962.* An application filed after June 30, 1962, may establish a period of disability commencing no earlier than 18 months prior to the day such application is filed.

8. A new § 404.607b is added after § 404.607a to read as follows:

§ 404.607b Filing of application for benefits for months before age 65.

(a) *Old-age insurance benefits.* If the first month for which an individual is entitled to an old-age insurance benefit is a month before the month such individual attains age 65, and if such individual is eligible for a wife's or husband's insurance benefit for such first month, such individual shall be deemed to have filed an application for wife's or husband's insurance benefits in such first month.

(b) *Husband's and wife's insurance benefits.* If the first month for which an individual is entitled to a husband's or wife's insurance benefit reduced under section 202(q) of the act is a month before the month such individual attains age 65, and if such individual is eligible for an old-age insurance benefit for such first month, such individual shall be deemed to have filed application for old-age insurance benefits in such first month, or, where such application is filed in August 1961 or later and such individual is also entitled to disability insurance benefits for such first month, in the first month after the month his entitlement to disability insurance benefits terminates.

9. Section 404.608 is amended to read as follows:

§ 404.608 When an application or written statement, request, or notice, is considered to have been filed; time and place of filing.

(a) *Date of receipt.* Except as otherwise provided in this Subpart G, an application (or written statement, request, or notice) is considered to have been filed only as of the date it is received at an office of the Bureau or by an employee of the Social Security Administration who has been authorized to receive such application (or written statement, request, or notice) at a place other than such office. However:

(1) Applications, statements, requests, or notices submitted to an office maintained by the Foreign Service of the United States by or on behalf of a claimant residing outside the United States shall be considered to have been filed with the Bureau as of the date it is received at such office of the Foreign Service.

(2) Applications, statements, requests, or notices submitted to the Veterans' Administration Regional Office in the Philippines, or to an employee of the Veterans' Administration in the Philippines authorized to receive such applications, statements, requests, or notices, at a place other than such office, shall be considered to have been filed with the Bureau as of the date it is received at such office of the Veterans' Administration or by such authorized employee.

(3) In cases of claimants having 10 or more years of service in the railroad industry (see Subpart O of this part), or entitled to annuities on the basis of awards under the Railroad Retirement Act prior to October 30, 1951, who file with an office of the Railroad Retirement Board an application for an annuity based upon a disability, such application shall be deemed an application to establish a period of disability under section 216(i) of the act. The application shall be considered to have been filed with the Bureau as of the date of filing determined by the Railroad Retirement Board.

(4) Applications filed with the Veterans' Administration on forms prescribed in section 3005 of title 38 United States Code (see § 404.611a) by or on behalf of an individual who may, upon filing a proper application therefor with the Bureau, be entitled to child's insurance benefits (see § 404.312), widow's insurance benefits (see § 404.319), mother's insurance benefits (see § 404.325), or parent's insurance benefits (see § 404.328), as the case may be, shall be considered also to have been filed with the Bureau as of the date of filing determined by the Veterans' Administration.

(b) *Date of mailing.* If the application, statement, request, or notice, is deposited in and transmitted by the United States mail and the fixing of the date of delivery as the date of filing would result in a loss or impairment of benefit rights, it will be considered to have been received as of the date of mailing (except in cases described in subparagraphs (3) and (4) of paragraph (a) of this section). The date appearing on the postmark (when available and legible) shall be prima facie evidence of the date of mailing.

10. Section 404.610 is revised to read as follows:

§ 404.610 Execution of requests and notices.

Except as otherwise provided in this Part 404, any request for a determination or decision relating to a person's right to monthly benefits, the establishment of a period of disability, a lump-sum death payment, a recomputation of a primary insurance amount, a revision of records of earnings, the withdrawal of an application, the withdrawal of a request for revision of records of earnings, the cancellation of a request for withdrawal, or any notice provided for by the regulations in this Part 404, shall be in writing and shall be signed by the person authorized to execute an application under § 404.603. (See § 404.608 for the place of filing requests and notices.)

11. Section 404.613 is revised to read as follows:

§ 404.613 When written statement considered an application.

(a) *Written statement filed by claimant.* Where a claimant files a written statement with the Bureau (see § 404.608) which indicates an intention to claim monthly benefits, a lump-sum death payment, a recomputation of a primary insurance amount, or to establish a period of disability, and such statement bears his signature or his mark properly witnessed, such claimant shall, unless he otherwise indicates, be deemed to have "filed an application" for such purposes, providing an application on a prescribed form (see § 404.602), executed by the claimant or a proper party on his behalf (see § 404.603), is filed while the claimant is alive (see § 404.605) and within the period prescribed in paragraph (c) of this section.

(b) *Written statement filed by person other than the claimant.* A written

statement filed by an individual which indicates an intention to claim on behalf of another person monthly benefits, a lump-sum death payment, a recomputation of a primary insurance amount, or to establish a period of disability shall, unless the claimant or a proper party on his behalf otherwise indicates, be deemed to be the "filing of an application" for such purposes, provided:

(1) The written statement bears the signature (or mark properly witnessed) of the individual filing the statement;

(2) The individual filing the statement is the spouse of the claimant or a proper party to execute an application on a prescribed form on behalf of the claimant as determined by § 404.603; and

(3) An application on a prescribed form (see § 404.602), executed by the claimant or a proper party on his behalf (see § 404.603), is filed while the claimant is alive (see § 404.605) and within the period prescribed in paragraph (c) of this section.

(c) *Period within which application on prescribed form must be filed.* The Bureau, or the Veterans' Administration Regional Office in the Philippines, as the case may be, shall notify the claimant (or, where the claimant is a minor or incompetent, the individual who submitted the written request on behalf of the claimant) in writing that an initial determination will be made with respect to the written statement only if a prescribed application form is filed by or on behalf of the claimant within 6 months from the date of such notification. If such a prescribed application form is not filed by or on behalf of the claimant within such 6-month period, the claimant shall be deemed to have indicated that the filing of such written statement is not to be considered the filing of an application for purposes of monthly benefits, a lump-sum death payment, a recomputation of a primary insurance amount, or to establish a period of disability, as appears from such written statement.

12. The heading of § 404.614 is amended to read as follows:

§ 404.614 When written statement filed with Railroad Retirement Board is considered an application.

13. Section 404.615 is revised to read as follows:

§ 404.615 Withdrawal of application and request for revision of records of earnings.

A claimant (or a person who is a proper party under § 404.603 to execute an application on his behalf) may withdraw his previously filed application or request for revision of records of earnings maintained by the Bureau, if he files a written request for withdrawal, such request for withdrawal is filed on or before the date the Bureau makes a determination upon the application or request for revision of records of earnings, the claimant is alive at the time of filing the request for withdrawal, and the Bureau approves the request for withdrawal. After such withdrawal, further action will be taken by the Bureau only upon the filing of a new application, or request for revision, except as provided in § 404.615a.

14. Section 404.615a is amended to read as follows:

§ 404.615a Cancellation of request for withdrawal.

Before or after a written request for withdrawal has been approved by the Bureau, the claimant (or a person who is authorized under § 404.603 to execute an application on his behalf) may request that the "request for withdrawal" be cancelled and that the withdrawn application or request for revision of records of earnings be reinstated. Such request for cancellation must be in writing and must be filed, in a case where the requested withdrawal was approved by the Bureau, no later than 60 days after such approval. The claimant must be alive at the time the request for cancellation of the "request for withdrawal" is filed with the Bureau.

15. The heading of § 404.905 is amended and new paragraphs (j) and (k) are added to § 404.905 to read as follows:

§ 404.905 Initial determinations: determinations affecting benefits, lump sums, establishment and continuance of period of disability, records of earnings, requests for withdrawals, and requests for cancellation of requests for withdrawals.

* * * * *

(j) *Withdrawal of applications and requests for revision of records of earnings.* When a request for withdrawal of an application, or for withdrawal of request for revision of records of earnings is denied by the Bureau (see § 404.615), the Bureau shall make findings, setting forth the pertinent facts and conclusions, and an initial determination of denial.

(k) *Cancellation of request for withdrawal.* When a request for cancellation of a "request for withdrawal" of an application or of a request for revision of records of earnings is denied by the Bureau (see § 404.615a), the Bureau shall make findings, setting forth the pertinent facts and conclusions, and an initial determination of denial.

(Secs. 202, 205, 216, 223, and 1102, 49 Stat. 623, as amended, 53 Stat. 1368, as amended, 68 Stat. 1080 as amended, 70 Stat. 815, as amended, 49 Stat. 647, as amended; sec. 5 of Reorganization Plan No. 1 of 1953, 67 Stat. 18; 42 U.S.C. 402, 405, 416, 423, and 1302)

Effective date: The foregoing amendments shall become effective on the date of publication in the FEDERAL REGISTER.

[SEAL] W. L. MITCHELL,
Commissioner of Social Security.

Title 41—PUBLIC CONTRACTS

Chapter 9—Atomic Energy Commission

PART 9-1—GENERAL

Small Business Concerns and Labor Surplus Area Concerns

Subparts 9-1.7 and 9-1.8 are added to read as follows:

Subpart 9-1.7—Small Business Concerns

Sec.
9-1.700 General.
9-1.702 Small business policies.
9-1.708-3 Conclusiveness of certificate of competency.
9-1.709 Records and reports.
9-1.751 AEC–SBA Agreement.

AUTHORITY: §§ 9-1.700 to 9-1.751 issued under sec. 161; 42 U.S.C. 2201; sec. 205, 63 Stat. 390; 40 U.S.C. 486.

§ 9-1.700 General.

This subpart implements and supplements general Government policies and procedures set forth in FPR 1-1.7.

§ 9-1.702 Small business policies.

(b) *Specific policies.* (1) Headquarters and Field Offices shall cooperate with the SBA in implementing the policies and procedures set forth in FPR 1-1.7 and this subpart.

(2) Managers of Field Offices shall appoint persons under their jurisdiction to serve in a liaison capacity with SBA representatives. Managers of Field Offices shall request cost-type contractors to make similar appointments.

(3) The AEC–SBA Agreement set forth in AECPR 9-1.751 does not provide for the establishment of over-all set-aside programs for the AEC. However, it is expected that Field Offices, through contracting officers, will cooperate with the SBA in establishing set-aside programs or in setting aside selected items or classes of items of procurement. Cost-type contractors shall be encouraged to make similar efforts.

§ 9-1.708-3 Conclusiveness of certificate of competency.

If the contracting officer questions the acceptability of an SBA certificate of competency based on substantial doubt as to a particular firm's ability to perform, he shall, before award, promptly refer the matter to the Director, Division of Contracts, for a final decision.

§ 9-1.709 Records and reports.

A quarterly small business report shall be prepared by each Field Office and forwarded to the Director, Division of Contracts, not later than the thirtieth day following the end of the quarter covered by the report. Managers of Field Offices shall require similar reports to be prepared by cost-type contractors to accompany the Field Office reports. Reports shall be prepared as follows:

(a) Narrative statement regarding the operation of the program during the quarter.

(b) Tabulation of the following factual information:

(1) Number of contracts awarded to small business concerns during the quarter which have not previously received contracts.

(2) Number of small business concerns added to bidders' mailing lists during the quarter.

(3) Number and dollar value of awards to small business concerns compared to the number and dollar value of awards suitable for small business concerns.

(4) Number and dollar value of invitations to bid and requests for proposals referred to SBA.

(5) Names of small business production and research and development pools receiving awards during the quarter and the identity and dollar value of each award.

(6) Number and dollar value of set-asides to small business.

§ 9-1.751 AEC–SBA Agreement.

A revised agreement for cooperation was signed by the Chairman of the AEC and the Administrator of the SBA in October 1960. The term "Operations Office," as used in the agreement, shall also apply to Field Offices. The text of this Agreement follows:

(a) *Introduction.* The purpose of this document is to revise and to continue an agreement between the Atomic Energy Commission (AEC) and the Small Business Administration (SBA), which has resulted in a friendly cooperative relationship since the agreement was established originally in 1953. The agreement provides a basis for cooperation between the two agencies in order to further the AEC small business program and the intent of Congress which is set forth in the Small Business Act. To the extent applicable, the agreement will be supplemented by the Federal Procurement Regulations (FPR's), pertaining to Small Business, which include definitions and uniform procedures for set-asides and Certificates of Competency.

(b) *Agreement.* The AEC and SBA will continue to establish and maintain liaison between appropriate combinations of AEC Operations Offices and SBA Regional Offices for exchanges of information regarding AEC opportunities for small businesses, suggestions of qualified small business concerns, and other appropriate matters.

(c) *Liaison*—(1) *Establishment.* SBA Regional Offices will continue to establish and maintain liaison with the AEC Operations Offices within their respective regions. Such liaison may include arrangements with respect to the Area Offices and cost-type contractors administered by an Operations Office.

Where an AEC Operations Office is located in one SBA region and its Area Offices and cost-type operating contractors are located in other SBA regions, the SBA Regional Office serving the region in which the Area Office or cost-type operating contractor is located shall contact the AEC Operations Office concerned regarding the establishment of liaison procedures for such Area Office or cost-type contractor.

(2) *Procedures.* Detailed procedures for carrying out the exchanges of information by this agreement have been jointly developed and will continue to be maintained and modified, as experience suggests, by each combination of SBA Regional and AEC Operations Office maintaining liaison.

(3) It is not contemplated that SBA employees will operate in any area where security "Q" clearances are required.

(d) *Exchanges of information*—(1) *Procurement, research and development, and property sales.* AEC Operations Offices (including Area Offices and cost-type contractors) will provide or arrange for the provision of information to the SBA Regional Offices with which liaison has been established regarding appropriate procurement, research and development, and property sales opportunities which are suitable for small business. In turn, the SBA Regional Offices will provide information, including the names of qualified small concerns, which will further the purpose of this agreement. The interchange of information provided in this paragraph will be in such form and will be transmitted by such means and with such frequency as seems most practical to the personnel engaged in the exchange of information.

(2) *Technical information and AEC-owned patents.* AEC will assist SBA to bring unclassified AEC research reports and AEC-owned (Government) patents to the attention of interested qualified small business concerns.

(e) *Time factor.* It is anticipated that in some circumstances the time available for the submission of bids may be too short for some small business concerns suggested by SBA to participate. In these circumstances, qualified small business concerns which are unable to participate will be added to bidders lists and invited to participate in subsequent procurements or sales.

(f) *Appropriate opportunities.* Appropriate opportunities, for the purpose of this agreement, will not include opportunities which must involve Government sources, those that security requirements will not permit to be publicly disclosed, and those where the urgency is too great to permit broad solicitation of bids or development of additional sources.

(g) *Review of agreement.* This agreement will be reviewed on a periodic basis to determine whether the purpose of the agreement is being achieved and whether expansion and/or modification would be appropriate.

Subpart 9-1.8—Labor Surplus Area Concerns

Sec.
9-1.802 Labor Surplus Area Policies.
9-1.807 Report on Preference Procurement on Labor Surplus Area.

AUTHORITY: §§ 9-1.802 and 9-1.807 issued under sec. 161; 42 U.S.C. 2201; sec. 205, 63 Stat. 390; 40 U.S.C. 486.

§ 9-1.802 Labor surplus area policies.

Cost-type contractors should be encouraged to adopt policies and procedures similar to those set forth in FPR 1-1.8 for application by Government agencies.

§ 9-1.807 Report on preference procurement in labor surplus areas.

The quarterly report on preference procurement in Labor Surplus Areas as set forth in FPR 1-1.807 shall also include a separate report on subcontracts from cost-type contractors.

Dated at Germantown, Md., this 1st day of February 1962.

For the Atomic Energy Commission.

A. R. LUEDECKE,
General Manager.

Persons who appear at any hearing shall deliver a written notation of appearance to the reporter, stating for whom the appearance is made. The written appearance shall be made a part of the record.

§ 201.24 Practice before the Administration defined.

Practice before the Administration shall be deemed to comprehend all matters connected with the presentation of any matter to the Administration including the preparation and filing of necessary documents, and correspondence with and communications to the Administration. The term "Administration" as used herein includes the Maritime Subsidy Board, or any member

thereof; and any office, division, branch, section, unit, or field office of the Maritime Administration and any officer or employee of such office, division, branch, section, unit, or field office.

§ 201.25 Attorneys at law.

Attorneys at law who are admitted to practice before the Federal courts or before the courts of any State or Territory of the United States may practice before the Administration. An attorney's own representation that he is such in good standing before any of the courts referred to in this section will be sufficient proof thereof.

§ 201.26 Persons not attorneys at law.

(a) *Requirements for admission.* Any person who is not an attorney at law may be admitted to practice before the Administration if he is a citizen of the United States and files proof to the satisfaction of the Administration that he possesses the necessary legal, technical, or other qualifications to enable him to render valuable service before the Administration and is otherwise competent to advise and assist in the presentation of matters before the Administration. Applications by persons not attorneys at law for admission to practice before the Administration shall be made on the forms prescribed therefor, which may be obtained from the Secretary, Maritime Administration, Washington 25, D.C. No person who is not an attorney at law and whose application has not been approved shall be permitted to practice before the Administration. This provision and the provisions of §§ 201.28, 201.29, and 201.30 shall not apply, however, to any person who appears before the Administration on his own behalf or on behalf of any corporation, partnership, or association of which he is a partner, officer, or regular employee.

(b) *Prior permissions.* No person who is not an attorney at law shall be permitted to practice before the Administration after February 28, 1962, on the basis of any permission previously granted to practice before the former Federal Maritime Board and/or Maritime Administration. Any such person desiring to practice before the Administration after February 28, 1962, shall be required to apply for permission in accordance with the provisions of paragraph (a) of this section.

§ 201.27 Firms and corporations.

Practice before the Administration by firms or corporations on behalf of others shall not be permitted.

§ 201.28 Hearings.

The Administration in its discretion may call upon the applicant for a full statement of the nature and extent of his qualifications. If the Administration is not satisfied as to the sufficiency of the applicant's qualifications, it will so notify him by registered mail, whereupon he may request a hearing for the purpose of showing his qualifications. If he presents to the Administration no request for such hearing within 20 days after receiving the notification referred to above, his application shall be acted upon without further notice.

§ 201.29 Suspension or disbarment.

The Administration may, in its discretion, deny admission to, suspend, or disbar any person from practice before the Administration who it finds does not possess the requisite qualifications to represent others or is lacking in character, integrity, or proper professional conduct. Any person who has been admitted to practice before the Administration may be disbarred from such practice only after he is afforded an opportunity to be heard.

§ 201.30 Statement of interest.

The Administration, in its discretion, may call upon any practitioner for a full statement of the nature and extent of his interest in the subject matter presented by him before the Administration. Attorneys retained on a contingent fee basis shall file with the Administration a copy of the contract of employment. Practitioners subject to section 807 of Merchant Marine Act, 1936, as amended, shall comply fully with the requirements of the Administration's General Order 9, Revised (Part 222 of this chapter, 22 F.R. 1087).

§ 201.31 Former employees.

(a) *Practice prohibited.* No person shall practice, appear, or represent anyone before the Administration in any matter to which he, as an officer or employee of the Administration, or as an officer or employee of the United States, gave personal consideration or as to the facts of which he gained knowledge during and by reason of his Government service.

(b) *Further prohibitions with exceptions.* No former officer or employee of the Administration shall practice, appear, or represent anyone before the Administration, or act as the employee of an attorney or agent, within two years after the termination of his service with the Administration, in any matter which was pending before the Administration during the period of his employment by the Administration, unless he has first obtained the written consent of the Administration. This consent will not be granted unless it appears that the applicant did not, as officer or employee of the United States, give personal consideration to the matter, to handle which consent is sought, or gain knowledge of the facts of said matter during and by reason of his Government service.

(c) *Former employees; affidavit.* Such applicant shall be required to file an affidavit to the effect that he gave no personal consideration to such matter; that he gained no knowledge of the facts involved in such matter during and by reason of his Government service; that he is not associated with, and will not in such matter be associated with, any former officer or employee of the Administration who has gained knowledge of the matter during and by reason of his Government service; and that his employment is not prohibited by any law of the United States or by the regulations of the Administration. The statements contained in such affidavit shall not be sufficient if disproved by an examination of the files and records of the case.

(d) *Former employees; applications for consent.* Applications for consent should be directed to the Administration; should state the former connection with the Administration of the applicant; and should identify the matter in which the applicant desires to appear. The applicant shall be promptly advised as to his privilege to appear in the particular matter, and the application, affidavit, and consent, or refusal to consent, shall be filed by the Administration in its records relative thereto. Separate consents to appear must be obtained to appear in separate cases.

(e) *Assistance to or by former employees.* No one entitled to practice before the Administration shall knowingly (1) assist a person employed by a client to represent him before the Administration in connection with any matter to which such person as an officer or employee of the Administration or as an officer or employee of the United States, gave personal consideration or as to the facts of which such person gained personal knowledge during and by reason of his Government service, or (2) accept assistance from any such person in connection with any such matter, or (3) share fees with any such person in connection with such matter.

Effective date: The foregoing amendments shall become effective on March 1, 1962.

Dated: February 2, 1962.

By order of the Maritime Administrator and the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

MISCELLANEOUS AMENDMENTS TO CHAPTER

Notice of proposed rule making in connection with amendments of the above cited parts of this chapter appeared in the FEDERAL REGISTER issue of October 11, 1961 (26 F.R. 9600).

Consideration having been given to the comments received regarding the proposed amendments, notice is hereby given of the adoption of said amendments, without substantive change, except with respect to § 201.32, *Permission to practice*, which has been deleted therefrom.

Therefore, pursuant to section 204, Merchant Marine Act, 1936, as amended (49 Stat. 1987, as amended; 46 U.S.C. 1114), and in accordance with the provisions of the Act of May 27, 1935 (15 U.S.C. 189a), the Act of May 15, 1936 (15 U.S.C. 189), the Act of December 19, 1942 (5 U.S.C. 606), and the Act of August 31, 1951 (5 U.S.C. 140), as implemented by the Bureau of the Budget Circular No. A-25, dated September 23, 1959, and Department of Commerce Administrative Order No. 203-5, dated March 11, 1959, said amendments shall be as set forth below:

[General Order 91]

PART 206—MISCELLANEOUS FEES

1. Part 206 is hereby amended by adding a new Subpart C, reading as follows:

Subpart C—Charges for Copies of Regulations

§ 206.10 Mailing list.

Persons may be placed on the mailing list to receive copies of the General Orders issued by the Maritime Administration and/or the Maritime Subsidy Board, and National Shipping Authority orders (32A CFR Ch. XVIII), upon request, written or oral, to the Secretary, Maritime Administration, Washington 25, D.C. The charge for this service is $10.00 per calendar year.

§ 206.11 Individual copies of orders.

Single copies of the orders referred to in § 206.10 may be obtained, upon request, written or oral, to the Secretary, Maritime Administration, Washington 25, D.C., at a cost of 25 cents each.

[General Order 94]

PART 221—DOCUMENTATION, TRANSFER OR CHARTER OF VESSELS

2. Part 221 is hereby amended by adding new §§ 221.14, 221.15 and 221.16, reading as follows:

§ 221.14 Charges for processing applications for approval of the transfer or charter of vessels pursuant to sec. 9 and 37, Shipping Act, 1916, as amended.

(a) An application for approval of the sale of a vessel to an alien and/or transfer of a vessel to foreign registry shall be accompanied by the sum of $125.00 for each vessel of 3,000 gross tons and over; $25.00 for each vessel of over 100 gross tons but less than 3,000 gross tons; and $15.00 for each vessel of 100 gross tons and under;

(b) An application for modification of an approval of a vessel sale to an alien and/or of a vessel transfer to foreign registry shall be accompanied by the sum of $125.00 for each vessel of 3,000 gross tons and over; $25.00 for each vessel of over 100 gross tons but less than 3,000 gross tons; $15.00 for each vessel of 100 gross tons and under;

(c) An application for approval of a mortgage of a vessel to an alien shall be accompanied by the sum of $25.00;

(d) An application for approval of a charter of a vessel to an alien shall be accompanied by the sum of $25.00;

(e) All fees set forth in this section will be retained to recover the cost of processing the applications;

(f) Applications for such approvals as set forth in this section should be made to the Foreign Transfer Branch, Office of Ship Operations, Maritime Administration, Washington 25, D.C., on forms which may be obtained from said Branch.

§ 221.15 Fee for processing applications for approval of surrender of marine documents of vessels under sec. 30, subsection O(a), Merchant Marine Act, 1920, as amended.

An application for approval of the surrender of the marine documents of a vessel shall be accompanied by the sum of $15.00, which sum will be retained to recover the cost of processing the application. Such application should be made to the Foreign Transfer Branch, Office of Ship Operations, Maritime Administration, Washington 25, D.C., on forms which may be obtained from said Branch.

§ 221.16 Fee for processing applications to transfer vessels, subject to mortgage outstanding in favor of the United States of America.

(a) Application for permission to transfer title to a vessel, subject to a mortgage in favor of the United States of America pursuant to the provisions of the 1936 Act and related Acts, or special legislation, and to have the mortgage assumed by a new mortgagor, may be made by the mortgagor joined by the proposed transferee, to the Secretary, Maritime Administration, Washington 25, D.C.

(b) Fee: Such application shall be accompanied by the sum of $400, which sum will be retained to recover the cost of processing the application.

[General Order 29, Rev., Amdt. 4]

PART 298—FEDERAL SHIP MORTGAGE AND LOAN INSURANCE

3. Part 298 is hereby amended by adding new paragraphs (f) and (g) at the end of § 298.3 *Applications*, to read as follows:

§ 298.3 Applications.

* * * * *

(f) *Assignment of mortgage.* (1) An application by the mortgagee may be made to the Secretary, Maritime Administration, Washington 25, D.C., for permission to assign a mortgage insured under title XI of the 1936 Act to a new mortgagee.

(2) Fee: Such application shall be accompanied by the sum of $1,500, which sum will be retained to recover the cost of processing the application.

(g) *Assumption of mortgage.* (1) An application by the mortgagor, joined by the proposed transferee, for permission to transfer title to a vessel, subject to a mortgage insured under Title XI of the 1936 Act and to have the mortgage assumed by the new mortgagor, may be made to the Secretary, Maritime Administration, Washington 25, D.C.

(2) Fee: Such application shall be accompanied by the sum of $3,000, which sum will be retained to recover the cost of processing the application.

[General Order 60, Rev., Amdt. 1]

PART 299—RULES AND REGULATIONS, FORMS AND CITIZENSHIP REQUIREMENTS

4. Part 299 is amended by adding a new Subpart I to read as follows:

Subpart I—Assumption of Mortgage by New Mortgagor

§ 299.301 Application to transfer a vessel, subject to mortgage.

(a) Application for permission to transfer title to a vessel, subject to a mortgage in favor of the United States of America, and to have the mortgage assumed by a new mortgagor, may be made by the mortgagor joined by the proposed transferee, to the Secretary, Maritime Administrator, Washington 25, D.C.

(b) Fee: Such application shall be accompanied by the sum of $400, which sum will be retained to recover the cost of processing the application.

Effective date: The foregoing amendments shall become effective on March 1, 1962.

Dated: February 2, 1962.

By order of the Maritime Administrator and the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 6741; FCC 62-117]

PART 1—PRACTICE AND PROCEDURE

Clear Channel Broadcasting in The Standard Broadcast Band; Further Supplement to Report and Order

1. On October 27, 1961, the Commission adopted its first Supplement to the Report and Order of September 13, 1961, in the above-captioned Docket concluding the clear channel proceeding. The purpose of the supplemental Order was to effect certain modifications with regard to the treatment of applications for frequencies within 30 kc of one of the 12 unduplicated Class I-A clear channels and, as such, the action represented a reconsideration by the Commission of paragraphs 63-65 of the Report and Order of September 13, 1961.

2. In the Supplemental Report, we stated that applications for new stations on, for change of frequency to, or to increase power or operate during nighttime hours not previously authorized on a frequency within 30 kc of one of the 12 unduplicated channels would not be accepted for filing on or after October 30, 1961. We stated further: "Applications for such facilities filed prior to October 30, 1961, will be studied in the light of their likely impact upon the possible future use of the unduplicated clear channels. From such study, it is contemplated that more precise engineering criteria might evolve which can then be applied in acting upon those applications now pending and announced as standards to govern the acceptance of future applications on these adjacent frequencies."

3. The Commission has studied 107 pending applications for these adjacent

channels and from this study has developed standards to govern our future practice in accepting and acting upon such applications. In substance, these standards reflect our consideration of two possible future uses of the twelve unduplicated Class I–A channels: high power, to a maximum of 750 kc, and duplication in specified areas with a new Class II unlimited time assignment similar to proposed assignments adopted in our Report and Order of September 13, 1961.

4. Accordingly § 1.351(b) of the Commission's rules will be amended to reflect the standards so developed. New applications which contain proper engineering data to demonstrate their compliance with the standards will now be accepted for filing. Applications now on file for the channels adjacent to the unduplicated Class I–A channels will be studied in light of the standards set forth in the amended rule. Those applications found not to conform to the standards will be placed in the pending file and held without further processing or consideration until September 1, 1964, or such earlier date as may be announced. Applications conforming to all standards set forth in the amended Rule will be acted upon in normal course.

5. Additionally, the paragraphs of § 1.351 will be rearranged, primarily for purposes of greater clarity. As amended, § 1.351(a) refers only to those ten adjacent channels which are within 30 kc of a Class I–A channel for which duplication has been provided but which are not, at the same time, within 30 kc of an unduplicated channel. The amended § 1.351(a) also incorporates a more precise definition of "undue risk of interference" to a possible new Class II assignment on a duplicated channel. Section 1.351(b) now refers to those twenty channels which are adjacent to both duplicated and unduplicated Class I–A channels and sets forth the criteria which will govern our future acceptance of, and action upon applications for those channels. Section 1.351(c) sets forth analogous criteria for those three channels which are within 30 kc of unduplicated channels and not, at the same time within 30 kc of any channel for which duplication has been provided.

6. The standards adopted herein are simply a further refinement and clarification of matters previously decided. Because we had not previously arrived at the precise criteria to be applied in accepting and acting upon applications involving frequencies adjacent to one or more of the Class I–A channels, we had provided, in our September 14, 1961, Report and Order, that certain applications would be accepted for filing and held in a pending file. Having now formulated the criteria, it becomes less of an administrative burden to accept only those applications which contain the requisite showing of compliance with the criteria announced herein. This change of procedure is in the public interest and does not affect any substantive rights. See Fort Harrison Telecasting Corporation v. F.C.C. U.S. App. D.C., No. 16,321, decided December 14, 1961, 22 RR 2031. We note further that our present action is a relaxation of the restrictions announced in the Supplement to Report and Order adopted October 27, 1961 (FCC 61–1293), in which we amended the rules to provide that no applications for new stations, power increases, or new nighttime operations on frequencies adjacent to the twelve unduplicated Class I–A channels would be accepted or considered.

7. In one respect, the rules now adopted impose an additional restriction, in that applications for major changes in facilities other than power increases or new nighttime hours—i.e., changes involving new directional or non-directional operation—will be subject to the provisions of § 1.351, where they would have possible impact on potential uses of the twelve unduplicated I–A channels. Hitherto, such applications have not been subject to any such restrictions (see § 1.351(b)(4), as adopted in the September Report and Order and left unchanged in the October Supplement). With respect to the very few pending applications falling into this category no such problems of possible impact exist; therefore this change affects, at most, only potential applicants. Such additional restriction is clearly required if possible uses of the unduplicated I–A channels are to be protected.

8. Authority for adoption of the rule changes herein is contained in sections 4 (i) and (j), 303 and 307(b) of the Communicatons Act of 1934, as amended. Section 4(a) of the Administrative Procedure Act exempts from the requirement of publication of general notice of proposed rule making "rules of agency organization, procedure, or practice". Because the rule changes herein are procedural, notice and public procedure thereon are not required. Similarly, the effective date provision of section 4(c) of that act applies only to substantive rules whereas the present rule changes are, as noted above, both procedural and for the most part, a relaxation of existing restrictions. (See also §§ 1.311(a) and 1.219(b) of our rules.) We find, therefore, that the public interest will be served by making the rules changes herein effective immediately and, for these reasons and for the reasons stated in the preceding paragraphs, notice and rule-making would not serve the public interest.

9. In view of the foregoing: *It is ordered*, This 31st day of January 1962, that § 1.351 of the Commission's rules is further amended as set forth below, effective January 31, 1962.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interpret or apply secs. 303, 307, 48 Stat. 1082, 1083; 47 U.S.C. 303, 307)

Released: February 5, 1962.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Acting Secretary.

Section 1.351 is amended to read as follows:

§ 1.351 Applications for frequencies adjacent to Class I–A channels.

Notwithstanding the provisions of any other rules of the Commission, all applications (regardless of when they were or may be filed) for frequencies located within 30 kc of a Class I–A channel listed in § 3.25(a) of this chapter will be subject to the provisions of this section. The provisions of paragraph (a) of this section apply to the frequencies listed therein, which are within 30 kc of a Class I–A channel on which no unlimited time Class II assignment is specifically provided for in §§ 3.22 or 3.25(a) of this chapter, and which are not within 30 kc of the remaining Class I–A channels (except with respect to 740 and 1230 kc which are to be considered as being within 30 kc of duplicated I–A channels only). The provisions of paragraph (b) of this section apply to the frequencies listed in that paragraph, which are within 30 kc of unduplicated Class I–A channels and also, in each case, within 30 kc of Class I–A channels on which the location of a Class II–A or other unlimited time Class II station has been specified in §§ 3.22 or 3.25 of this chapter. The provisions of paragraph (c) of this section apply to the three frequencies listed therein, which are within 30 kc of unduplicated Class I–A channels only.

(a)(1) The provisions of this paragraph apply to the following frequencies: 740, 910, 920, 990, 1000, 1080, 1090, 1110, 1230, and 1240 kcs.

(2) Where it appears that the facilities requested in any application for one of the designated frequencies (other than an application by an existing Class IV station to increase daytime power on 1230 or 1240 kcs) involves undue risk of interference or prohibited overlap with a possible new Class II–A assignment specified in § 3.22 of this chapter or a new unlimited time Class II assignment at Anchorage, Alaska, or San Diego, California, specified in § 3.25(a) of this chapter, such application will not be accepted for filing or, if filed prior to the effective date of this Rule, will not be acted upon, until the location and operating facilities of such new Class II station are established. An application for one of the designated frequencies shall be deemed to involve undue risk of interference with a possible new Class II assignment unless it is demonstrated that no interference would be caused to specified II–A assignments within 30 kc assuming such facilities to be located at the nearest point on the boundary of the nearest state specified by the Clear Channel Decision released September 14, 1961, and assuming such II–A facility radiates at least 1238 mv/m omnidirectionally; and, in the case of frequencies within 30 kc of 750 kc or 760 kc, the proposed facility would not cause interference to Class II assignments at San Diego, California, or Anchorage, Alaska, specified in § 3.25(a) of this chapter.

(3) Assignments of new Class II facilities provided for in §§ 3.22 and 3.25(a) of this chapter will be made without regard to the pendency of applications on adjacent frequencies (i.e., the ten frequencies designated in subparagraph (1) of this paragraph and the additional 20 frequencies which are within 30 kc of both duplicated and unduplicated Class I–A channels). Any hearing which may be held on an application for an adjacent frequency will not be comparative with respect to the Class II–A facility, and any issues pertaining to the mutual impact of the Class II–A and adjacent channel proposals will be confined to the question of whether, with the Class II station operating as proposed, the public interest would be served by a grant of the adjacent channel application.

(b)(1) Until September 1, 1964, or such earlier date as may be announced, the provisions of this paragraph will apply to all applications for the following frequencies: 680, 690, 710, 730, 790, 800, 810, 850, 860, 900, 1010, 1050, 1060, 1070, 1130, 1140, 1150, 1170, 1190, and 1220 kcs.

(2) Applications for new stations on, change of existing stations to, or for any major change in operation of stations presently operating on the designated frequencies will be accepted for filing and acted upon in normal course provided they are accompanied by appropriate exhibits and necessary supporting data to show clearly the following with respect to all Class I–A channels within 30 kc of the designated frequency:

(i) The proposed transmitter site is located inside the area encompassed by a 500 mile extension of the 0.5 mv/m–50 percent nighttime contour of Class I–A stations on unduplicated channels.

(ii) No interference or prohibited overlap would be caused to Class I–A stations on unduplicated I–A channels, assuming such stations operate with power increased to 750 kws with their present antenna systems and radiation patterns.

(iii) No interference or prohibited overlap would be caused to an assumed Class II–A station on an unduplicated channel, radiating at least 1238 mv/m omnidirectionally from the nearest point on the boundary described in subparagraph (i) of this paragraph.

(iv) No interference or prohibited overlap would be caused to presently specified Class II–A assignments, assuming such facilities to be located at the nearest point on the boundary of the nearest state specified by the Clear Channel Decision released September 14, 1961, and assuming such II–A facility radiates at least 1238 mv/m omnidirectionally; and, in the case of frequencies within 30 kc of 750 kc or 760 kc, the proposed facility would not cause interference to Class II assignments at San Diego, California, or Anchorage, Alaska, specified in § 3.25(a) of this chapter.

(3) Applications of the type specified in subparagraph (2) of this paragraph filed before October 30, 1961, will be studied to determine whether they comply with each of the four standards set forth in subparagraph (2) of this paragraph. Those applications which are found to comply fully with the standards will be processed and acted upon in normal course. Applications which fail to comply with one or more of the standards will be retained in the pending file without further processing or consideration.

(4) Applications for other changes in facilities on the designated frequencies will be processed and acted upon in normal course.

(c)(1) Until September 1, 1964, or such earlier date as may be announced, the provisions of this paragraph will apply to all applications for the following frequencies: 610, 620, 630 kcs.

(2) Applications for new stations on, change of existing stations to, or for any major change in operation of stations presently operating on the designated frequencies will be accepted for filing and acted upon in normal course provided they are accompanied by appropriate exhibits and necessary supporting data to show clearly the following with respect to all Class I–A channels within 30 kc of the designated frequency:

(i) The proposed transmitter site is located inside the area encompassed by a 500 mile extension of the 0.5 mv/m–50 percent nighttime contour of Class I–A stations on unduplicated channels.

(ii) No interference or prohibited overlap would be caused to Class I–A stations on unduplicated I–A channels, assuming such stations operate with power increased to 750 kw, with their present antenna systems and radiation patterns.

(iii) No interference or prohibited overlap would be caused to an assumed Class II–A station on an unduplicated channel, radiating at least 1238 mv/m omnidirectionally from the nearest point on the boundary described in subdivision (i) of this subparagraph.

(3) Applications of the type specified in subparagraph (2) of this paragraph filed before October 30, 1961, will be studied to determine whether they comply with each of the three standards set forth in subparagraph (2) of this paragraph. Those applications which are found to comply fully with the standards will be processed and acted upon in normal course. Applications which fail to comply with one or more of the standards will be retained in the pending file without further processing or consideration.

(4) Applications for other changes in facilities on the designated frequencies will be processed and acted upon in normal course.

(d)(1) Applications previously accepted for filing which must be held without action pursuant to paragraph (a), (b), or (c) of this section, will not be designated for hearing unless they conflict with applications which may be acted upon in normal course.

(2) If the decision in a hearing looks toward grant of an application which may not be acted upon, pursuant to paragraph (a), (b), or (c) of this section, such application and all applications conflicting with it will be held without final action to the extent required by paragraph (a), (b), or (c) of this section.

Title 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

SUBCHAPTER B—CARRIERS BY MOTOR VEHICLES

PART 205—REPORTS OF MOTOR CARRIERS

Motor Carrier Annual Report Form B (Class II Carriers of Property)[1]

At a session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 23d day of January A.D. 1962.

The matter of annual reports of Class II motor carriers of property being under further consideration, and the changes to be made by this order being minor changes in the data to be furnished, rule-making procedures under section 4(a) of the Administrative Procedure Act, 5 U.S.C. 1003, being deemed unnecessary:

It is ordered, That § 205.1a of the order of December 8, 1960, in the matter of *Motor Carrier Annual Report Form B (Class II Carriers of Property)*,[1] be, and it is hereby, modified and amended, with respect to annual reports for the year ended December 31, 1961, and subsequent years, to read as shown below.

It is further ordered, That 49 CFR 205.1a be modified and amended to read as follows:

§ 205.1a Annual reports of Class II carriers of property.

Commencing with reports for the year ended December 31, 1961, and thereafter until further order, all Class II motor carriers of property, as described in 49 CFR 182.01–1, viz., carriers with average annual gross operating revenues (including interstate and intrastate) of $200,000 but less than $1,000,000, from property motor carrier operations, are required to file annual reports in accordance with Motor Carrier Annual Report Form B (Property), which is attached to and made a part of this section.[1] Such annual report shall be filed in duplicate in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D.C., on or before March 31 of the year following the year to which it relates.

(Sec. 204, 49 Stat. 546, as amended; 49 U.S.C. 304. Interpret or apply sec. 220, 49 Stat. 563, as amended; 49 U.S.C. 320)

And it is further ordered, That copies of this order and of Motor Carrier Annual Report Form B (Property) shall be served on all Class II motor carriers of property subject to its provisions, and upon every trustee, receiver, executor, administrator, or assignee of any such motor carrier, and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary of the Commission in

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 32—HUNTING

Kentucky Woodlands National Wildlife Refuge, Kentucky

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

KENTUCKY

KENTUCKY WOODLANDS NATIONAL WILDLIFE REFUGE

Hunting of upland game on the Kentucky Woodlands National Wildlife Refuge, Kentucky, is permitted only on the areas designated by signs as open to hunting. This open area, comprising 25,000 acres or 36 percent of the total area of the Refuge, is delineated on a map available at the Refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Peachtree-Seventh Building, Atlanta 23, Georgia. Hunting shall be subject to the following conditions:

(a) Species permitted to be taken: Wild turkeys, gobblers only. The hunting of upland game species, as may be otherwise authorized by Kentucky State regulation, is prohibited.

(b) Open season: April 19–20, 23–24, and 26–27. Hunters will be permitted to enter the open area at 4:30 a.m. Check-out time is 11:00 a.m., c.s.t. Total season kill limited to 25 gobblers.

(c) Bag limits: Only one turkey gobbler per hunter for the season. A successful hunter cannot assist any other hunter in taking turkey.

(d) Method of hunting: Shotguns only, not larger than 12 gauge. Slugs prohibited.

(e) Other provisions:

1. The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

2. During the open season hours specified in (b) above, bobcats, woodchucks, grey foxes, crows and feral cats, which are not protected by State regulation, may be taken without limit on the area designated as open to hunting.

3. Hunters, upon entering or leaving the hunting area, must report at such checking stations as may be established for regulating the hunting. Checking stations will be open at 4:30 a.m. and check-out time will be 11:00 a.m., c.s.t.

4. A Federal permit is required to enter the public hunting area. Permits will be issued at the Refuge office starting April 16, 1962.

5. The provisions of this special regulation are effective to April 28, 1962.

W. L. TOWNS,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

COTTAGE CHEESE, CREAMED COTTAGE CHEESE

Proposed Amendments of Identity Standards

Notice is given that a petition has been filed by the Milk Industry Foundation, 1145 Nineteenth Street NW., Washington, D.C.; The American Cottage Cheese Institute, Ithaca, N.Y., and others, proposing amendments of the standards of identity for cottage cheese and creamed cottage cheese (21 CFR 19.525, 19.530). The proposed amendments with certain minor editorial changes are as follows:

1. It is proposed to amend § 19.525(a) by adding new text to the first sentence; by changing the citation to the A.O.A.C. method of analysis in the second sentence; and by deleting the third sentence. As amended, § 19.525(a) would read as follows:

§ 19.525 Cottage cheese; identity.

(a) Cottage cheese is the soft uncured cheese prepared by the procedure set forth in paragraph (b) of this section or by another procedure which produces a finished cheese having the same physical and chemical properties as the cheese produced when the procedure set forth in paragraph (b) of this section is used. The finished cottage cheese contains not more than 80 percent of moisture, as determined by the method prescribed under "Moisture—Official" on page 210 of "Official Methods of Analysis of the Association of Official Agricultural Chemists," Ninth Edition, 1960.

2. It is proposed to change § 19.530 to read as follows:

§ 19.530 Creamed cottage cheese; identity; label statement of optional ingredients.

(a) Creamed cottage cheese is the soft uncured cheese prepared by the procedure set forth in paragraph (b) of this section, or by another procedure which produces a finished cheese having the same physical and chemical properties as the cheese produced when the procedure set forth in paragraph (b) of this section is used. The creaming mixture specified in paragraph (b) of this section is used in such quantity that the milk fat added thereby is not less than 4 percent by weight of the finished creamed cottage cheese. The finished creamed cottage cheese contains not more than 80 percent of moisture as determined by the method prescribed under "Moisture—Official" on page 210 of "Official Methods of Analysis of the Association of Official Agricultural Chemists," Ninth Edition, 1960.

(b) Cottage cheese is mixed with a creaming mixture. The creaming mixture consists of either pasteurized cream or a pasteurized mixture of cream with milk or skim milk or both to which may be added one or more of the optional ingredients specified in subparagraphs (1), (2), (3), and (4) of this paragraph. Harmless lactic acid- and flavor-producing bacteria, with or without rennet, may be used to culture such creaming mixture, or may be added to it. The pasteurized skim milk used in such creaming mixture may be subjected to the action of harmless flavor- and aroma-producing bacteria and of citric acid. Other optional ingredients that may be added to such creaming mixture are:

(1) Salt.

(2) Citric, phosphoric, or lactic acid.

(3) One or any mixture of two or more of the optional ingredients gum karaya, locust (carob) bean gum, gum tragacanth, algin (sodium alginate), propylene glycol alginate, guar gum, extract of Irish moss, or sodium carboxymethylcellulose which may be added in admixture with sucrose, dextrose, or dextrin; but the quantity of any such optional ingredient or mixture of two or more of such optional ingredients is such that the total weight of the solids contained therein is not more than 0.5 percent of the weight of such creaming mixture.

(4) Nonfat dry milk or concentrated skim milk or a mixture thereof in such an amount that the total weight of the added solids contained therein is not more than 3 percent of the weight of such creaming mixture.

(c) For the purposes of this section, "milk" means sweet milk of cows; "skim milk" means milk from which the milk fat has been separated; and "concentrated skim milk" means skim milk from which a portion of the water has been removed by evaporation.

(d) When an optional ingredient listed in paragraph (b)(3) of this section is present in creamed cottage cheese, the label shall bear the statement "---------- added" or "with added ---------- " the blank being filled in with the name of such optional ingredient, or the combination of such optional ingredients used, except the gum karaya, locust (carob) bean gum, gum tragacanth, and guar gum, or a mixture of these, may be named as "vegetable gum" or "vegetable gums," as the case may be.

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055, as amended 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371), and in accordance with the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (25 F.R. 8625), all interested persons are invited to submit their views in writing regarding the proposal published herein. Such views and comments should be submitted in quintuplicate, addressed to the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., prior to the 30th day following the date of publication of this notice in the FEDERAL REGISTER.

MIGRATORY BIRD PERMITS

Notice of Hearings

On August 31, 1961, there was published in the FEDERAL REGISTER (26 F.R. 8207), as a notice of proposed rule making, the text of proposed amendments to Part 10 and the establishment of a new Part 16 under Title 50, Code of Federal Regulations. The purpose of these amendments was to revise the regulations governing the issuance of permits to acquire, possess, transport, and dispose of migratory birds and their increase, parts, nests, or eggs for certain specified purposes. That notice afforded all interested parties 45 days from date of publication within which to submit written comments, objections, or suggestions regarding the proposal.

A number of communications were submitted regarding the establishment of user's fees or charges for the issuance of propagating and taxidermist permits, and regarding the definition of "wild migratory birds". In order to permit the public an opportunity to further express its views, it was determined, pending the results of public hearings, that these provisions would be deleted from the regulations which were adopted and published on November 29, 1961, in the FEDERAL REGISTER (26 F.R. 11246).

Accordingly, notice is hereby given that public hearings for the purpose of considering these specific provisions will be held from 9:30 a.m., to 12:30 p.m., on the dates and at the locations as follows:

1. On February 28, 1962, in the auditorium of the Department of the Interior, 18th and C Streets NW., Washington, D.C.

2. On March 7, 1962, at the Statler Hilton Hotel, Washington Avenue at Ninth and St. Charles Streets, St. Louis, Missouri.

3. On March 9, 1962, at the Fairmont Hotel, California and Mason Streets, San Francisco, California.

The written communications that were received within the above mentioned 45-day period will be considered. In addition, all interested persons may present their views regarding these provisions orally or in writing, as they may desire, at these hearings.

STEWART L. UDALL,
Secretary of the Interior.

RE-INSPECTION AND PREPARATION OF PRODUCTS

Proposed Amendment Relating to the Nitrate Content of Cured Meat

Notice is hereby given in accordance with section 4(a) of the Administrative Procedure Act (5 U.S.C. 1003(a)) that pursuant to the authority conferred by the Meat Inspection Act, as amended and extended (21 U.S.C. 71-96), and section 306(b) of the Tariff Act of 1930 (19 U.S.C. 1306(b)), it is proposed to amend § 18.7 of the Meat Inspection Regulations (9 CFR 18.7, as amended) as follows:

Paragraph (k) of § 18.7 would be amended to read:

(k) The use of sodium nitrite, potassium nitrate, sodium nitrate or potassium nitrate, or combination of nitrite and nitrate, shall not result in the presence of more than 200 parts per million of nitrate and 500 parts per million of nitrate in the finished product. Supplies of sodium nitrite and potassium nitrite and mixtures containing them must be kept securely under the care of a responsible employee of the establishment. The specific nitrite content of such supplies must be known and clearly marked accordingly. The maximum amount of sodium nitrite and/or potassium nitrite which may be used are as follows:

(1) 2 pounds in 100 gallons of pickle.

(2) 1 ounce for each 100 pounds of meat in dry salt, dry cure, or box cure.

(3) ¼ ounce in 100 pounds of chopped meat and/or meat byproducts.

While nitrate has been used for curing meat and meat food products for many years the quantity in the finished product has been controlled by limiting the amount added. The purpose of the proposed amendment is to establish a definite maximum limitation for nitrate in cured meat and meat food products. This will provide an additional control procedure for preventing the use of the additive in an amount above that necessary.

Any person who wishes to submit written data, views or arguments concerning the proposed amendment may do so by filing them with the Director, Meat Inspection Division, Agricultural Research Service, U.S. Department of Agriculture, Washington 25, D.C., within 30 days after the date of publication of this notice in the FEDERAL REGISTER.

Done at Washington, D.C., this 5th day of February 1962.

M. R. CLARKSON,
Acting Administrator, Agricultural Research Service.

WHEAT

Notice of Proposed Amendments to Farm Wheat Acreage Allotment Regulations for 1960 and Subsequent Crops of Wheat To Govern Determination of 1963 Farm Base Acreages and Acreage Allotments and New Farm Allotments

Pursuant to the authority contained in applicable provisions of the Agricultural Adjustment Act of 1938, as amended, the Department has under consideration the formulation and issuance of amendments to the farm wheat acreage allotment regulations for the 1960 and subsequent crops of wheat to provide the basis for determining farm base acreages and acreage allotments for the 1963 crop of wheat.

Section 334(c) of the Agricultural Adjustment Act of 1938, as amended, requires that the county wheat acreage allotment for any year shall be apportioned among the old farms within the county on the basis of the past acreage of wheat, tillable acres, crop-rotation practices, type of soil, and topography. Wheat allotments have been in effect continuously since 1954 and county committees have had ample opportunity to review and make appropriate adjustments when necessary to properly reflect the above factors. It is felt that such statutory factors except for the acreage of wheat for the crop year 1961 are adequately reflected for the 1963 crop of wheat in the 1962 base acreages for most regular rotation farms and in the 1961 base acreages for most odd and even rotation farms, except as adjustments provided for in Public Laws 85-203 and 85-366 may be required or appropriate. These laws provide the manner in which wheat history acreage shall be determined for 1958 and subsequent years for purposes of establishing acreage allotments. In the same way, in determining 1962 allotments, the statutory factors except for the 1960 acreage of wheat were considered to be adequately reflected in the 1961 base acreage for most regular rotation farms, and in the 1960 base acreage for most odd and even rotation farms, taking into account necessary adjustments required by law.

In applying the statutory factor of past acreage of wheat in determining farm base acreages and acreage allotments for any crop of wheat it is not practicable to take into account the wheat history acreage for the immediately preceding crop because the allotment must be determined prior to the time that the wheat acreage for such crop can be ascertained. Thus, the 1963 base acreage for any farm was determined without regard to the wheat history acreage for 1961 for such farm. The 1961 farm wheat acreage will have been determined prior to the establishment of 1963 farm base acreages and acreage allotments.

It is proposed to change the eligibility requirements governing wheat acreage allotments for "new farms" (i.e., farms on which wheat was not planted or considered planted to wheat for harvest as grain during any of the years 1960, 1961, and 1962) in order to obtain uniformity between the wheat acreage allotment regulations and the regulations for other allotment crops and also to provide that the wheat acreage allotment established for a new farm shall be reduced to the wheat acreage determined for the farm if it is determined such wheat acreage on the farm is less than 75 percent of the farm wheat acreage allotment.

In other respects, the regulations governing determination of 1963 farm base acreages and acreage allotments would be substantially identical to those for the determination of 1962 farm base acreages and acreage allotments.

In order to give effect to these proposed changes and to give appropriate consideration to the 1961 farm wheat history acreages in the determination of 1963 base acreages, it is proposed that the amendments be as follows:

1. A new § 728.1017c would be added between §§ 728.1017b and 728.1018 to read as follows:

§ 728.1017c Determination of base acreages for old farms for the 1963 crop of wheat.

(a) The county committee shall, in accordance with the regulations in this section, determine a 1963 base acreage of wheat for each old farm which will reflect the factors of past acreage of wheat, tillable acres, crop-rotation practices, type of soil and topography. For substantially all farms, these factors are determined to be adequately reflected for the 1963 crop in the 1962 base acreages for regular rotation farms and in the 1961 base acreages for odd and even rotation farms and the wheat history acreages for 1961, weighted and adjusted as provided for in this section. For the small number of farms where special provisions are necessary as provided in subparagraphs (3), (4), (5), (6), and (7) of paragraph (b) of this section, the computed base acreage determined in accordance with the provisions of such subparagraphs have been determined adequately to reflect these factors.

(b) *Computed base acreage.* The county committee shall establish for each farm a computed base acreage which shall be:

(1) For a regular rotation farm, 80 per centum of the 1962 base acreage which was determined for the farm under § 728.1017b, plus 20 per centum of the 1961 wheat history acreage as determined for the farm under § 728.1011(f)(6).

(2) For any farm having an odd and even crop rotation as defined in § 728.1011(d), 80 per centum of the 1961 base acreage which was determined for the farm under § 728.1017a, plus 20 per centum of the 1961 wheat history acreage as determined for the farm under § 728.1011(f)(6).

(3) For a farm for which a new farm allotment was established for the first time for the 1962 crop, the product obtained by multiplying the final 1962 wheat acreage allotment for the farm by 111.11 percent and multiplying that product by the reciprocal of a decimal fraction which is 100 per centum of the county proration factor used in adjusting old farm base acreages in 1962 to the 1962 county acreage allotment as determined under § 728.1018.

(4) For a farm which had established a new odd and even crop-rotation system for 1962 as provided in § 728.1017b(b)(4), the base acreage recommended by the county committee as applicable for 1963 for such farm.

(5) For an old farm having a crop-rotation system under which the acreage devoted to the production of wheat for harvest as grain has varied in a set pattern from year to year over a three- or four-year period, the previous base acreage selected by the county committee as applicable for 1963 for such farm under such rotation system.

(6) For a farm with an established odd and even rotation for which a change in the crop-rotation practices will go into effect for 1963, the computed base acreage recommended by the county committee as applicable for 1963 for such farm under the new rotation: *Provided*, That such computed base acreage shall not exceed the base acreage which would have been computed if the rotation in effect for 1962 had been continued.

(7) For those farms for which the penalty on excess wheat of the 1959 or 1960 crop was postponed or avoided by storage of the excess but on which the penalty became due after determination of the 1962 allotment, the farm base acreage for 1963 shall be computed in accordance with the applicable subparagraph (1) or (2) of this paragraph after the 1961 or 1962 base acreage has been recomputed, for 1963 base acreage determination only, by using the 1959 or 1960 allotment, as appropriate, instead of the 1959 or 1960 base acreage as the 1959 or 1960 wheat history acreage.

(c) *Tentative farm base acreage.* The tentative base acreage for a farm shall be the computed base acreage determined under paragraph (b) of this section, as adjusted under this paragraph (c). The county committee may make adjustments not to exceed 10 percent in the computed base acreage for the farm when it is determined that such computed farm base acreage is too low or too high when compared with base acreages on similar farms similarly operated which have had very similar crop-rotation practices in the past and have relatively the same type of soil and topography and approximately the same amount of cropland. Such adjustments are subject to the following conditions:

(1) The computed farm base acreage may not be adjusted above the cropland for the farm.

(2) No adjustment shall be made for the purpose of offsetting the effects of exceeding the 1959, 1960, or 1961 farm acreage allotment.

(3) An adjustment shall be made to reflect the loss in county history caused by those farms for which the base acreage is determined under § 728.1017c(b)(4) or (5) which had excess wheat acreage on which the penalty became due for the 1959, 1960, or 1961 crop of wheat. A zero tentative base acreage shall be established for any farm if the county committee determines that the land will not be used for agricultural production in 1963 because it has been devoted to non-agricultural use.

(d) *The 1963 base acreage.* The 1963 base acreage shall be that acreage determined under paragraphs (a) through (c) of this section, adjusted to the approved county base. If the sum of the indicated 1963 tentative base acreages for all old farms in the county does not equal (within rounding tolerance) the 1963 final county base acreage used in apportioning the State acreage allotments to counties contained in § 728.1307, such indicated base acreage shall be adjusted up or down by that percentage which the sum of the indicated base acreages for all old farms in the county is less or more than the 1963 county base acreage: *Provided*, That the 1963 base acreage for any farm shall not exceed the total cropland for the farm, except for any farm where less than 15 percent of the cropland on the farm has been acquired under the right of eminent domain. As so adjusted, the 1963 tentative base acreage for the farm shall become the 1963 base acreage for the farm.

§ 728.1018 [Amendment]

2. Section 728.1018 would be amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the language "and § 728.1017c for 1963."

§ 728.1019 [Amendment]

3. Section 728.1019 would be amended by changing the heading to read *"Determination of tentative acreages for new farms for the 1960, 1961, and 1962 crops"*; by adding in the first sentence of paragraph (a) immediately following the word "shall" the language ", with respect to the 1960, 1961, and 1962 crops,"; by adding in the first sentence of paragraph (b) immediately following the word "allotments" the language "for the 1960, 1961, or 1962 crop"; and by adding in the first sentence of paragraph (c) immediately following the words "new farm" the language "for the 1960, 1961, or 1962 crop".

4. A new § 728.1019a would be added to read a follows:

§ 728.1019a Determination of tentative acreages for new farms for 1963 and subsequent crops.

(a) The county committee shall determine a tentative acreage for use in establishing a wheat acreage allotment for each eligible new farm for the 1963 or any subsequent crop for which an acreage allotment is requested in writing prior to July 1 of the year immediately preceding the current year in the winter wheat area, and prior to March 1 of the current year in the spring wheat area. The spring wheat area shall include any area where spring wheat is normally grown, even though winter wheat is also grown in such area. Each request for such allotment shall be made by the owner or operator on Form MQ-25, Application for New Farm Allotment,

which shall contain statements as to location and identification of the farm, name and address of the farm operator, the acreages of farmland and cropland on the farm, the acreage of wheat requested, the past experience of the applicant in producing wheat, the acreage allotments established for other crops for the farm for the current year, the tillable acreage on the farm available for the production of wheat, whether the operator or owner owns or operates any other farm in the United States for which a wheat acreage allotment will be established for the current year, whether the operator of the farm will obtain more than 50 per centum of his income during the current year from the production of agricultural commodities or products from the farm, excluding the estimated return from the production of wheat on the requested allotment, whether the production of wheat on the farm ordinarily would result in an undue erosion hazard under continuous production and whether the operator owns or has readily available adequate equipment and other facilities for the production of wheat.

(b) Eligibility for a new farm allotment shall be conditioned upon the following:

(1) The application for a new farm allotment is filed by the farm operator or farm owner at the office of the county committee on or before the applicable closing date.

(2) Neither the operator nor the owner of the farm covered by the application owns or operates any other farm in the United States for which a wheat allotment will be established for the current year.

(3) The available land, type of soil and topography of the land on the farm for which the wheat allotment is requested is suitable for the production of wheat and the production of wheat on the farm ordinarily will not result in an undue erosion hazard under continuous production.

(4) The operator owns or otherwise has readily available adequate equipment and the other facilities of production necessary to the successful production of wheat on the farm.

(5) The operator will obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products from the farm for which the new farm allotment application is filed. In making this computation of income from the farm, no value will be allowed for the estimated return from the production of the requested allotment. However, in addition to the value of agricultural products sold from the farm, credit will be allowed for the estimated value of home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm. Where the farm operator is a partnership, each partner must obtain, during the current year, more than 50 percent of his income from the agricultural commodities or products from the farm; where the farm operator is a corporation, it must have no major purpose other than operation or ownership, as applicable, of such farm, and the officers and general manager of the corporation must obtain more than 50 percent of their income, including dividends and salaries, from the corporation.

(6) Notwithstanding the provisions of subparagraphs (2), (3), and (5) of this paragraph, the committee shall establish a new farm allotment for a farm (other than an old wheat farm) with an established four- or five-year rotation that will include wheat for the current year.

(c) In determining the tentative acreage for each new farm, the county committee shall take into consideration the tillable acres, crop-rotation practices, type of soil, topography and the farming system to be followed by the operator, including the equipment and other facilities available for the production of wheat under such system: *Provided*, That the tentative acreage so established shall not exceed the wheat acreage for the farm for the current year under the planned crop-rotation system. Without prior approval of the State committee, the acreage recommended by the county committee shall not exceed one hundred percent of the acreage indicated by cropland where the operator of the farm has been planting wheat on the farm in regular rotation; eighty percent of the acreage indicated by cropland where the operator has had actual wheat production in previous years; sixty-five percent of the acreage indicated by cropland where the operator has had no opportunity to establish wheat history for himself; and twenty-five percent of the acreage indicated by cropland where the applicant could have established wheat history but has not done so, and in all other cases. The State committee when requested may grant approval in excess of the limits established above if such limitation would result in an inequitable tentative acreage due to the fact that the type of farming operations carried out generally in the community or county is not representative of the type of farming operations to be carried out on the new farm.

5. Section 728.1020 would be amended to read as follows:

§ 728.1020 Determination of acreage allotments for new farms.

(a) The county committee shall, after approval by the State committee of the tentative acreages established for new wheat farms, determine a wheat acreage allotment for the current year for each new farm by multiplying the tentative acreage so established by a pro rata adjustment factor which shall be the smaller of the factor determined under § 728.1018 or a factor obtained by dividing the State reserve for new farms by the sum of the tentative acreages determined for new farms under §§ 728.1019 or 728.1019a. If the wheat acreage for the current year is less than the allotment established for the farm under this section for the 1960, 1961, or 1962 crop, or is less than 75 per centum of the allotment established for the farm under this section for the 1963 or any subsequent crop, the wheat allotment for the farm shall be reduced to the acreage classified as wheat acreage on the farm, and the acreage resulting from such reduction in each county shall be transferred to the reserve available to the county committee for appeals, correction of errors and missed farms. The sum of all new farm acreage allotments in the State shall not exceed the State reserve set aside for new farms. In determining future allotments for such new farms, the farm will not be considered to have any acreage diverted from the production of wheat for the year in which the allotment was established.

(b) Any new farm allotment approved under § 728.1020 for the 1963 or any subsequent crop which was determined by the county committee on the basis of incorrect information knowingly furnished the county committee by the applicant for a new farm allotment shall be cancelled as of the date established.

Prior to the issuance of the proposed amendments, any data, views or recommendations pertaining thereto which are submitted in writing to the Director, Grain Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, Washington 25, D.C., will be given consideration, provided such submissions are postmarked not later than 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D.C., on February 2, 1962.

E. A. JAENKE,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[Docket No. AO-229-A6]

MILK IN CEDAR RAPIDS-IOWA CITY MARKETING AREA

Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Cedar Rapids, Iowa, on October 19, 1961, pursuant to notice thereof issued on September 28, 1961 (26 F.R. 9347).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Secretary, United States Department of Agriculture, on January 3, 1962 (27 F.R. 238; F.R. Doc. 62-219) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. Individual handler pooling;

2. Pool plant qualification of a plant operated by a cooperative association; and

3. Diversion of producer milk from pool plants to nonpool plants.

The notice of hearing included proposals pertaining to the pricing of Class II milk. However, no evidence was presented on the record with respect to such proposals and, therefore, no issue is presented herein.

The notice also contained a proposal to modify the allocation provision of the order. The proponent of the proposal presented testimony on the record in support of the proposal but in its brief requested that the issue be abandoned. No other supporting testimony was received. Accordingly, the issue is not presented herein.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. Marketwide pooling should be continued in the Cedar Rapids-Iowa City order as the method of distributing to producers the use value of their milk.

A handler proposed that the order be amended to provide for individual handler pooling. Individual handler pooling would provide for payment of uniform prices for all milk delivered by producers delivering to the same handler depending on the use of the milk by the handler. Marketwide pooling provides for payment of uniform prices for all milk delivered by all producers to all handlers based upon the marketwide use of such milk.

The class utilization of milk in the market by handlers is not uniform. One handler in the market, the Eastern Iowa Cooperative Dairy Producers Association, handles most of the milk which is not needed for fluid purposes.

Distributing pool plants in the market tend to limit their purchases of milk to that amount required for use in Class I products plus what is used in ice cream and cottage cheese. They depend on the Eastern Iowa Cooperative Dairy Producers Association to care for excess supplies during periods of flush production and to furnish supplemental supplies during periods of short production. In addition to seasonal variations, handlers vary their purchases according to the day of the week. Some handlers do not take any milk from the cooperative on Sundays.

In a market such as this where one handler cares for the reserve supply for the market, an individual handler pool would not contribute the same degree of stability to the market that is accomplished through the present marketwide pool. The marketwide pool assures that all of the producers supplying the market share equally in the Class I sales in the market and that the burden of carrying reserve supplies is likewise shared equally among all producers.

2. The qualifications for pool plant status of a plant operated by a cooperative association under the order should be modified.

The order provides pool plant status for a plant operated by a cooperative association whose members are a majority of the total number of producers shipping to pool plants, and supply half or more of the total producer milk received at all pool plants during the month.

The Eastern Iowa Cooperative Dairy Producers Association, which represents over 70 percent of the producers supplying the market, proposed that such pool plant provisions be changed to afford pool plant status to a plant located within 10 miles of the marketing area which receives milk from dairy farmers and which is operated by a cooperative association having member producers whose milk is delivered to regulated plants of other handlers.

The association operates a plant located at Marion, Iowa, which is about four miles from the marketing area. This plant has facilities for receiving, cooling and storage of milk. It is used primarily for supplying spot loads of milk to distributing pool plants and assembling milk for shipment to other markets. The association supplies milk to all of the handlers in the market, however, two of the handlers also receive milk from other producers.

During 1960 distributing pool plants received 82 percent of their total milk supply from the members of the cooperative association. The proportion of such handlers' receipts from the cooperative association's members was at least 79 percent in all months of 1960.

In February 1961 the association failed to qualify its plant for pool status since, on February 1, 1961, the two largest handlers in the market obtained their entire supplies of milk from sources other than members of the Eastern Iowa Cooperative Dairy Producers Association. This was caused by a dispute arising in negotiation of prices above those established by the order. However, by early March both of these handlers resumed receiving milk from members of the association, but in limited amounts since a greater portion of their needs were being supplied by new producers.

Due to the increased amount of milk on the market from new producers, the proportion of milk received at distributing pool plants from members of the cooperative association has declined. By June 1961 the proportion of distributing pool plant receipts from members of the cooperative had dropped to 53.5 percent.

Pool plant status for the cooperative's plant became critical in July and the provision of the order which requires a cooperative to supply at least 50 percent of the milk received at other pool plants in order to have its plant qualify as a pool plant was suspended for the months of July and August 1961. It turned out that the cooperative did supply 50 percent of the milk received at other pool plants, however, this provision of the order should be changed in order to assure continued pool status for a cooperative's plant so long as its members' milk is associated with and needed in the market.

The provision proposed by the Eastern Iowa Cooperative Dairy Producers Association would qualify its plant for pool status on the basis of its location. However, there would be no assurance that its members' milk was sufficiently associated with and needed on the market to warrant pooling its plant as is the case under the present provision. Pool status of such a plant should continue to be based on performance standards which relate the cooperative's total supply of milk with distributing pool plants.

During 1960 the Eastern Iowa Cooperative Dairy Producers Association sold 78 percent of its members' milk to other pool plants. Its sales to pool plants varied seasonally from a low of 61 percent in June to 97 percent in November. The cooperative continues to sell a substantial proportion of its members' milk to pool plants.

From March through September 1961 the cooperative association sold 53 percent of its members' milk to other pool plants. During this period the proportion of such sales on a monthly basis varied from 41 percent in June to 72 percent in September. On many days in September 1961 virtually all of the cooperative association's supply of milk was sold to pool plants. Due to daily variation in demand by handlers, the monthly proportion of the cooperative association's supply received by other handlers was only 72 percent.

The amount of milk needed for bottling purposes is fairly constant from month to month. However, the available supply of producer milk is highest in the spring and lowest in the fall. Accordingly, the performance standards should be varied seasonally.

In view of the increased supply of milk on the market and that pool plants do not process the reserve supply, it cannot be expected that a majority of the available supplies be moved to such plants except during the season of short supply. Performance standards which would require that one-half the milk of members of a cooperative association be moved to distributing pool plants during September, October and November; 30 percent during May, June and July; and 40 percent in all other months, would assure that such milk is associated with and needed on the market. A cooperative association which supplies such proportions of the total milk of its producer members should be afforded pool plant status for any plant which it operates if the plant is approved by an appropriate health authority for the handling of Grade A milk. Pool status of such a plant would contribute to orderly marketing by allowing it to be used for storage of supplies that would be available to other handlers on short notice. In addition it could be used to assemble part loads of milk from farms for shipment to pool plants or transfer to nonpool plants.

3. The diversion provisions of the order should be modified to allow more liberal diversion of producer milk from farms to nonpool plants.

The order provides unlimited diversion during the months of April, May and June. During other months milk may be diverted on as many days as it is received at pool plants and still be pooled under the order. The entry of new producers on the market has resulted in the need to divert greater amounts of milk to nonpool plants since pool plants do

not process the markets reserve supply. Direct movement of this reserve milk from farms to nonpool plants is the most economical means of handling it. However, the present diversion limits of the order are not liberal enough to allow this milk to be diverted and still be pooled under the order without being shipped to a pool plant and then transferred to a nonpool plant. The Eastern Iowa Cooperative Dairy Producers Association proposed that this be corrected by allowing milk to be pooled so long as it is not diverted for the entire month.

This cooperative association is the only handler experiencing difficulty with the present diversion limits since it is the sole handler of the increased reserve supply for the market. In order to keep its members' milk pooled, the cooperative association has had to bring the milk to its own plant and then transfer it to nonpool plants for manufacturing. Handlers have displaced producer milk of the cooperative association's members with milk from other producers. Since April 1961 the receipts of milk at distributing pool plants from producers who are not members of the Eastern Iowa Cooperative Dairy Producers Association has more than doubled. During the period April–September 1961 distributing pool plants received 28.7 million pounds of milk from such producers compared to 13.6 million pounds during the same period of 1960. The difference, an increase of 15.1 million pounds, was more than offset by the drop in sales of milk to such plants from the Eastern Iowa Cooperative Dairy Producers Association which were 58.1 million pounds during April through September 1960 and 39.5 million pounds for the same period of 1961, or a decrease of 18.6 million pounds.

Further evidence that this association has the role of caring for the reserve supply is that its sales of milk to handlers are inversely related to the normal seasonal production pattern while the opposite it true of such handler's receipts from other producers. For example, from July through September 1961 monthly receipts of milk at distributing pool plants from members of the Eastern Iowa Cooperative Dairy Producers Association increased from 5.5 million pounds to 7.7 million pounds while receipts from other producers dropped from 5.1 million pounds to 4.5 million pounds.

In addition to handling the seasonal reserve for the market this cooperative association handles the market's weekly reserve supply. Handlers tend to buy only enough milk from the Eastern Iowa Cooperative Dairy Producers Association to fulfill their daily bottling requirements. Handlers receive very little of the association's milk on weekends but take large amounts on Thursdays and Fridays. On these days during September 1961 virtually all of the cooperative's available supply of milk was received at distributing pool plants.

The present diversion limit applies during the period of July through March. Unlimited diversion is permitted during April, May and June. In 1958 these three months represented the lowest percentage of producer milk utilized in Class I. However, in 1959 the percentage of producer milk in Class I during July was lower than in April. During 1960 and 1961 a lower percentage of producer milk was utilized in Class I in both July and August than in April. In 1961 the percentage of producer milk utilized in Class I was 50 percent during July and 57 percent during August compared to 48 percent in June which was the month with the lowest percentage Class I use of producer milk. In addition, deliveries to distributing pool plants by members of the Eastern Iowa Cooperative Dairy Producers Association during these two months represented 42 percent and 51 percent of the association's total available supplies. To conform to this changed condition unlimited diversion should be extended to include the months of July and August. This change in the order will enhance orderly disposal of the seasonal reserve supply on the market. It would also help preclude any recurrence of the need for emergency action to assure that producer milk which is historically associated with the market be pooled under the order as was the case in July and August 1961.

The diversion limits applicable during the months of September through March should also be modified to allow the weekly reserve supply to be moved directly from farms to nonpool plants. Most of the available producer milk is needed at least one day of the week. Accordingly, this milk should be pooled to assure its continued availability and allow it to be diverted on other days. This is accomplished by providing for diversion of up to 25 days' production of a producer during such months.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, the exception received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with the exception, such exception is hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area," and "Order Amending the Order Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Determination of representative period. The month of November 1961 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached order amending the order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area, is approved or favored by producers, as defined under the terms of the order as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on February 2, 1962.

JAMES T. RALPH,
Assistant Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Cedar Rapids-Iowa City Marketing Area

§ 1070.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Cedar Rapids-Iowa City marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Delete paragraph (d) of § 1070.10 and substitute therefor the following:

(d) A plant (1) which is approved by a duly constituted health authority for the handling of Grade A milk; (2) which is operated by a cooperative association; and (3) from which the quantity of milk transferred by the association to plants of other handlers specified in paragraph (a) of this section plus that delivered by such association pursuant to paragraph (c) of this section and that delivered directly from the farms of members of such association to such plants is at least the following percentages, in the months indicated, of the total quantity of Grade A milk delivered by all producers who are members of the association:

Month:	*Minimum percentage*
September, October and November	50
May, June, and July	30
All other months	40

If written application is filed with the market administrator on or before the 5th day of any month, such plant may be designated a nonpool plant for such month and for any subsequent months, except such plant shall be a nonpool plant during any month in which it would be subject to the classification and pricing provisions of another order issued pursuant to the Act, unless a greater volume of fluid milk products is disposed of from such plant to retail or wholesale outlets and pool plants in the Cedar Rapids-Iowa City marketing area than in the marketing area regulated pursuant to such other order.

2. Delete § 1070.14 and substitute therefor the following:

§ 1070.14 Producer milk.

"Producer milk" means all skim milk and butterfat produced by producers which is:

(a) Received at a pool plant directly from producers; or

(b) Diverted from a pool plant to a nonpool plant for the account of the operator of a pool plant or a cooperative association, subject to the following:

(1) Such diversions may be without limit during the months of April through August, but not be for more than 25 days' production of any producer during any other month and milk diverted in excess of this limit shall not be producer milk;

(2) Milk so diverted for the account of the operator of a pool plant shall be deemed to have been received at the plant from which diverted; and

(3) Milk so diverted from the plant of another handler for the account of a cooperative association shall be priced at the location of the plant from which diverted.

[F.R. Doc. 62-1304; Filed, Feb. 7, 1962; 8:50 a.m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

MILK IN THE NEOSHO VALLEY MARKETING AREA

Notice of Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Parsonian Hotel, Parsons, Kansas, beginning at 10:00 a.m., local time, on February 27, 1962, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Neosho Valley marketing area.

The public hearing is for the purpose of receiving evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

The proposal relative to a redefinition of the marketing area raises the issue whether the provisions of the present order would tend to effectuate the declared policy of the Act, if they are applied to the marketing area as proposed to be redefined and, if not, what modifications of the provisions of the order would be appropriate.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

Proposed by the Page Milk Company of Coffeyville, Kansas:

Proposal No. 1. Amend § 1071.6 to increase the marketing area by adding the counties of Craig, Nowata, Ottawa and Washington all in the State of Oklahoma.

Proposed by the K.M.O. Grade A Milk Producers Association:

Proposal No. 2. Amend § 1071.7(a) by inserting after the word "area" the following: "And from which during the delivery period 50 percent or more of the milk received from dairy farmers is disposed of as Class I milk."

Proposed by the Neosho Valley Cooperative Creamery Association:

Proposal No. 3. Amend § 1071.7 by adding "or" after § 1071.7(b)(2) and by adding a paragraph (c), as follows:

(c) Which is located within the marketing area, and at which milk is received from dairy farmers holding permits or authorization from such health authority and which is operated by a cooperative association having member producers whose milk is delivered directly to an approved plant(s) of other handlers.

Proposed by the K.M.O. Grade A Milk Producers Association:

Proposal No. 4. Change the term of an "Approved plant" in § 1071.7 to "Pool plant" and add a definition of "Nonpool plant".

Proposal No. 5. Provide a definition of an "Approved dairy farmer".

Proposal No. 6. In the last proviso in § 1071.9 "Producer", delete the words "and § 1071.62".

Proposed by the Beatrice Foods Company of Chicago, Illinois:

Proposal No. 7. Amend §§ 1071.50, 1071.51 and 1071.52 to provide that for pricing purposes the basic butterfat content be changed from 4 percent to a 3.5 percent basis and provide that price adjustments varying from 2.5 percent be made by the use of the butterfat differentials provided in § 1071.52.

Proposal No. 8. Amend § 1071.51(a) to provide for a Class I price the same as the Class I price established by Order No. 67 (Ozarks) applicable to pool plants located in Springfield, Missouri, plus 15 cents.

Proposed by the Foremost Dairies, Inc.:

Proposal No. 9. Amend § 1071.51(a) so that the Class I pricing provisions of the order assure proper alignment with Ozarks order Class I prices.

Proposed by the Cloverleaf Dairy Company of Springfield, Missouri:

Proposal No. 10. Delete § 1071.61 and substitute the following:

§ 1071.61 Plant subject to other Federal orders.

In the case of any approved plant which the Secretary determines disposes of a greater portion of its milk as Class I milk in another marketing area regulated by another marketing order issued pursuant to the Act, than is disposed of as Class I milk in the Neosho Valley marketing area, the provisions of this part shall not apply except as follows. The operator of such plant shall with respect to the total receipts and utilization of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

Proposed by the Hiland Dairy, Inc., of Springfield, Missouri:

Proposal No. 11. Delete § 1071.61 and substitute the following:

§ 1071.61 Plants subject to other Federal orders.

In the case of any approved plant which the Secretary determines disposes of a greater portion of its milk as Class I milk on retail or wholesale routes (including plant stores) in another marketing area fully regulated by another order issued pursuant to the Act than is disposed of as Class I milk on retail or wholesale routes (including plant stores) in the Neosho Valley marketing area, the provisions of this part shall not apply except as follows: The operator of such plant shall, with respect to the total receipts and utilization of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require, and allow verification of such reports by the market administrator.

Proposed by the K.M.O. Grade A Milk Producers' Association:

Proposal No. 12. In § 1071.62 amend the preamble and paragraphs (a) and (b) as follows:

§ 1071.62 Handlers doing less than 10 percent of their business in the marketing area or disposing of less than 50 percent of their milk as Class I.

In the case of any handler (except a handler who would be covered under the provisions of § 1071.61) who the Secretary determines disposes of less than 10 percent of his milk qualified for distribution as Grade A milk in the marketing area as Class I milk in the marketing area, or who the Secretary determines disposes of less than 50 percent of his milk received from dairy farmers as Class I, the provisions of this part shall not apply, except as follows: Each handler who operates an approved plant as defined in this section shall, in lieu of the payments required pursuant to §§ 1071.90 through 1071.97 pay to the market administrator for deposit in the producer settlement fund on or before the 13th day after the end of each delivery period, the amount resulting from the computation of paragraph (a) of this section, unless such handler elects to pay the computation specified in paragraph (b) of this section.

(a) The product of the quantity of milk received by such handler which was disposed of during the delivery period in the marketing area on routes as Class I milk, by the difference between the applicable Class I and Class II price; and

(b) Any plus amount resulting from the following computation: from an amount equal to the net pool obligation which would be computed pursuant to §§ 1071.70 and 1071.93 for such handler for such delivery period, if such handler operated a pool plant deduct the gross payments made by such handlers to approved dairy farmers for milk received during the month.

Proposed by the Fairmont Foods Company of Omaha, Nebraska:

Proposal No. 13. Delete subparagraphs (b) and (c) of § 1071.61.

Proposed by the Milk Marketing Orders Division, Agricultural Stabilization and Conservation Service:

Proposal No. 14. Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, Mr. Kenneth M. Fell, P.O. Box 601, Pittsburg, Kansas, or from the Hearing Clerk, Room 112, Administration Building, United States Department of Agriculture, Washington 25, D.C., or may be there inspected.

Signed at Washington, D.C., on February 5, 1962.

ROBERT G. LEWIS,
Deputy Administrator, Price and Production, Agricultural Stabilization and Conservation Service.

MILK IN INLAND EMPIRE MARKETING AREA

Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Spokane, Washington, on September 13-14, 1961, pursuant to notice thereof issued on August 16, 1961 (26 F.R. 7782).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Secretary, United States Department of Agriculture, on December 22, 1961 (26 F.R. 12611; F.R. Doc. 61-12295) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. Expansion of the marketing area.
2. Pool plant requirements.
3. Limitation of diversions.
4. Cooperatives as handlers of bulk tank milk.
5. Classification and accounting for milk.
6. Supply-demand adjustment of the Class I price.
7. Location adjustment to handlers and to producers.
8. Obligations of handlers operating nonpool distributing plants.
9. Advance payments to producers.
10. Conforming changes.

No testimony was offered in support of a proposal in the notice of hearing to include an additional basic formula price alternative. A proposal not contained in the notice of hearing was made at the hearing with respect to conditions under which skim milk dumped may be classified as Class II milk, but no evidence was offered in support thereof. There is thus no issue presented with respect to these proposals.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Expansion of the marketing area.* The marketing area should be expanded to include the remaining portions of Bonner and Kootenai Counties, all of Shoshone and Latah Counties, Idaho, and Whitman County, Washington. Nes Perce County, Idaho, and Asotin County, Washington, should not be added to the marketing area at this time.

The two cooperatives in the market, Spokane Milk Producers Association and Inland Empire Dairy Association, which represents approximately 75 percent of the total producers, proposed that the marketing area be enlarged to include all of Shoshone and Latah Counties, Idaho; Whitman County, Washington; and the remaining portions of Bonner and Kootenai Counties, Idaho. A proprietary handler operating a distributing plant at Pullman, Washington, proposed that if Latah and Whitman Counties were to be included Nez Perce and Asotin Counties should also be added to the marketing area. Representatives of the University of Idaho and Washington State University requested that their operations be exempt from regulation if Latah and Whitman Counties are added.

The addition of the portions of Bonner and Kootenai Counties not included in the marketing area at the present time will simplify the reporting of in and out of area sales required by the order. There are no plants located in these areas. At the present time there are no sales of milk by unregulated handlers in the portions of Bonner County not now included in the marketing area. The addition of Shoshone County without the addition of the remaining portion of Kootenai County would result in a small unregulated island within the marketing area. This area is presently served only by regulated handlers and those that would become regulated by the addition of Shoshone County.

The addition of Shoshone County will result in the full regulation of two handlers located in that county and partial regulation of a Missoula, Montana, handler who distributes some milk in the county. The handler operating a plant at Kellogg is supplied by 20 dairy farmers who are members of the Spokane Milk Producers Association. The Kellogg handler pays class prices of the order for this milk. Supplemental supplies of pool milk have been purchased from the Spokane Milk Producers Association by this handler in eight of the last 12 months, also at order prices. This handler has approximately 62 percent of the total sales in the county while regulated handlers account for an additional 16 percent. The other handler who will become fully regulated operates a plant in Wallace and is being supplied by five independent dairymen. These producers have been receiving less than order prices for their milk. This has placed handlers who are paying order prices at a competitive disadvantage and threatens to reduce prices to all producers who supply the area. Since it is evident that marketing in Shoshone County should be subject to order regulation on the basis of conditions existing in the county, it is appropriate that this be achieved by adding the county to the Inland Empire marketing area because of the close geographical and marketing relationships which exist. A handler whose plant is located in Missoula, Montana, distributes five percent of his total sales in this county. These sales are a minor portion of all sales in the area. He objected to the inclusion of Shoshone County because he would become partially regulated and therefore subject to the obligations required of a nonpool handler. No other opposition was offered to inclusion of Shoshone County in the marketing area.

The inclusion of Latah and Whitman Counties will bring under full regulation a plant at Pullman, Washington, which is operated by a handler who has a pool plant located in Spokane. This plant accounts for approximately 83 percent of the total sales in these counties while regulated handlers make 16 percent of all sales and a handler at Lewiston, Idaho, has minor sales in this area. Of the 30 dairy farmers supplying the Pullman plant 23 are members of one of the proponent cooperative associations. A representative of the independent shippers testified that they were satisfied with the prices they have been receiving for their milk and are opposed to the inclusion of this area in the market. Since the Inland Empire order first became effective the Pullman plant, which was then independently owned and operated, has been acquired by the handler with a Spokane plant. This handler has so integrated the operations of the two plants as to provide a substantial degree of specialization. Ice cream and cottage cheese distributed from the Pullman plant are processed at the Spokane plant from pool milk. Class I sales outside the marketing area are assigned to the fullest extent possible to the Pullman plant. Dairy farm receipts at the Pullman plant have been kept as close to Class I requirements as possible and pool milk received at the Spokane plant has been moved to Pullman when Class I sales exceed receipts from producers. By this integration of operations, producer prices at the Pullman plant have been maintained at a level competitive with order prices at Spokane but with a lesser Class I cost to the handler, and the interests of producers supplying pool plants have been adversely affected. Since these operations are integrated to this extent and the Pullman plant will be the only plant to be brought under regulation thereby, the appropriate means for protecting the interests of pool producers is to include in the marketing area the principal sales area of the Pullman plant. This area is the counties of Latah, Idaho, and Whitman, Washington.

Exemption is provided for state institutions or establishments that confine distribution of milk they process or package to their premises or those of other state institutions. The order need not regulate the activities of states in supplying the needs of their own institutions. The University of Idaho and Washington State University each presently confines distribution to milk of its own production in student dining halls on the campus. It is provided that milk that pool plants may receive from or dispose of to such institutions be treated as are receipts from, or disposition to, a producer-handler. The provisions with respect to producer-handlers in these and other respects are restated for clarification.

A handler operating the distributing plant at Pullman proposed that if this plant were to be regulated through the inclusion of Latah and Whitman Counties, then Nez Perce and Asotin Counties should also be included. Sixteen percent of all sales from this plant are made in these counties in competition with a handler at Lewiston, Idaho, in Nez Perce County. Some sales are also made by another regulated handler, who offered no testimony in favor of the proposal. The proponent was unable to offer data on the proportion of total sales in the area which are made by him or the regulated handler. There was no indication of unstable marketing conditions nor that the Inland Empire regulation would be significantly affected adversely by excluding the Lewiston handler from full regulation. The producers who supply the plant at Lewiston were opposed to regulation. It is concluded that on the basis of this record Nez Perce County, Idaho, and Asotin County, Washington, should not be included in the marketing area.

Some milk is sold in the enlarged marketing area by a Montana plant supplied by dairy farmers who are not under the routine inspection of health authorities having jurisdiction in the marketing area. While this plant would not now qualify for pool status, under which the farmers supplying it would become producers, the identity of the health authority issuing permits or ratings should not bar such farmers from producer status if the plant should qualify as a pool plant. Accordingly "producers" are defined in terms of Grade A permits or ratings issued by any duly constituted health authority.

2. *Pool plant requirements.* No change should be made in the total route disposition requirements that a distributing plant must meet to obtain pool status but a volume alternative pooling standard should be provided with respect to route disposition within the marketing area. However, if a handler operates more than one plant with the required disposition, he should be permitted to combine the receipts and utilization at such plants for purposes of compliance with the requirement for total route distribution. Also, plants operated by cooperative associations which have the required disposition on routes within the marketing area should be permitted to apply bulk deliveries to distributing pool plants of other handlers when computing the requirements for total route disposition.

The present order requires that to maintain pool status a distributing plant must dispose of 20 percent of receipts on routes within the marketing area and a total of 40 percent of receipts February through August and 50 percent September through January on all routes. A handler proposed that these requirements be reduced to 15 percent within the area and 30 percent overall, and that handlers operating more than one pool plant in the marketing area combine receipts and sales of all plants to determine qualification. The Inland Empire Dairy Association proposed that bulk deliveries from a cooperative plant to another pool distributing plant be considered route disposition.

No need for reduction in the qualification standards was demonstrated with respect to operations of plants presently regulated. Utilization in the market is well above the present minimum requirements. Expansion of the marketing area will result in a higher percentage of in-area route sales for plants now in the pool. The expansion of area does, however, afford a potential opportunity for large volume plants to have a significant percentage of the total sales in the marketing area without being pooled. In the recommended decision it was estimated that present fluid sales of any plant whose primary business is not in the enlarged area are substantially less than 5,000 pounds daily, or 150,000 pounds monthly. On this basis it was proposed that the pooling standard with respect to in-area route disposition be the lesser of 20 percent of receipts as presently provided, or 5,000 pounds per day. On the basis of exceptions received it appears this amount is not substantially in excess of present sales of at

least one plant whose primary business is outside the area. It is concluded that the alternative volume standard should be increased to 250,000 pounds monthly, an amount which represents approximately 2.5 percent of the present total market sales. Permitting a handler who operates more than one distributing plant with the required in-area distribution to combine receipts and sales of such plants for purposes of determining compliance with the total route disposition standards will meet the needs of the handler proposing changes in the standards. This handler operates a plant at Pullman, Washington, which will be included in the enlarged marketing area. Provisions for aggregate performance will permit this handler to operate his Spokane and Pullman plants to better use the facilities available at each of these plants. Rather than mere location in the marketing area, compliance with the in-area requirement should determine the plants of a handler for which aggregate performance may be used.

The Inland Empire Dairy Association has historically marketed its packaged fluid products through the Safeway stores in the area. However, Safeway plans to build a processing plant and offer milk under its own brand name in its stores. Some raw milk will continue to be supplied by Inland. This will result in a reduction in Inland route sales but the milk will be in the pool as it has been. This will change the functions of the Inland Empire plant with respect to such milk from that of distribution to that of balancing the supply required by a distribution plant, a function which should be recognized in the pooling requirement. Since the plant is primarily a distributing plant it should be required to meet the in-area route disposition requirement. Recognition of the supply balancing functions can more appropriately be provided by adding bulk transfers to distributing pool plants of other handlers to route disposition for purposes of computing the percentage of total route disposition.

The order presently specifies in the pool plant definition the dispositions which constitute distributions on "routes". Since there is need to use the term "route" elsewhere in the order a separate definition of "route" is provided. In this definition it is specified that delivery through a distribution point constitutes route disposition of the plant at which the milk is processed. Enlargement of the marketing area will include such a distribution point through which a Spokane handler presently distributes milk in the area to be added.

3. *Limitation of diversions.* Diversions by cooperative associations and proprietary handlers to nonpool plants should be permitted from December through June. Under the present order diversions are permitted in the months of February through August.

The cooperative associations proposed that the diversion period be changed to the months of December through June. A proprietary handler proposed that diversions of producer milk to nonpool plants be permitted during all months of the year with a limit of 20 days per month for each individual producer from July through November.

The trend in the market has been for supplies to be more in line with sales during July and August and a tendency toward an excess supply in December and January. Thus, substitution of December and January for July and August as the months when diversion to nonpool plants is permitted will better serve the needs of the market.

The testimony favoring this proposal was inconclusive as to the need for year-round diversions. It was not demonstrated that any hardship has occurred or is likely to because diversions are not permitted during all months. The needs of the proponent handler will be met by the changes made in the pool plant definition previously discussed.

4. *Cooperatives as handlers of bulk tank milk.* Cooperative associations should be given the option of becoming the responsible handler for bulk tank milk delivered to pool plants in trucks owned or under the control of the cooperative, if the market administrator and the operator of the pool plant are given prior notice by the cooperative of its intention to be the handler for such milk.

More than 95 percent of the producer milk in the market is handled in bulk tanks. This proposal was made by two cooperative associations in the market whose members comprise 75 percent of the total number of producers. Under the present order cooperatives are handlers for diverted milk and as operators of pool plants.

Flexibility should be provided in order that cooperatives may better meet the fluctuating day-to-day needs of handlers in a more efficient manner. When loads are split among handlers it is impossible to identify the milk of any single producer. Thus, the plants must rely on haulers to maintain producer records for such milk. Accounting will be simplified if the cooperative is permitted to become the responsible handler in these cases.

In settling with the cooperative associations for any milk for which an association is the handler, payment should be made at the uniform producer price and settlement made for pool equilization with the market administrator. To accomplish this, milk received from the cooperative association should be accounted for by the handler on the same basis as are receipts direct from producers. This system has the merit that any adjustments in classification found on audit of a handler's records will be made directly with such handler by the market administrator.

The order presently provides that a cooperative association may, within certain limits, divert milk from one pool plant to another without such milk being included in the computation determining pool status of either plant. Administration of this provision would not be feasible if the plant to which such milk is diverted is also supplied by the same cooperative association as a bulk tank handler. Accordingly, such interplant diversion is limited to cases in which the plant actually receiving the diverted milk is not also receiving milk from the same cooperative association as a bulk tank handler.

5. *Classification and accounting for milk.* The order presently classifies milk into Classes I, II(a), and II, but does not distinguish clearly between Class II(a) and Class II in all respects. For clarification these classes are redesignated Classes I, II, and III so that assignment of utilization between the classes may be made more explicit. In order to simplify language of the order a definition of "fluid milk products" is provided to include those products which are now classified as Class I milk when disposed of in fluid form.

(a) *Solids used for fortification and in dietary products.* The classification provisions should be revised to include dietary foods in Class I. Fluid milk products fortified with added nonfat milk solids should be classified as Class I milk in an amount equal only to the weight of an equal volume of a like unmodified product of the same butterfat content. The skim milk equivalent of the added solids should be classified as Class III milk.

Two proprietary handlers proposed that only the actual pounds of skim milk powder used in fortification of fluid products be classified as Class I with no provisions for accounting for the skim equivalent. Another handler, who will become partially regulated due to the enlargement of the marketing area, proposed a modification of the proposals to permit retention of the skim equivalent accounting method. The Spokane Milk Producers Association opposed any change in present system of accounting for fortified products.

Dietary foods should be specifically designated as fluid milk products and classified as Class I. Such items have been classified as Class I because they were considered to be flavored milk drinks.

The water associated with milk solids added to fortified products cannot be shown to be displacing producer milk in this market. However, the order should continue to account for reconstituted milk products on the basis of the original volume, including all the water originally associated with the solids. These products compete for the same sales as whole milk or skim milk and would displace producer milk available for the same purpose.

There is an incentive for handlers to fortify fluid milk products, which are primarily derived from producer milk, to meet the demand of consumers for low fat products which are high in nutritional value. The sale of such products helps to maintain or even increase Class I sales.

To maintain proper accounting the nonfat solids added should be converted to their skim milk equivalent and an amount equal to the difference between the skim milk equivalent of fortified products and the actual weight of the product disposed of in fluid form should be classified as Class III. The skim milk equivalent would be considered as a receipt of other source milk.

(b) *Shrinkage.* The two percent maximum allowance for Class III classification of shrinkage should be divided between the receiving and other operations when performed at different plants. The proration of total shrinkage should be between pool milk and other source fluid milk products.

The cooperative associations proposed that pool plants and cooperatives transferring milk in bulk tank lots to another pool plant be allowed 0.5 percent shrinkage leaving 1.5 percent allowable shrinkage for the processing plant. They also proposed to prorate total shrinkage between pool milk and other source milk.

The division of shrinkage on bulk tank milk to allow 0.5 percent to the plant (or cooperative handler) receiving milk from producers, and the remaining 1.5 percent to the plant at which the milk is processed, is in line with experience in other markets. Of course, the amount of shrinkage experienced by different handlers for various operations will vary, but this division would provide adequate allowance for normal operations.

When cooperatives deliver bulk tank milk in their capacity as handlers to pool plants, the operator of the pool plant may elect to purchase such milk on the basis of weights taken at the farm. In this case the pool plant operator should be allowed the full two percent shrinkage, because the cooperative would have no need for shrinkage allowance. However, a handler should be permitted to exercise this option only if he notifies the market administrator in advance that the purchase of such milk from the cooperative is on the basis of farm weights.

This change in computing the shrinkage allowance makes it necessary to prorate shrinkage between the volume of pool milk to which the maximum shrinkage allowance of two percent would apply and receipts of other source fluid milk products, rather than between producer milk and other source milk. Otherwise a disproportionate share of the total shrinkage could be assigned to pool milk.

(c) *Classification of milk delivered to nonpool plants outside the area.* Evidence was offered at the hearing, without objection, in support of a proposal that milk moved to nonpool plants outside the marketing area and used for manufacturing be classified separately and priced at 25 cents per hundredweight less than the Class II (new Class III) price of the order. It was claimed that lack of surplus handling facilities in the area and distance to nonpool plants required a transportation allowance. It was also claimed that modification of the order in this respect was required if the marketing area was to be enlarged. No evidence was offered that at current levels of supply disposal of reserve milk supplies has been a problem which would require lowering the Class III price. Neither does it appear that enlargement of the marketing area will in any way affect the problem of disposition to nonpool plants. The proposal is accordingly denied.

6. *Supply-demand adjustment of Class I price.* The present supply-demand adjustment limit of plus or minus 50 cents should not be changed. The cooperative associations proposed a reduction in the limit to plus or minus 25 cents.

The supply-demand adjuster was last amended in October 1959. Since that time the maximum adjustment has been 9 cents. This indicates that receipts and utilization have been in close alignment. The purpose of the supply-demand adjuster is to provide automatic price changes to encourage or discourage additional supplies as the relationship between receipts and utilization in the market changes. There may be need for adjustment in excess of the proposed 25-cent limit if there is a substantial change in the ratio of supplies to sales. Therefore the maximum rate should not be changed at this time.

7. *Location adjustment to handlers and producers.* Location adjustments should be applicable only at pool plants located more than 90 miles from the City Hall in Spokane.

The order presently provides location adjustments to handlers and producers on milk received at pool plants located more than 50 miles from the City Hall in Spokane. The cooperative associations proposed that location adjustments apply only at pool plants located outside the marketing area and more than 90 miles from Spokane without changing the rates applicable at such plants. Opposition was offered by a handler who operates a distributing plant at Pullman, Washington, which will become a pool plant under the expanded area of the order.

At the present time only one regulated plant, at Sandpoint, Idaho, is located more than 50 miles from Spokane. The handler operating this plant has for some time paid his producers at the f.o.b. Spokane price without deducting the location adjustment permitted under the order. Enlargement of the marketing area is expected to bring under full regulation three additional plants, all located in the territory being added; all of these are located more than 50 but less than 90 miles from Spokane.

One plant to become regulated, at Kellogg, Idaho, has been purchasing its milk from Spokane Milk Producers Association at full class prices of the order (with no location adjustment) and the producers supplying this plant have received prices approximately the same as producers delivering milk to Spokane plants. Another, at Pullman, Washington, has paid producer prices approximately equal to producer prices at Spokane under the order, but has had to rely on pool sources for reserve supplies of milk. The third plant, at Wallace, Idaho, is located within 11 miles of the plant at Kellogg and buys milk in competition with it. Within this area Spokane handlers and the plants to be newly regulated compete actively with each other. In view of present relationships, class prices and producer prices should be equal within this area. Since 90 miles includes all locations in the marketing area at which there are likely to be any plants, location adjustments are provided at all plants located more than 90 miles from Spokane. There are no plants outside the enlarged marketing area affected by this change. The rate presently applicable at Missoula, Montana, at which is located a plant that may become partially regulated, is not changed.

8. *Obligations of handlers operating nonpool distributing plants.* The operator of a plant distributing Class I milk in the marketing area that does not qualify as a pool plant should have the option of paying into the pool any amount by which the classified value of receipts from dairy farmers exceeds the gross payment to such farmers or the present rate of compensatory payment computed on the volume of his distribution in the marketing area less the amount of Class I purchases from pool plants. The expense of administration should be the same as that for a fully regulated handler if the first option is elected and computed only on the net volume of sales in the marketing area under the second option. If the first option is elected, credit should be given for payments to the producer-settlement and administrative funds of any other Federal order under which the plant may also be subject to partial regulation.

It was proposed by the cooperative associations that partially regulated handlers have the choice of making payments to the dairy farmers supplying them in amounts determined in the same manner as for a fully regulated handler or making compensatory payments as provided for in the present order. A handler whose plant at Missoula, Montana, will become partially regulated due to the expanded marketing area, proposed a modification to permit the volume of sales in the marketing area under the second option to be reduced by the amount of Class I purchases from pool plants. This handler also proposed that credit be given for costs of administration assessed under state orders, and favored a change in the rate of compensatory payment.

The order presently provides that operators of nonpool distributing plants shall pay compensatory payments on their Class I sales in the marketing area at a rate equal to the difference between the Class I and Class II (new Class III) prices. Testimony was offered that during months of short production this rate should be the difference between the Class I and uniform price of the order, on the theory that it might be assumed that milk could not be procured at that season for less than the uniform prices of the order. During much of this season the uniform prices of the Inland Empire order will in the future be increased through the fall incentive payment plan adopted effective September 1, 1961, and thus may even exceed the Class I price. The evidence offered in support of the changed rate is not such as to justify a change in the rate of payment.

The provisions adopted will assure the fully regulated handlers in the market that any of their competitors who are primarily associated with another market have no procurement advantage. If

the partially regulated handler chooses the first option, his total minimum obligations for milk will be determined exactly as if he were fully regulated. The plants to which the provisions may presently apply are so located that their procurement areas do not overlap those of fully regulated handlers. Local plants that might fail to qualify as pool plants would be those with Class I utilization far below the market average. The full use value of their milk that such handlers may pay to the dairy farmers supplying them under this option will not be competitive, in this market and under these circumstances, with the uniform order price paid Inland Empire producers by fully regulated handlers.

The obligation of a nonpool plant under the second option will be the same as that of a pool plant with respect to other source milk used for Class I purposes. Permitting the partially regulated handler to make a compensatory payment on the net of Class I sales in the marketing area (actual sales less purchases of Class I milk from pool plants) will not result in any loss to the pool because the regulated handler from whom the milk is obtained will account to the producer-settlement fund for such sales at the Class I price.

The assessment of administrative expense should depend upon the option chosen by the nonpool distributor. The first option requires the same verification of receipts and utilization by the market administrator as in the case of a pool plant, therefore, the expense of administration should be the same. Under the second option comprehensive audits are not required so the expense of administration should only be computed on the sales in the marketing area. There should be no credit given for administrative expense paid under a state order. Responsibility for administration of the order may not be delegated to a state agency.

9. *Advance payments to producers.* The order should provide for an advance payment for producer milk received during the first half of each month. The rate of payment should be at the Class III price for the previous month.

The Spokane Milk Producers Association proposed that advance payments be made to producers. Proprietary handlers contended this was not necessary because advance payments are available to producers on request.

The order presently provides that producers be paid by the 17th of each month for milk delivered during the previous month. This permits handlers the use of producer money for milk for a period of up to a month and a half at some risk to the producers. Many producers are presently receiving advances and the order should provide for such payments to be made to all producers. Milk production under present conditions requires substantial operating capital. The producers must make substantial cash investments and have ready cash to meet credit obligations. Provisions for regular partial payment for milk delivered early in the month will reduce the need for producers to increase operating capital.

Since cooperative associations will be permitted to become handlers for their member's milk it will be necessary, in order that associations may make advance payments to their members, for handlers to make advance payments at the same rate on the aggregate amount of milk received from the cooperative. For member milk for which the cooperative is not the handler, but for which it collects payments, a statement showing the receipts from each member producer should also be required on the 20th day of the month for milk delivered the first half of the month and the 7th for milk received the last half of the previous month. In either case payments to cooperatives should be made at least two days prior to the date of payment to individual producers. Thus, cooperatives will be able to make advance payments to their members and all producers in the market will receive payment at the same time.

Use of the Class III price for the previous month in computing advance payments will result in a minimum of overpayments. Administrative detail will be kept at a minimum in that no adjustments for butterfat, hauling or other deductions are required.

10. *Conforming changes.* The amendments required to carry out the conclusions of this decision require change in almost every section of the order. The entire order has accordingly been rewritten to incorporate these conforming changes and for clarity and specificity of provisions. Certain plants which have discontinued operations are deleted from the list of those whose paying prices are used as an alternative basic formula price.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Inland Empire Marketing Area", and "Order Amending the Order Regulating the Handling of Milk in the Inland Empire Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Referendum order; determination of representative period; and designation of referendum agent. It is hereby directed that a referendum be conducted to determine whether the issuance of the attached order amending the order regulating the handling of milk in the Inland Empire marketing area, is approved or favored by the producers, as defined under the terms of the order, as hereby proposed to be amended, and who, during the representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

The month of November 1961 is hereby determined to be the representative period for the conduct of such referendum.

James A. Burger is hereby designated agent of the Secretary to conduct referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders (15 F.R. 5177), such referendum to be completed on or before the 30th day from the date this decision is issued.

Signed at Washington, D.C., on February 2, 1962.

JAMES T. RALPH,
Assistant Secretary.

1133.93 Liquidation.

MISCELLANEOUS PROVISIONS

1133.100 Agents.
1133.101 Separability of provisions.

AUTHORITY: §§ 1133.0 to 1133.101 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1133.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of milk in the Inland Empire marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Inland Empire marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 5 cents per hundredweight or such amount not to exceed 5 cents per hundredweight as the Secretary may prescribe, with respect to: (i) Receipts at a pool plant of (a) producer milk, including such handler's own farm production and that classified pursuant to § 1133.44(b), and (b) other source milk, except other order milk, allocated to Class I; (ii) producer milk for which a cooperative association is the handler pursuant to § 1133.15 (c) and (d) in excess of that delivered to the pool plants of other handlers; and (iii) the quantities of milk at handler's nonpool plants as specified in § 1133.62.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Inland Empire marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

DEFINITIONS

§ 1133.1 Act.

"Act" means Public Act No. 10, 73d Congress as amended, and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601 et seq.).

§ 1133.2 Secretary.

"Secretary" means the Secretary of Agriculture, or other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 1133.3 Department.

"Department" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in this part.

§ 1133.4 Person.

"Person" means any individual, partnership, corporation, association or any other business unit.

§ 1133.5 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers, duly organized as such under the laws of any State, which includes members who are producers as defined in § 1133.11 and which the Secretary determines, after application by the association:

(a) To be qualified under the standards set forth in the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have its entire organization and all its activities under the control of its members; and

(c) To be currently engaged in making collective sales of or marketing milk or its products for its members.

§ 1133.6 Inland Empire marketing area.

"Inland Empire marketing area" hereinafter called the "marketing area" means all of Benewah, Bonner, Boundary, Kootenai, Latah and Shoshone

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Counties, Idaho; Spokane and Whitman Counties, Washington; that portion of Pend Oreille County, Washington, lying south of Township 35; and that portion of Stevens County, Washington, lying south of Township 37. This definition shall include all municipal corporations, Federal military reservations, facilities, and installations and State institutions lying wholly or partly within the above described area.

§ 1133.7 Plant.

"Plant" means the land, buildings, surroundings, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment which is maintained and operated primarily for the receiving, handling, or processing of milk or milk products.

§ 1133.8 Pool plant.

"Pool plant" means any plant described in paragraph (a) or (b) of this section, other than the plant of a producer-handler, or a plant with respect to which the handler is exempt pursuant to § 1133.61, which is approved by an appropriate health authority for the receiving of milk qualified for distribution as Grade A milk in the marketing area.

(a) Any plant, hereinafter referred to as a "distributing pool plant", in which fluid milk products are processed or packaged and from which during the month:

(1) Disposition of fluid milk products on routes within the marketing area equals or exceeds the lesser of 250,000 pounds or 20 percent of the total receipts of Grade A milk from dairy farmers, cooperative associations pursuant to § 1133.15(d), and from pool supply plants and other plants forwarding the applicable percentage of receipts specified in paragraph (b) of this section to such plant and other pool distributing plants; and

(2) Total disposition of fluid milk products on routes is 40 percent or more of such receipts in any of the months of February through August, inclusive, and 50 percent or more of such receipts in any of the months of September through January, inclusive.

(b) Any plant, hereinafter referred to as a "supply pool plant", from which there is forwarded to a pool distributing plant(s) 50 percent or more each of the skim milk and butterfat in its dairy farm supply of Grade A milk during the current month during the period of October through December, or 20 percent or more during the current month during the period January through September. Any such plant which has forwarded more than 50 percent of such receipts for the entire period October through December shall be a pool plant for the months of January through September immediately following unless the operator of such plant files with the market administrator, prior to the first day of any month(s), a written request to withdraw such plant from pool plant status for such month(s); and

(c) For the purposes of computing the percentages specified in this section the following shall apply:

(1) Receipt of milk from dairy farmers shall not include, at either plant involved, milk diverted pursuant to § 1133.15(c)(2);

(2) If a plant operated by a cooperative association meets the requirements of paragraph (a)(1) of this section, bulk milk delivered to distributing pool plants of other handlers shall be added to disposition on routes for purposes of computing the percentage specified in paragraph (a)(2) of this section; and

(3) If a handler operates more than one distributing plant meeting the requirements of paragraph (a)(1) of this section, the aggregate route disposition and receipts of all such plants shall be used to compute the percentage specified in paragraph (a)(2) of this section for each of such plants.

§ 1133.9 Nonpool plant.

"Nonpool plant" means any plant other than a pool plant.

§ 1133.10 Dairy farmer.

"Dairy farmer" means any person who operates a farm engaged in the production of milk.

§ 1133.11 Producer.

"Producer" means any dairy farmer, other than a producer-handler, who produces milk under a dairy farm permit or rating issued by a duly constituted health authority for distribution as Grade A milk whose milk is received at a pool plant or diverted as producer milk pursuant to § 1133.12.

§ 1133.12 Producer milk.

"Producer milk" of each handler means all skim milk and butterfat produced by producers:

(a) With respect to receipts at a pool plant:

(1) Received directly from such producers;

(2) Diverted from such pool plant to a nonpool plant for the account of the operator of the pool plant, subject to the limitations and conditions of paragraph (c) of this section; and

(3) That to be classified pursuant to § 1133.44(b);

(b) With respect to additional receipts of a cooperative association:

(1) For which such cooperative association is the handler pursuant to § 1133.15(c)(1), subject to the limitations and conditions of paragraph (c) of this section; and

(2) For which the cooperative association is the handler pursuant to § 1133.15(c)(2) and (d); and

(c) With respect to diversions to nonpool plants pursuant to paragraphs (a)(2) and (b)(1) of this section:

(1) Such diversions may be without limit during the months of December through June if milk from the same producer was received at a pool plant during some portion of the period July through November immediately preceding; and

(2) For the purpose of location adjustments pursuant to §§ 1133.53 and 1133.81, milk so diverted shall be priced at the location of the plant from which diverted.

§ 1133.13 Other source milk.

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of fluid milk products from any source except (1) producer milk; or (2) receipts from other pool plants; and

(b) Products, other than fluid milk products, from any source (including those processed at the plant) which are reprocessed or converted to another product in the plant during the month.

§ 1133.14 Other order milk.

"Other order milk" means all skim milk and butterfat received at a pool plant in the form of a fluid milk product which is subject to the pricing and payment provisions of any other order issued pursuant to the Act.

§ 1133.15 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any person who operates a nonpool plant from which fluid milk products labeled Grade A are disposed of on routes in the marketing area;

(c) A cooperative association with respect to the milk of its member producers caused to be diverted for its account:

(1) From a pool plant to a nonpool plant during any of the months of December through June; and

(2) From a pool plant to another pool plant to which such cooperative association delivers no milk pursuant to paragraph (d) of this section during the month, and not exceeding a period of 90 consecutive days for any producer; and

(d) A cooperative association with respect to the milk of its member producers which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by, or under contract to, such cooperative association, if the cooperative association notifies the market administrator and the operator of the pool plant to whom the milk is delivered in writing prior to the first day on which the milk is delivered, that it elects to be the handler for all such milk. Milk so delivered shall be considered to have been received by the cooperative association at the location of the plant to which delivered.

§ 1133.16 Producer-handler.

"Producer-handler" means any person who operates a dairy farm and a processing plant from which fluid milk products are distributed on routes in the marketing area but who receives no fluid milk products during the month from other dairy farmers or from any other source except by transfer from a pool plant. Such person must provide proof satisfactory to the market administrator that the maintenance, care and management of the dairy animals and other resources necessary to produce his own farm milk production and the operation of the processing and distribution business is the personal enterprise and risk of such person.

§ 1133.17 Fluid milk product.

"Fluid milk product" means milk, skim milk, skim milk drinks, buttermilk, flavored milk, flavored milk drinks, concentrated milk, skim milk or milk drinks (not including evaporated milk, condensed milk or condensed skim milk), fortified milk or skim milk (including "diet" foods), cream (sweet or sour), any mixture in fluid form of cream and milk or skim milk (except ice cream mix, frozen dessert mix, cocoa mixes, aerated products, eggnog and yogurt), which are neither sterilized nor in hermetically sealed metal containers.

§ 1133.18 Route.

"Route" means any delivery, including delivery by a vendor or disposition from a plant, plant store or distribution point, of fluid milk products to retail or wholesale outlets other than delivery to a milk plant or distribution point, or pursuant to § 1133.41(c)(3).

MARKET ADMINISTRATOR

§ 1133.20 Designation.

The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be designated by, and shall be subject to removal at the discretion of, the Secretary.

§ 1133.21 Powers.

The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 1133.22 Duties.

The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 1133.86 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 1133.87) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not:

(1) Made reports pursuant to §§ 1133.30 to 1133.32, inclusive; or

(2) Made one or more of the payments pursuant to §§ 1133.80 to 1133.88, inclusive;

(i) On or before the 16th day after the end of each month, report to each cooperative association (or its duly designated agent) which so requests the class utilization of milk delivered by such cooperative association pursuant to § 1133.15(c)(2) and (d) or from its member producers to each handler. For the purpose of this report, the milk caused to be so delivered by such cooperative association shall be prorated to each class in the proportion that the total receipts of producer milk by such handler were used in each class;

(j) On or before the 12th day after the end of each month, notify:

(1) Each handler whose total value of milk is computed pursuant to § 1133.70 of:

(i) The amounts and values of his producer milk in each class and the totals of such amounts and values;

(ii) The amount of any charge made pursuant to § 1133.70(e);

(iii) The uniform price;

(iv) The totals of the amounts computed in the manner provided by § 1133.80;

(v) The amount due such handler from the producer-settlement fund or the amount to be paid by such handler to the producer-settlement fund, as the case may be; and

(vi) The totals of the amounts required to be paid by such handler pursuant to §§ 1133.87 and 1133.88.

(2) Each handler whose total value of milk is computed pursuant to § 1133.62 of the pounds of other source milk on which payment is required to be made and the amount due the producer-settlement fund from such handler.

(k) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate the prices determined for each month as follows:

(1) On or before the 6th day of each month the minimum price for Class I milk pursuant to § 1133.51(a) and the Class I butterfat differential pursuant to § 1133.52(a), both for the current month; and the respective minimum prices for Class II milk and Class III milk pursuant to § 1133.51 (b) and (c) and the Class II and III butterfat differential pursuant to § 1133.52(b), both for the preceding month; and

(2) On or before the 12th day of each month, the uniform price computed pursuant to § 1133.71 and the butterfat differential computed pursuant to § 1133.82, both applicable to producer milk received during the preceding month.

(l) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS, AND FACILITIES

§ 1133.30 Reports of receipts and utilization.

On or before the 7th day of each month, each handler except a producer-handler or a handler making payments pursuant to § 1133.62(b), shall report to the market administrator in the detail and on the forms prescribed by the market administrator the following information for the preceding month:

(a) Each handler operating pool plants shall report the quantities of skim milk and butterfat in:

(1) Receipts of each such plant in:

(i) Producer milk, showing separately that to be classified pursuant to § 1133.44(b);

(ii) Fluid milk products received from other pool plants; and

(iii) Other source milk, including other order milk;

(2) Opening inventories of fluid milk products;

(3) The utilization in each class of the quantities required to be reported, including separate statements of quantities (i) in inventories of fluid milk products on hand at the end of the month, and (ii) in route disposition outside the marketing area; and

(4) Such other information with respect to receipts and utilization as the market administrator may request.

(b) Each handler specified in § 1133.15(b) shall report as required in paragraph (a) of this section except that receipts of Grade A milk from dairy farmers shall be reported in lieu of those in producer milk; and

(c) Each cooperative association shall report with respect to milk for which it is a handler pursuant to § 1133.15(c) and (d) as follows:

(1) Receipts of skim milk and butterfat in producer milk;

(2) Utilization of milk for which it is the handler pursuant to § 1133.15(c)(1);

(3) The quantities delivered to each pool plant of another handler pursuant to § 1133.15 (c)(2) and (d); and

(4) Such other information as the market administrator may require.

§ 1133.31 Payroll reports.

On or before the 20th day of each month, each handler except one exempt pursuant to § 1133.61 or one making payments pursuant to § 1133.62(b), shall submit to the market administrator his

producer payroll (or in the case of a handler making payments pursuant to § 1133.62(a), his payroll for dairy farmers delivering Grade A milk) for deliveries made the preceding month which shall show for each producer:

(a) The name and address of the producer or dairy farmer;

(b) The total pounds of milk, the average butterfat test thereof, and the pounds of butterfat received from such producer and the number of days on which milk was received from such producer; and

(c) The price, amount and date of payment with the nature and amount of any deductions.

§ 1133.32 Other reports.

(a) Each producer-handler, each handler required to report pursuant to § 1133.61 and each handler making payments pursuant to § 1133.62(b) shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe; and

(b) Each handler dumping skim milk shall give the market administrator not less than 6 hours' notice of intention to make such disposition and of the quantities of skim milk involved. In addition, each handler dumping skim milk shall mail or deliver to the market administrator within 48 hours following each dumping not witnessed by the market administrator or his agent, a report in writing, as prescribed by the market administrator, showing the date on which the dumping was made and the quantity dumped, such report to be signed by both the person who dumped the skim milk and the person authorized to sign reports for the handler made pursuant to § 1133.30 (if the latter person is not available to sign the report within the 48-hour period, the signature of the plant manager or plant superintendent shall be substituted on the report).

§ 1133.33 Records and facilities.

Each handler shall maintain and make available to the market administrator, or his representative, during the usual hours of business, such accounts and records of his operations, including those of any other person upon whose utilization the classification of milk depends, and such facilities as, in the opinion of the market administrator, are necessary to verify or to establish the correct data with respect to:

(a) The information required to be reported pursuant to §§ 1133.30, 1133.31 and 1133.32;

(b) The weights and tests for butterfat and other contents of all milk and milk products handled; and

(c) Payments required to be made pursuant to §§ 1133.80 through 1133.88.

§ 1133.34 Retention of records.

All books and records required under this order to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8(c)(15)(A) of the Act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

§ 1133.35 Handler reports to producers and cooperative associations.

(a) In making payments to producers pursuant to § 1133.80(b), each handler on or before the 17th day after the end of each month, for milk received during such month, shall furnish each producer with a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate at which payment to such producer is required pursuant to § 1133.80;

(4) The rate which is used in making payment if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer.

(b) In making payments to a cooperative association pursuant to § 1133.80(c) each handler upon request shall furnish to the cooperative association on or before the 20th day of the month with respect to milk received during the first half of the month and on or before the 7th day of the month with respect to milk received during the last half of the previous month for each producer for whom such payment is made, the information specified in subparagraphs (1), (2), and (5) of paragraph (a) of this section, and the daily weights of milk purchased from each of the association's member producers.

CLASSIFICATION

§ 1133.40 Skim milk and butterfat to be classified.

All skim milk and butterfat received within the month for which utilization is required to be reported pursuant to § 1133.30 shall be classified each month by the market administrator pursuant to the provisions of §§ 1133.41 through 1133.45. If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk used or disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all the water originally associated with such solids.

§ 1133.41 Classes of utilization.

Subject to the conditions set forth in §§ 1133.42, 1133.43 and 1133.44 the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product (including those reconstituted) except:

(i) Any products fortified with added nonfat milk solids shall be Class I in an amount equal only to the weight of an equal volume of milk, skim milk, or cream of the same butterfat content; and

(ii) As classified pursuant to paragraphs (c) (2) and (3) of this section; or

(2) Not otherwise specifically accounted for as Class II or Class III utilization;

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat used to produce ice cream, ice cream mix, frozen desserts, cocoa mixes, and cottage, pot and bakers' cheeses; and

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce any product other than a fluid milk product or a Class II product;

(2) In skim milk:

(i) Disposed of for livestock feed;

(ii) Dumped pursuant to the conditions specified in § 1133.32(b); and

(iii) In fluid milk products which are excepted from Class I milk pursuant to paragraph (a)(1)(i) of this section;

(3) Disposed of in fluid milk products in bulk form to any commercial food processing establishment for use in food products prepared for consumption off the premises;

(4) Contained in inventories of fluid milk products on hand at the end of the month;

(5) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1133.42(b)(1) but not to exceed the following:

(i) Two percent of receipts directly from producers (including in the case of a cooperative association, such receipts for which it is the handler pursuant to § 1133.15 (c) or (d)), plus

(ii) 1.5 percent of receipts from a cooperative association in its capacity as a handler pursuant to § 1133.15 (c) or (d), except that if the handler operating the pool plant files with the market administrator notice that he is purchasing such milk on the basis of farm weights determined by farm bulk tank calibrations, the applicable percentage shall be two percent; plus

(iii) 1.5 percent of receipts in bulk tank lots from other pool plants; less

(iv) 1.5 percent of disposition in bulk tank lots to other milk plants (where the exception specified in (ii) hereof applies, the applicable percentage shall be two percent); and

(6) In shrinkage allocated to receipts of other source milk.

§ 1133.42 Shrinkage.

The market administrator shall allocate shrinkage over a handler's receipts at each pool plant as follows:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, for each handler; and

(b) If a handler has receipts of other source milk, shrinkage shall be prorated between: (1) Skim milk and butterfat in pool milk in amounts respectively equal to 90 times the maximum amount that may be computed pursuant to § 1133.41 (a)(5); and (2) skim milk and butterfat in other source milk.

§ 1133.43 Responsibility of handlers and reclassification of milk.

(a) All skim milk and butterfat shall be Class I unless the handler who first receives such skim milk or butterfat can establish to the satisfaction of the market administrator that such skim milk or butterfat should be classified otherwise;

(b) The burden shall rest upon each handler to establish the sources of milk and milk products required to be reported by him pursuant to § 1133.30; and

(c) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect.

§ 1133.44 Transfers.

Skim milk and butterfat disposed of by a handler, either by transfer or diversion, shall be classified as follows:

(a) As Class I milk if transferred in bulk in the form of fluid milk products from a pool plant to another pool plant unless:

(1) Utilization in another class is claimed by the operators of both pool plants in their reports pursuant to § 1133.30;

(2) The receiving handler has utilization in such class of an equivalent amount of skim milk and butterfat, respectively, remaining after the allocation pursuant to § 1133.46(a) (1) through (6) and the corresponding steps of § 1133.46(b); and

(3) The classification of the skim milk or butterfat so transferred shall be classified so as to allocate to producer milk the greatest possible total Class I utilization at both plants;

(b) Milk for which a cooperative association is the handler pursuant to § 1133.15 (c)(2) or (d) shall be deducted from the producer milk to be classified as that of the cooperative association and shall be included in producer milk classified at the plant of the transferee handler;

(c) As Class I milk if transferred to a producer-handler in the form of a fluid milk product;

(d) As Class I milk if transferred or diverted except as provided in paragraph (c) of this section as a fluid milk product in bulk form to a nonpool plant, unless the following conditions are met:

(1) The operator of the pool plant claims utilization in another class in his report for the month submitted pursuant to § 1133.30;

(2) The operator of the nonpool plant maintains books and records showing the utilization of the skim milk and butterfat at such plant, which are made available if requested by the market administrator for the purpose of verification;

(3) If the conditions set forth in subparagraphs (1) and (2) of this paragraph are met the market administrator shall determine the classification of all skim milk and butterfat at such nonpool plant and the transfer from the pool plant shall be allocated in sequence to the highest class uses remaining after allocating, in series beginning with Class I, such nonpool plant's regular dairy farm receipts of Grade A milk and receipts of milk classified as Class I milk under another Federal order;

(e) Transfers to nonpool plants fully regulated under the terms of another Federal order issued pursuant to the Act, shall be classified as Class III milk if in bulk form and allocated in the transferee-plant, pursuant to the terms of the order to which such plant is subject, as other than Class I milk, otherwise such transfers shall be classified as Class I milk.

§ 1133.45 Computation of skim milk and butterfat in each class.

For each month the market administrator shall correct for mathematical and other obvious errors the reports of receipts and utilization submitted by each handler and shall compute the total pounds of skim milk and butterfat, respectively, in each class for such handler at all of his pool plants.

§ 1133.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1133.45, the market administrator shall determine the classification of producer milk for each handler as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III milk the shrinkage of skim milk classified as Class III milk pursuant to § 1133.41(c)(5);

(2) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in other source milk received in a form other than a fluid milk product;

(3) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in other source milk in the form of fluid milk products exclusive of other order milk;

(4) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in other order milk;

(5) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month;

(6) Add to the pounds of skim milk remaining in Class III milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph;

(7) Subtract the pounds of skim milk in fluid milk products received from pool plants of other handlers from the pounds of skim milk remaining in the class to which assigned pursuant to § 1133.44; and

(8) If the remaining pounds of skim milk in all classes exceeds the pounds of skim milk contained in milk received from producers, subtract such excess from the remaining pounds of skim milk in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Allocate butterfat in accordance with the same procedure outlined for skim milk in paragraph (a) of this section; and

(c) Combine the amounts of skim milk and butterfat determined pursuant to paragraphs (a) and (b) of this section into one total for each class and determine the weighted average butterfat content of producer milk in each class.

MINIMUM PRICES

§ 1133.50 Basic formula price to be used in determining Class I prices.

The basic formula price to be used on computing the price per hundredweight of Class I milk for the current month shall be the higher of the prices computed pursuant to paragraphs (a) and (b) of this section for the preceding month:

(a) Divide by 3.5 and then multiply by 4.0 the average of the basic, or field, prices per hundredweight reported to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from dairy farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Present Operator and Location

Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Richland Center, Wis.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by the market administrator from the following formula:

(1) Multiply by 4.8 the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the simple average of the weighted averages of carlot prices per pound for nonfat dry milk, spray and roller process, respectively, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph, subtract 67 cents.

§ 1133.51 Class prices.

Subject to the differentials provided in §§ 1133.52 and 1133.53 the following

are the minimum prices per hundredweight to handlers for Class I milk, Class II milk, and Class III milk:

(a) *Class I milk.* For each month the price for Class I milk shall be the basic formula price rounded to the nearest cent, plus $1.90 adjusted by the amount, but not in excess of 50 cents for any month, computed pursuant to paragraph (d) of this section.

(b) *Class II milk.* The price for Class II milk shall be the price computed pursuant to paragraph (c) of this section, plus 25 cents per hundredweight.

(c) *Class III milk.* The price for Class III milk shall be that computed by the market administrator from the formula set forth in subparagraphs (1), (2), and (3) of this paragraph.

(1) Add 3 cents to the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month, and multiply the result by 4.8: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the simple average of the weighted averages of carlot prices per pound for spray and roller process nonfat dry milk for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph, subtract 80 cents and round to the nearest cent.

(d) *Supply-demand adjustment.* On or before the 6th day of each month the market administrator shall make the following computations based upon information obtained from handler's reports of receipts and utilization:

(1) Determine the total receipts of producer milk by all handlers (including receipts from a handler's own farm production) during the second and third months preceding;

(2) Determine the total pounds of milk and milk products disposed of from pool plants as Class I milk (excluding shrinkage, unaccounted for milk, and any duplications resulting from interhandler transfers) during the same two months;

(3) Divide the amount obtained in subparagraph (2) of this paragraph by the amount obtained in subparagraph (1) of this paragraph, and adjust to the nearest full percentage point. The resulting percentage shall be known as the "Class I utilization percentage";

(4) Compute a "net deviation percentage" as follows:

(i) If the Class I utilization percentage is neither less than the minimum standard utilization percentage specified below nor in excess of the maximum standard utilization percentage specified below, the net deviation percentage is zero;

(ii) Any amount by which the Class I utilization percentage is less than the minimum standard utilization percentage specified below is the "minus net deviation percentage"; and

(iii) Any amount by which the Class I utilization percentage exceeds the maximum standard utilization percentage specified below is the "plus net deviation percentage":

Month for which price applies	Months used in computation	Standard utilization percentage	
		Minimum	Maximum
January	October–November	79	82
February	November–December	76	79
March	December–January	73	76
April	January–February	74	76
May	February–March	72	75
June	March–April	70	73
July	April–May	68	71
August	May–June	63	66
September	June–July	65	68
October	July–August	69	72
November	August–September	73	76
December	September–October	77	80

(5) For a minus net deviation percentage the Class I price shall be decreased, and for a plus net deviation percentage the Class I price shall be increased, as follows:

(i) One cent for each such full percentage point of net deviation; plus

(ii) One cent for the lesser of:

(*a*) Each such percentage point of net deviation, or

(*b*) Each percentage point of net deviation of like direction (plus or minus, with any net deviation percentage of opposite direction considered to be zero for purposes of the computations of this subparagraph) computed pursuant to subparagraph (4) of this paragraph for the month immediately preceding, plus

(iii) One cent for the least of:

(*a*) Each such percentage point of net deviation;

(*b*) Each percentage point of net deviation of like direction computed pursuant to subparagraph (4) of this paragraph for the month immediately preceding; or

(*c*) Each percentage point of net deviation of like direction computed pursuant to subparagraph (4) of this paragraph for the second preceding month.

§ 1133.52 Butterfat differentials to handlers.

If the average butterfat content of Class I milk, Class II milk or Class III milk, computed pursuant to § 1133.45, for any handler for any month differs from 4.0 percent, there shall be added to, or subtracted from, the applicable class price (§ 1133.51) for each one-tenth of one percent that the average butterfat content of such class is respectively above, or below, 4.0 percent, a butterfat differential computed by the market administrator as follows:

(a) *Class I milk.* Add three cents to the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter at Chicago, as reported by the Department during the preceding month, multiply the result by 0.123, and round to the nearest tenth of a cent: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter.

(b) *Class II milk and Class III milk.* Add three cents to the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter at Chicago, as reported by the Department, during the month, multiply the result by 0.12[illegible] and round to the nearest tenth of a cent: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu of the price for Grade AA (93-score) butter.

§ 1133.53 Location adjustments to handlers.

(a) For milk received from producers at a pool plant located more than 2[illegible] miles by the shortest highway distance as determined by the market administrator, from the City Hall, Spokane, Washington, and disposed of as Class I milk or assigned to Class I pursuant to paragraph (b) of this section, the price computed pursuant to § 1133.51(a) shall be reduced two cents for each 10 miles or fraction thereof, up to 200 miles, and one cent for each 10 miles or fraction thereof, in excess of 200 miles, by the shortest hard-surfaced highway distance determined by the market administrator, from such pool plant to the City Hall, Spokane, Washington; and

(b) For purposes of calculating this adjustment, transfers between pool plants shall be assigned to Class I use in volume not in excess of that by which Class I disposition at the transferor plant exceeds receipts at such plant from producers and cooperative associations pursuant to § 1133.15 (c)(2) and (d), and assignment to transferor plants shall be made first to plants at which no location adjustment is applicable and then in sequence beginning with the plant at which the least location differential would apply.

§ 1133.54 Use of equivalent prices.

If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1133.60 Producer-handlers.

Sections 1133.40 through 1133.50 through 1133.53, 1133.70, 1133.[illegible] and 1133.80 through 1133.88 shall not apply to a producer-handler.

§ 1133.61 Plants subject to other Federal orders.

The provisions of this part shall not apply to any distributing or supply plant which would be subject to the distribution, pricing and payment provisions of another order issued pursuant to the Act, unless a greater volume of fluid

milk products are disposed of on routes in the marketing area than in the marketing area regulated pursuant to such other order, except that the operators of such plants shall make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

§ 1133.62 Handlers operating nonpool distributing plants.

In lieu of the payments required pursuant to §§ 1133.80 through 1133.87, each handler, other than a producer-handler or one exempt pursuant to § 1133.61, who operates during the month a nonpool distributing plant, shall pay to the market administrator on or before the 25th day after the end of the month the amounts calculated pursuant to paragraph (a) of this section, unless the handler elects at the time of reporting pursuant to § 1133.30, to pay the amounts computed pursuant to paragraph (b) of this section:

(a) The following amounts:

(1) To the producer-settlement fund any plus amount remaining after deducting from the value that would have been computed pursuant to § 1133.70, if such handler had operated a pool plant, the sum of (i) the gross payments made by such handler for Grade A milk received during the month from dairy farmers at such plant or at a plant which serves as a supply plant, and (ii) any payments with respect to operations of the same month to the producer-settlement funds of other orders issued pursuant to the Act due to the nonpool plant being partially regulated under such other orders; and

(2) As his pro rata share of the expense of administration, an amount equal to that which would have been computed pursuant to § 1133.88 had such plant been a pool plant, except that if such plant is also a nonpool plant under another order issued pursuant to the Act, the payments due under this subparagraph shall be reduced by the amount of any administrative expense payments under the other order; and

(b) The following amounts:

(1) To the producer-settlement fund, an amount equal to the value at the Class I price applicable at the location of such handler's plant, of all skim milk and butterfat disposed of as Class I milk on routes in the marketing area, in excess of the skim milk and butterfat received at such nonpool plant from a pool plant during the month which was classified as Class I milk under this part less the value of such skim milk and butterfat at the Class III price; and

(2) As his share of the expense of administration the rate specified in § 1133.88 with respect to the net Class I milk so disposed of in the marketing area.

§ 1133.63 State institutions.

A state owned and operated institution or establishment which processes or packages milk distributed solely on its premises or those of other state institutions or establishments shall be exempt from all provisions of this part. Milk received from such institutions at pool plants shall be other source milk and fluid milk products disposed of by a handler to such institutions shall be classified on the same basis as though disposed of to a producer-handler.

DETERMINATION OF UNIFORM PRICE

§ 1133.70 Computation of the value of producer milk.

The value of producer milk received by each handler during each month shall be a sum of money computed by the market administrator as follows:

(a) Multiply the quantity of producer milk in each class, as computed pursuant to § 1133.46(c), by the applicable class prices, adjusted pursuant to §§ 1133.52 and 1133.53;

(b) Add or subtract the amount necessary to correct errors disclosed by the verification of reports of receipts and utilization of skim milk and butterfat in previous months for which payment has not been made;

(c) Add the amount obtained in multiplying the pounds of overage deducted from each class pursuant to § 1133.46(a)(8) and the corresponding step of § 1133.46(b) by the applicable class prices;

(d) Add the amount obtained in multiplying the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1133.46(a)(2) and the corresponding step of § 1133.46(b) by the difference between the Class III price and the Class I price, each adjusted by the respective butterfat differentials;

(e) Add the amount obtained in multiplying the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1133.46(a)(3) and the corresponding step of § 1133.46(b) by the difference between the Class III price and the Class I price adjusted for butterfat content and location of the nearest plant(s) from which an equivalent amount of other source milk was received in the form of fluid milk products;

(f) Add the amount obtained in multiplying the difference between the Class III price for the preceding month and the Class I price for the current month by the lesser of:

(1) The hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1133.46(a)(5) and the corresponding step of § 1133.46(b); or

(2) The hundredweight of skim milk and butterfat remaining in Class III after the calculation pursuant to § 1133.46(a)(6) and the corresponding step of § 1133.46(b) in the preceding month; and

(g) Subtract the value of payments applicable under any other Federal order issued pursuant to the Act, if confirmed by the market administrator of such other order, on transfers of skim milk or butterfat in bulk form pursuant to § 1133.44(e), which are other source milk under such other order.

§ 1133.71 Computation of uniform price.

For each month the market administrator shall compute a uniform price per hundredweight as follows:

(a) Combine into one total the values computed pursuant to § 1133.70 for all handlers who made reports prescribed in § 1133.30 and who made the payments pursuant to § 1133.84 for the preceding month;

(b) Add the aggregate values of the location adjustments pursuant to § 1133.81;

(c) Subtract for each of the months of April, May and June an amount computed by multiplying the total hundredweight of producer milk for such month by 30 cents;

(d) Add for each of the months of September, October and November one-third of the aggregate amount subtracted pursuant to section (c) of this section;

(e) Subtract, if the average butterfat content of the milk represented by the values included under paragraph (a) of this section is greater than 4.0 percent, or add if such average butterfat content is less than 4.0 percent, an amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 1133.82 and multiplying the result by the total hundredweight of producer milk included in these computations;

(f) Add an amount representing not less than one-half the unobligated cash balance in the producer-settlement fund;

(g) Divide the resulting sum by the total hundredweight of milk included in these computations; and

(h) Subtract not less than four cents nor more than five cents per hundredweight. The result shall be known as the "uniform price" for milk received from producers.

PAYMENTS

§ 1133.80 Time and method of payment to producers and cooperative associations.

Except as provided in paragraph (c) of this section, each handler shall make payment to each producer from whom milk is received as specified in paragraphs (a) and (b) of this section:

(a) On or before the last day of the month, to each producer who had not discontinued shipping milk to such handler before the 18th day of the month, an advance payment with respect to milk received during the first 15 days of the month at not less than the Class III price for the preceding month;

(b) On or before the 17th day after the end of each month, for milk received during such month, an amount computed at not less than the uniform price per hundredweight pursuant to § 1133.71 subject to the butterfat differential computed pursuant to § 1133.82 and location adjustment computed pursuant to § 1133.81, and less (1) payments made pursuant to paragraph (a) of this section, (2) marketing service deductions pursuant to § 1133.87, and (3) proper deductions authorized in writing by such producer: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 1133.85, he may reduce his total payment to all producers uniformly by not less than the amount of reduction in payment from the market administrator; the handler shall, however, complete

such payments not later than the date for making such payments pursuant to this paragraph next following receipt of the balance from the market administrator;

(c) (1) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payments for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association, each handler shall pay to the cooperative association on or before the second day prior to the date of payment to producers in lieu of payments pursuant to paragraphs (a) and (b), respectively, of this section an amount equal to the sum of the individual payments otherwise payable to such producers the foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association;

(2) A copy of each such request, promise to reimburse and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination;

(d) Each handler who receives milk for which a cooperative association is the handler pursuant to § 1133.15(c)(2) and (d), shall, on or before the second day prior to the date payments are due individual producers, pay such cooperative association for such milk as follows:

(1) An advance payment for milk received during the first 15 days of the month at not less than the Class III price for the preceding month; and

(2) In making final settlement, the value of such milk at the applicable uniform price, less payment made pursuant to subparagraph (1) of this paragraph; and

(e) None of the provisions of this section shall be construed to restrict any cooperative association qualified under section 8c(5)(F) of the Act from making payment for milk to its producers in accordance with such provisions of the Act.

§ 1133.81 Location adjustments to producers.

In making payment to producers pursuant to § 1133.80 for milk received at a pool plant to which the provisions of § 1133.53 apply, the uniform price per hundredweight for base milk shall be reduced at the same rate per hundredweight as is applicable to Class I milk at such plant pursuant to § 1133.53.

§ 1133.82 Producer butterfat differential.

In making payments pursuant to § 1133.80(a) the uniform price shall be adjusted for each one-tenth of one percent of butterfat content in the milk of each producer above or below 4.0 percent as the case may be, by a butterfat differential equal to the average of the butterfat differentials determined pursuant to paragraphs (a) and (b) of § 1133.52, weighted by the pounds of butterfat in producer milk in each class, the result being rounded to the nearest tenth of a cent.

§ 1133.83 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1133.62 (a) (1) and (b) (1), 1133.84 and 1133.86 and out of which he shall make all payments to handlers pursuant to §§ 1133.85 and 1133.86.

§ 1133.84 Payments to the producer-settlement fund.

On or before the 14th day after the end of each month each handler shall pay to the market administrator the amount, if any, by which the total value of the milk received by such handler from producers computed pursuant to § 1133.70 (plus, in the case of a cooperative association which is a handler, the minimum amount due from other handlers pursuant to § 1133.80(e)) is greater than the value of such handler's producer milk at the applicable uniform price specified in § 1133.80.

§ 1133.85 Payments out of the producer-settlement fund.

On or before the 15th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the value of the milk received by such handler from producers computed pursuant to § 1133.70 (plus, in the case of a cooperative association that is a handler, the minimum amount due from other handlers pursuant to § 1133.80(e)) is less than the value of such handler's producer milk at the applicable uniform price specified in § 1133.80, except that the market administrator shall offset any payments due any handler against payments due from such handler. If the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the funds are available.

§ 1133.86 Adjustments of accounts.

Whenever verification by the market administrator of reports or payments of any handler discloses errors resulting in money due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred following the 5th day after the notice.

§ 1133.87 Marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers (other than with respect to milk of such handler's own production) pursuant to § 1133.80(a), shall make a deduction of 5 cents per hundredweight of milk, or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to the following:

(1) All milk received from producers at a plant not operated by a cooperative association;

(2) All milk received at a plant operated by a cooperative association from producers who are not members of such association; and

(3) All milk received at a plant operated by a cooperative association from producers who are members thereof but for whom any of the services set forth below in this paragraph is not being performed by such association(s) as determined by the market administrator. Such deduction shall be paid by the handler to the market administrator on or before the 14th day after the end of the month. Such moneys shall be expended by the market administrator for the verification of weights, sampling and testing of milk received from producers and in providing for market information to producers; such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of each producer who is a member of, or who has given written authorization for the rendering of marketing services and taking of deduction therefor to, a cooperative association, (2) whose milk is received at a plant not operated by such association and (3) for whom the market administrator determines that such association is performing the services described in paragraph (a) of this section, each handler shall deduct, in lieu of the deduction specified under paragraph (a) of this section, from the payments made pursuant to § 1133.80(a) the amount per hundredweight of milk authorized by such producer and shall pay over, on or before the 16th day after the end of the month, such deduction to the association entitled to receive it under this paragraph.

§ 1133.88 Expense of administration.

As his pro rata share of the expense of administration of the order each handler, including any cooperative association which is a handler, shall pay to the market administrator 5 cents per hundredweight or such lesser amount as the Secretary may prescribe:

(a) On or before the 14th day after the end of the month with respect to receipts at a pool plant of (1) producer milk including such handler's own farm production and that classified pursuant to § 1133.44(b), and (2) other source milk except other order milk, allocated to Class I; or

(b) On or before the 14th day after the end of the month with respect to other milk for which a cooperative association is the handler pursuant to § 1133.15 (c) and (d) in excess of that delivered to the pool plants of other handlers; and

(c) The quantities of milk at handler's nonpool plants and at the time as specified in § 1133.62.

§ 1133.89 Termination of obligations.

The provisions of this section shall apply to any obligation under this part for the payment of money:

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this order to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not be able to run until the first day of the month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the month during which the milk involved in the claims was received if an underpayment is claimed, or two years after the end of the month during which the payment (including deduction or setoff by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c(15)(A) of the Act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1133.90 Effective time.

The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 1133.91.

§ 1133.91 Suspension or termination.

The Secretary may suspend or terminate this part or any provision of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the Act. This part shall terminate in any event whenever the provisions of the Act authorizing it cease to be in effect.

§ 1133.92 Continuing obligations.

If, upon the suspension or termination of any or all provisions of this part there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1133.93 Liquidation.

Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall if so directed by the Secretary liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition.

If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expense of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1133.100 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

FEDERAL AVIATION AGENCY

[14 CFR Part 600]

[Airspace Docket No. 61-FW-90]

FEDERAL AIRWAYS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 600.6068 of the regulations of the Administrator, the substance of which is stated below.

Low altitude VOR Federal airway No. 68 is designated in part from the San Antonio, Tex., VORTAC via the intersection of the San Antonio VORTAC 187° and the Corpus Christi, Tex., VORTAC 321° True radials; to the Corpus Christi VORTAC. The Federal Aviation Agency has under consideration the realignment of this segment of Victor 68 from the San Antonio VORTAC via the intersection of the Alice, Tex., VOR 350° and the Corpus Christi VORTAC 313° True radials; to the Corpus Christi VORTAC. This would provide adequate separation between air traffic en route along Victor 68 and terminal traffic executing revised holding and instrument approach procedures at NAAS Chase, Texas. The control areas associated with this segment of Victor 68 are so designated that they would automatically conform to the altered airway. The vertical extent of these control areas would remain as designated pending review of the adjacent airspace. Separate actions will be initiated to implement on an area basis Amendment 60-21 to Part 60 of the Civil Air Regulations.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Southwest Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, P.O. Box 1689, Fort Worth 1, Tex. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 1, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

FEDERAL AIRWAYS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 600.1506 of the regulations of the Administrator, the substance of which is stated below.

Intermediate altitude VOR Federal airway No. 1506 extends in part from Seattle, Wash., to Pendleton, Oreg. The Federal Aviation Agency has under consideration extension of Victor 1506 from the Seattle VOR as a 16-mile wide airway to the intersection of the Seattle VOR 322° and the Port Angeles, Wash., VOR 090° True radials; thence 14-mile wide airway to the Port Angeles VOR; thence 8-mile wide airway to the intersection of the Port Angeles VOR 282° True radial and the 112° True bearing from the Neah Bay, Wash., radio range; thence 10-mile wide airway to the Neah Bay radio range. The extension of Victor 1506 will provide an airway for intermediate altitude air traffic operating from Seattle over Neah Bay to points in Alaska and the Orient. The airway width reductions from the intersection of the Seattle VOR 322° and the Port Angeles VOR 090° True radials to the Neah Bay radio range would provide separation from Canadian Restricted Areas (C1D-8) and (C1D-74), and would also contain the entire airway segment within U.S. territory.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles, 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 1, 1962.

Acting Chief,
Airspace Utilization Division.

FEDERAL AIRWAYS AND CONTROLLED AIRSPACE

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency (FAA) is considering amendments to §§ 600.6062 and 601.6062 of the regulations of the Administrator, the substance of which is stated below.

Low altitude VOR Federal airway No. 62 presently extends from Prescott, Ariz., to Abilene, Tex. The FAA has under consideration the revocation of the segment of this airway and its associated control areas from Prescott to Zuni, N. Mex. A recent traffic survey covering a 6-month period indicated no instrument flight rule traffic on this segment of the airway during the area's most active day for the period It would appear, therefore, that retention of this airway segment is unjustified as an assignment of controlled airspace. Further, it appears that the route from Prescott to Zuni is adequately served by low altitude VOR Federal airways No. 12 from Winslow, Ariz., to Zuni and No. 12 south alternate from Prescott to Winslow.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 1, 1962.

FEDERAL AIRWAYS AND ASSOCIATED CONTROL AREAS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering amendments to §§ 600.6002 and 601.6002 of the regulations of the Administrator, the substance of which is stated below.

Low Altitude VOR Federal Airway No. 2 extends, in part, from Rochester, N.Y., to Syracuse, N.Y.

The Federal Aviation Agency has under consideration alteration of this airway segment by designating a north alternate airway and its associated control areas via the intersection of the Rochester VOR 064° and the Syracuse VORTAC 283° True radials. The designation of this north alternate airway would provide dual-route capabilities between Rochester and Syracuse. Additionally, it would provide for application of procedures that would segregate Rochester/Syracuse terminal traffic from en route traffic on the main airway.

The control areas associated with the airway as modified herein would extend upward from 700 feet above the surface to the base of the continental control area. Separate actions will be initiated to implement Amendment 60-21 to Part 60 of the Civil Air Regulations at such time as Amendment 60-21 can be applied to all of the controlled airspace in the Syracuse-Rochester area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Eastern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, New York International Airport, Jamaica 30, N.Y. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will

be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 1, 1962.

ARIZONA

Notice of Proposed Withdrawal and Reservation of Lands

The U.S. Army Corps of Engineers has filed an application, Serial Number, Arizona 030950, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the general mining and mineral leasing laws, subject to existing valid claims. The applicant desires the lands for establishment of a seismological laboratory for seismic research in detecting both atmospheric and underground detonations, study of earthquakes, and study of other miscellaneous seismic noises.

Attention is called to the fact that the withdrawal of the lands described below may require legislation pursuant to 43 U.S.C. 155 (Suppl). The lands are presently embraced within the Tonto National Forest.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the State Director or undersigned officer of the Bureau of Land Management, Department of the Interior, 3022 Federal Building, Phoenix 25, Ariz.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in this application are:

REPUBLIC OF NIGER

Finding Regarding Foreign Social Insurance and Pension System

Section 202(t)(2) of the Social Security Act (42 U.S.C. 402(t)(2)) authorizes and requires the Secretary of Health, Education, and Welfare to find whether a foreign country has in effect a social insurance or pension system which is of general application in such country and under which periodic benefits, or the actuarial equivalent thereof, are paid on account of old age, retirement, or death; and whether individuals who are citizens of the United States but not citizens of such foreign country and who qualify for such benefits are permitted to receive such benefits or the actuarial equivalent thereof while outside such foreign country without regard to the duration of the absence.

Pursuant to authority duly vested in him by the Secretary of Health, Education, and Welfare, the Commissioner of Social Security has considered evidence relating to the social insurance or pension system of the Republic of Niger, from which evidence it appears that under the social insurance or pension system of the Republic of Niger a citizen of the United States cannot qualify for or receive benefits while outside that country.

Accordingly, it is hereby determined and found that the Republic of Niger does not have in effect a social insurance or pension system which meets the requirements of section 202(t)(2) of the Social Security Act (42 U.S.C. 402(t)(2)).

FEDERAL TRADE COMMISSION

[File No. 21–545]

WIRE ROPE INDUSTRY

Trade Practice Conference

A trade practice conference for the Wire Rope Industry will be held by the Federal Trade Commission in Room 332 of the Commission Building, Pennsylvania Avenue at 6th Street NW., Washington, D.C., on Monday, February 26, 1962, commencing at 10 a.m., e.s.t. The conference will be held under the supervision of the Honorable A. Everette MacIntyre, Federal Trade Commissioner.

Members of this industry are persons, firms, corporations and organizations engaged in the manufacture, sale or distribution of wire rope, wire cable, and fabricated assemblies consisting primarily of wire rope, cable, and strand.

The conference is to afford all members of the industry an opportunity to consider and propose for establishment rules which will furnish guidance as to the requirements of laws administered by the Commission. It is the first step in the proceedings designed to eliminate and prevent on an industrywide basis, unfair methods of competition, unfair or deceptive acts or practices, and other trade abuses violative of such laws. Any industry member may suggest rules for consideration at the conference and discuss proposals or suggestions by others.

Among the subjects suggested for consideration at the conference are: misrepresentation (general); deception as to origin and disclosure of foreign origin; substitution of products; misleading price lists; misuse of terms "closeouts", "overruns", "discontinued lines", etc.; deceptive invoicing, etc.; prohibited sales below cost; inducing breach of contract; consignment distribution; exclusive dealing; defamation of competitors or false disparagement of their products; commercial bribery; push money; tie-in sales; traffic volume as inducement for sales; prohibited forms of trade restraints (unlawful price fixing, etc.); and prohibited discriminatory trade practices.

Also suggested for discussion and consideration for possible rule coverage are various other pricing practices. Among such practices said to exist in the industry and which will be considered is that of an industry member who sells raw materials to other industry members and finished industry products to other purchasers at unjustified differentials in

prices. It is claimed that in some of these instances the prices at which raw materials are sold to competing industry members are at such high prices as to provide for some subsidization of the low prices at which some finished industry products are sold.

Before final rules are approved by the Commission, proposed rules will be made available to all affected or interested parties, including consumers, upon public notice affording them opportunity to present their views and suggestions thereon at a future public hearing.

Issued: February 7, 1962.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-3848]

APEX MINERALS CORP.

Order Summarily Suspending Trading

FEBRUARY 2, 1962.

The common stock, $1.00 par value, of Apex Minerals Corporation, being listed and registered on the San Francisco Mining Exchange, a national securities exchange; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on such Exchange and that such action is necessary and appropriate for the protection of investors; and

The Commission being of the opinion further that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15(c)(2) of the Securities Exchange Act of 1934 and the Commission's Rule 15c2-2 thereunder for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, such security, otherwise than on a national securities exchange;

It is ordered, Pursuant to section 19(a)(4) of the Securities Exchange Act of 1934 that trading in said security on the San Francisco Mining Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, this order to be effective for a period of ten (10) days, February 5, 1962, to February 14, 1962, both dates inclusive.

NATIONAL MERCANTILE CLEARING HOUSE, INC.

Notice and Order for Hearing

FEBRUARY 2, 1962.

I. National Mercantile Clearing House, Inc. (issuer), a collection agency company, filed with the Commission on October 23, 1961, a notification on Form 1-A and an offering circular relating to a proposed public offering of 1,000,000 shares of its 1-cent par value common stock at $4.00 per share for an aggregate amount of $300,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof and Regulation A promulgated thereunder.

II. The Commission, on January 5, 1962, issued an order pursuant to Rule 261 of the General Rules and Regulations under the Securities Act of 1933, as amended, temporarily suspending the issuer's exemption under Regulation A and affording to any person having an interest in the matter an opportunity to request a hearing. A written request for a hearing has been received by the Commission.

The Commission deems it necessary and appropriate that a hearing be held for the purpose of determining whether it should vacate the temporary suspension or enter an order of permanent suspension in this matter.

It is hereby ordered, Pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, that a hearing be held at 10:00 a.m., e.s.t., on March 27, 1962, in Room 209, United States Post Office and Court House Building, 301 Northeast First Avenue, Miami, Florida, with respect to the following matters and questions, without prejudice, however, to the specification of additional issues which may be presented in these proceedings:

A. Whether the terms and conditions of Regulation A have not been complied with, in that:

1. The notification on Form 1-A fails to set forth the names and addresses of its predecessors and affiliates of the issuer as required by Item 2 thereof.

2. The offering circular fails to disclose the remuneration of officers and promoters of the issuer as required by Item 9(b) and to describe accurately and completely certain material transactions between the issuer and insiders as required by Item 9(c) of Schedule I.

3. Whether the offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly in that:

1. The offering circular fails to disclose the manner and extent to which the securities being offered will be diluted due to issuer's financial condition and its issuance of stock to insiders at prices substantially lower than the public offering price.

2. It overstates the number of full-time employees.

3. It falsely describes certain letters as "letters of recommendation of satisfactory use and merit" and fails to disclose their true nature.

4. It contains financial statements as of August 31, 1961, which are false and misleading because—

(a) Sales and profits of the issuer for the eight months ended August 31, 1961, are substantially overstated.

(b) Certain accounts receivable are shown as current assets without disclosure that such receivables had been written off by the issuer's accountant as "bad debts" as of December 31, 1960.

(c) Certain assets, liabilities and transactions affecting issuer's capital are inaccurately and inadequately described in the financial statements and notes thereto.

(d) Material amounts claimed by issuer's former counsel for legal fees and material amounts claimed to be owed by the issuer to others are not disclosed in the financials and notes thereto.

C. Whether the offering would be made in violation of section 17(a) of the Securities Act of 1933, as amended.

III. *It is further ordered*, That Robert Bishop, or any officer or officers of the Commission designated by it for that purpose, shall preside at the hearing; that any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all the powers granted to the Commission under sections 19(b), 21 and 22(c) of the Securities Act of 1933, as amended, and to hearing officers under the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail on National Mercantile Clearing House, Inc.; that notice of the entering of this order shall be given to all other persons by a general release of the Commission and by publication in the FEDERAL REGISTER. Any person who desires to be heard, or otherwise wishes to participate in the hearing, shall file with the Secretary of the Commission on or before March 23, 1962, a written request relative thereto as provided in Rule 9(c) of the Commission's rules of practice.

By the Commission.

UNITED CORP.

Notice of Filing of Application for an Order Exempting Proposed Transaction From Provisions of the Act

Notice is hereby given that The United Corporation ("Applicant"), a registered closed-end, non-diversified management investment company, has filed an application pursuant to section 17(b) of the Investment Company Act of 1940 ("Act") for an order of the Commission exempting from the provisions of section 17(a) of the Act the proposed purchase by Applicant from Mr. Charles B. McDonald, 1250 Union Commerce Building, Cleveland, Ohio of 20,000 shares of common stock of True Temper Corporation (hereinafter called "True Temper").

Applicant, a Delaware corporation, owns 389,154 shares of the common stock of True Temper or 36.6 per centum of the outstanding voting securities of that corporation and Mr. McDonald is a director of True Temper.

Applicant's acquisition of True Temper stock were made pursuant to its announced policy of investing substantial portions of its assets in "special situations" without limitation as to the amount of capital which might be invested at any particular time in any industry, company or situation. This policy was approved by Applicant's stockholders at the 1947 Annual Meeting of stockholders and is set forth in its registration statement filed by Applicant with the Commission.

Applicant has been informed that Mr. McDonald has available for purchase in one block 20,000 shares of True Temper common stock now owned by him. On January 10, 1962 the Board of Directors of Applicant authorized its officers to offer to purchase from Mr. McDonald subject to the approval of the Commission, 20,000 shares of True Temper Common Stock at a price not to exceed the average price of such stock on the American Stock Exchange on the second business day subsequent to the issuance by the Commission of an appropriate exemption order (the average price to be deemed to be the mean between the high and low sales price, if there were sales; and the mean between the closing bid and asked price, if there were no sales).

Section 2(a)(3) of the Act defines an "affiliated person" of another person as, among other things, any person five per cent or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote by such other person. In addition, an affiliated person includes a director of such other person. True Temper is therefore an affiliated person of an affiliated person of the Applicant under the Act. The proposed transaction would be prohibited by Section 17(a) unless the Commission issues an order exempting such transaction from the provisions thereof. Section 17(a) of the Act, in general, prohibits an affiliated person of an affiliated person of a registered investment company from purchasing from, or selling to, such registered investment company, any security with certain exceptions, unless the Commission upon application pursuant to section 17(b) of the Act, grants an exemption from section 17(a) of the Act after finding that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, that the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the Act, and is consistent with the general purposes of the Act.

Notice is further given that any interested person may, not later than February 15, 1962, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D.C. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) should be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the showing contained in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

By the Commission.

ORVAL L. DUBOIS, *Secretary.*

Title 3—THE PRESIDENT

Executive Order 10991

MAKING A CHANGE WITH RESPECT TO THE MEMBERSHIP OF THE COMMISSION ESTABLISHED BY EXECUTIVE ORDER NO. 10929,[1] RELATING TO A CONTROVERSY BETWEEN CERTAIN CARRIERS AND CERTAIN OF THEIR EMPLOYEES

By virtue of the authority vested in me as President of the United States, it is ordered that Executive Order No. 10929 of March 24, 1961 (which order provides for a commission to consider a controversy between, and involving certain proposals of, the carriers represented by the New York Harbor Conference Carriers' Committee and certain of their employees represented by various organizations named in the order, all such organizations being members of the Railroad Marine Harbor Council, AFL–CIO), be, and it is hereby, amended by substituting for the second sentence of section 1 thereof the following: "The commission shall consist of nine members designated by the President as follows: three members from among persons nominated by the carriers, three members from among persons nominated by the employees, and the chairman of the commission and two other members without nominations."

JOHN F. KENNEDY

THE WHITE HOUSE,

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION AND STANDARDS)

Subpart—United States Standards for Grades of Bermuda-Granex-Grano Type Onions

Subpart—United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types) [1]

On December 21, 1961, a notice of proposed rule making was published in the FEDERAL REGISTER (26 F.R. 12,222), regarding a proposal to make the United States Standards for Bermuda-Granex Onions (7 CFR 51.3195 to 51.3209) applicable to Grano onions. The Grano variety has previously been covered by the United States Standards for Grades of Onions (other than Bermuda-Granex and Creole Types) (7 CFR 51.2830 to 51.2850, 26 F.R. 2817).

Statement of considerations. All comments received from industry members favored the proposal as published on December 21, 1961, with the exception of a single comment which opposed the change. No change is made in the original proposal for this final publication.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, it is hereby determined that United States Standards for Bermuda-Granex type onions (7 CFR 51.3195 to 51.3209), should be made applicable to Grano type onions and that the headings in the above subparts be amended as follows:

1. Amend the heading in the subpart applicable to the United States Standards for Bermuda-Granex type onions (7 CFR 51.3195 to 51.3209), to read as follows: "Subpart—United States Standards for Grades of Bermuda-Granex-Grano Type Onions."

2. Amend the heading in the subpart applicable to the United States Standards for Grades of Onions (other than Bermuda-Granex and Creol Types) (7 CFR 51.2830 to 51.2850, 26 F.R. 2817) to read as follows: "Subpart—United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types)."

(Sec. 202–208, 60 Stat. 1087, as amended; 7 U.S.C. 1621–1627)

Dated: February 6, 1962, to become effective March 18, 1962.

G. R. GRANGE,
Deputy Administrator,
Marketing Services.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Agency

[Reg. Docket No. 1066; Reg. No. SR–432A]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

Special Civil Air Regulation; Carriage of Persons Aboard All-Cargo Aircraft

Authorization for the carriage of persons aboard all-cargo aircraft is presently contained in Special Civil Air Regulations No. SR–419, effective January 17, 1957 (22 F.R. 423), and No. SR–432, effective May 30, 1959 (24 F.R. 4360).

SR–419 authorizes three LOGAIR contractors, listed in Appendix A thereto, to carry military couriers, route supervisors, and LOGAIR flight crewmembers of other LOGAIR contractors in their cargo aircraft. These air carriers were granted relief from the maximum passenger weight requirements of Special Civil Air Regulation No. SR–406C, as applicable to C–46 aircraft, in addition to certain other passenger-carrying provisions of Part 42 of the Civil Air Regulations. Special Civil Air Regulation No. SR–419 also provides that other air carriers conducting LOGAIR operations may individually secure this authorization from the Administrator, and be listed accordingly in Appendix A of the regulation. Such authorization was granted in the interest of the efficiency and safety of these essential national defense operations.

SR–432 authorizes the carriage of certain persons in cargo operations when such persons perform specific duties in connection with the safety of flights, the safe carriage of animals, or the carriage of radioactive materials. It also provides for the carriage of security and honor guards in cargo aircraft when authorized by the Federal Government. These authorizations were based on the conclusion that compliance with the passenger operation rules of Parts 40, 41, and 42 by an air carrier when carrying these passengers in all-cargo airplanes placed an unreasonable burden upon the air carriers concerned, since such individuals should not, and were not intended to, fall within the normally accepted category of air carrier passengers.

This regulation incorporates the provisions of both Special Regulations in a single regulation with the following changes:

(1) Recently the Agency has received requests from other air carriers and commercial operators operating flights under LOGAIR or other types of military contracts who wish to take advantage of SR–419. However, as presently written, it would require a revision of the regulation or an exemption thereto each time an operator is given such authorization. The Administrator has determined that there are no special reasons to limit such authorization to LOGAIR operations or air carriers and that this privilege should be extended to all military contract air carriers or commercial operators.

(2) Requests have also been received from air carriers to permit carriage of company employees and their dependents on cargo flights without complying with the passenger-carrying airplane requirements when traveling on company business to and from outlying stations not served by adequate and regular passenger flights. The problem of providing these persons with transportation to and from their duty stations is particularly acute outside the United States. Carriage of these persons on cargo flights is similar to the carriage of the persons authorized by paragraphs 1 (a) and (b) of SR–432 and a provision is included authorizing their transportation on cargo flights without full compliance with the passenger-carrying or passenger-service airplane requirements of Part 40, 41, or 42.

(3) Many of the operators may also wish to conduct the cargo flights in accordance with SR–411A which authorizes airplanes certificated under the transport category requirements in effect prior to March 13, 1956, to be operated in cargo service at certain increased weights. Airplanes used in these cargo flights are subject to inspections in addition to those normally performed and have been operated incident-free for many years. Therefore, as part of this regulatory action the persons authorized herein may also be carried aboard those airplanes specified in SR–411A at the increased weights.

(4) Under SR–419, the operator is responsible for the issuance of instructions to insure that the persons carried will not interfere with the control of the aircraft. This requirement is unnecessary and is being deleted in this regulation. The pilot in command of the aircraft has the authority to approve or deny access to the flight deck of such aircraft and is better qualified to issue such instructions as are necessary under the particular circumstances of the flight to persons authorized to enter the flight deck under this regulation.

(5) SR–419 also requires that the operator furnish the Administrator, prior to the carriage of persons authorized by the regulation, with a list showing the type of aircraft, registration number, and an authorization from the Air Force for the transportation of such persons. Experience has shown that inspection of the records of the operators involved will supply the necessary information. Therefore, submission of this information in advance is no longer required under this regulation.

In view of the foregoing, this regulation combines the provisions of SR–419 and SR–432, insofar as they both relate to the carriage of passengers on cargo aircraft, and, in addition, permits the carriage of certain other persons on such cargo flights. The regulation also permits such flights to be conducted without compliance with the passenger-carrying or passenger-service airplane requirements of Part 40, 41, or 42, or, in the case of C–46 airplanes, the provisions of SR–406C. When such persons are authorized to be carried on airplanes certificated under the transport category requirements in effect prior to March 13, 1956, the airplane may be operated in accordance with the increased weight requirements of SR–411A.

With regard to the carriage of company employees and their dependents it was deemed necessary to provide special requirements, since these persons may vary in age and agility, and thus their ability to cope with unusual situations may be restricted. Therefore, it is being required that operators include in their operations manuals the procedures necessary for the safe carriage of such persons.

Since this regulatory action imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and good cause exists for making it effective on less than 30 days' notice.

In consideration of the foregoing, the following Special Civil Air Regulation is hereby adopted, effective February 9, 1962:

1. The following persons, when duly authorized by the air carrier or commercial operator operating the airplane may be carried aboard an airplane engaged in the carriage of cargo only, without compliance with the passenger-carrying or passenger-service airplane requirements of Parts 40, 41, and 42, and SR–406C and SR–411A of the Civil Air Regulations:

(a) A person performing a specific duty assignment aboard an airplane in connection with the safety of the flight, or the safe carriage of animals, or radioactive materials within the meaning of and subject to the requirements of § 49.2 of the Civil Air Regulations; or while traveling to or from such duty assignments where the air carrier or commercial operator finds that other means of transportation are not practicable;

(b) A person performing duty as a security or honor guard aboard an airplane for shipments made by or under the authority of the Federal Government;

(c) Military couriers, military route supervisors, and flight crewmembers of any military cargo contract air carrier or commercial operator, when operating under a military cargo contract and specifically authorized by the appropriate military service; and

(d) Company employees of the air carrier or commercial operator and their dependents when traveling on company business to or from outlying stations not served by adequate, regular passenger flights. When such persons are carried, cargo will be loaded in such a manner as not to obstruct access to the pilot compartment, or the appropriate emergency or regular exits. In addition, for extended overwater flights, or for flights over uninhabited terrain, emergency and survival equipment adequate for the particular operation involved shall be carried. Procedures for the safe carriage of company employees and their dependents under this subparagraph shall be incorporated into the air carrier's or commercial operator's operations manual.

2. An approved seat with a safety belt shall be available for the use of each person described in paragraph 1. The location of the seat shall be such that the occupant will not be in a position to interfere with the flight crewmembers in the performance of their duties.

3. Persons described in paragraph 1 may be admitted to the flight deck of the airplane when authorized by the pilot in command.

This Special Civil Air Regulation supersedes Special Civil Air Regulation No. SR–419 and Special Civil Air Regulation No. SR–432, and shall remain in effect until superseded or rescinded.

Chapter III—Federal Aviation Agency

SUBCHAPTER E—AIR NAVIGATION REGULATIONS

[Airspace Docket No. 62-WA-8]

PART 600—DESIGNATION OF FEDERAL AIRWAYS

PART 601—DESIGNATION OF CONTROLLED AIRSPACE, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS, AND POSITIVE CONTROL AREAS

Alteration of Federal Airways and Reporting Points

The purpose of these amendments to §§ 600.6404, 600.6408, and 601.7002 of the regulations of the Administrator is to alter the descriptions of Hawaiian VOR Federal airways No. 4 and No. 8, and the Sunrise and Tuna Intersections.

Hawaiian Victor 4 is designated in part to the INT of the Koko Head, Hawaii VOR 065° and the Upolu Point, Hawaii VOR 003° radials (Sunrise INT.). Hawaiian Victor 8 is designated in part to the INT of Molokai, Hawaii VOR 067° and the Upolu Point, Hawaii, VOR 012° radials (Tuna INT.). Effective 0001 e.s.t., February 8, 1962, the Upolu Point VOR will be commissioned at a new site at latitude 20°12'13" N., longitude 155°50'47" W. Therefore, effective with the commissioning of this facility at its new location, it will be necessary to alter the descriptions of Hawaiian Victor 4 and 8, and the Sunrise and Tuna Intersections by substituting radials from the Upolu Point VOR, at its new location, for radials from its present location. This alteration will involve no additional assignment of airspace.

Since these alterations are editorial in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary, and they may be made effective on less than 30 days' notice.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (25 F.R. 12582) §§ 600.6404, 600.6408, and 601.7002 are amended as follows:

1. In the text of § 600.6404 (14 CFR 600.6404) "Upolu Point, Hawaii, VOR 003° radials." is deleted and "Upolu Point, Hawaii, VOR 002° radials." is substituted therefor.

2. In the text of § 600.6408 (14 CFR 600.6408) "to the point of intersection of the Molokai omnirange 067° True and the Upolu Point, Hawaii, omnirange 012° True radials." is deleted and "to the INT of the Molokai VOR 067° and the Upolu Point, Hawaii, VOR 010° radials." is substituted therefor.

3. In the text of § 601.7002 (14 CFR 601.7002) the following changes are made:

a. "Sunrise INT: The INT of the Koko Head VOR 065° T and the Upolu Point VOR 003° T radials." is deleted and "Sunrise INT: The INT of the Koko Head VOR 065° and the Upolu Point VOR 002° radials." is substituted therefor.

b. "Tuna Intersection: The intersection of the Molokai VOR 067° True and the Upolu Point VOR 012° True radials." is deleted and "Tuna INT: The INT of the Molokai VOR 067° and the Upolu Point VOR 010° radials." is substituted therefor.

These amendments shall become effective 0001 e.s.t., February 8, 1962.

(Sec. 307(a), 72 Stat. 749; 49 U.S.C. 1348)

Issued in Washington, D.C., on February 1, 1962.

Director, Air Traffic Service.

PART 610—MINIMUM EN ROUTE IFR ALTITUDES

Miscellaneous Amendments

This amendment is being adopted to insure the safety of IFR operations by establishing the minimum en route IFR altitudes for the route or portions thereof contained herein, and the altitudes which assure navigational coverage that is adequate and free of frequency interference for such routes or portions thereof.

As a situation exists which demands immediate action in the interests of safety, I find that compliance with the notice, public procedure and effective date of provisions of the Administrative Procedure Act would be impracticable.

In view of the foregoing and pursuant to the authority delegated to me by the Administrator (24 F.R. 5662), Part 610 is hereby amended as follows:

Section 610.17 *Green Federal airway 7* is amended to read in part:

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

TEXTILES AND TEXTILE FIBERS

The Commissioner of Food and Drugs, having evaluated the data submitted in petitions filed by Johnson and Johnson, New Brunswick, N.J., and Textile Bag Manufacturers Association, Suite 209, 518 Davis Street, Evanston, Ill., and other relevant material, has concluded that the following regulation should issue in conformance with section 409 of the Federal Food, Drug, and Cosmetic Act, with respect to food additives resulting from use of textiles and textile fibers as articles and components of articles that contact dry food. Under the prescribed conditions of safe usage, substances approved for use in the preparation of textiles and textile fibers are not expected to become components of food in any significant amounts. Therefore, pursuant to the provisions of the act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (25 F.R. 8625) the food additive regulations (21 CFR Part 121) are amended by adding to Subpart F the following new section:

§ 121.2535 Textiles and textile fibers.

Textiles and textile fibers may safely be used as articles or components of articles intended for use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food, subject to the provisions of this section.

(a) The textiles and textile fibers are prepared from one or more of the fibers identified in paragraph (d) of this section and from certain other adjuvant substances required in the production of the textiles or textile fibers or added to impart desired properties.

(b) The quantity of any adjuvant substance employed in the production of textiles or textile fibers does not exceed the amount reasonably required to accomplish the intended physical or technical effect or any limitation further provided.

(c) Any substance employed in the production of textiles or textiles fibers that is the subject of a regulation in this Subpart F of this part conforms with any specification in such regulation, and any substance that is not the subject of a regulation in this Subpart F conforms with the specifications, if any, prescribed by an order extending the effective date of the statute for such substance as an indirect additive to food.

(d) Substances employed in the production of or added to textiles and textile fibers may include:

(1) Substances generally recognized as safe in food.

(2) Substances subject to prior sanction or approval for use in textiles and textile fibers and used in accordance with such sanction or approval.

(3) Substances generally recognized as safe for use in cotton and cotton fabrics used in dry-food packaging.

(4) Substances that by regulation in this part may safely be used in the production of or as a component of textiles or textile fibers and subject to provisions of such regulation.

(5) Substances identified in this subparagraph, subject to such limitations as are provided:

List of Substances and Limitation
(i) Fibers:
Cotton.
Rayon.
(ii) Adjuvant substances:
4,4'-bis (4-Anilino-6-diethanolamine-s-triazin - 2 - ylamino) - 2,2' - stilbenedisulfonic acid, disodium salt. (For use as colorant only.)
4,4'-bis (4-Anilino-6-methylethanolamine-s-triazin - 2-ylamino) - 2,2'-stilbenedisulfonic acid, disodium salt. (For use as colorant only.)
Borax. (For use as preservative only.)
Formaldehyde. (For use as preservative only.)
Mineral oil. (For use as preservative only.)
Petrolatum. (For use as preservative only.)
Polyoxyethylene (20) sorbitan monolaurate. (For use as preservative only.)
Polyoxyethylene (20) sorbitan monostearate. (For use as preservative only.)
Polyvinyl acetate. (For use as preservative only.)
Polyvinyl alcohol. (For use as preservative only.)
Sodium bis(2,6-dimethylheptyl-4) sulfosuccinate. (For use as preservative only.)
Sodium dodecyl benzenesulfonate. (For use as preservative only.)
Sodium fluoride. (For use as preservative only.)
Sodium hypochlorite. (For use as preservative only.)
Sodium lauryl sulfate. (For use as preservative only.)
Sodium pentachlorophenate. (For use as preservative only.)
Styrene-butadiene copolymer. (For use as preservative only.)
Tallow. (For use as preservative only.)
Tallow, sulfonated. (For use as preservative only.)
Titanium dioxide. (For use as a preservative only.)
Triethanolamine. (For use of preservative only.)
Ultramarine blue. (For use as preservative only.)
Waxes, petroleum. (For use as preservative only.)

(e) Textile and textile fibers are used as articles or components of articles that contact dry food only.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective on the date of its publication in the FEDERAL REGISTER.

Chapter II—Bureau of Narcotics, Department of the Treasury

[T.D. 66]

PART 307—MANUFACTURING OF NARCOTIC DRUGS

Addition of Norpethidine and its Salts to the Basic Classes of Narcotic Drugs

On December 21, 1961, a notice was published in the FEDERAL REGISTER (26 F.R. 12222), which stated that the Commissioner of Narcotics, pursuant to the provisions of section 6 of the Narcotics Manufacturing Act of 1960 (74 Stat. 61, 26 U.S.C. 584) and 21 CFR 307.71–307.72, proposed to add Norpethidine (ethyl 4-phenyl-4-piperidinecarboxylate) and its salts, which have heretofore been determined to be narcotic drugs as defined in 26 U.S.C. 4731, as amended, to the existing classification of "basic classes of narcotic drugs" enumerated in section 3(g) of the Narcotics Manufacturing Act of 1960 (74 Stat. 56, 21 U.S.C. 502).

After due notice and opportunity for public hearing, and after consideration of all relevant matters, the addition to the list of "basic classes of narcotic drugs" has been determined, under paragraphs (c) and (e) of 21 CFR 307.72, to be consistent with the law and the public health and safety and Norpethidine (ethyl 4-phenyl-4-piperidinecarboxylate) and its salts are hereby established as a new basic class of narcotic drugs to be added to the existing classification set forth in section 3(g) of the Narcotics Manufacturing Act of 1960.

Accordingly § 307.73 is amended by adding a new basic class of narcotic drugs to the list of basic classes of narcotic drugs, as follows:

§ 307.73 List of basic classes of narcotic drugs.

The following substances and their salts constitute the list of basic classes of narcotic drugs:

* * * * *

(a) Norpethidine (ethyl 4-phenyl-4-piperidinecarboxylate).

Because the amendment of § 307.73 is merely for the purpose of listing a new basic class of narcotic drugs, it is hereby found unnecessary to issue this Treasury Decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of that Act.

Effective date. This Treasury Decision shall become effective upon its filing for publication in the FEDERAL REGISTER.

[SEAL] HENRY L. GIORDANO,
Acting Commissioner of Narcotics.

Approved: February 2, 1962.

Title 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

SUBCHAPTER T—SALE, LEASE, OR USE, AND ACQUISITIONS

[Circular 2076]

PART 257—SALE OR LEASE OF SMALL TRACTS

Miscellaneous Amendments

On page 10285 of the FEDERAL REGISTER of November 2, 1961, there was published a notice and text of a proposed revision of Part 257 of Title 43, Code of Federal Regulations. The purpose of this revision is to (1) permit public auctions of small tracts wherever appropriate; (2) make the reversionary clause in community site dispositions unlimited in duration; (3) make specific that lands will be leased or sold at their fair market value; and (4) eliminate group agreements. In addition the amendment would spell out requirements for coordination with local governmental units and for consideration of availability of public facilities, and would set new minimum rentals.

Interested persons were given 30 days within which to submit written comments, suggestions or objections with respect to the proposed revision. Comments received were carefully studied and the proposed regulations are hereby adopted with the following change and are set forth below.

Under § 257.2(a) add the following words "or the stability of existing economic enterprises" at the end of the paragraph.

This amendment shall become effective at the beginning of the 30th calendar day following the date of this publication in the FEDERAL REGISTER.

STEWART L. UDALL,
Secretary of the Interior.

FEBRUARY 2, 1962.

1. The caption and text of § 257.2 are revised to read as follows:

§ 257.2 Criteria.

(a) It is the program in the administration of the act of June 1, 1938, as amended, to promote the beneficial utilization of the public lands subject to the terms thereof, and at the same time to safeguard the public interest in the lands. To this end small tract activity shall be coordinated with interested local governmental agencies, and small tract sites will be considered in the light of their effect upon the conservation of natural resources and upon the communities or area involved and in the light of availability of schools, utilities, and other

facilities. Lands will not be leased or sold, for example, which would lead to private ownership or control of scenic attractions, or water resources, or other areas that should be kept open to public use. Nor will isolated or scattered settlement be permitted which would impose heavy burdens upon State or local governments for roads; schools; police, health, and fire protection; and other facilities. Undesirable types of construction for settlement or business along public highways and parkways will be guarded against, and lands will not be leased or sold under the act if such action would unreasonably interfere with the use of water for grazing purposes or unduly impair the protection of watershed areas or the stability of existing economic enterprises.

(b) Under this act lands may be classified for direct sale, for lease and sale, or for lease only. Revested Oregon and California Railroad lands and reconveyed Coos Bay Wagon Road grant lands in Oregon will be classified for lease only—as will other public lands where title should remain in the United States and leasing is not contrary to the interests of the United States. Lands suitable for community site purposes will be classified for lease, lease and sale, or direct sale at appraised prices and will be subject to application only by nonprofit corporations or associations, States, municipalities, or other governmental subdivisions. Lands may be classified for lease and sale, as provided for in § 257.13, where such action is necessary for the protection of adjacent property and the community as a whole. In other cases, lands will be sold at public auction at not less than their appraised fair market value in accordance with § 257.14.

2. Paragraph (a) of § 257.9 is amended to read as follows:

§ 257.9 Advance payment.

* * * * *

(a) If the land has been classified for lease or for lease and sale, the advance payment is the rental for the entire lease period, as specified in the classification order if such period does not exceed five years. Where lands are classified for lease for periods in excess of five years, the advance payment will be as specified in the classification order. If the land has not been classified, the advance payment is $25 for nonbusiness and $100 for business site applications. Successful applicants will be required to pay any difference between advance payment and rental or purchase price before their applications will be granted.

3. Paragraph (b) of § 257.10 is amended to read as follows:

§ 257.10 Community sites; appraisal; restrictions.

* * * * *

(b) Where lands are sold at less than fair market value in accordance with paragraph (a) of this section, the patent will contain a provision for reversion of title to the United States if the lands are used for any purpose not consistent with the classification order after issuance of patent unless consent to change the use is first obtained from the authorized officer.

4. Paragraph (b) of § 257.11 is amended to read as follows:

§ 257.11 Lease provisions; terms and rentals.

* * * * *

(b) The amount of rental will be specified in the appropriate order. The rental for community sites will take into consideration the purpose for which the land will be used. Rental for other types of sites will equal the fair market rental of the lands, provided, however, the minimum rental will be $100 per year for business sites and $25 per year for other sites.

5. Paragraph (d) (1), (2), and (3) of § 257.13 are revoked and paragraph (a) is revised to read as follows:

§ 257.13 Leases with option to purchase; sale; patent.

(a) Leases for lands classified for lease and sale will contain an option to purchase clause. The option to purchase clause will afford the lessee or his duly approved successor in interest an opportunity to purchase the tract at any time within the term of the lease, provided the improvements required by the lease have been made and all other terms and conditions of the lease complied with. The net purchase price of the land will be the appraised fair market value of the unimproved land as of the date of the lease minus an amount equal to the advance rental for each full lease year, if any, subsequent to the first of an allowable application to purchase.

6. Paragraph (a) of § 257.14 is revised to read as follows:

§ 257.14 Public auctions.

(a) Whenever lands are classified for direct sale by public auction, they will be sold at not less than their appraised fair market value at the time and place and in the manner specified by the classification order.

HANDLING OF CENTRAL CALIFORNIA GRAPES FOR CRUSHING

Proposed Expenses of Grape Crush Administrative Committee and Proposed Rate of Assessment

Notice is hereby given that there is under consideration a proposal regarding (a) the expenses which are reasonable and are likely to be incurred by the Grape Crush Administrative Committee during the period beginning on August 26, 1961, and ending on June 30, 1962, and (b) the rate of assessment to be fixed by the Secretary for such period. These actions are pursuant to Marketing Agreement No. 133 and Order No. 990 (originally issued as Order No. 126, 26 F.R. 7797), regulating the handling of Central California grapes for crushing, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The committee has recommended such expenses in the amount of $189,178 and an assessment rate with respect to free tonnage grapes for crushing received by each handler, including such grapes of his own production, of 19.5 cents per ton of fresh grapes and the equivalent amount of 34.5 cents per ton of raisin residual material. The estimated assessable tonnage includes 953,863 tons of fresh grapes (including those varieties exempted from volume regulation by § 990.202) and 9,203 tons of raisin residual material.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D.C., not later than the seventh day after the date of publication of this notice in the FEDERAL REGISTER.

The proposal is as follows:

§ 990.301 Expenses of the Grape Crush Administrative Committee and rate of assessment.

(a) *Expenses.* Expenses[1] in the amount of $189,178 are reasonable and are likely to be incurred, pursuant to § 990.71, by the Grape Crush Administrative Committee during the period beginning on August 26, 1961, and ending on June 30, 1962, of the initial crop year, for the maintenance and functioning of the committee and the Grape Crush Advisory Board, and for such other purposes as the Secretary may, pursuant to the provisions of this part, determine to be appropriate.

(b) *Rate of assessment.* The rate of assessment for the period beginning on August 26, 1961, and ending on June 30, 1962, of the initial crop year, which each handler shall, pursuant to § 990.72, pay with respect to all free tonnage (including tonnage exempted from volume regulation by § 990.202) grapes for crushing, including such grapes of his own production, received by him during such period is fixed at 19.5 cents per ton of fresh grapes and the equivalent amount of 34.5 cents per ton of raisin residual material.

Dated: February 6, 1962.

RULES OF PRACTICE IN TRADEMARK CASES

Notice of Proposed Rule Making

Notice is hereby given that the United States Patent Office proposes to amend certain rules and regulations relating to trademarks. The amendments are proposed to be issued pursuant to the authority contained in Title 15, U.S. Code, section 1123, Title 35, U.S. Code, section 6, and other authority.

All persons who desire to submit written data, views, arguments or suggestions, for consideration in connection with the proposed amendments, are invited to forward the same to the Commissioner of Patents, Washington 25, D.C., on or before April 23, 1962, on which day a hearing will be held at 10:00 a.m. in Room 3886-B of the Department of Commerce Building. All persons wishing to be heard orally are requested to notify the Commissioner of Patents of their intended appearance.

The text of the proposed amendments follows:

1. Section 2.39 is proposed to be amended to read as follows:

§ 2.39 Omission of allegation of use by foreign applicants.

(a) The allegation that the mark is in use in commerce, required by § 2.33, and the statements of the dates of applicant's first use, required by § 2.33(a) (1) (vii) and (viii), may be omitted in the case of an application, filed pursuant to section 44(e) of the act for registration of a mark duly registered in the country of origin of a foreign applicant, provided the application when filed is accompanied by a certificate of the trademark office of the foreign country showing that the mark has been registered in the country of origin of the applicant and also showing the mark, the goods for which registered and that said registration is then in full force and effect. If the certificate is not in the English language, a translation is required.

2. Section 2.96 is proposed to be amended to read as follows:

§ 2.96 Issues; burden of proof.

The issue in an interference between applications shall be the respective rights of the parties to registration as established in the proceeding. The issue in an interference between an application and a registration shall be the same, but in the event the decision is adverse to the registrant, a registration to the applicant will not be authorized so long as the interfering registration remains on the register. The party whose application or registration involved in the interference has the latest filing date (the junior party) will be regarded as having the burden of the proof.

3. Section 2.97 is proposed to be amended to read as follows:

§ 2.97 Enlargement of issues.

Any party to an interference may, within fifty days after the notice of interference is mailed, file a pleading setting forth affirmatively any matter on the basis of which, if proved, the other party would not be entitled to obtain or maintain a registration. Such pleading may request affirmative relief by way of cancellation of a registration involved, but no defense attacking the validity of such registration may be otherwise

raised in the proceeding. Such request for affirmative relief must be verified and must be accompanied by the fee required by section 14 of the act. A reply to such request for affirmative relief is required within twenty days after service thereof, but no reply need be filed to other affirmative defenses.

§ 2.106 [Amendment]

4. Paragraph (b) of § 2.106 is proposed to be amended to read as follows:

(b) An answer may contain any affirmative defense, including a request for affirmative relief by way of cancellation of a registration pleaded in the notice of opposition, but no defense attacking the validity of such registration may be otherwise raised in the proceeding. Such request for affirmative relief must be verified and must be accompanied by the fee required by section 14 of the act. A reply to such a request for affirmative relief is required within twenty days after service thereof, but no reply need be filed to other affirmative defenses.

§ 2.113 [Amendment]

5. Paragraph (b) of § 2.113 is proposed to be amended to read as follows:

(b) When the petition is correct as to form, a notice shall be prepared identifying the title and number of the proceeding and the registration involved, and designating a time, not less than thirty days from the mailing date of such notice, within which answer must be filed. A copy of this notice shall be forwarded to the petitioner in care of his attorney or agent, if he has an attorney or agent of record. The duplicate copy of the petition and exhibits shall be forwarded with a copy of such notice to the registrant.

§ 2.114 [Amendment]

6. Paragraph (b) of § 2.114 is proposed to be amended to read as follows:

(b) An answer may contain any affirmative defense, including a request for affirmative relief by way of cancellation of a registration pleaded in the petition, but no defense attacking the validity of such registration may be otherwise raised in the proceeding. Such request for affirmative relief must be verified and must be accompanied by the fee required by section 14 of the act. A reply to such a request for affirmative relief is required within twenty days after service thereof, but no reply need be filed to other affirmative defenses.

§ 2.120 [Amendment]

7. Subparagraph (1) of § 2.120(a) is proposed to be amended to read as follows:

(1) Any party to an opposition, interference, cancellation or concurrent use proceeding may, at any time not later than thirty days prior to the date upon which any testimony may first be taken as set by initial or subsequent Office action, take the deposition of any person, including a party, for the purpose of discovery. Such depositions may be taken upon oral examination in the manner prescribed by §§ 1.273, 1.274, and 1.275 of this chapter, or upon written questions in the manner prescribed by § 2.124. The responsibility for securing attendance of proposed deponents not parties to the proceeding rests with the moving party, and if he is unable to arrange for their voluntary attendance, they may only be compelled to submit to questioning by the order of a court under 35 U.S.C. 24.

8. Paragraph (b) of § 2.120 is proposed to be amended to read as follows:

(b) *Request for admission.* (1) Any party to an opposition, interference, cancellation or concurrent use proceeding may, within the time specified for taking depositions for discovery, serve upon any adverse party a written request for admission by the latter of the genuineness of any relevant document described in and attached to the request (a photocopy may be attached provided the original thereof is made available for inspection), or of the truth of any facts which are material and relevant to the issues and which are believed to be within the knowledge of both the party serving and the party served. Each matter in respect of which an admission is requested shall be considered as admitted unless, within fifteen days after service thereof, the party to whom the request is directed serves upon the party requesting the admission a sworn statement denying specifically the matter in respect of which admission is requested, or setting forth in detail the reasons why he cannot truthfully either admit or deny the same, or files objections thereto. Any reply to such objections shall be due within ten days after service thereof.

(2) No admission shall be considered as part of the record in the case unless a party files, before the close of his testimony period, a notice of reliance thereon and a copy of the admission and request therefor.

9. Paragraph (c) of § 2.120 is proposed to be amended to read as follows:

(c). *Motion to produce documents, etc., for inspection and copying.* Upon motion showing good cause therefor, filed prior to the date upon which any testimony may first be taken as set by initial or subsequent Office action, an order may be entered requiring a party to produce and permit the inspection and copying or photographing, by or on behalf of the moving party, of any designated books, documents or other tangible things, not privileged, the existence of which has been pleaded or otherwise asserted, and which constitute or contain material within the scope of inquiries permitted in depositions for discovery and which are in his possession, custody or control. The order shall specify a time for compliance therewith, and may prescribe such terms and conditions as may be just.

10. Paragraph (d) of § 2.120 is proposed to be amended to read as follows:

(d) *Refusal to make discovery.* (1) If any party fails or refuses to comply with an order to produce and permit the inspection and copying or photographing of designated things, the Trademark Trial and Appeal Board may strike out all or any part of any pleading of that party, or dismiss the action or proceeding or any part thereof, or enter a judgment as by default against that party, or take such other action as may be deemed appropriate.

§ 2.127 [Amendment]

11. Paragraph (b) of § 2.127 is proposed to be amended to read as follows:

(b) Any petition for reconsideration or modification of a decision, if it is not appealable, must be filed within ten days after the decision or, if the decision is appealable, within the time specified in § 2.129(c).

§ 2.128 [Amendment]

12. Paragraph (c) of § 2.128 is proposed to be amended to read as follows:

(c) If a party desires an oral hearing, he should so state by a separate notice filed not later than his brief, and the time for such hearing will be set in a notice sent to each party by the Office. If no request for oral hearing is made, the case will be decided on the record and briefs.

§ 2.129 [Amendment]

13. Section 2.129 is proposed to be amended by cancelling the last sentence of paragraph (a) and by adding new paragraph (c) reading as follows:

(c) Any petition for rehearing, reconsideration, or modification of a decision must be filed within thirty days from the date thereof.

14. Section 2.133 is proposed to be amended to read as follows:

§ 2.133 Amendment of application or registration during proceedings.

An application involved in a proceeding may not be amended in substance nor may a registration be amended or disclaimed in part, except with the consent of the other party or parties and the approval of the Trademark Trial and Appeal Board, or except upon motion duly filed and considered.

15. Section 2.134 is proposed to be amended to read as follows:

§ 2.134 Surrender or cancellation of registration.

If a registrant involved in a proceeding applies to cancel his registration under section 7(d) of the act without first obtaining the written consent thereto of the adverse party, judgment shall be entered against him.

16. Section 2.135 is proposed to be amended to read as follows:

§ 2.135 Abandonment of application or mark.

If, in a proceeding an applicant files a written abandonment of the application or of the mark without the consent thereto of the adverse party, judgment shall be entered against such applicant.

§ 2.142 [Amendment]

17. Paragraph (a) of § 2.142 is proposed to be amended to read as follows:

(a) Such appeal must be taken within six months from the date of final refusal or from the date of the action from which appeal is taken. Appeal is taken simply by filing a notice of appeal and payment of the appeal fee.

18. Paragraph (c) of § 2.142 is proposed to be amended to read as follows:

(c) If the appellant desires an oral hearing, he should so state by a separate notice filed not later than his brief; and due notice of the time for such hearing will be given. Oral argument on the hearing will be limited to one-half hour unless otherwise permitted. If no request for oral hearing is made, the appeal will be considered on brief.

DAVID L. LADD,
Commissioner of Patents.

FEDERAL AVIATION AGENCY

[14 CFR Part 42]

[Reg. Docket No. 1062; Draft Release No. 62-5]

PROVING PERIOD FOR LARGE AIRCRAFT

Notice of Proposed Rule Making

Pursuant to the authority delegated to me by the Administrator (14 CFR 405.-27), notice is hereby given that there is under consideration a proposal to amend Part 42 of the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Docket Section of the Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. All communications received on or before April 12, 1962, will be considered by the Administrator before taking action on the proposed rules. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Docket Section for examination by interested persons when the prescribed date for return of comments has expired.

For a number of years, the aircraft placed into service by air carriers operating under the provisions of Part 40, 41, or 46 of the Civil Air Regulations have had to undergo a specific proving period in accordance with the provisions of those parts prior to being used in air carrier operations. This proving period has been conducted under the surveillance of the Federal Aviation Agency, or its predecessor agencies.

The purpose of a proving period is twofold: It provides the Administrator with established criteria to assist him in determining that an air carrier can safely operate a new or different type of aircraft; and it affords the air carrier an opportunity to acquire, first hand, the experience necessary to operate new equipment safely and efficiently. Proving periods are also of great value since they help to familiarize air carrier personnel with the various peculiarities of a new or different type aircraft with regard to operations, maintenance, servicing, and handling. The extent of this proving period varies with the newness of the type aircraft being placed into service by the air carrier. For example, the regulations require that an aircraft recently type certificated and not previously proved in air carrier operations have a more extensive proving period than one which has been proved by another air carrier or one which has previously been proved and is subsequently altered in design.

The aircraft placed into service by air carrier and commercial operators conducting operations under the provisions of Part 42 have not been required to undergo any specific proving period. Under this part, it has only been required that the Administrator find the aircraft to be safe for the service offered without having to establish specific proving period requirements. This determination posed no problem in the past since the aircraft placed in service by these operators had either undergone a previous proving period when operated by a scheduled air carrier or had been proved by virtue of many years of safe and successful operation by the military services. Recently, however, newly certificated aircraft not previously proved, and previously proved aircraft which were subsequently altered in design, have been placed into service by certain air carriers operating under the provisions of Part 42. Prior to utilizing these aircraft in air carrier operations, the operators concerned have conducted fairly extensive training and familiarization programs. While these programs may, to some extent, accomplish the objective of the proving period, they may not fully comply with, or be as comprehensive as, the specific proving period requirements set forth in either Part 40, 41, or 46.

In view of the foregoing, the Federal Aviation Agency considers it appropriate to propose an amendment to Part 42 of the Civil Air Regulations to add thereto provisions similar to those in Parts 40, 41, and 46 which require all aircraft to undergo a specific proving period prior to their being used in air carrier operations. Such an amendment, if adopted, would be applicable to all large aircraft used for the first time after the effective

date of the amendment by an air carrier or commercial operator operating under the provisions of Part 42.

Accordingly, notice is hereby given that it is proposed to amend Part 42 of the Civil Air Regulations (14 CFR Part 42, as amended) by adding a new § 42.17 to read as follows:

§ 42.17 Proving tests for large aircraft.

(a) A type of aircraft not previously proved for use in air carrier operation shall have at least 100 hours of proving tests, in addition to the aircraft certification tests, accomplished under the supervision of an authorized representative of the Administrator. As part of the 100-hour total at least 50 hours shall be flown in en route operation and at least 10 hours shall be flown at night.

(b) A type of aircraft which has been previously proved for use in air carrier operation shall be tested for at least 50 hours, of which at least 25 hours shall be flown in en route operation, unless deviations are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements of this paragraph unnecessary for safety, when the aircraft:

(1) Is materially altered in design, or

(2) Is to be used by an air carrier who has not previously proved such a type.

NOTE: A type of aircraft will be considered to be materially altered in design when the alterations include, but are not necessarily limited to: (a) Installation of powerplants other than the powerplants of a type similar to those with which the aircraft is certificated; (b) major alteration to the aircraft or its components which materially affects the flight characteristics.

(c) During proving tests only those persons required to make the test and those designated by the Administrator shall be carried. Mail, express, and other cargo may be carried when approved.

This amendment is proposed under the authority of sections 313(a), 601, 605, of the Federal Aviation Act of 1958 (72 Stat. 752, 775, 778; 49 U.S.C. 1354, 1421, 1425).

Issued in Washington, D.C., on February 5, 1962.

G. S. MOORE,
Acting Director,
Flight Standards Service.

FEDERAL AIRWAYS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 600.6004 of the regulations of the Administrator, the substance of which is stated below.

Low altitude VOR Federal airway No. 4 is designated in part from Malad City, Idaho, to Rock Springs, Wyo. The Federal Aviation Agency has under consideration the designation of a south alternate to this segment of Victor 4 from the Malad City VORTAC to the Rock Springs VORTAC via the Fort Bridger, Wyo., VOR. The minimum en route altitude along the segment of Victor 4 between the Malad City VOR and the Green River Intersection (intersection of the Fort Bridger VOR 032° and the Rock Springs VORTAC 252° True radials) is 13,800 feet MSL. This provides only one usable altitude in the low altitude structure. The minimum en route altitude along the proposed south alternate airway would be 12,000 feet MSL. Accordingly, the south alternate airway would provide additional altitudes for flight between Malad City and Rock Springs.

The control areas associated with this proposed airway segment would extend from 700 feet above the surface to the base of the continental control area. Separate actions would be initiated to implement on an area basis Amendment 60-21 to Part 60 of the Civil Air Regulations.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 2, 1962.

FEDERAL AIRWAYS

Proposed Alteration

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering an amendment to § 600.1748 of the regulations of the Administrator, the substance of which is stated below.

The western terminus of intermediate altitude VOR Federal airway No. 136 is the Las Vegas, Nev., VOR. The Federal Aviation Agency is considering extending Victor 1748 from the Las Vegas VOR to the intersection of the Las Vegas VOR 266° and the Beatty, Nev., VOR 147° True radials.

This extension of Victor 1748 will provide a more direct intermediate altitude airway for traffic operating from and over Las Vegas to terminals to the northwest.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, P.O. Box 90007, Airport Station, Los Angeles 45, Calif. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

FEDERAL AIRWAYS AND CONTROLLED AIRSPACE

Proposed Alteration of Federal Airways

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency is considering amendments to §§ 600.6045, 600.6010, and 601.6045 of the regulations of the Administrator the substance of which is stated below.

Low altitude VOR Federal airway No. 45 extends in part from the intersection of the Litchfield, Mich., VORTAC 096° and the Jackson, Mich., VOR 131° True radials to the Jackson VOR. Low altitude VOR Federal airway No. 10 extends in part from the Litchfield VORTAC via the intersection of the Litchfield VORTAC 096° and the Carleton, Mich., VORTAC 247° True radials to the Carleton VORTAC. The Federal Aviation Agency has under consideration the following proposed airspace actions:

1. Revoke the above-mentioned segment of Victor 45, and designate this airway and its associated control areas from the Jackson VOR via the intersection of the Jackson VORTAC 137° and the Waterville VORTAC 329° True radials to the Waterville, Ohio, VORTAC. This would facilitate the use of the Detroit, Mich., terminal area air traffic control procedures and provide a route between Toledo, Ohio, and Jackson, Mich. The control areas associated with this proposed airway segment would extend from 700 feet above the surface to the base of the continental control area. Separate action would be initiated to implement on an area basis Amendment 60-21 to Part 60 of the Civil Air Regulations. The Jackson, Mich., control area extension (§ 601.1187) is defined in part as bounded on the west by VOR Federal airway No. 45. No change is proposed in this description since the alteration of Victor 45 as proposed herein would not materially increase the size of the presently designated Jackson control area extension.

2. Redesignate Victor 10 from the Litchfield VORTAC to the Carleton VORTAC via the intersection of the Litchfield VORTAC 107° and the Carleton VORTAC 247° True radials. This would facilitate the use of the Detroit, Mich., terminal area air traffic control procedures and provide an alternate route from the Litchfield VOR to the Waterville VOR via Victor 10 and Victor 45. The control areas associated with this airway segment are so designated that they would automatically conform to the altered airway. The vertical extent of these control areas would remain designated pending review of the adjacent airspace. Separate actions will be initiated to implement on an area basis Amendment 60-21 to Part 60 of the Civil Air Regulations.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City 10, Mo. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C-226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348).

Issued in Washington, D.C., on February 2, 1962.

[Airspace Docket No. 61-KC-49]

FEDERAL AIRWAYS AND CONTROLLED AIRSPACE

Proposed Designation of Transition Areas, Proposed Revocation of Control Area Extensions; Proposed Alteration of Control Zones, Federal Airways, and Associated Control Areas

Pursuant to the authority delegated to me by the Administrator (14 CFR 409.13), notice is hereby given that the Federal Aviation Agency (FAA) is considering amendments to Parts 600 and 601 of the regulations of the Administrator, the substance of which is stated below.

The following controlled airspace is presently designated in the St. Louis, Mo., terminal area:

1. The St. Louis control area extension (§ 601.1119) is designated within a 25-mile radius of Lambert Field, St. Louis, excluding the portion that coincides with the Belleville, Ill., control area extension (§ 601.1021).

2. The Belleville control area extension is designated within a 40-mile radius of Scott Air Force Base.

3. The St. Louis control zone (§ 601.2070) is designated within a 5-mile radius of Lambert-St. Louis Municipal Airport, within 2 miles either side of the east course of the St. Louis radio range extending from the radio range to 10 miles east, within 2 miles either side of the front course of the St. Louis ILS localizer extending from the localizer to 5 miles east of the outer compass locator, within 2 miles either side of the back course of the ILS localizer extending from the locator to 10 miles southwest of the Lake nondirectional radio beacon, and within 2 miles either side of the 323° and 143° True radials of the St. Louis VORTAC extending from the airport to 10 miles northwest of the VORTAC.

4. The Belleville control zone § 601.2095) is designated within a 5-mile radius of Scott Air Force Base, Belleville, and within 2 miles either side of the 317° True bearing from the Belleville radio beacon extending from the 5-mile radius zone to the radio beacon.

In addition, effective January 11, 1962 (Airspace Docket No. 61-KC-42, 26 F.R. 12501), the Hardin, Ill., transition area was designated as that airspace extending upward from 2,500 feet mean sea level, bounded on the east by longitude 90°32'00" W., on the south and southwest by VOR Federal airway No. 210 north alternate and on the north and northwest by the arc of a 33-mile radius circle centered on Lambert Field.

The control areas associated with the airways which traverse these airspace designations are presently designated to extend upward from 700 feet above the surface to the base of the continental control area.

To implement the provisions of Amendment 60-21 to the Civil Air Regulations, Part 60, Air Traffic Rules (26 F.R. 570), in the St. Louis terminal area, the Federal Aviation Agency has under consideration the following airspace actions:

1. Revoke the St. Louis control area extension and the Hardin transition area and designate in lieu thereof the St. Louis transition area to extend upward from 1,200 feet above the surface within a 25-mile radius of Lambert-St. Louis Municipal Airport (latitude 38°44'50" N., longitude 90°21'52" W.), and within the area extending from the 25-mile radius area to 33 miles northwest of the St. Louis VORTAC bounded on the east by VOR Federal airway No. 9 west alternate and on the west by VOR Federal airway No. 4 north alternate.

2. Revoke the Belleville control area extension and designate in lieu thereof the Belleville transition area to extend upward from 1,200 feet above the surface within a 40-mile radius of Scott Air Force Base (latitude 38°32'32" N., longitude 89°51'30" W.), bounded on the west by VOR Federal airway No. 9, and on the northwest by the proposed St. Louis transition area and VOR Federal airway No. 191.

3. The airways and their associated control areas that traverse these proposed transition areas would be redesignated to extend upward from a floor coincident with that of the transition areas.

4. Alter the St. Louis control zone by redesignating it within an 8-mile radius of Lambert-St. Louis Municipal Airport (latitude 38°44'50" N., longitude 90°21'52" W.), within 2 miles either side of the ILS localizer front course extending from the 8-mile radius zone to 8 miles northeast of the outer marker, and within 2 miles south and 3 miles north of the ILS localizer back course extending from the 8-mile radius zone to 12 miles southwest of the Lake radio beacon. The 8-mile radius is being proposed

Issued in Washington, D.C., on February 2, 1962.

CLIFFORD P. BURTON,
Acting Chief,
Airspace Utilization Division.

[F.R. Doc. 62-1321; Filed, Feb. 8, 1962; 8:45 a.m.]

in lieu of a smaller radius with extensions because the standard departure routings in use at this location would require an excessive number of extensions. The extensions northeast of the outer marker and southwest of the Lake radio beacon are necessary to contain the flight paths of arriving aircraft executing existing prescribed instrument approach procedures. The 3-mile width proposed for the extension to the north of the ILS localizer backcourse is necessary to contain the flight path of arriving aircraft making straight-in approaches from the Maryland Heights VORTAC, and also to include the Creve Coeur and Lobmaster Airports and their surrounding traffic patterns.

5. The Belleville, Ill., control zone would be altered to include the airspace within an 8-mile radius of Scott Air Force Base, Belleville, Ill. (latitude 38°-32'32" N., longitude 89°51'30" W.). This increase in size of the Belleville control zone would provide controlled airspace for aircraft arriving and departing Scott Air Force Base when descending from or climbing to a point within the proposed Belleville transition area.

Required revisions of instrument approach and departure procedures and minimum instrument flight rules altitudes attendant to the implementation of Amendment 60–21 would be effective concurrently with the controlled airspace designations proposed herein. Specific details of the changes in procedures that would be required may be examined by contacting the Chief, Airspace Utilization Branch, Air Traffic Division, Central Region Federal Aviation Agency, 4825 Troost Avenue, Kansas City 10, Mo.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Assistant Administrator, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City 10, Mo. All communications received within sixty days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief, or the Chief, Airspace Utilization Division, Federal Aviation Agency, Washington 25, D.C. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Docket Section, Federal Aviation Agency, Room C–226, 1711 New York Avenue NW., Washington 25, D.C. An informal Docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

DEPARTMENT OF THE TREASURY

Coast Guard

[CGFR 61–64]

EQUIPMENT, INSTALLATIONS, OR MATERIALS

Approval Notice

1. Various items of lifesaving, firefighting, and miscellaneous equipment, installations, and materials used on merchant vessels subject to Coast Guard inspection or on certain motorboats and other pleasure craft are required by law and various regulations in 46 CFR Chapter I to be of types approved by the Commandant, United States Coast Guard. The procedures governing the granting of approvals, and cancellation, termination or withdrawal of approvals are set forth in 46 CFR 2.75–1 to 2.75–50, inclusive. For certain types of equipment, installations, and materials, specific specifications have been prescribed by the Commandant and are published in 46 CFR Parts 160 to 164, inclusive (Subchapter Q—Specifications), and detailed procedures for obtaining approvals are also described therein.

2. The Commandant's approval of a specific item is intended to provide a control over its quality. Therefore, such approval applies only to the item constructed or installed in accordance with the applicable requirements and the details described in the specific approval. If a specific item when manufactured does not comply with the details in the approval, then such item is not considered to have the Commandant's approval, and the certificate of approval issued to the manufacturer does not apply to such modified item. For example, if an item is manufactured with changes in design or material not previously approved, the approval does not apply to such modified item.

3. After a manufacturer has submitted satisfactory evidence that a particular item complies with the applicable laws and regulations, a Certificate of Approval (Form CGHQ–10030) will be issued to the manufacturer certifying that the item specified complies with the applicable laws and regulations and approval is given, which will be in effect for a period of 5 years from the date given unless sooner canceled or suspended by proper authority.

4. The purpose of this document is to notify all concerned that certain approvals were granted during the period from November 15, 1961, to December 7, 1961. These actions were taken in accordance with procedures set forth in 46 CFR 2.75–1 to 2.75–50, inclusive.

5. The delegations of authority for the Coast Guard's actions with respect to approvals may be found in Treasury Department Orders 120, dated July 31, 1960 (15 F.R. 6521), 167–14, dated November 26, 1954 (19 F.R. 8026), 167–15, dated January 3, 1955 (20 F.R. 840), 167–20, dated June 18, 1956 (21 F.R. 4894), CGFR 56–28, dated July 24, 1956 (21 F.R. 5659), or 167–38, dated October 26, 1959 (24 F.R. 8857), and the statutory authority may be found in R.S. 4405, as amended, 4462, as amended, 4488, as amended, 4491, as amended, secs. 1, 2, 49 Stat. 1544, as amended, sec. 17, 54 Stat. 166, as amended, sec. 3, 54 Stat. 346, as amended, sec. 3, 70 Stat. 152 (46 U.S.C. 375, 416, 481, 489, 367, 526p, 1333, 390b), sec. 4(e), 67 Stat. 462 (43 U.S.C. 1333 (e)), or sec. 3(c), 68 Stat. 675 (50 U.S.C. 198), and implementing regulations in 46 CFR Chapter I or 33 CFR Chapter I.

6. In Part I of this document are listed the approvals granted which shall be in effect for a period of 5 years from the dates granted, unless sooner canceled or suspended by proper authority.

Office of the Secretary

[Dept. Circular, Public Debt Series No. 2–62]

3½ PERCENT TREASURY CERTIFICATES OF INDEBTEDNESS OF SERIES A–1963

Offering of Certificates

FEBRUARY 5, 1962.

I. *Offering of certificates.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for certificates of indebtedness of the United States, designated 3½ percent Treasury Certificates of Indebtedness of Series A–1963, in exchange for any of the following notes:

3⅝ percent Treasury Notes of Series A–1962, maturing February 15, 1962.
4 percent Treasury Notes of Series D–1963, maturing February 15, 1962.
3¼ percent Treasury Notes of Series F–1962, maturing February 15, 1962.
1½ percent Treasury Notes of Series EA–1962, maturing April 1, 1962.

Interest will be adjusted in the case of the 1½ percent Treasury Notes of Series EA–1962 as set forth in Section IV hereof. The amount of the offering under this circular will be limited to the amount of eligible notes tendered in exchange and accepted. The books will be open only on February 5 through February 7, 1962, for the receipt of subscriptions for this issue.

2. In addition to the offering under this circular, holders of the eligible notes are offered the privilege of exchanging all or any part of such notes for 4 percent Treasury Notes of Series A–1966, which offering is set forth in Department Circular, Public Debt Series—No. 3–62, issued simultaneously with this circular.

II. *Description of certificates.* 1. The certificates will be dated February 15, 1962, and will bear interest from that date at the rate of 3½ percent per annum, payable semiannually on August 15, 1962, and February 15, 1963. They will mature February 15, 1963, and will not be subject to call for redemption prior to maturity.

2. The income derived from the certificates is subject to all taxes imposed under the Internal Revenue Code of 1954. The certificates are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The certificates will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer certificates with interest coupons attached will be issued in denominations of $1,000, $5,000, $10,000, $100,000, $1,000,000, $100,000,000, and $500,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of certificates applied for; and

any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of certificates allotted hereunder must be made on or before February 15, 1962, or on later allotment, and may be made only in notes of the four series enumerated in Section I hereof, which will be accepted at par, and should accompany the subscription. Coupons dated February 15, 1962, should be detached and cashed when due by holders of the maturing notes of Series A–1962, Series D–1962, and Series F–1962 in coupon form. In the case of registered notes of Series F–1962, the final interest due on February 15, 1962, will be paid by check drawn in accordance with the assignments on the notes surrendered, or by credit in any account maintained by a banking institution with the Federal Reserve Bank of its District. Coupons dated April 1, 1962, must be attached to the 1½ percent Treasury Notes of Series EA–1962 when surrendered and accrued interest from October 1, 1961, to March 1, 1962 ($6.22253 per $1,000), will be credited, accrued interest from February 15, 1962, to March 1, 1962 ($1.35359 per $1,000), on the certificates to be issued will be charged, and the difference ($4.86894 per $1,000) will be paid to subscribers following acceptance of the notes.

V. *Assignment of registered notes.* 1. Treasury Notes of Series F–1962 in registered form tendered in payment for certificates offered hereunder should be assigned by the registered payee or assignees thereof to "The Secretary of the Treasury for exchange for 3½ percent Treasury Certificates of Indebtedness of Series A–1963 to be delivered to ------", in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, and thereafter should be surrendered with the subscription to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Washington 25, D.C. The notes must be delivered at the expense and risk of the holder.

VI. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

4 PERCENT TREASURY NOTES OF SERIES A–1966

Offering of Notes

FEBRUARY 5, 1962.

I. *Offering of notes.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for notes of the United States, designated 4 percent Treasury Notes of Series A–1966, in exchange for any of the following notes:

3⅛ percent Treasury Notes of Series A–1962, maturing February 15, 1962.
4 percent Treasury Notes of Series D–1962, maturing February 15, 1962.
3¼ percent Treasury Notes of Series F–1962, maturing February 15, 1962.
1½ percent Treasury Notes of Series EA–1962, maturing April 1, 1962.

Interest will be adjusted in the case of the 1½ percent Treasury Notes of Series EA–1962 as set forth in Section IV hereof. The amount of the offering under this circular will be limited to the amount of eligible notes tendered in exchange and accepted. The books will be open only on February 5 through February 7, 1962, for the receipt of subscriptions for this issue.

2. In addition to the offering under this circular, holders of the eligible notes are offered the privilege of exchanging all or any part of such notes for 3½ percent Treasury Certificates of Indebtedness of Series A–1963, which offering is set forth in Department Circular, Public Debt Series No. 2–62, issued simultaneously with this circular.

II. *Description of notes.* 1. The notes will be dated February 15, 1962, and will bear interest from that date at the rate of 4 percent per annum, payable semiannually on August 15, 1962, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable. They will mature August 15, 1966, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached, and notes registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, $1,000,000, $100,000,000, and $500,000,000. Provision will be made for the interchange of notes of different denominations and of coupon and registered notes, and for the transfer of registered notes, under rules and regulations prescribed by the Secretary of the Treasury.

5. The notes will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States notes.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington 25, D.C. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department may be authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of notes applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment for the face amount of notes allotted hereunder must be made on or before February 15, 1962, or on later allotment, and may be made only in notes of the four series enumerated in Section I hereof, which will be accepted at par, and should accompany the subscription. Coupons dated February 15, 1962, should be detached and cashed when due by holders of the maturing notes of Series A–1962, Series D–1962, and Series F–1962 in coupon form. In the case of registered notes of Series F–1962, the final interest due on February 15, 1962, will be paid by check drawn in accordance with the assignments on the notes surrendered, or by credit in any account maintained by a banking institution with the Federal Reserve Bank of its District. Coupons dated April 1, 1962, must be attached to the 1½ percent Treasury Notes of Series EA–1962 when surrendered and accrued interest from October 1, 1961, to March 1, 1962 ($6.22253 per $1,000), will be credited, accrued interest from February 15, 1962, to March 1, 1962 ($1.54696 per $1,000), on the new notes to be issued will be charged, and the difference ($4.67557 per $1,000) will be paid to subscribers following acceptance of the notes of Series EA–1962.

V. *Assignment of registered notes.* 1. Treasury Notes of Series F–1962 in registered form tendered in payment for notes offered hereunder should be assigned by the registered payees or assignees thereof, in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, in one of the forms hereafter set forth, and thereafter should be surrendered with the subscription to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Washington 25, D.C. The notes must be delivered at the expense and risk of the holder. If the new notes are desired registered in the same name as the notes surrendered, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Notes of Series A–1966"; if the new notes are desired registered in another name, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Notes of Series A–1966 in the name of ------"; if new notes in coupon form are desired, the assignment should be to "The Secretary of the Treasury for exchange for 4 percent Treasury Notes of Series A–1966 in coupon form to be delivered to ------".

VI. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis an up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for notes allotted, to make delivery of notes on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] DOUGLAS DILLON,
Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CALIFORNIA

Notice of Proposed Withdrawal and Reservation of Lands

The Forest Service, United States Department of Agriculture, has filed an application, Serial No. Los Angeles 034944, for the withdrawal of certain lands from location and entry, under the General Mining Laws, subject, however, to existing withdrawals and to valid existing rights.

These lands have previously been withdrawn for the Sequoia National Forest Reserve by Presidential Proclamation dated November 5, 1891, and as such have been open to entry under the mining laws. The applicant desired the exclusion of mining activity from all National Forest land between the Kern River Channel and 200 feet east of the center line of the Kernville-Johnsondale Highway, as such lands are needed by the Forest Service as Roadside Zones.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 1414 8th Street, Box 723, Riverside, California.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party.

The lands involved in the application are all National Forest land between the Kern River Channel and 200 feet east of the center line of the Kernville-Johnsondale Highway through the following legal subdivisions:
